**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# Dillon's Bill of Rights for Reloaders

**All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:**

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
  - 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
  - 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
  - 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
  - 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.
- Editor's Note:** The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered. We constantly strive to live up to his standards. Please let us know if we're not succeeding.

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-

disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **P84-62164** is **\$374.99**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **P84-13141**, are **\$21.99** each. Upper lock rings, **P84-13559**, are **\$7.99** each.

## MILITARY BRASS?

Eliminate the "Grunt Work" with  
Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	<b>P84-62124</b>	<b>\$23.99</b>
9mm Adapter	<b>P84-62168</b>	<b>17.99</b>

# Case Preparation Equipment

## Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator ^	P84-20675	\$84.99
CM-500 Case/Media Separator ^	P84-21045	\$52.99

### CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

### Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

### Limited Work Space?

Dillon's introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle.	P84-13804	\$9.99
Case (20 pc.)	P84-20255	149.99

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle	P84-13733	\$15.99
Case (20 pc.)	P84-20256	223.99

Handloading  
Takes the Sting  
Out of Shooting  
the Škorpion

## By Frank Jardim

When Czech engineer Miroslav Rybá began development work on the machine pistol that would be adopted by the Czechoslovakian Army in 1961 as the vz. 61 Škorpion, he chose the .32 ACP because its balance of small size and power were well suited to this early PDW (personal defense weapon) for troops whose duties made the carrying or use of a full-size submachine gun or carbine impractical. Instead of a seven- or eight-shot semiauto pistol as a sidearm, Czech tank crews, vehicle drivers, headquarters staff, and security officers carried the vz. 61's full-auto firepower in a belt holster only a little larger than that for a conventional pistol. The rate of fire was a speedy 800 rounds per minute which meant the bearer could pour the gun's 20-round magazine into the target in 1.5 seconds. What the .32 ACP vz. 61 lacked in ballistic power, it made up for in volume of fire. The Czechs made around 200,000 vz. 61s during the Cold War and licensed the design to the Yugoslavians too. Not surprisingly, the Škorpion seemed to end up in the hands of terrorist groups (i.e. Red Brigade, PLO, etc.) with agendas against the western nations.

The select-fire vz. 61 is very controllable and fun to shoot, but there are very few NFA registered guns in America. Recon Ordnance Company ([reconord.com](http://reconord.com)) recently offered several semiautomatic pistol variants in .32 ACP, .380 ACP, and 9mm Makarov, manufactured by Czech Small Arms (C.S.A.). Aside from the lack of a rate reducer, folding wire buttstock, and full auto selector, they are ringers for the real thing. Being something of a purist, I wanted to shoot one in the original .32 ACP chambering.

To my surprise, not only was .32 ACP factory ammo difficult to come by locally, it was darn expensive too, costing more per round than vastly larger .45 ACP or 9mm! One of the reasons I first bought my Dillon RL 550B was so I wouldn't fall victim to the economic implications of ammo supply and demand. Once you invest in .32 ACP brass (excellent Starline Brass costs 18 cents a case), your subsequent reloads can cost as little as 11 cents a round if you buy your cast bullets. If you cast your own bullets from salvaged lead, your price per shot drops to a mere 4 cents for primer and powder.

I got on the task of setting my RL 550B up for the

diminutive .32 ACP. It's the smallest cartridge you can load on that press. Some powder charges are so small, I had to substitute an extra small powder bar in the measure. Otherwise, the conversion required no more than the usual shellplate, locator pins and powder funnel. Since this is a straight-walled case, reloading dies with a carbide sizer are the only sensible way to go to save yourself the chore of lubing every tiny little case. They are hard enough to hold onto already without being slippery. Redding's titanium carbide die set is excellent and built to last several lifetimes.

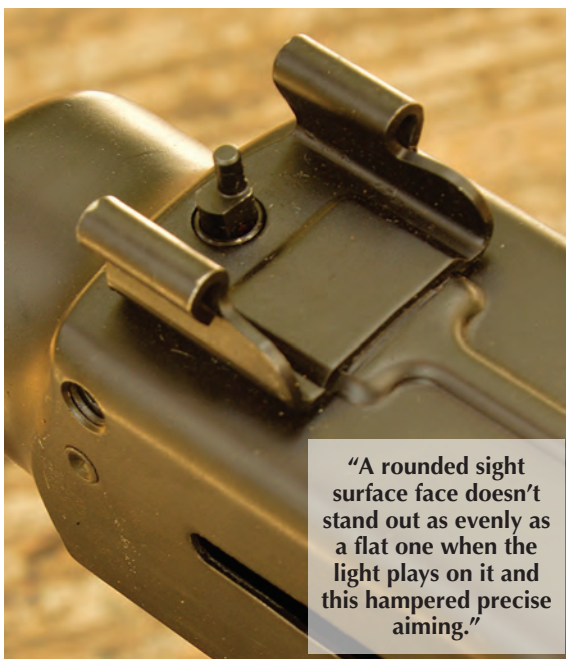

I started my handloading research by testing some factory ammo to get a performance baseline. The Škorpion wouldn't feed hollowpoint reliably, but never had a problem with ball ammo. I also learned the sights don't lend themselves for shooting this pistol with an arm's-length pistol hold. The rear sight is flip adjustable for 75 and 150 yards but the notch on the 75-yard sight

is so narrow, it barely lets a sliver of light show on either side of the front sight blade. It was clearly designed for use with the original wire buttstock that puts your eye about 3.5" behind it for a nice sight picture. The front sight is an off-center, round post that screws up and down to adjust windage and elevation. A rounded sight surface face doesn't stand out as evenly as a flat one when the light plays on it and this hampered precise aiming.

