Dillon’s RF 100 
Automatic Primer Filler

Eliminates the need for primer pick-up tubes!
Fills the primer tube while you reload!
Clear polycarbonate shield and protective housing

Dillon’s RF 100 Automatic Primer Filler eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run!

In about two minutes the primers are inside the protective metal housing. That’s about 30 rounds you can load while the RF 100 is doing your work for you!

The RF 100 is available for either large or small primers, and conversion kits are available at one low price of $47.95 each.

Thank you so much for the wonderful customer service you provide. You recently rebuilt my Square Deal “B” machine under warranty. The machine is 21 years old and has served me well. I look forward to another 21 years of service out of it.

Again, thank you for being a company that stands behind its products fully, and without hesitation.

Sincerely,

R. Wilson – Scottsdale, Arizona

---

I just wanted to write to say THANK YOU! I called your customer service department to inquire about getting some replacement parts for my RL 550B. The gentleman I spoke with was courteous, intelligent, and very knowledgeable. Even with my explanations of what I needed being like, “You know that doohickey that goes on the thingamabob...” he easily understood just what I needed.

I was also quite pleasantly surprised when I didn’t have to pay shipping costs, let alone for the parts. I was greatly impressed to get that kind of support from a company these days. Most of the time it seems like they put people with I.Q.s equivalent to buffalo chips on the phone in the hope that you will get so frustrated that you hang up and don’t call again.

I would also like to say, I LOVE MY RL 550B! I load 9mm Luger, .38 Special, .357 Magnum, .45 ACP, .223 Remington, .243 Winchester, 7.62 x 39 and .308 Winchester. Every one of them rolls through the press without the slightest hitch. It is, flat out, an amazing machine. I’ve had the opportunity to work on both Lee and Hornady progressives and they don’t even come within a parsec.

Again, my thanks, and please keep “doin’ it the way you do it!”

Sincerely,

Steven Alexander – Raton, New Mexico

Thanks for your kind words, Steven! I have to agree with you about the RL 550B – it’s my favorite machine, also. When you load several calibers like we do, it’s the quickest machine to convert from one caliber to the next.

Thank you for being a company that stands behind its products fully, and without hesitation.

Sincerely,

R. Wilson – Scottsdale, Arizona

All the electrical and/or electronic components of Dillon equipment and all Dillon textiles are covered by a one-year warranty from date of purchase. Any modifications performed to Dillon machines, or the addition of any unapproved equipment, including automated or mechanical add-ons from other manufacturers, is expressly not recommended and will void the Dillon warranty.
Like the popular Ruger® SR9® and SR40® pistols, the SR45™ is perfectly sized to be comfortable and controllable with a slim, ergonomic grip and narrow slide. A short reach from the backstrap to the trigger creates a comfort level that will challenge any standard-sized, striker-fired pistol available today. Its structurally rigid, recoil-reducing, glass-filled nylon frame and alloy or stainless steel slide combine to create a low-maintenance, rugged and reliable handgun.

**HP1 Electronic Hearing Protector**

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon’s HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

By Peter Caroline

If you were wondering, earlier this year, where all the ARs, MSRs and EBRs had gone, I’ll tell you…they were all in Las Vegas, at the SHOT Show…Armalite, Bushmaster, Colt, DPMS, et al, ad infinitum. And from what the folks at the booths were saying, they’re working three shifts per day, 24/7, just to fill current orders.

What’s new? North American Arms has a neat little mini-revolver, entitled the Sidewinder [Photo #1]. The cylinder, with star extractor, swings out to the side like most modern full-size revolvers. Only difference is, it swings out to the right. It’s available in .22 Magnum Rimfire, but can be ordered with an optional .22 LR cylinder and crane. (www.NorthAmericanArms.com)

Arsenal Firearms (www.arsenalfirearms.com) was displaying something totally different…a double barrel 1911A1! You might well ask why. Well, because nobody ever made one before. It is, admittedly, a handful. But it is a beautifully crafted handful, and you’ll probably be the only one at the range who has one. Arsenal was also showing its more conventional Strike One 9mm pistol [#2], with perhaps the lowest barrel center line over handgrip that I’ve seen since the old H&K P7.

Some years ago, I bought a Kahr P380 (www.kahr.com). It was a pricey little .380, retailing at about $650, but super-accurate. Now, Kahr has come out with their new CW380 [#3], at $419 MSRP. Same size, same caliber, and a hell of a deal!

Just to add yet another option to your choice of .380s, Kimber (www.kimberamerica.com) has introduced their Micro CDP, a mini 1911 design that weighs only 14 oz., has an ambidextrous safety and a 2.75″ barrel. It’s a superbly built little gun, and it should be, at an MSRP of $1,139.99.

On the larger and noisier side, Uberti (www.uberti.com) was displaying a bright nickel-plated replica of the classic S&W Russian Model [#4], with spurred trigger guard and hump-backed gripstrap. Caliber was .45 Colt, which is not authentic, but still fun.

At the Ohio Ordnance Works booth, I ran into one of my old loves. They are currently making an authentic Browning Automatic Rifle (BAR), .30-06, complete with bipod [#5], but semiauto only, so you can own one without all the paperwork (so far). MSRP $4,300. I’m seriously tempted. (www.ohioordinanceworks.com)

Everyone knows that the last thing we need is a whole new cartridge, right? Wrong! Armscor’s Rock Island Armory was showing off their new TCM Series 9mm/22 1911-style pistols. The cartridge looks like a slightly longer 9mm Parabellum necked down to .22 caliber. Bullet speed is a phenomenal 2,000 fps, with light recoil and an impressive muzzle flash. It comes with a standard 9mm barrel for practice. Must have! (www.RockIslandArmory.com)
Lipsey’s (www.lipseys.com) seems to have cornered the market on interesting Ruger variations. I got to play with their new Ruger Bearcat Shopkeeper [#6], a 3” barreled .22LR stainless single-action, with a birdshead grip. They made me give it back. Damn! They were also showing an exclusive and very lovely Ruger 77/22 bolt action rifle with a full-length Mannlicher-style stock. Here’s a thought: what if they made a Ruger 10/22 takedown model with a fancy wood Mannlicher stock, in a custom canvas-and-leather carrying case? Could be a winner, albeit pricey.

I’d heard that Chiappa (www.mksciappa.com) was coming out with a .40 S&W version [#7] of their innovative Rhino .357 revolver. I really liked the .357, so I stopped by the booth to check out the new model. Unfortunately, it wasn’t yet available, but I got to handle a limited edition 6” Rhino .357 with a flashy gold finish. Outrageous, but oddly appealing! Chiappa was also showing some interesting Winchester-style lever-action shotguns and rifles, at very reasonable prices.

Several years ago, Armalite (www.armalite.com) was making noises about producing a .45 ACP semiautomatic pistol in the same style as their AR-24 9mm. As I recall, it was at the same time as an earlier “assault rifle” ban scare, and they had all they could do to keep up with long-gun demand, so they shelved the project. Well, the .45 may be back. I saw a prototype [#8], and it looked good. They also were showing a couple of d.a. revolver prototypes [#9], made in Turkey, that looked interesting. Stay tuned.

Colt (www.coltmgf.com) was showing off their USMC 1911A1. It’s good to see that the old warhorse, in new camo garb, is back in the hands of our military. They also were displaying a limited edition brass Gatling Gun, in .45-70, of course. Pony up $50K, and you, too, can mow down the invading hordes of whomever.

One of the less-delightful aspects of the firearms experience is, you have to clean the damn things. Unless you have unusually compliant children, this can be a chore. Well, no more. Lyman (www.lymanproducts.com) was showing their Turbo®Sonic™ 6000 ultrasonic cleaner [#10]. Just dump your hogleg (sans grips) in this 6.2-quart tank with some Lyman cleaning solution, and in just a few minutes it emerges, absolutely immaculate. This boon to mankind retails at only $349.95, and also cleans up to 1,300 9mm cases at once.

By the time this article is printed, I suppose we will know if we still maintain our Second Amendment rights, or if the foes of firearms freedom will have gained some (hopefully short-term) ground. The people I met at the SHOT Show embody all that is good about this country. Let’s keep it that way!
Pick up your brass the easy way! This takes the hard work out of policing up your brass. No more aching back from bending over or kneeling at the range!

K25-21894 $44.95

The SHELLSORTER

...is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting.

The SHELLSORTER is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time.

The SHELLSORTER is made of ABS, a strong plastic which will give a lifetime of service.

K25-19972 $39.95

FrogLube is a bio-based cleaner, lubricant and preservative (CLP) product. FrogLube Solvents are designed to quickly attack surface fouling, baked-on or filmed residues and other metallic fouling such as lead and copper, while protecting firearms coatings, paints, wood and other materials from the corrosive effects of petroleum-based, flammable and toxic weapons care products. Frequent use will keep firearms running at optimal performance and not harm the FrogLube coating.

Dillon's RL 550B has long worn the title of “The World’s Most Versatile Progressive Reloader,” and stripping it down to its most basic form – Dillon’s BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles.

The BL 550 is essentially an RL 550B without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550B – it uses any manufacturer’s standard 7/8” x 14 reloading dies. It’s priced comparably with other manufacturers’ turret presses; yet unlike them, it’s fully upgradeable to Dillon’s Progressive RL 550B loader!

The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. For example, if you load .30-06 for elk, .243 for deer and .22-250 for coyotes, you don’t even have to change the shellplate. You simply pull two pins and swap the toolhead with your .30-06 dies to another toolhead with your .22-250 or .243 dies in less than 30 seconds! The additional toolheads are $22.95 each, or $20.95 each if you buy three or more – if you load for several rifles it’s a no-brainer! Once you get your dies adjusted, you’ll never have to re-set them.

A powder measure adapter (bottom right photo) is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it’s easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

Open 7-6 MST, M-F; 8-3 Sat. • VISA, MasterCard, Discover, C.O.D. • Shipping and HazMat Not Included
STANDARD FEATURES:
• Accommodates Over 160 Calibers
• Uses Standard 7/8” x 14 Dies
• Loading Rate: 500-600 Rds./Hr.
• Comes With One Caliber Conversion
• Interchangeable Toolhead Assembly
• Automatic Powder Measure
• Automatic Primer System

- 1 550 Brass Tip Set Screw
- 1 550 Ejector Wire
- 1 Cartridge Retaining Spring
- 1 550 Slide Return Spring
- 4 Locator Pins (#1, #2, #3, #4)
- 1 Seating Punch, Large
- 1 550 Index Ball Spring
- 2 Pickup Tube, Small, Yellow Tips
- 2 Magazine Orifices, Large
- 1 Toolhead Pin
**K25-20048, $18.95**

### L. MACHINE MAINTENANCE KIT
Provides you with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.
**M.T.KIT & RL 550B Spare Parts Kit K25-97016, $32.95**

### M. LOW POWDER SENSOR
Provides an audible and visual reminder when it’s time to refill your powder reservoir. When the powder level drops to about 1000 grains, a buzzer will sound and a bright red LED will light.
**K25-16306, $41.95**

### N. EQUIPMENT DUST COVERS
This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.
**RL 550B Cover, K25-13795, $23.95**
**(O.) Master lock, K25-13083, $3.95**
**Quick-Change Cover (for use with powder measure) K25-11143, $14.95**

### H. RL 550B CASEFEEDER UPGRADE
Available for most pistol cartridges – will not work with rifle cartridges.
- Large Pistol K25-14450
- Small Pistol K25-14451
**$254.95 (110v US Model)**
- Large Pistol K25-14453
- Small Pistol K25-14454
**$264.95 (220v Euro Model)**
**CASEFEEDER CALIBER CONVERSIONS (Page 16)**

### P. UNIVERSAL MOUNTING HARDWARE KIT
Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.
**K25-14355, $5.49**
**Dillon’s Stainless Steel Case Gages**

The RT 1200B is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, a 1/4 horsepower electric motor driving a carbide cutter is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1200B is equipped with a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1200B trimmer motor K25-22080 is $254.95. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (Please see chart below). Replacement carbide cutting blades, K25-13141, are $19.95 each. Upper lock rings, K25-13559, are $4.99 each.

**Dillon’s Rapid Trim 1200B Case Trimmer**

Makes short work out of trimming large quantities of rifle brass

---

**Dillon’s Super Swage 600**

Eliminate the “Grunt Work” with Dillon’s Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won’t be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works.

What’s more, it’s inexpensive. The Super Swage 600 comes complete with large and small swage rods.
Dillon’s CV-2001 – The Industry Standard

Dillon’s CV-2001 Vibratory Case Cleaner is the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour.

Not only is our capacity greater, but our motor is larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no “hobby” machine!

The bowl and base are constructed of 7/32” thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media.

We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners.

The solution was an injection molded reversible part. Simple, and it works great.

Our device is large, 10” x 14”, and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18” x 22”. The tub keeps the mess off the floor and bench.

It’s fast – so fast it will remove media from 1,500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon’s introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit.

Attention European Customers:

Case Cleaners are available in 220 volt!

Rapid Polish 290

SHINE? You bet your brass! Dillon Precision has developed another exciting new product to make your reloading faster and easier. Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You’ll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases!

Rapid Polish 290
8 oz. bottle. K25-13804 $8.95
Case (20 pc.) K25-20255 135.95

Don’t Forget Polishing Media!

Crushed walnut hull polishing media – quickly cleans even the dirtiest of cases.
15-pound bag K25-13287 $23.95

Ground corn cob polishing media – the best there is for that final polish.
10-pound bag K25-13496 $15.95

Dillon Case Lube

Rapid Lube 5000, Dillon’s aerosol cartridge case lubricant, has been replaced by an “environmentally correct,” non-aerosol case lube. It works the same: Simply lay your cases out, spray lightly with one or two passes and you’ve done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you’re ready to load. Try a bottle. You’ll never use a grease pad again.

D.C.L. Dillon Case Lubricant
8 oz. bottle K25-13733 $8.95
Case (20 pc.) K25-20256 135.95

Half and Half 10 bottles of polish / 10 of lube
Case (20 pc.) K25-21375 $135.95

By Selwyn Duke

Upstate New York’s Catskill Mountain Range is a bucolic place near and dear to my heart. It’s where storybook character Rip Van Winkle enjoyed his legendary slumber, and its scenery hasn’t changed much since he was born of Washington Irving’s fertile imagination. Yet, like Van Winkle, if I’d fallen asleep for 20 years when first arriving in that verdant heaven, I, too, would have noticed some profound changes upon awakening.

About two decades ago, many rural Catskill teens — sons of farmers and hunters and fishermen — suddenly started donning baggy pants and reflecting “gangsta” counter-culture despite living nowhere near any large urban center. The following generation of teens experienced today’s recent cultural evolution and often sport multiple tattoos and body piercings despite living nowhere near NYC’s grungy East Village. Yet I’m wrong in a sense: those places were actually very close — a television set away.

My old hinterland haunt was once a place where, if you wiggled the rabbit-ear antenna just right, you could pull in one or two TV stations. And what could you see? Perhaps reruns of “The Brady Bunch,” perhaps the news. But about a quarter century ago came VCRs and video stores; then cable and satellite TV; and, finally, the Internet. The serpent had entered Eden.

In the wake of the Sandy Hook tragedy, much fire has been directed at gun advocates in general and the National Rifle Association in particular. In response, the organization has implicated Hollywood and popular culture in general for mainstreaming mindless violence. Yet even many Second Amendment advocates part company with the NRA on this point. After all, blaming entertainment for crime smacks of blaming guns. Yet there’s quite a profound difference: guns don’t transmit values. But how we use guns — and knives, fists and words — on screen certainly does.

This message is often a tough sell, however, as it’s very natural to defend one’s entertainment. We grow up with certain shows, movies, characters and music and often become emotionally attached to them; in fact, we may identify with them so closely that an attack upon them can be taken personally. It’s the same phenomenon that causes an avid sports fan to defend his favorite team as if it’s his favored son. And it is then we may hear that old refrain, “It isn’t the entertainment; it’s the values learned at home.” (They’re actually one and the same since isn’t the entertainment; it’s the values learned at home."

Yet it appears few really believe that refrain. Sure, depending on our ideology, we may disagree on what entertainment is destructive, but that it can be destruc- tive is something on which consensus exists. Just consider, for instance, that when James Cameron’s film “Avatar” was released, there was much talk in the conservative blogosphere about its containing environmentalist, anti-corporate and anti-American propaganda. At the other end of the spectrum, liberals wanted the old show “Amos ‘n Andy” taken off the air because it contained what they considered harmful stereotypes. Or think of how critics worried that Mel Gibson’s “Passion of the Christ” would stoke anti-Jewish sentiment or that Martin Scorsese’s “The Last Temptation of Christ” would inspire anti-Christian feelings, and how the Catholic League complained that “The Da Vinci Code” was anti-Catholic. Now, I’m not commenting on these claims’ validity. My only point is that when our own sacred cows are being slaughtered, few of us will say, “Well, yeah, the work attacks my cause, but I don’t care because it’s the values taught at home that really matter.”

The truth? Entertainment is powerful. This is why Adolf Hitler had his propaganda filmmaker, Leni Riefenstahl, and why all modern regimes have at times created their own propaganda films. It’s why the ancient Greeks saw fit to censor the arts and American localities traditionally had obscenity laws. And it is why, while “The pen is mightier than the sword” and a picture mightier still, being worth a “thousand words,” we have to wonder how many words moving footage coupled with sound would be. How mighty art thou, Tinseltown? Well, we worry that a child witnessing one parent continually abuse the other will learn to be violent, as children learn by example. Yet often forgotten is that while a person can model behavior seven feet away from the television, he can also model it seven feet away through the television.

And what effect do our entertainment role models have? Much relevant research exists, and the picture it paints isn’t pretty. For instance, a definitive 1990s study published by The Journal of the American Medical Association found that in every society in which TV was introduced, there was an explosion in violent crime and murder within 15 years. As an example, TV had been banned in South Africa for internal security reasons until 1975, at which point the nation had a lower murder rate than other lands with similar demographics. The country’s legalization of TV prompted psychiatrist Dr. Brandon Centerwall to predict “that white South African homicide rates would double within 10 to 15 years after the introduction of television....” But he was wrong.

By 1987 they had more than doubled.

Then the Guardian told us in 2003 that, "...Bhutan, the fabled Himalayan Shangri-la, became the last nation on earth to introduce television. Suddenly a culture, barely changed in centuries, was bombarded by 46 cable channels. And all too soon came Bhutan’s first crime wave — murder, fraud, drug offences.” The serpent had struck again.