At 25 yards, rested, from the bench, my average five-shot group with Sellier & Bellot ([sellierbellot.us](http://sellierbellot.us)), 71-grain FMJ was 2.36". Out of the vz. 61's

4.6" long barrel, average velocity was 1,072 fps measured 15" from the muzzle with a Competition Electronics Pro-Chrono Digital chronograph. Actual bullet weight was 73.4 grains with a diameter of .3075". That velocity is on the zippy side for .32 ACP. Accuracy was also better than I expected with the sights. The military two-stage trigger was light at 4 pounds with only a little creep. The vz. 61 was unusual among machine guns of its day because it fired from a closed bolt, which is inherently more accurate than open-bolt designs. This semiauto is closed bolt also.

To keep my reloading costs low, I chose to cast bullets using lead wheel weights. Mold choices are limited, but Lyman makes a classic, 85-grain round nose with a lube and crimping groove that looked perfect. You never know what's really in any alloy unless you

test it, and too soft a bullet can quickly lead up a bore. Using a SAECO Lead Hardness Tester, I'd already determined it had a Brinell Hardness (BHN) of 8. That is slightly softer than the usual BHN 9 rating for wheel weights, but still fine when used with SEACO Gold bullet lube. I never had any leading in the bore with this combination. Actual average bullet weight with my alloy was 83.26 grains. The nice thing about small bullets is your lead supply goes a long way. After my mold got to temperature, I had a small mountain of bullets cast in what seemed like no time. Slugging the barrel showed .303" lands and .310" grooves so I set up my SAECO Lubri-sizer to .3115", a standard cast bullet diameter for this caliber.

With my lubed and sized bullets, I was ready to start working up a load. In Ken Waters' "Pet Loads" article from the May 1984 issue of *Handloader Magazine*, he'd had great results with this Lyman bullet using a near-maximum charge of W231 powder for an average velocity of 821 fps. His bullet alloy was heavier than mine at 91 grains, and the Walther PP he tested had a shorter barrel of 3.3", but one can't always find an apples-to-apples comparison. Because Waters was so careful in his research, I believed it a sound starting point for planning my load development.

Overall length is critical with this load as there's not much room in the magazine.

The author found it necessary to use Dillon's Extra-Small Powder Bar (top).

This little cartridge is very sensitive to powder-charge weights. A tenth of a grain is a big deal. Great care needs to be taken in calibrating your powder measure and if ever a good electronic scale is in order, it's here. I weighed 10 charges to set the measure, picking a charge weight that was just enough to get the scale readout to pause for a second or two after stabilizing, and then tip over to the next tenth of a grain. Here's an example of why that's important. Say you wanted the powder measure to throw a 1.0 grain charge. By this method, you know your charge is closer to 1.00 grains than 1.09 grains. With .32 ACP, that makes a difference.

Nothing more than a light roll crimp is really needed with this round because it headspaces on the rim. I found slightly higher velocities with roll-crimped loads. The crimp didn't seem to effect accuracy, nor did it flatten out after firing. Wondering if the crimp was scraping the bullet base down a few thousandths as the latter was propelled from the case, I pulled a bullet and measured it. There was no dimensional change in bullet diameter at all.

My cast bullet load with W231 chronographed at 990 fps with average groups from the bench of 3.4" at 25 yards. Adding a tenth of a grain in powder added nearly an inch to the group size but only another 25 fps so I see no gain in pushing this bullet and powder combo beyond 990 fps. Its accuracy was not quite as good as the S&B factory ammo and I hoped to do better.

Tests with Bullseye powder based on data in the *Lyman Reloading Handbook* yielded my best load, producing average groups of 2.14 inches at an average velocity of 915 fps. This exceeded the S&B factory load in accuracy and will be my load of choice for the vz. 61 until such time as I die from joy riddling soda cans with it.

# HI-POINT

## FIREARMS

Hi-Point Carbines and Handguns are striker-fired blow back action firearms that are suited for every budget. With extreme reliability and accuracy they are ready for any shooter.

Handguns and Carbines are chambered in .380Auto, 9mm, .45Auto, .40S&W and 10mm\*, to meet any of your shooting needs.

# Mr. Bulletfeeder®

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collar to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

### Mr. Bulletfeeder Set Up in One Caliber

## On the Cover

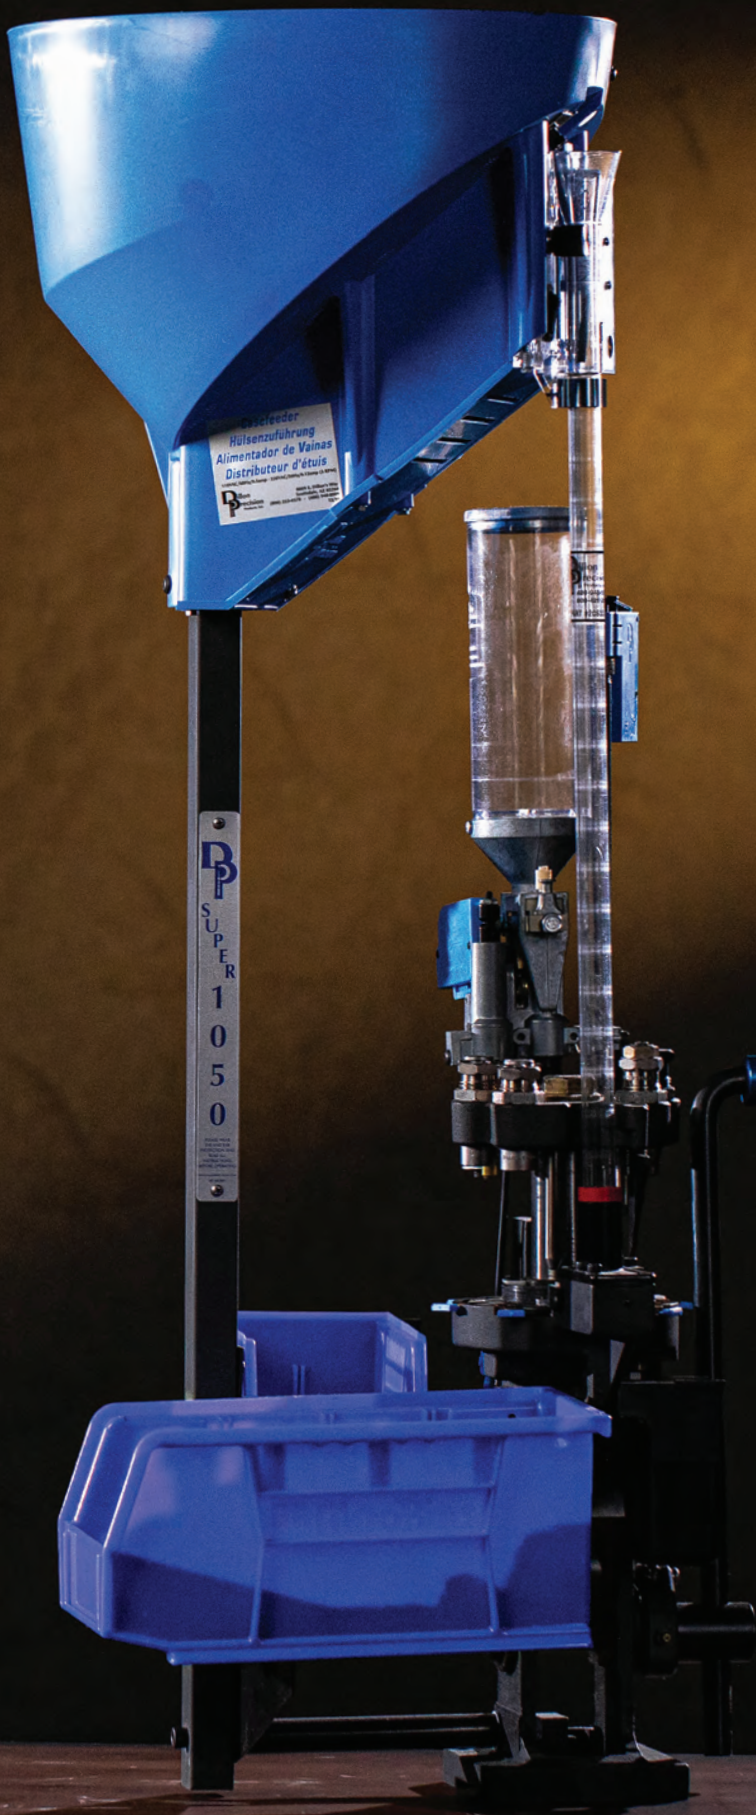

Gracing this month's Blue Press cover, as well as the cover of our 2021 calendar, is Toni McBride (@toni\_mcbride) an LAPD police officer and competitive shooter for Taran Tactical Innovations.

We admire Toni as a strong woman who has chosen to protect and serve others as a first responder. Ayn Rand once said, "The question isn't who's going to LET me; it's who's going to STOP me." Having had the pleasure of working with Toni, we're pretty sure the answer to Ayn Rand's question is: **NOBODY.**

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls for each ear
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

## Bullet Seating Die (Pistol)

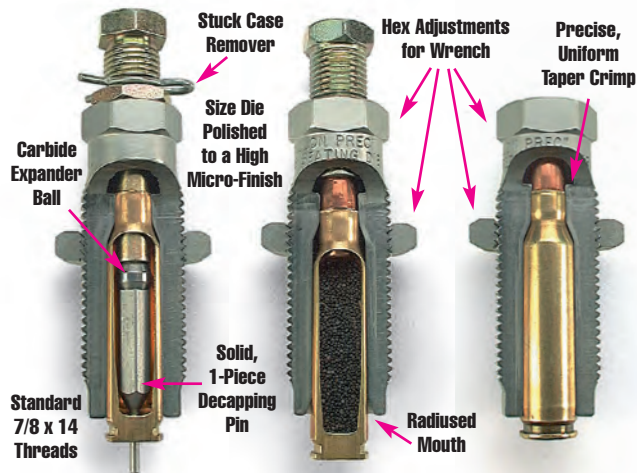

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon's double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Package of 10	P84-21528	\$7.99

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksmen.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

# BL 550<sup>^</sup>

## Dillon's Basic Loader

**\$319<sup>99</sup>**

**P84-15399**

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:

Strong Mount P84-22051 \$84.99

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of

versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers. The additional toolheads are \$28.99 each, or \$26.99 each if you

buy three or more – if you load for several rifles it's a no-brainer! Once you get your dies adjusted, you'll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it's easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

### AUTO PRIME SYSTEM<sup>^</sup>

**P84-16627**

**\$104.99**

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system.

**P84-20302**

**\$30.99**

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency.