And exactly how it strikes is interesting...and scary. Lt. Col. David Grossman, a former West Point military psychologist and one of the world’s foremost experts on what he calls “killology,” explains the process well. In his essay “Trained to Kill,” he speaks of how the military learned that during WWII only 15 to 20 percent of riflemen would actually shoot at an exposed enemy soldier. Yet this rate was increased to 55 percent during the Korean War and then 90 percent in Vietnam. How? By applying psychological principles, says Grossman, identical to the forces our children are exposed to through entertainment. They are (all quotations are Grossman’s):
New from North American Arms, Inc.
The NAA Sidewinder!

North American Arms is pleased to announce the Sidewinder mini-revolver. This important new product features a “swing-out” style cylinder assembly similar to most other modern revolvers. This allows easier loading and unloading. This revolver is offered in standard .22 Magnum with an optional .22LR conversion cylinder assembly.

Specifications:

- Weight: 6.7 oz.
- Length: 5” • Height: 2 7/8” • Width: 1”
- Barrel Length: 1”

When we lost our supplier for Dillon Leather, we considered abandoning the gunleather business. Fortunately, we were able to team up with Mitch Rosen Extraordinary Gunleather to continue to offer a best-quality, made-in-the-USA line of belts and holsters. We know you'll like these products — we're happy to have our name on them.

**Stylemaster-DL**  $150

A superior shoulder rig made of best-quality leather with solid brass fittings — no cheap plastic, no soft suede or other low-quality leather.

- Beretta 92  K25-18846
- Colt Gov't. Model, Commander  K25-18844
- GLOCK 17, 22, 31  K25-18845

**Best-Quality Belt-DL**  $70

Simply the best GUN BELT you have ever owned. Full, double-thickness leather with solid brass buckle and hardware.

## Premier-DL

**$90**

Instead of traditional belt slots, the Premier-DL has two wide straps that loop over the belt and lock up with sturdy snaps. A great feature for those who prefer not to thread the belt through holster slots to put on and take off the rig. Quick on, quick off, with excellent security.

The Safepacker™ Holster is the ONLY mode of concealed carry that I have personally witnessed save a man’s life. It’s a long story, but suffice it to say that the element of surprise afforded by the Safepacker did the trick. The folks at The Wilderness contend that the Safepacker™ is the best, most versatile and utilitarian holster in the world. I tend to agree, because the one you see pictured at left...is mine.

Mark Pixler, editor

The Safepacker can be hand carried like a day planner, equipped with a shoulder strap (not included), slipped into an attaché case, opened with the top flap stuffed between the mattress and box springs on your bed, strapped to a seatbelt, attached to a sun visor, clipped to a backpack, or worn on your hip as a very low-profile “un-holster.”

“Government Model” Safepacker, RH  K25-11703  $89.95
“Government Model” Fits: Colt Government Model, GLOCK 17/18/20/21/22, SIG P-220/226, Beretta 92/96, HK USP-45, 4” K-Frame, 3” N-Frame, etc.
“Commander” Safepacker, RH  K25-11702  89.95
“Commander” Fits: Colt Commander, SIG P-245/229, HK USP-45 Compact, Tokarev, etc.
“Officers’ Model” Safepacker, RH  K25-11701  89.95
“Officers’ Model” Fits: Colt Officers’ Model, GLOCK 19/23/30/32/36, Para P-12, etc.
“GLOCK 26/27” Safepacker, RH  K25-11700  89.95
“GLOCK 26/27” Fits: G 26/27, Springfield XD Subcompact, Makarov, etc.
“J-Frame” Safepacker, RH  K25-11699  89.95
“J-Frame” Fits: S&W Centennial, Taurus M85, Walther PPK, KelTec P-11, etc.
“Mustang” Safepacker, RH  K25-11698  89.95
“Mustang” Fits: Colt Mustang, Pony, KelTec P-32, Beretta Tomcat, etc.

Center of Mass LLC’s Pistol Sheath is an adjustable, ambidextrous, multi-fit KYDEX® holster that is durable, affordable and Made in Idaho!
The Small Pistol Sheath will hold all 1911s; Browning Hi Power; Buckmark 22.; all Kahrs; Walther P-22, PP, PPK; Kel-Tec P-11, PF9; Ruger LC9; Taurus Slim 9, 40; CZ75s and Witness.
The Small Revolver Pistol Sheath fits all J-Frame-Size revolvers, including the new S&W Bodyguard, Ruger SP101 and LCR.
The Large Pistol Sheath will hold all Springfield XD5s; GLOCKs (excluding the G21 w/Picatinny rail); S&W M&Ps, SDs, Sigmas, P99s; Fn; Walther PPS, P99; Hi Points; Taurus Millennium, Pro, 24/7, 809, 840, 845; HK USP Compacts, P30, P30 Long, 45 Long, P2000/P2000SK; SIG Polymer frame pistols; Ruger SR9, SR40, SR9C, SR40C, P345, P95; and many others.
The Wilderness’ Original Instructor Belt is an incredibly strong belt with a specially designed “V” ring buckle. Imitation is the sincerest form of flattery, and the marketplace is full of copies of this belt, but none can compare to the original.

We’re selling the five-stitch version, which has extra stitch lines to make the belt more rigid vertically in order to better support holsters, magazine pouches and other gear. This belt is a favorite with law enforcement, military personnel, firefighters, paramedics, etc.

Note: The 1.75” belt works best with BDUs or jeans. The 1.5” belt features a scaled-down buckle.

Michaels of Oregon’s injection-molded Kydex holsters have a level of detailing, quality and affordability unmatched by other manufacturing methods. The almost-vertical rake allows for behind-the-hip carry, and for some applications, the holster can function as a crossdraw. Smaller-size holsters can also be used for “appendix” carry. To aid concealment and to assist in the draw, the holster rides close to the body at a mid-level height. The injection-molded belt loop is designed to accept and support a variety of belts from 1” to 1.75” wide.

The De Santis Elastic Belly Band accommodates small autos and revolvers with one reload and a pair of handcuffs. Fastest when worn under an untucked shirt, but can be used with a tucked-in shirt for deep concealment.

24" - 28" waist [K25-18557]
30" - 34" waist [K25-18558]
36" - 42" waist [K25-18559]
44" - 50" waist [K25-18560]

De Santis' Apache ankle holster's wide, elastic leg band largely eliminates the unwanted rocking motion commonly associated with ankle holsters. A sheepskin pad makes the Apache comfortable to wear.

Recent release from De Santis is the Nemesis Cargo Pocket Holster. It fits in your tactical shorts or BDU's and holds both your back-up pistol and a magazine.

The De Santis Elastic Belly Band accommodates small autos and revolvers with one reload and a pair of handcuffs. Fastest when worn under an untucked shirt, but can be used with a tucked-in shirt for deep concealment.

“Wild Bunch” 1911 Holster & Mag Pouch

This holster/mag pouch was designed in a joint effort by World Cowboy Action Shooting Champion Gene “Evil Roy” Pearcey and World Fast Draw Champion Bob Mernickle when SASS introduced the “Wild Bunch” category for Cowboy Action Shooting.

When these two champions put their heads together, they created a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The holster is hard molded so as not to lose its shape even after thousands of draws. It spaces the pistol’s grip frame away from your body so you’ll get a full combat grip, and the holster includes the T-nut lock system to ensure that it stays in place during a draw.

The mag pouch spaces the magazines so when you grab one mag, the second isn’t in your way; above the belt line so the belt doesn’t interfere with the draw; and at the max depth required by the sport – and no more – so you’ll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

- 1911 Holster K25-19947 $139.95
- Mag Pouch K25-19946 44.95

Close & Ready Bedside Holster Caddy

The key to the successful gunfighters of the Old West was not so much the weapon of choice, but rather the holster. How quickly the weapon could be retrieved, aimed and fired was the difference between survival and becoming a statistic. The Close & Ready Holster Caddy provides a faster and safer way to protect your family. It works with most existing holsters and slides easily between the mattress and box springs on either side of your bed.

Safariland Custom Fit 567 Holsters

The Model 567 Custom Fit holster is one of the lightest, thinnest, best fitting concealment holsters available. True to its name, it adjusts to a wide variety of popular handguns, giving each a “custom fit” in this holster.

- 2" Revolvers K25-19261 $43.95
- 4" K & L-Frame S&W, Ruger, and Colt Rev. K25-19262 43.95

2. Sm. tube K25-22028 7.99

**B3. PRIMER FLIP TRAY**
A heavy, high-quality tray large enough for the Federal primer package.

K25-13606, $20.95

**E. PRIMER FLIP TRAY**
This great looking nylon cover adds security to your loading bench. Comes equipped with a D-ring, allowing the heavy-duty zipper to be locked.

Cover,

K25-13329, $39.95

(G.) Master lock,

K25-13083, $3.95

**F. 1050 MACHINE COVER**
Designed for “economy of motion” when loading. Our new bullet tray is made of durable cast aluminum and is Dillon Blue powder coated.

K25-22215, $41.95

**F1. SPARE PARTS KIT**

**G. 1” BENCH WRENCH**
K25-10842, $7.95 each. Two or more, $7.10 each.

**H. 1050 BULLET TRAY**

**I. SPARE PARTS KIT**

**J. MACHINE MAINTENANCE KIT**
Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available in combination with a spare parts kit for your machine.

Maint. Kit & 1050 Spare Parts Kit K25-97018, $46.95

**K. MOUNTING HARDWARE KIT**
Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

K25-14355, $5.49

800-223-4570 or 480-948-8009 • FAX 480-998-2786 • 24-Hour On-Line Ordering @ www.bluepress.com
Dillon’s Modular Range Bag features a MOLLE-style fastener system to make it easy to reconfigure the bag to fit your individual needs. The end compartments and side compartments are removable, and extra end compartments are available.