**P84-20251**

**\$114.99**

### OPTIONAL MAGNUM RIFLE POWDER BAR

**P84-21353**

## If You want to Become a Gunsmith You need to read this book!

### LEARN HOW YOU CAN BECOME A CERTIFIED GUNSMITH!

*Becoming an American Gunsmith* shows you a path to follow to become a Certified Professional Gunsmith, without having to give up your lifestyle, income, leave home, or spend tens of thousands of dollars attending a campus based school.

Mr. Kelly details how mastering the Design, Function, and Repair (DF&R) training concepts revealed in this book will enable you to maintain, repair, build, and customize firearms as a Certified Gunsmith.

This information will provide you with the ability to follow your passion of working on firearms and ensure your personal freedom and financial security. Included:

- How to set up your shop
- Numerous suggestions and resources to help you establish a successful gunsmithing shop.
- What tools and equipment are *really* necessary

Read this book and learn how you can be a Certified Gunsmith, protecting and participating in the ongoing history of firearms in America.

## Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

# Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come

with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

<b>P84-16306</b>	<b>\$45.99</b>
------------------	----------------

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

**Dillon's "Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**P84-97126 \$179.99**

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**P84-21044, \$74.99 each**  
**Three or more, \$68.99 ea.**

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

**P84-17950 \$52.99**

**Dillon's 1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

**P84-10842, \$12.99 each**  
**Two or more, \$11.99 ea.**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in

combination with a spare parts kit for your machine.

## Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with

the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.
"Square Deal" Bin	P84-13756	\$2.99	\$15.30	\$24.84

"SL 900" Bin	P84-17125	10.50	56.94	106.92

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Description	Stock #	Each	5 ea.
Small Utility Box	P84-13636	\$2.99	\$12.45
Large Utility Box	P84-17195	5.75	23.99

# Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

P84-19972 \$39.99

**“I’d give up  
my gun  
before I’d  
give up my  
flashlight!”**

**ROB’S  
ON  
POINT**

# WHY I'D CHOOSE MY LIGHT OVER MY FIREARM

**By Rob Orgel, Photos by Offensive Marketing Group**

You're in a dimly lit hallway and a silhouette menacingly approaches. WHO is the dark silhouette? Is it your son coming home late? An old buddy, say... a former roommate who still has a key? A neighbor who had a few too many and stumbled into the wrong house? Or, is he a predator with genuinely evil intent?

**HAVING A FLASHLIGHT  
ENABLES YOU TO  
IDENTIFY WHO'S IN  
YOUR HOME AND IF IT'S  
A POTENTIALLY  
LETHAL SITUATION OR  
JUST AN  
EMBARRASSING  
MISUNDERSTANDING.**

Having a flashlight enables you to identify who's in your home and if it's a potentially lethal situation or just an embarrassing misunderstanding. My flashlight gives me the ability to positively identify a threat and gain control of the situation. That's why my light is more important to me than my firearm.

A firearm provides the ability to take life, but not to discern "friend or foe." This can result in a tragedy and a life-changing aftermath that could have been avoided. Choose a firearm over a flashlight? This is what can happen.

The bright side? Use of a powerful tactical flashlight can also paralyze an enemy caught in its beam! Merely illuminating a potential suspect with a flashlight often seizes the assailant or sends him into immediate retreat. Put yourself in his shoes: He's obviously aware he doesn't belong where he is, he's hoping not to get caught, suddenly he's looking at a bright light, not knowing who's behind it and whether or not they're armed. He's lost control of the situation and likely has also lost the will to fight. And if he hasn't, your ability to see enables you to elevate your level of force based on the enemy's actions.

So, what if the "threat" isn't necessarily the guy with a knife and a ski mask? Let's not forget the perils of your nearby supermarket parking lot. This is a known danger area for all of us. I've used the beam from my tac light many times to stop a backing-up car from hitting me or my family. It has also illuminated my path crossing the street to alert drivers who can't see us. Sure, a shady character will likely stop approaching me when he's looking into the high beam of my tac light, but let's consider how often the typical driver isn't really paying attention behind the wheel. Indeed, this may

be one of the greatest "real world" threats to life and limb we can avoid by using that flashlight.

Why choose between your flashlight and your weapon? In a perfect world, we don't have to give up either – instead, we can multiply them! Consider the benefits of both a weapon-mounted and a handheld light. You can use the handheld light to search and identify potential threats, and should you need to deploy your firearm, you can use the weapon-mounted light. There are several techniques to deploy the firearm and a handheld light, but testing has shown that trained operators used a weapon-mounted light more effectively.

### **Considerations**

What is the likelihood you're going to need to deploy your firearm versus your flashlight? You're much more likely to need your flashlight on multiple occasions and it's highly unlikely you're going to need to deploy your firearm. Day or night, you might need a flashlight in a parking garage, during a power outage, or in any poorly lit area. If I need to squint, my flashlight is already out!

**Draw!** We all do proactive holster work with our firearm, refining our technique and training with the ideal of sub-one-second draws. We ought to apply the same practice to deploying our flashlights. The quicker you can identify a potential threat, the more time you have to respond by drawing your firearm if necessary.

**Op Check!** How often do you check your weapon? How about your flashlight? Checking the operation and battery status of your flashlight should be part of your everyday procedure, just like checking your firearm.

**MY FLASHLIGHT GIVES ME THE ABILITY TO POSITIVELY IDENTIFY A THREAT AND GAIN CONTROL OF THE SITUATION. THAT'S WHY MY LIGHT IS MORE IMPORTANT TO ME THAN MY FIREARM.**

### Tactical Light Selection Criteria

**Size:** Just as you would select a firearm that's of an appropriate size to carry every day without limiting its capability, you should select a tactical light with the same consideration – small enough to carry, powerful enough to do any job required of it.

**Operations:** Most tactical lights have “high” and “low” settings. The low setting is administrative, i.e. finding your wallet in your truck or something in your glovebox. The high setting is for identifying and (hopefully) seizing a potential threat. It's important to be able to toggle between “low” and “high” single handedly with your “off” hand, leaving the “on” hand free to draw your firearm. The light should default to the high instead of the low setting. A lot of lights offer a strobe option if you're a fan.

**Activation:** The ideal light should have a temporary- or constant-on option that can be activated with one hand. For example, if the button is temporary only, it makes it difficult to set the light down and use both hands when necessary, and even a light press can become tiresome over time.

**Testing:** We're all guilty of reading the box and being impressed by the number of lumens advertised. Purchasing a light based only on the number of lumens leaves out a lot of info that the packaging may not tell us. Other things to look for include the primary and secondary cone of light or “field of view” offered. Like shotgun chokes, different lights are appropriate for different jobs. On my carbine, I want a weapon-mounted light that's very bright with a narrow cone that enables me to ID and engage targets at 100-200 yards that fit the role of a carbine in low-light situations. On my pistol, I want a wide cone that often shortens range, but increases field

of view as would be needed for a defensive shoot. For a handheld light, I'd use the same methodology depending upon how I want to use the light.

**Effective Range:** At what distance can I positively identify threats that are somewhat camouflaged by the environment vs. merely see the reflectors of a vehicle? Testing is the only way to find out how your light will perform.

**Penetration:** If I shine a light at a bush and I'm able to see through the bush to what might be behind it is more befitting a flashlight that's capable of helping me identify a threat than a light that only enables me to see the bush.

**Light vs. Light:** Consider that your opponent might also have a light. In that situation, a weak light serves only to give away your position. Would you rather have a weak light or a strong light? Yeah, me too.

### Parting Shots

In a dark room, if you flick the lights on and off, you can't see anything. Some thing happens after the muzzle blast from your first shot. A flashlight helps you power through the situation to reassess and reengage if necessary.

**The moral of the story:** We need to seek new knowledge and techniques now and test them so that we may survive or fight, whatever that might mean to you.

*About the author: Rob Orgel is a USMC veteran who served in Iraq and Afghanistan. After his service he worked as a military contractor and was responsible for training specialty teams at the US Embassy in Baghdad, Iraq. Since then he has trained military and law-enforcement snipers as well as civilian precision-rifle competitors. He is the founder and chief instructor of Emergency Response Tactical, a company that provides firearms, self- and home-defense training for all levels in Phoenix, Arizona.*

# 5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

## "Plan B" Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster<sup>▲</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

# Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

# HYSKORE

## Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rack will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rack also means that two or more racks can be connected together and reconfigured not only to give each gun its own "special home," but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16" threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

P84-10208 \$19.99

## Hornady Security Dehumidifiers

Absorb humidity and prevent rust or mildew in gun safes or other enclosed areas.

Moisture-control crystals change color when unit needs recharging. Recharge by plugging into 110V electrical outlet.

P84-66702 \$19.99

Protect your valuables against rust and corrosion.

When the moisture control crystals turn pink, recharge unit by placing it in the oven. Unlimited recharges ensure a lifetime of use.

P84-66701 \$19.99

## DESI®PAK Desiccants

These 532 gram DESI®PAK desiccants absorb moisture better than silica gel. It's an industrial grade material that exceeds the requirements of Mil Spec MIL-D-3464E. Now available in smaller packages for other applications (ammo cans, long-term storage containers, etc.).

## Dillon Teams Up With TechwearUSA

In response to everyone who has been asking us for Dillon Precision shooting jerseys, we've teamed up with **TechwearUSA** – Your Official Provider of Custom USPSA Gear!

The TechwearUSA AirFlex (\$70) is the ultimate performance layer and their lightest weight jersey. The TechwearUSA Premier Polo (\$95) is made of proprietary Techstatic fabric and is the ultimate competition polo. From its classic cut, added length to make sure it stays tucked in, fold-over collar, zipper front and side panels made from extra breathable mesh, every detail of this garment has been thought through to help you look, feel and perform at your best.

To order TechwearUSA's Dillon Precision men's and women's shooting jerseys, go to [techwearusa.com](http://techwearusa.com). By the way, the "USA" in TechwearUSA signifies that their apparel is MADE HERE!

**By Richard Bhella**

“What happened on October 3rd?”

This was a teaser question we sent out to action rifle competitors across the Southwest US. The answers we got were...colorful. The debut of the Mickey Mouse Club? The OJ acquittal? Mean Girls Day was a new one on us.

For students of history, the answer is that October 3, 1990 was the date the Deutsche Demokratische Republik – Communist East Germany – ceased to exist. It was the day the West could finally declare victory in the Cold War.

Fast forward 30 years and the weapons of the Cold War now sit in the backs of gun safes, diligently cleaned and oiled but with few opportunities to be fired in earnest. This was the motivation behind the creation of a new action rifle competition...Red Oktober: Cold War.

Inspired by the original Red Oktober Kalashnikov match (run in Utah by our friend Brian Nelson), Red Oktober: Cold War (ROCW) was conceived as a competitive event for all Cold War-era rifles. ROCW was hosted by the Rio Multigun team at Rio Salado Sportsman's Club in Mesa, Arizona on October 3, 2020.