The Range Bag comes with a removable, open-topped Stage Bag, so you can carry your ammo to shoot a stage without having to take the entire bag. The main compartment is designed to hold the Stage Bag or a Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 36).

- Range Bag, Black 17”x11”x10” K25-19258 $99.95
- Extra Stage Bag (inset, top right) K25-19259 29.95
- Extra End Compartment (inset) K25-19260 14.95
- Pistol Pouch, Black K25-17027 10.95

Dillon’s two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You’ll never again mix fired brass with loaded rounds!

- ‘Border Shift’ Ammo Bag K25-13755 $25.95

Protect your handguns with Dillon’s rugged, padded nylon pistol cases. These cases feature a pouch on one side for cleaning gear or other accessories and magazine/speedloader pouches on the other. The “Small” Dillon Pistol Case will accommodate most “Limited” class autos and the “Large” case will accept pistols with scopes and extended compensators.

- Small – 7.5”x11.5” K25-10161 $18.95
- Large – 9.5”x12.5” K25-10162 21.95
**Dillon Reloading Accessory Package Deals!**

Dillon's Package Deals include: either Dillon's D-Terminator Electronic Scale or Eliminator Balance Beam Scale, a Dial Caliper, a Primer Flip Tray, a Bench Wrench, an 8 oz. bottle of Case Lube, a pair of clear safety glasses, a machine cover and the latest edition of the Lyman Reloading Handbook.

**Strong Mounts**

Increase the stability of your reloading bench with Dillon's new Strong Mounts. These heavy gauge steel Strong Mounts increase the machine's “footprint” to over 10", spreading the load over the whole bench instead of stressing the leading edge.

Strong Mounts raise your machine 6" to 8", providing a comfortable work height for people who prefer to stand while reloading. For some XL 650 owners, overhead clearance can become a problem, so we designed a mount especially for this application. The XL 650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine (550/650 mount includes RL 550B bin bracket) and are coated with a durable black wrinkle finish.

**Bullet Tray Kits**

Dillon's original RL 1000 came equipped with a simple, shallow aluminum bullet tray that was designed for economy of motion when loading. For years, our attempts to duplicate the efficiency and the “feel” of that tray in other machine applications were less than satisfactory. It took the development of the Strong Mount for the RL 550 and the XL 650 to enable us to place the redesigned tray exactly where it needed to be.

Our aluminum tray works on the Square Deal 'B', the RL 550B and XL 650 when equipped with the RL 550/XL 650 Strong Mount, and a separate kit is available for the RL 1050. Comes with a Dillon Blue powder coat finish.

**RL 550B/XL 650 Toolhead Stands**

This all-metal stand provides a place to store your complete caliber conversions: toolhead, reloading dies, powder measure, shellplate and locator buttons. The mounting system makes it possible to secure the toolhead stands to your bench, keeping them from getting knocked over by your well-meaning-but-clumsy shooting buddies.

Dillon’s new toolhead stands are finished with a high-quality, durable powder coating designed to meet the needs of even the highest volume, commercial reloading operation. They are available individually or in packages of three, and are packaged with reloading data labels to help you record your favorite loads.

**Low Powder Sensor**

Dillon's new Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light.

This simple, but effective, device is designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**Size Die**
- Floating Decap Assembly Eliminates Primer “Draw Back”
- Long, Tapered Carbide Ring
- Radiused Opening Makes Progressive Loading Smoother

**Seat Die**
- Reversible Seating Stem Makes it Easy to Change Bullet Styles

**Crimp Die**
- Quick Disassembly, Easy to Clean

**Sizing/Depriming Die**
Our sizing/depriming dies feature a unique “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the problem of primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design – the long, tapered carbide ring with a radiused opening – remains unchanged.

That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

**Bullet Seating Die**
Our new quick-disassembly seat die allows the user to disassemble and clean the seat die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem out of the die body. We’ve always included both types of seating stems, but the new double-ended design makes it a simple matter to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time it used to take.

**Crimp Die**
We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**NOTE:** All Dillon Pistol Die sets include our sizer/ decap die, seat die and a separate crimp die. (Taper crimp for autos; accu-crimp for revolvers.)

**Spare Decapping Pins**

Package of 10 K25-21528 $5.75
Dillon Three-Die Rifle Die Sets include a sizing/depriming die, a bullet seating die and a taper crimp die. Dillon Two-Die Rifle Die Sets include a sizing/depriming die and a seat/crimp die.

**Sizing/Depriming Die**

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

**Bullet Seating Die**

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

**Taper Crimp Die**

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.
Get your “stuff” together, then keep it that way!

**Dillon AkroBins**

AkroBins are perfect for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550B/XL650 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can’t beat ‘em! Buy several and get your “stuff” together.

Belted Magnum Powder System

Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. Our “Belted Magnum” Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Like all of Dillon’s powder measures, the Belted Magnum Powder System is case-activated and can be used with your RL 550B, XL 650 or AT 500 reloader. It’s ideal for loading large-caliber magnum rifle cartridges. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

The “Belted Magnum” Powder System is based on our SL 900 Shot Dispenser, so the Maximum Charge Bar won’t work in our standard powder measures – you’ll need to buy the entire system. The good news is that the “Belted Magnum” Powder System has an integral drain, so it’s easy to empty the hopper in order to change powder types; so, if you load several big calibers with various powders, it’s easy to switch from one to another.

Keep plenty of extra powder on hand, because when you’re dispensing 100-plus grains into every cartridge, you’re gonna need it!

Magnum Powder System $25-97126 $137.95

PROTEKTOR MODEL

The Original Leather Sandbag* Rifle Rests

All Protektor Model leather bags are made with the best top grain cowhide available. The welded steel rest is strong enough to stand on and won’t break if dropped (Owl Ear Front Bag sold separately).

K25-11154, $26.95
By John Marshall

The Mauser HSc pistol had its beginnings in the 1930s. At that time, Mauser-Werke, in the town of Oberndorf am Neckar, Germany had been producing a fairly popular line of single-action pocket semiauto pistols in calibers .25, .32, and .380, the models 1910, 1914 and 1934. However, the Carl Walther company of Zella-Mehlis in Germany had introduced its advanced double-action Model PP in 1929 and the similar but more compact PPK pocket pistol in 1931. When Mauser sales dropped and the public began to show a preference for the more modern Walther pistols, Mauser management decided to develop a competitive double-action pistol of their own.

The design of the new pistol was assigned in 1933 to Alexius Wilhelm Seidel (1909 – 1989) in the Mauser Development Section. Seidel was a talented engineer who later went on to become a co-founder and the chief engineer of Heckler and Koch in the postwar years. His work was difficult, as he had to maneuver around the existing and iron-clad Walther patents. Nonetheless, he succeeded in that task. His brainchild became the Hahn Selbstspanner Pistole (Self-Cocking Hammer Pistol) version “c” in 1934. Mauser was set to begin production in 1938, but the German Heereswaffenamt (Army Weapons Bureau) insisted that Mauser concentrate on production of the K98k rifle, the P.08 “Luger” and M1934 pocket pistol. With the eventual blessing of the German arms authorities, production of the HSc began in December, 1940. The first serial number was 700001, which was stamped on the lower front grip strap. The last three digits were also marked on the barrel and slide. The introduction of the HSc ended production of the single-action Model 1934.

The first 1,345 of the pistols are now known as the “low grip screw” pistols because the grip retention screws were close to the bottom of the grips. Most of this production run went to the Kriegsmarine (German Navy). The grip screws were then moved up about 3/4”. At serial number 701348, the Heer (Army) began purchasing the pistol. Subsequently, guns were bought by various Polizei (Police) departments, including the infamous Schutzstaffel or SS. The Luftwaffe (Air Force) purchased their pistols through the Heereswaffenamt instead of directly. The HSc also found popularity with military troops who were not issued pistols; they often bought them on the commercial market. These pistols were produced in 7.65mm (32 ACP). A few experimental models were subsequently made in .22 LR caliber.

The HSc was a blowback pistol, and was designed to fire double action on the first shot and single action on subsequent shots. Unlike the Walther PP series, the rotating safety lever on the slide does not interpose a block in front of the hammer. It swings the firing pin out of the impact area of the hammer. The safety does not lower the hammer; this has to be done by pressing the trigger. Once the hammer is down and the safety engaged, the pistol cannot be brought to full cock except by retracting the slide, as the safety also blocks the sear. There is no external slide stop. The slide will lock back if the pistol is empty regardless of whether or not there is a magazine present. The insertion of a loaded or empty magazine will cause the slide to snap forward. This is a strange feature inherited from the Model 1910/1914/1934 pocket pistols and is often confusing when first encountered. The hammer on the HSc is very unobtrusive, designed so that it would not easily catch on clothing. It can be manually cocked for a single-action first shot if desired. Because of its rounded form and close fitting, the hammer seals the internal mechanism against dust. The gun cannot be fired when the eight-round magazine is removed. The extractor doubles as a loaded chamber indicator, and can be felt when it protrudes about 1 mm over a loaded round. The magazine release is at the heel of the butt, in

“It pointed naturally and valued for its ergonomic sleek lines and quality. day it lived in very comp.

c-0co-existence with the WPP series of pocket pis
The Mauser HSc Pistol

accordance with European custom. Field stripping the unloaded pistol is accomplished by cocking the hammer, engaging the safety, depressing the take-down catch inside the trigger guard and moving the slide with the barrel and recoil spring forward very slightly to remove. The barrel and recoil spring are then easily taken out of the slide. Further disassembly is not recommended. The HSc utilizes a significant number of stamped internal parts.