### The Rules

Equipment divisions for this match were designed to be inclusive, but almost all required traditional iron sights. There was a Combloc Open division (that permitted optical sights for those too old to see irons – or

too young to know how they work), but the vast majority of competitors entered one of the following divisions:

- **Combloc Irons:** A Cold War-era Warsaw Pact/Eastern Bloc rifle with iron sights and 30-round magazines only.
- **Free World Irons:** A Cold War-era NATO/Western Bloc rifle with iron sights and 30-round magazines only.
- **Battle Rifle Irons:** A Cold War-era battle rifle in a battle rifle caliber, with iron sights and 20-round magazines only.

Recognizing that not everyone owns a traditional AK-47 or AR-15, the ROCW rules allow folks to participate by simply bolting a set of iron sights onto their modern flat-top

rifle. The essence of the competition is not in the historical correctness of the guns, but rather in the challenge of making rapid, accurate hits on practical targets at realistic combat distances using battle worthy

**Chris Gotie and his  
Spanish CETME  
battle rifle.**

# COLD WAR IN THE HOT DESERT

iron sights – an important skill for warriors on both sides of the Iron Curtain.

## The Stages

This inaugural ROCW match consisted of seven action shooting courses of fire that were shot in just one day. Stage names were inspired by Cold War icons like Hill 937 (the infamous Hamburger Hill) and the Fulda Gap (where NATO expected Soviet tanks to initiate World War III).

Each stage presented its own unique combination of challenges, with competitors having to master quick movement, close-range rapid fire and longer distance precision shooting at targets set in the beautiful Sonoran Desert terrain.

The host range is one of the World's foremost action shooting venues and the organizers were able to draw on an assortment of props and equipment that most other matches can only dream of. Examples included moving and disappearing targets, shooting towers, a tank that the competitor blasted with a

bazooka, and an actual helicopter fuselage from which long-range reactive targets were engaged on the stage aptly named "Yak-24".

The farthest targets in the match were a pair of full-size steel silhouettes about 300M away. While certainly not easy, all shots were achievable with iron sights – I completed the match clean (no misses, no penalties) with my short-barreled Krinkov AK despite it having less of a sight radius than some pistols.

## The Gear

As with many major matches, there was a generous prize table. Unlike most other matches, the prizes at ROCW were distributed by random draw as competitors rotated through a demo area. In addition to saving time and ensuring almost everybody walked away with at

ROKW competitor  
TJ Meisaichi with  
an M16A1.

least their entry fee back in prizes, this approach meant that competitors did not feel pressure to bring their most competitive, race-ready rifle to the match. Instead, they did what we hoped they would do –

Holden Pattengill  
shooting his M1  
Garand in Free  
World Irons division.

Old vs. New,  
West vs. East.

Inside the  
helicopter on the  
Yak-24 stage.

they blew the dust off their old war horses and gave us the treat of seeing them in action.

Some examples of the rifles used at ROCW that are rarely seen at other action-shooting competitions included an M1 Garand, a Spanish CETME and an assortment of SKS and M1 carbines. As expected, AK and AR rifles were seen in abundance, but with some twists...at least one M16A1 was brought out to play, complete with frequent use of the "happy switch" (yes, full-auto fire was allowed at this match). From talking with competitors, I suspect ROCW is just the excuse many are looking for to buy a new and interesting Cold War-era rifle.

It was not just the firearms that echoed the Cold

War – many of the participants looked the part too. An assortment of Cold War themed clothing was on display, with one competitor shooting a Springfield M1A (semiauto M14) while wearing the uniform and web gear he was issued by the US Air Force during the Cold War.

While we were cautiously optimistic that the ROCW concept would get some traction, we were still blown away by how quickly this inaugural match filled up. During and after the match, feedback from participants was overwhelmingly positive, and competitors and sponsors strongly urged us to make the next match even bigger. Plans are already in motion to run ROCW over two days during the first weekend in October

Ethan Jones shooting an AKM in Combloc Open division.

TJ Meisaichi shooting a prop bazooka on the Fulda Gap stage.

Author Richard Bhella presenting the High Cold Warrior trophy to AJ Anthony. AJ also won first place in Combloc Irons division.

2021, with more stages and more capacity so everyone who wants to shoot in the match should be able to get a slot – mark your diary now and keep an eye on the [riomultigun.com](http://riomultigun.com) website or Rio Multigun Facebook page for the latest news.

### Sponsorship & Awards

ROCW could not have happened without the support of sponsors who believe in this new match format. Local AK manufacturer Lee Armory stepped up as overall match sponsor with the donation of several amazing custom rifles that were distributed by random draw (in addition to the great random prize bag each competitor got). Other sponsors, Zastava and LUTH-AR, donated rifles and retro AR-15

uppers that everyone salivated over until the last one was handed out. Generous sponsorship also came from XTECH, KE Arms, ProMag-Archangel and We Plead The 2nd.

The award ceremony saw some beautiful laser-cut trophies going to top-placed shooters in each equipment division and culminated in a special award for the competitor who placed highest overall using an iron-sighted rifle – High Cold Warrior. The winner was shooting – drumroll please – an AK-47. Believe it or not, the next highest-placed iron-sight shooter was running an AR-15 and came in just 0.4% behind. The Eastern Bloc prevailed in 2020...we can't wait to see which side wins the Cold War in 2021.

## Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means that

the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO changes all that by simplifying scope alignment in four easy steps. Accurate and intuitive, this timesaving instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy. Level-Right PRO **P84-21777 \$69.99**

## The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin. HMB Bolt **P84-66680 \$99.99**

Young Manufacturing's **Upper Receiver Vise** holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2. YM Upper Receiver Vise **P84-66679 \$34.99**

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch. # Real Avid Gun Tools & Cleaning Gear

Smart Mats™ are cleaning mats on steroids. The no-slip backed Spadded mat features an oil-resistant surface. It allows you to properly clean your gun without ruining the kitchen table and is large enough to handle field-stripped guns. The ingenious magnetic parts tray ensures your pins, screws and springs are never lost again. This is real world gun cleaning taken to the next level.

AR-15 Smart Mat	P84-29041	\$24.99
1911 Smart Mat	P84-29040	19.99
Handgun Smart Mat	P84-29042	19.99

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

P84-29033 \$34.99

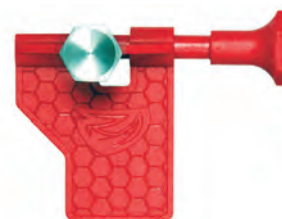

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

P84-29032 \$39.99

The Chamber Boss – AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

P84-21778 \$29.99

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

P84-29034 \$9.99

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

P84-29039 \$29.99

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

P84-29036 \$9.99

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

P84-29037 \$9.99

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

P84-29038 \$12.99

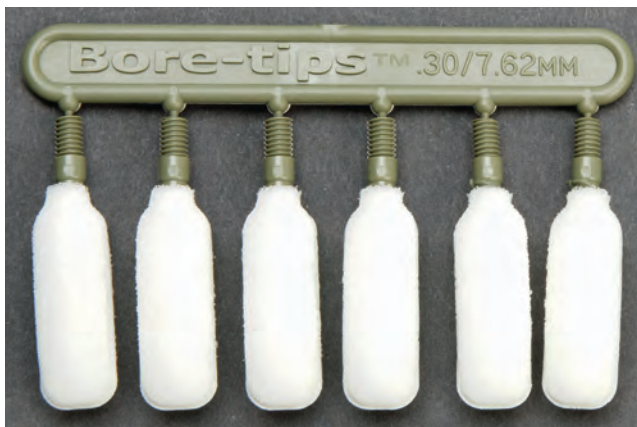

## Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

P84-21776 \$79.99

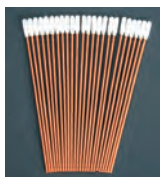

## Swab-its A Swab for Every Job!

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	P84-15310	\$4.98
.243/6mm (6 ea.)	P84-15311	4.98
.30/7.62mm (6 ea.)	P84-15312	4.98
.357/9mm (6 ea.)	P84-15313	4.98

### The HYSKORE Degreezer

consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezer (rather than returned to the bottle) with the cover in place so that it's ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

P84-10209 \$15.99

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P84-19237 \$21.99

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P84-19234 \$21.99

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P84-11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. P84-11645 \$18.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P84-11652 \$25.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. P84-11646 \$11.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

P84-11676 \$19.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack P84-11674 \$14.99

**TW-25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe  
1.5 Ounces

P84-15732 \$12.99  
P84-15731 17.99

**66 Blue Press**

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

## Sweet's 7.62

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's.

## NEBO®

The NEBO® INSPECTOR RC<sup>▲</sup> is a powerful 360 lumen rechargeable, waterproof (IP67) penlight. The INSPECTOR RC features FLEX-POWER and is equipped with a removable steel clip, 4x zoom and 3 light modes (high, low, strobe) and Soft-Touch Technology, which provides momentary operation when the light is off, with the slight touch of the button.

### 3 LIGHT MODES (Rechargeable Battery)

- High (360 lumens) – 1 hour/125 meters
- Low (120 lumens) – 3 hours/70 meters
- Strobe (360 lumens) – 25 minutes/125 meters

### 3 LIGHT MODES (AAA Batteries)

- High (100 lumens) – 1 hour/90 meters
- Low (30 lumens) – 4 hours/50 meters
- Strobe (100 lumens) – 25 min./90 meters

# Shoot Out Targets

The Alpha Target is Shoot Out Targets' Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3" in diameter and 1/2" thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43" tall and 22" wide when assembled.

### By Peter Caroline

I've been collecting (or more accurately, accumulating) guns since I was 10 years old. In the early years, when I had little or no income, the process of acquiring a new gun usually involved trading an earlier acquisition, and later regretting it. In my twenties, I got involved in sports car racing and sold off some real treasures (90-percent condition Spencer carbine, cased Ordnance bomb Luger, mint 1930 commercial Mauser broomhandle, Danish Bergman Bayard, etc.) in order to finance a race car, a very much modified 1958 Saab 750 GT. Not long after, having a grand old time scaring myself witless, I came to the realization that I would not be the next Stirling Moss, and started rebuilding my shattered collection.

Fast-forward about 30 years...my wife and I were living in a suburb on Boston's North Shore, with two kids having left the nest. We'd had it up to here with Massachusetts politics, taxes, gun restrictions and rotten weather. Time to move to Arizona. To lighten the weight of my moving shipment, I parted with a number

of guns and all my ammo and components. I did, however, add one gun to my collection two months before the move...a very nicely preserved 1941-vintage Winchester Model 63 .22 semiautomatic rifle, complete with a Weaver Model 29S scope of the same vintage. I'd found it at a local gun shop. It called out to me, and the price was right.