All Mauser HSc pistols made during WWII will bear the Beschusstempel (factory firing proof) of an eagle over “N” stamped on the barrel breech. In addition, military and police pistols will have a specific waffenamt (acceptance stamp) on the left trigger guard web. The wartime HSc was produced from December 1940 to April 1945, with a grand total of 259,923 being made. The Army got 135,000, the Navy 27,100, and the Police organizations 29,300. The rest of production went to the commercial market. Most pistols had a polished blue finish, while later wartime production had a rougher polish. Very late examples had a phosphate finish quite similar to U.S. Parkerizing, bore an Eagle over WaA135 acceptance marks, and had Eagle over N proofs. These are considered rare and very desirable for collectors today. From 1943 on, brown or black Kunststoff (plastic) grips substituted for the original wood. Pistols intended for the police and military were generally issued with two matching magazines and a flap holster, and these are also desirable to find.

The Oberndorf area was captured by American troops in April, 1945, and production of the HSc was terminated by the occupiers. The Mauser facility fell into the French sector of divided Germany following the war, and was occupied by the French from May 1945 to June 1946. The French continued to produce about 15,000 additional HSc pistols in Oberndorf, most of which went to their troops in Indochina. These had serial numbers in continuation of the wartime system, up to about number 971239. There were no proof marks on these guns, but an interlaced “WR” factory inspection mark was stamped on most pistols at the right rear of the trigger guard. Most of the factory was subsequently destroyed and the manufacturing equipment distributed to other Allied nations.

In 1967, a reconstituted Mauser-Werke returned to Oberndorf, and from October 1968 to December 1977, a total of 63,118 new HSc pistols were manufactured. 18,868 were made in 7.65mm with a serial number range of 00.1001 to 00.19868, and 39,250 in 9mm Kurz (.380 ACP) with a serial range of 01.1001 to 01.40250. A special group of 5,000 in those two calibers, the “American Eagle Edition,” brought this series to a close. The pistol illustrated was made in 1975. It’s chambered in 9mm Kurz, and is so marked on the chamber of the barrel, over “.38”. It came with both a finger-extension magazine and one with a flat baseplate. An HSc “Super” model was made for a while under Mauser license by the Renato Gamba company in Gardone, Italy. It featured a 13-round two-column magazine, a recurved trigger guard, and a magazine release located at the bottom rear of the trigger guard. It unfortunately never approached the quality of the original German HSc.

Today, the Mauser HSc is no more, but the pistols, particularly those of wartime manufacture, are rapidly becoming valued collector’s items. This classic pistol had a number of innovative features. It pointed naturally and was valued for its ergonomics, sleek lines and quality. In its day it lived in very competitive co-existence with the Walther PP series of pocket pistols. Surviving examples still make very effective personal defense weapons.
UTG Brass Catcher for AR15s

Take out your frustrations, and build your grip strength at the same time! Just think about...oh, the new Supreme Court, socialized medicine, tax increases, high-capacity magazine bans, etc., and use the one-pound ball. Or, think about the “bailout” legislation and the luxury resort vacation the execs at AIG enjoyed on YOUR DIME. You’ll need the two-pound ball for THAT one!

**About SNS Casting:** SNS Casting, Inc. is a family owned and operated business located in rural Flanagan, Illinois and was officially founded by Jim Stinar in the winter of 2008. Jim's casting history actually began in the mid 1980s as a hobby. This supplied not only himself but a group of friends and fellow avid shooters who were tired of paying too much for inferior products. Eventually, word was spreading throughout the surrounding states of his bullets, which were priced right for the quality.

Today, SNS Casting features four of Magma Engineering’s Mark VIII casters and two Lube Master lubers/sizers fitted with M-A Systems Collators. Our lead is a certified factory alloy of 92 percent lead, 6 percent antimony and 2 percent tin, which is purchased in 44,000-pound lots to ensure consistent quality. The lube we use is Magma blue lube.

We have two full-time employees at SNS Casting. Jim Stinar and son Ryan are avid USPSA (A30909, A63666) shooters, SASS members and NRA members.

---

**NOTICE:** There is a $20.00 minimum ‘Hazardous Material’ (HazMat) handling fee for shipping PRIMERS. This fee is assessed in increments of 10,000 primers. Primer orders MUST be shipped separate from other items, and require a separate shipping and handling charge. Shipping and HazMat fees are not included in prices.
A superior bullet for when the stakes are at their highest. Designed for law enforcement and personal defense, the Golden Saber™ High Performance Jacket (HPJ) projectile successfully combines match-type accuracy, deep penetration, maximum expansion and near 100 percent weight retention.

Made in the USA and sold in Packages of 25 cartridges.

Bore-tips™ Bore Cleaning Foam Swabs

No s#!+, there I was…in my office, cleaning my 686 SSR when the boss walks in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (thinking fast), “I’m trying out these Bore-tips before I write the Blue Press copy for them. They work GREAT!”

The Bore-tips Swabs REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

'Plan B' Day Planner

Dillon's “Plan B” Day Planner Holster holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

“Plan B” Day Planner
K25-10252 $24.95

Concealed Carry Tote

Dillon's Concealed Carry Tote accommodates all the tools you need to survive the urban jungle!
This low-profile carry case looks like a mild-mannered-computer-nerd accessory, but it's designed for your pistol as well as your PC! Made of rugged nylon fabric, with heavy-duty zippers on all three main compartments — one designed to hold a laptop computer, one for folders and paperwork, and one in the middle for a handgun.
Inside the case are pockets and pouches that will hold spare magazines as well as folding knives, letter openers, flashlights, cell phones, full-sized 8.5”x11” paper note pads, etc. Measures 13.5” x 11.5” x 6.5” deep.

K25-18193 $45.00

Tuff Products Mag Pouches

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system; for instance, the Dillon Range Bag, a tactical vest or body armor carrier. Available in black or coyote brown.

Front view with flap.
Front view without flap.
Rear shows loops and MOLLE fasteners.

Black 8-Magazine Single-Stack (1911) K25-19854 $39.95
Brown 8-Magazine Single-Stack (1911) K25-19855 39.95
Black 5-Mag, Double-Stack (.357/.380 GLOCK) K25-19856 39.95
Brown 5-Mag, Double-Stack (9/.40 GLOCK) K25-19857 39.95

Comtech’s STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a “force multiplier,” it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. Plus, it passes un-noticed by 90 percent of people who see it. Yup, just another “keychain device” to most, and yet it works so well when needed. You’ll love your Stinger and undoubt-
edly draw a great deal of security and peace of mind from it's mere presence. You deserve a Stinger today!

Comtech STINGER Keychain
K25-19495 $9.95

Arredondo Accessories’ Magazine-Cleaning Brush is ideal for that little job we all dread (avoid!)! No excuse, Sir!

Magazine-Cleaning Brush K25-19257 $11.95

Cavalry Arms Medical Trauma Kits

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore “first aid kit” you have stashed under the seat of your truck won’t do much good. That’s why Cavalry Arms Medical has produced trauma kits designed by Armed Forces medics.

The Cavalry Arms Medical P.T.K. (Personal Trauma Kit) contains a 15-gram package of Celox granules to control serious bleeding, Nitrile gloves, a high-intensity Chem-Light, a six-inch Emergency Bandage with a second pad, and a 4.5-inch Kerlix Roll.

The A.T.K. (Advanced Trauma Kit) contains one 15-gram package of Celox granules, Nitrile gloves, a CPR Face Barrier, two VioNex Anti-Microbial Wipes, a high-intensity Chem-Light, two 4-inch Emergency Bandages, one 4.5-inch Kerlix Roll, two 2-inch Kerlix Rolls, one 3-inch Elastic Bandage, and two 5 x 9-inch sterile Abdominal Pads. All contents of both kits are currently in use by real-world combat medics.

Personal Trauma Kit (P.T.K.) K25-19220 $29.95
Advanced Trauma Kit (A.T.K.) K25-19322 69.95

NSIGHT TECHNOLOGY’S HX150 Programmable LED Flashlight comes with a limited lifetime warranty and is equipped with Smart-Power Technology™ that allows the operator to pre-program the desired “On” mode. A programmed mode can then be easily turned off and reprogrammed to adapt to any newly desired “On” mode. Modes of operation include: Constant On Mode, Momentary On Mode, Strobe Mode From On, Strobe Mode From Off, Strobe Mode to Constant Mode, Strobe Mode OFF, Dimming Mode, Dim to Bright Mode, Dim mode OFF, Auto On/Off, and S.O.S. Mode.

50 BMG Carbide Size Die K25-50075 $849.95
50 BMG Case Trimmer K25-50050 $374.95
BFR Mounting Post (56.5" High) K25-50150 $249.95
BFR Mounting Hardware Kit K25-50140 $9.95

BFR Accessories

A. 50 BMG CASE TRIMMER ASSEMBLY
Features an industry standard 1-1/2”-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die.
K25-50050, $374.95

B. 50 BMG CARBIDE SIZE DIE
The only .50 BMG size die in the industry that’s a full-length solid carbide size die for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2”-12 UNF thread, and is manufactured to low chamber tolerance specifications.
K25-50075, $849.95

C. 50 BMG POWDER MEASURE ADAPTER
For use with the RCBS .50 BMG powder measure.
K25-50125, $74.95

D. 50 BMG PRIMER SEATING DIE
One of these is included with Dillon’s Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, milspec primer punch.
K25-50200, $149.95

E. 50 BMG PRIMER POCKET SWAGER
Makes it easy to remove the military crimp.
K25-50001, $299.95

F. 50 BMG PRIMING SYSTEM
Allows off-the-machine primer seating.
K25-50002, $299.95

E./F. SWAGER CONVERSION
Converts Priming System to Swager.
K25-50004, $74.95

RCBS LOADING ACCESSORIES THAT CAN BE USED WITH DILLON’S BIG FIFTY RELOADER

.50 BMG Manual Powder Measure K25-21896, $114.95

Dillon's New Bench Wrench
Fits new 1” die lock rings

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you are first setting up a “naked” machine, there is plenty of wrench room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring on a crowded toolhead.

Dillon Precision has addressed this in two ways. We now offer new 1” die lock rings and a 1” Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they’re already mounted. The opposite end of our new wrench is a 7/16” box-end for adjusting the Powder Bar of any Dillon Powder Measure. Our new lock rings fit any standard 7/8” x 14 dies.

1” Dillon Die Lock Ring
$1.35
5-Pack of Die Lock Rings
$4.15
1” Dillon Bench Wrench
$7.95
(Buy two or more 1” Bench Wrenches for $7.10 each)
Wrench/Lock Ring 5-Pack
$9.95
The Tru-Weight Trigger Tension Scale has a range from eight ounces to eight pounds. A unique weight indicator remains at the exact point of trigger release, making it easier to read your trigger pull pressure.

Grace USA Gun Care Tool Set

This custom designed 12” x 9” x 1-1/2” case is made from durable soft Nukaf and contains a 17-piece set of Grace USA Gun Care Screwdrivers (8 ea.), Solid Brass Pin Punches (8 ea.) and a specially fabricated 8 Oz. Brass Hammer. The screwdrivers are hand-assembled and custom hollow ground to fit scope screws, plug screws, guard screws, etc. The handles are turned from quality Maine hardwood and protected with a smooth finish. Made in USA.

Johnson Precision's Mag Rack™ moon clip retention system holds eight of your moon clips in place with strong magnets. The Mag Rack may be permanently attached to a belt with included fasteners, or temporarily with the optional belt loops.

- Mag Rack, 8-Shot 627: K25-25367, $149.95
- Mag Rack, 7-Shot 686 and 6-Shot 625: K25-25368, 149.95
- Mini Mag Rack, 10-Shot 617 .22 LR: K25-25386, 74.95
- Accessory Belt Loops: K25-25369, 9.95

627 Moon Clips (Starline, Remington Brass): K25-14308, 39.95/10 pk.

California Competition Works' 10-Round Speedloader for S&W Model 617 .22 LR Revolvers is ideal for Steel Challenge or Ruger Rimfire Series competition. The speedloaders are machined from 6061 T6 aluminum, then black anodized. The Loading Block (inset photo) is CNC machined from polymer and holds 120 rounds of .22 LR ready for insertion into speedloaders.

- CCW Model 617 Speedloader: K25-12623, $34.95
- CCW .22 LR Loading Block/Case: K25-12627, 49.95

These .025 EDM Stainless Moon Clips are designed to fit Remington brass SNUGLY, eliminating nasty “cartridge flop” when you reload.

- Stainless EDM 8-Shot Moon Clips: K25-16510, $59.95
  Sold in Packages of 10 for 8-Shot S&W 627 Revolvers

North Mountain Moon Clip Holder

I’ve tried several methods of holding my moon clips, and this works best for me! My hand only has to go to one place, so I no longer grope around frantically for my reloads. – Mark Pider

For 610/625, 7-Shot 686, 8-Shot 627: K25-21883, $130.00

**Ghost 3.5 Trigger Stop Connector**

A. The Ghost 3.5 Trigger Stop Connector shortens trigger movement, eliminates over-travel and provides the fastest trigger reset. Can be fitted to all GLOCK pistols.

- 3.5 Trigger Stop: K25-14760, $24.95

**Ghost Bullet and Forward Slide Release**

The Ghost Bullet Slide Release was designed with a wider, longer thumb tab that is unobtrusive and sits closer to the frame when not in use. The Forward version addresses the issues of shooters who use the “modern technique” (with thumbs high and pointing towards the muzzle) by placing the thumb tab forward so that it sits between the thumbs, eliminating the problems shooters experience with the modern technique. It also places the thumb tab within easy reach of the forfinger of left-handed shooters.

- Bullet Slide Release: K25-18630, $14.95
- Bullet Forward Slide Release: K25-18629, $19.95

**GLOCK® Factory Original Parts:**

- Extended Mag Release (Small Frame): K25-18569, $9.95
- Extended Slide Release: K25-18569, $9.95

By Barrett Tillman

Stephen Hunter is a gun guy. While most people would expect that of the writer who invented Bob Lee Swagger, hero of the enormously popular sniper novels, few realize how dead-earnest serious Hunter is about the art, craft, science, and culture of marksmanship.

Steve was in Phoenix in January to promote his latest novel, *The Third Bullet*, in which Bob Lee solves the John F. Kennedy murder mystery. Steve’s goal was to conceive “a legitimate alternate narrative,” and without giving away too much of the story, we’ll say that Swagger is drawn into a review of the 1963 assassination – the only presidential murder with a rifle. It’s a compelling story told in patented Hunter style with a mixture of shooting, science, speculation, and first-rate writing.

Like everyone of Boomer vintage, Steve remembers exactly where, when, and how he learned of the event. He was a suburban Chicago high school junior that Friday, and the shock remains palpable. “I’ve believed every major theory about the assassination at one time or another,” Steve confides. “I started out believing the Warren Commission, and then I believed Jim Garrison and then I believed Vincent Bugliosi and others. The one I never believed was that a Secret Service agent shot the president with an AR-15 – either intentionally or accidentally!”

As a certified member of The Gun Culture, Steve recognized that nearly all the post-mortems focused on the technical aspects of Lee Harvey Oswald’s M91/38 Mannlicher-Carcano rifle rather than what was practically possible with the weapon. He went back to the beginning, noting that in 1891 the Italian Army designed the 6.5mm cartridge to penetrate the winter clothing and blood-bearing organs of Austrian soldiers. The “magic bullet” recovered in Dallas – barely deformed – was viewed skeptically, reportedly having struck the president and Texas Governor John Connolly in the front seat. But Steve says, “That bullet did what it was designed to do – it stayed intact after maximum penetration.”

The JFK mystery and the Hunter novel both turn upon the fatal third round so vividly seen in the famous Zapruder film. Given the known performance of the 6.5mm bullet, why would the last one disintegrate on impact? Steve began wondering if it was something other than “Italian GI issue,” which led to his drafting the story while conducting his own research. “I bought four Mannlichers before I got one that would group,” Steve explains. “I had a hard time explaining all those purchases to my wife, but she was used to me accumulating weird stuff, especially after my sword collection for *The 47th Samurai*!”

The cheap four-power scope with wobbly mount on Oswald’s rifle did not lend themselves to precision shooting, especially on a target moving slightly right to left. However, the iron sights were regulated for 300 meters, whereas Oswald’s first shot was made at about 60 yards.

Hunter describes LHO as “unbelievably stupid, narcissist white trash” who was unemployable outside the Marine Corps where, despite training as a radar operator, he was put on sentry duty and managed to shoot himself. Steve does not believe that Oswald, “who only shot well once in the Marine Corps,” had the knowledge or ability to hold under a precise amount with the iron sights. So how did he do it?

Or, as Bob Lee Swagger asks, who else did it?

Adopting his BLS persona, Steve fetched himself to Dealey Plaza in Dallas and examined the mystery from all the angles – literally and figuratively. In the novel he places the “actual” marksman in an office building adjacent to the Texas School Book Depository where Oswald lurked.

Almost lost in the JFK drama is the character Steve identifies with the most: J.D. Tippit, the 39-year-old Dallas policeman whom Oswald murdered after the Kennedy hit. Tippit left a widow and three children, similar to Bob Lee Swagger’s fictional father Earl who was killed in the line of duty.

Steve has friends in law enforcement but observes that the FBI asked the wrong people to evaluate Oswald’s rifle. “They got some high-power, non-science guys together with a few technicians who weren’t really riflemen,” he explains. “They were competition shooters who delved into the nuts and bolts of the Mannlicher-Carcano without much thought as to how it would have been used in the real world. How
By Duane Thomas  
*An IDPA Master Tells You How to Do It, Too!*

This is the final entry in a series of articles on shooting tips to improve performance on the IDPA classifier. We now move to the last string on the classifier, which takes place from around low cover at 15 yards.

**STRING 14:** Draw, kneel, fire two shots T1-T3 from around side of low cover.  
*(My time: 5.73 seconds.)*

**Tip #1:** As you wait for the timer, already have your feet in the position they’ll need to assume when you kneel. At the end of String 13 you were already down in a crouch shooting around the barrel, with your feet exactly where they needed to be. As you ready yourself for String 14, simply stand up, but leave your feet in the same position. At the buzzer, just lower yourself down again voilà! you’re right back in the same low cover shooting position you just were.

**Tip #2:** Get down FAST. Don’t try to synchronize gun movement with your downward movement. By the time you get the gun up and out, you should already have been down behind cover for a considerable amount of time.

**STAGE 3 RAW SCORE:** 35.27  
**DROPPED POINTS:** 15 x 0.5 = 7.50  
**OVERALL SCORE:** 42.77

We have now finished shooting the IDPA classifier. As I mentioned in the first article, I have been giving you my times for every string on the classifier, and points dropped per stage, from the run where I actually earned my IDPA Stock Service Pistol Master rank, in order to make the point that shooting a Master score on the IDPA classifier does not require blazing speed, only decent speed and decent accuracy. Now let’s add it all up. A Master score in SSP is 98.82 seconds or faster. Though I have since shot the classifier much faster and better, this is what it took for me to earn my Master rank:

**THE BOTTOM LINE**

**STAGE 1 TOTAL SCORE:** 30.49  
**STAGE 2 TOTAL SCORE:** 24.41  
**STAGE 3 TOTAL SCORE:** 42.77  
**CLASSIFIER TOTAL SCORE:** 97.76  
**RANK:** Master

**PHOTO CAPTIONS:**

1. For the last string of the classifier, begin with your feet already in the position they’ll need to be when crouching.
2. Through 5. Get down behind low cover FAST. By the time the gun begins its extension you should have been down behind cover for – relatively – a long time.

By Marko Kloos

Debating “assault weapons” bans with Progressives and Liberals is usually a frustrating exercise in flinging reason, statistics, and historical evidence against a nigh-impenetrable wall of uninformed righteousness.

Gun ban proponents aren’t often swayed by talks of “inalienable, God-given rights,” the demonstrated counterproductive effect of gun bans on crime statistics, or any of the usual arguments gun owners employ when defending their right to keep and bear arms. Worse, our side often turns off the other side from the start with defiant confrontational statements that get you lots of applause when preaching to the pro-gun choir, but which aren’t likely to sway the anti-gun-leaning fence sitter toward the pro-gun choir, but which aren’t likely to sway the anti-gunleaning fence sitter toward the pro-rights position. You start talking about the 300 Spartans or your cold, dead hands with the average gun-hostile Liberal, you will mentally get filed as a nutcase whose opinion can be safely discarded as that of a confrontational, unstable crackpot who shouldn’t be allowed anywhere near a firearm. (If anything, you will have hardened that person’s resolve to support an “assault weapons” ban.)

Try to debate the same gun-hostile Liberal with the common arguments employed by our side, and you will most likely also fail to sway them. If three 10-rounders are as good as a 30-round magazine, why not ban the 30-rounder? If the banned features are just cosmetic, why not ban them? If registration may prevent crime and help the police solve murders, why not make it mandatory? If it only saves one life in the future, why not ban machine guns in a timely and error-free fashion. (Applications for tax stamps for suppressors take the BATFE three to six months to process.) Adding millions of firearms to the registry would take years and a gigantic administrative effort. Gun registries are notoriously expensive and invariably useless for crime prevention. We would be wasting tens or hundreds of millions of dollars on a bureaucratic boondoggle that would have no effect on crime rates, and it would be ignored and disobeyed on a grand scale.

In addition to harming the public purse by racking up a huge bill without any likely tangible results, an “assault weapons” ban will also hurt the pocketbooks of millions of gun owners who now have to pay vastly inflated prices. Understand that the “assault weapons” ban of 1994 never came with any promised benefits. The average Liberal even if he or she doesn’t own any guns at all. You have to show them the law they propose is not just useless, but that it’s actually harmful to them. You have to appeal to their self-interest.

Here’s why Progressives should oppose an “assault weapons” ban:

1. **It will harm the economy and the pocketbooks of others, and waste valuable and limited public resources.**

The proposal to put existing “assault weapons” onto the National Firearms Act registry along with machine guns is an awful idea. There are millions of such rifles in private hands that would have to be added to the registry. The BATFE can’t even handle the registration and administration of the few (10,000) legally owned machine guns in a timely and error-free fashion. (Applications for tax stamps for suppressors take the BATFE three to six months to process.) Adding millions of firearms to the registry would take years and a gigantic administrative effort. Gun registries are notoriously expensive and invariably useless for crime prevention. We would be wasting tens or hundreds of millions of dollars on a bureaucratic boondoggle that would have no effect on crime rates, and it would be ignored and disobeyed on a grand scale.

In addition to harming the public purse by racking up a huge bill without any likely tangible results, an “assault weapons” ban will also hurt the pocketbooks of millions of gun owners who now have to pay vastly inflated prices. Understand that the “assault weapons” ban of 1994 never got rid of the banned firearms, but rather drove their prices up artificially. Magazines that held more than 10 rounds were readily available because millions were made and grandfathered in before the ban, but that $20 Glock or AR-15 magazine went up to three or four times the pre-ban price. In practice, those gun owners who wanted to have non-neutered magazines for their home defense guns or range plinkers were forced to pay a punitive fear tax for the privilege – money that could have gone to restaurant meals or other family outings.

Lastly, an “assault weapons” ban would hurt one of the few sectors of the economy that’s actually healthy. Gun manufacturers would have to scale back operations, lay off employees, or close shop altogether if the products they make isn’t legal to manufacture or buy anymore. That’s tens of thousands of lost jobs, and a lot of lost tax revenue – not just from the missing taxes paid by those manufacturers, but also from all the taxes paid by the customers downstream, all the way to the end consumer. Is a crime reduction of a fraction of a percent worth the economic damage? (Remember, “assault weapons” are used in very few crimes, and even the 1994 “assault weapons” ban had no measurable effect on the crime rate.)

2. **It will harm the respect for government authority irreparably.**
The certain noncompliance with an “assault weapons” ban and registration brings us to the bigger problem of authority erosion. Just in December of 2012, the FBI logged over two million background checks for gun purchases. You could bet that most of them weren’t purchases of items likely to fall under the proposed assault weapons ban, but you’d probably have better luck winning a million bucks from a gas station scratch ticket. That’s two million weapons, and tens of millions of “high-capacity” magazines for them, which would all need to be registered and entered into the NFA database at a punitive tax of $200 per item. Prior efforts to register firearms have been met with high non-compliance rates everywhere they have been introduced. It stands to reason that few owners of newly-banned “assault weapons” would be willing to register or forfeit their new property. And if millions of people simply ignore the law, it will become worse than worthless – it would be a constant reminder that the state is basically impotent, and that other laws may be equally disregarded. 

3. It amounts to immoral collective punishment. 

Let’s set that one straight right out of the gate: if it’s immoral to punish a classroom full of kids for the misbehavior of a single child, or punish all Muslims for the actions of a few radical terrorists, then it’s immoral to punish law-abiding gun owners for the actions of a few mentally ill sociopaths. Collective punishment is unfair and deeply immoral. And passing a law that is demonstrably extremely unlikely to have an effect on the crime rate or the prevention of mass shootings, a law that merely harasses and punitively fines a specific group of people for the act of peacefully owning an object you don’t like is the very definition of collective punishment. Having to pay $100 for a magazine that before the passing of that law cost me $20 is a punishment. Having to pay a $200 tax and filing federal paperwork for every semiautomatic rifle I own is a punishment. Having to possibly surrender thousands of dollars of property that I legally acquired and that won’t ever be used by me to commit a violent crime is a punishment.

And if you give your consent to such a collective punishment because you agree with it – on what grounds will you protest in the future when someone else wants to punish YOU unjustly for the misdeeds of another? How can you be against racism, sexism, classism, and other social injustices if you’re willing to invoke collective guilt when it suits you? If you can hold the NRA responsible for Newtown, how can you be morally justified in condemning your neighbor for holding all Muslims responsible for 9/11?

4. It will have legislative repercussions for the progressive agenda. 

Lots of people own guns. Two million people bought firearms in just the month of December 2012 alone in anticipation of new restrictions. America has tens of millions of gun owners, and that’s a lot of votes. Any legislation that restricts the rights of those gun owners, deprives them of their legal property, or hits them in the pocketbook in a substantial way will meet with a backlash at the polls in whatever election – national, state or local – comes next. Pushing hard on gun control will almost certainly mean significant gains for the Republicans in the next few elections, and possibly a Republican-controlled Senate and House. Is the subject of “assault weapons” so important to you that you’re willing to trade a successfully enacted gun ban for a repeal of Obamacare, setbacks for marriage equality rights, and all the other items on the Progressive wish list? Are guns so much more important to you than the rest of your legislative agenda that you are willing to risk sacrificing all of them just so you can pass a gun ban that’s useless at best and disastrous at worst?

5. It will set a strong precedent for ignoring or removing other Amendments.

This is perhaps the single biggest reason for Progressives to oppose an evisceration of the Second Amendment: it creates a blueprint for others to invalidate the civil rights they oppose. If we can just cancel a Constitutional amendment because the outraged masses of the day want it gone, then the Bill of Rights is worthless. If you get rid of the Second Amendment because it’s “no longer relevant,” then you invite the people from the other side of the aisle to do the same to the other Amendments, and you will have no legal or moral leg to stand on when you oppose that. Your team will not always be in charge, and you should never assent to the government exercising sweeping powers if you’re not comfortable with the idea of the same powers being used against you. Because history teaches us that sooner or later, that’s precisely what will happen.

Your average gun-hostile Progressive debate opponent largely supports an “assault weapons” ban because “it’s better than doing nothing,” and because they don’t think themselves inconvenienced in the least by it. Show them in a calm and rational manner that this kind of law is, in fact, much worse than “doing nothing,” and you may very well sway their opinion toward the side of less government intrusion and greater personal freedom...which are, after all, supposed to be Progressive principles.
**Product is color-coded by caliber. White shown here for clarity only.**

**Bore Snake**, the “World’s Fastest Gun Bore Cleaner” from Michaels of Oregon is a better way to clean handguns, rifles and shotguns. Originally sold as a field tool, this product is popular with gunsmiths and benchrest shooters alike. They say “You’ll be hooked!”

Barrel-Lite®

K25-10529 $4.95

°J. Dewey’s AR-Link Cleaning Pin utilizes the near take-down pin in your AR-15 style rifle to hold the upper and lower receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized receivers open for cleaning. It fits all AR-15s and AR-10s with standard and oversized receivers open for cleaning.

1) Depress the rear take-down pin and pull out. 2) Pivot the upper and lower receivers apart. 3) Insert the pin on the AR-Link into the upper receiver take-down pin tab. 4) Close receivers with the AR-Link inserted into the lower receiver. 5) Push the take-down pin through the channel in the AR-Link to lock the upper and lower receivers into place. 6) Clean your rifle. 7) To remove AR-Link, reverse the above steps.

AR-Link Cleaning Pin K25-18599 $14.95

K25-15025 $25.95
This Adjustable Target Pistol Sight is precision machined and fits in a standard "Bomar slide cut." Yeah, the services of a gunsmith are required to cut the slide (unless your 1911 pistol already has a Bomar cut) but the results are worth it.

Adjustable Target Sight for 1911s

Evolution Gun Works

These two-piece flat checkered mainspring housings with bolt-on mag wells are similar to the patented one-piece S&A design. The mag well and checkered mainspring housing are machined from solid bar stock steel and can be used without the mag well attached, although there will be a small dovetail below (this does not impair function). This is a great replacement for plastic mainspring housings on full-size or commander model 1911s.

Secure Firearm Products 1911 Armorer’s Tools

Secure Firearms Products’ 1911 Recoil Spring Tester (left) will help you determine if the recoil spring in your needs replacing, and you’ll save time and money by testing and organizing loose recoil springs in your shooting bag.

The 1911 Firing Pin Stop Tool (right) is used to safely remove and replace the firing pin stop from 1911-style slides.

stable could it be in that sixth-floor window? Why didn’t Oswald shoot when the limousine was closest to the depository building? How did Oswald manage two hits of three shots when he was such a clown?”

Since Oswald was killed by Dallas strip-club operator Jack Ruby before a proper interrogation, those questions went unanswered. Therefore, Hunter/Swagger took up the case as practical riflemen.

Steve has a foot in two worlds: nonfiction and fiction. With a Pulitzer Prize as a Washington Post movie critic, he draws interesting comparisons between Tinseltown and The Gun Culture. “Shooters are much more interesting than actors,” he declares, “and so are writers and directors, who don’t rely on their good looks.”

Among Steve’s nonfiction is American Gunfight, a detailed collaborative account of the 1950 Puerto Rican assassination attempt on Harry Truman.

Steve says he rarely gets writer’s block because guns open his mind: “I’ve spent my life thinking, reading, and writing about guns and shooting guns.” Firearms are the collective fusiological muse that sprinkles literary pixie dust on Steve Hunter, who says, “the gun culture has nourished me.”

“The gun culture has nourished me.”
– Stephen Hunter

Living in Baltimore, Steve tries to shoot three or four times a week at an indoor pistol range, where regular patrons recognize him but courteously leave him alone. His ultimate goal is to move somewhere he can carry concealed – if not Arizona perhaps Northern Virginia or Pennsylvania. But any move will require his wife Jean’s retirement several years downstream.

Steve deadpans: “She’s of Filipino descent, and when she gets angry I remind her that my people invented the 1911 to stop her people from chopping us to pieces.”

While writing his next novel (a WW II snip tale) Steve still yearns to run a comprehensive test of the Oswald rifle. “I’d like to have real-world snipers and big game hunters with some competent friends – people who have shot for blood and know what’s involved.” But the rifle and related artifacts are held by the U.S. government at the National Archives, and access appears unlikely.

So who shot JFK? You can find out what Bob The Nailer learned for the ridiculously low price of $26 at finer emporiums near you.

   K25-19169       $24.95

The MagPul® Enhanced Trigger Guard™ is a black anodized aluminum drop-in replacement for the AR15/M16 weapons platform. It features a shallow "V" shape for better use of gloves in tactical shooting or cold weather operations. It's non-folding and has rounded edges.

Aluminum Trigger Guard
   K25-12611      $19.95

Viking Tactics V-TAC MK1 Sling

Viking Tactics' V-TAC MK1 Sling is quick, instantly adjustable to improve your shooting position, allows shooting from weak-side shoulder, secures the carbine during handgun transitions, and allows hands-free movement in difficult surroundings.

Viking Tactics Sling for CAR-15
   K25-11961      $34.95
Adapter for any full-stock AR
   K25-11963      7.99
Viking Tactics Sling for FN-FAL/HK-91
   K25-11962      40.00

The Pressure Plug

Does your .22 LR insert move back and forth in your upper? Did you know that the very top of your lower receiver takes all the recoil of your .22 LR insert? You can eliminate those problems by inserting the pressure plug in front of your buffer. The front of the plug has a taper that allows you to open and close the weapon just like always.

M1A / M-14 Extended Mag Release

So THAT's how you grease that little S.O.B. (Slick-Operating Bolt, that is.) M-14/M1A Bolt Roller Greaser
   K25-18531      $6.75

M-14 Bolt Roller Greaser
   K25-21913      $37.50

"Battery Assist Device" for AR-15/M16

Developed from the experience of the MagPul® Team, the B.A.D. Lever™ is designed to improve the speed and efficiency of the AR-15/M16 by enabling the shooter to manipulate the bolt catch without moving away from the ready position.

MagPul B.A.D. Lever
   K25-27058      $29.95
The AccuWedge fits between the upper and lower receiver on your AR-15, removing excess movement. AccuWedge K25-19122 $4.95

The Gapper From Ergo Grip, a way to plug that annoying gap between pistol grip, frame and trigger guard on your AR. K25-11395 $2.95

The AR-15 Extractor Upgrade increases the tension on the extractor, pushing it deeper into the cartridge extractor groove. K25-19121 $12.95

Jerry Miculek’s three-chamber AR-15 Compensator fits threaded-barrel rifles and may be “clocked” for left- or right-handed shooters. Used by many top three-gun competitors. K25-11328 $49.95

Jerry Miculek’s AR-15 Compensator

TC–Accessories’ AR-15/M-16 Brass Deflectors are CMP/NRA approved for service-rifle competition. Now you can pile your spent brass at your feet instead of wasting time hunting it down. K25-12541 $19.95

Perma-Pin Firing Pin Retainer for M-16 and AR-15 replaces the standard cotter pin found in the bolt carrier to retain the firing pin (as in original Stoner rifles). Made of tool steel. No modification to gun required. K25-19927 $7.95

The K9 was developed by the Noveske Shooting team to address the problem with shooting off, through and around non-sturdy barricades. K25-11624 $49.00

Tactical Flashlight Holders

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring. K25-19460 $19.95

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for “flat-top” rifles equipped with low-mounted optics. K25-10379 $18.95

The Designated Marksman Scope fills the requirements of the law-enforcement officer, rifle shooter, and the big-game hunter who needs a quick sighting system at ranges of five to 500 yards. The “Dot in a Donut” reticle allows for fast, natural aiming. The shooter’s eye lines up the circle at close range, and the one-MOA dot gives accuracy at the longer ranges. Range estimation is straightforward by use of the circle out to 500 yards. Compact design, 30mm tube and bright illumination of the reticle are just a few of the many features of the DMS-1. Bright red illumination of the reticle adds to the quickness of the sighting system in day and low-light conditions. At one power it works well as a reflex sight and at longer ranges the four-X magnification gives increased accuracy.

Bushnell Trophy TRS-25 Ultra Compact Red Dot Sight

Bushnell’s Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell’s high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute of angle dot.

C-MORE SYSTEMS

C-More Systems sights feature a “Heads-Up Display” for an uncluttered, limitless field of view; a totally fogproof laminated single lens; and a positive locking screw for windage and elevation settings.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero. Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle K25-25374 $72.95
Scout Scope Mount for SKS Rifle K25-25373 67.95

90 Degree C-More Mount

You won’t believe how much this will decrease your times from initial sight picture and target transition. You’ll never lose your dot...and finding it has NEVER been easier! Turning your C-MORE (Railway or Slide Ride) 90 degrees and eliminating the rail mount will lower your dot by as much as 1” to the bore of your pistol...and lower is just going to increase your speed. And when you do torque your pistol, you’ll find the dot just that much easier. Designed by Bearcave Machining and offered by TACCOM, LLC.

A. Ruger MK1 K25-19535 $79.95
B. Browning Buckmark K25-19534 79.95

How do you make a Savage rifle even more accurate? Well, as the adage goes, you can’t kill what you can’t see, so you include a Nikon 3-9x40 BDC reticle scope, mounted and bore sighted. This unique reticle can be ballistically matched to your exact cartridge using Nikon “Spot On” Software. Coincidentally, the price of the New package is “Spot On” too.

See your favorite Savage dealer for details.