The Winchester Model 63 was to .22 semiautos what the Marlin 39A was to .22 lever actions...designed and built to meet the expectations of a more mature and financially secure shooter. Its predecessor, the Model 1903, was Winchester's first semiautomatic. It had its own proprietary cartridge, the Winchester .22 Automatic, one of the first .22 cartridges using smokeless powder. The .22 Long Rifle cartridge, however, became the market standard, and Winchester finally followed suit in 1933 with the .22LR Model 63. It had the distinctive appearance of its predecessor, with a 10-round tubular magazine located in the buttstock, and the cocking rod extending from the front of the forearm. The last Model 63 was featured in Win-

# Lost and Found

chester's 1958 catalog, although some "special editions" were turned out later.

My Model 63 turned out to be a superlative shooter. The period-correct scope was clear and right on, requiring no adjustment, and the gun performed flawlessly with Federal Lightning ammunition, so that was all I ever fed it. The gun was, in every respect, the perfect definition of "a keeper." At one point, however, in a fit of madness or misplaced generosity, I swapped it to a good friend and shooting buddy for some weird shotgun. Don't ask; sometimes I do things that even I don't understand.

More recently, I decided to cash in on the current gun frenzy by selling a substantial portion of my collection. My friend and fellow Shootist, Bobby Tyler ([tylergunworks.com](http://tylergunworks.com)) stopped by, loaded 100-plus guns into his trailer, and headed back to Friona, Texas. Among those were a significant number of guns chambered for .223 and .308, which left me with mass quantities of .223 and .308 ammo...far more than I'd ever need.

Several weeks later, I was chatting with my friend to

whom I had traded the Model 63. He mentioned the current scarcity of certain popular calibers of rifle ammo and asked if I had any ammo I'd like to sell. I replied that I had mass quantities of certain calibers, and I might actually make him one hell of a deal, but first...did he still have the Model 63? He couldn't remember. Like me, he is of a certain age and has "too many guns." In addition, he has his demons (Vietnam, Airborne, Bronze Star, Purple Heart, etc.), so the presence and current location of a .22 rifle might not immediately leap to mind. Fortunately, the Model 63 was found tucked away in a safe place, and the deal was consummated, with two shaky oldsters lugging steel ammo boxes up from their subterranean storage.

Several days later, I took the Model 63 out to a spot in the desert that we use as a range and set up some targets at about 30 yards. I didn't know if the scope had been "adjusted" while under different ownership. Apparently not; the 10-round groups were all perfectly centered and tight. This gun is a keeper, for real this time. And the circle is complete.

# Sporting Shotguns in the Defensive Role

By Oleg Volk

Shotguns are common in America. Inexpensive, powerful, and simple, 12 gauge pumps are ubiquitous, and other types and bore sizes aren't far behind. Generally less restricted by regulations than rifles or handguns, they are even available in locations under severe gun control. It's not surprising that more than a few have come out of the closets and attics this year for riot-control duty. Potent as they are, sporting and hunting models could use a few tweaks for best martial results.

Some upgrades can be done at home with no tools. For example, many pump and semiauto shotguns can be fitted with shorter barrels just swapped in during field-stripping. 18 inches is the minimum legal length, and that's plenty to realize the full shotshell ballistic potential. Shorter barrels are easier to swing in a confined space, and cut-down guns are easier to control with one hand if necessary. Buying a shorter barrel can be cheaper than hiring a gunsmith to shorten the existing one, provided short barrels are available for your weapon. Cutting a barrel requires careful crowning, replacement front sight or bead, and usually loses chokes. For home defense, even in rural areas, cylinder bore works fine to 30 yards with flight-controlled loads like Federal 00 buckshot, and past 50 yards with good quality slugs. The statistical probability of self-defense beyond that range is very low. For semiauto shotguns, reducing the barrel length may require opening up the gas port, but that's not always the case. Especially with higher-powered defensive loads, guns like the 20 gauge Hatfield hunting smoothbore shortened from 28" to 18.5" did not require it, being optimized for lower recoil with buck and slug rather than perfect functioning with underpowered promotional birdshot.

Improved sights are the next step. Slugs don't scatter, and premium shotgun loads at indoor distances spread but mere inches. While brass beads can be adequate, they work poorly for distance. Depending on the light direction, the highlight on the bead shifts, changing the perceived center. Fiber optic beads are easier to see, center more reliably, especially when coupled with drift and drop adjustable rear sights like the HiViz example used on the Hatfield. Instead of slugs impacting the very edge of the silhouette at 15 yards, these sights permitted reliably centered hits at 50. Ghost rings work best when the front sight is prominently illuminated. Red or holographic dot sights speed aiming even more, permitting head-up mounting and easier leads on moving opponents. They have, after all, descended from fighter aircraft sighting systems!

Low capacity is the traditional downside of shotguns. While not much can be done about single or

double-barreled models, tube magazines on many models are user-upgradable. Steel or aluminum tubes work, but carbon fiber extensions like the Briley tube on the Auto 5 save weight and allow better balance. Unlike the extra-long model shown, the best defensive extensions stop just short of the muzzle to minimize the possibility of damage from bumping into something. Higher capacity permits an easier switch to slug: the tube may be left one round short, so a shell can be placed into the tube and then hand-cycled into the chamber. Speaking of hand-cycling: an extended charging handle is often a worthwhile addition, not so much for the ease of loading as for the extra bearing surface for getting a stuck casing out in the event of a malfunction.

By contrast, enlarged safety buttons or levers are a matter of taste. On some guns, they might stick out enough to get pushed by accident. Swapping plastic safety button or slide for metal is always recommended: I've seen too many broken.

Muzzle brakes are a mixed bag as well: they reduce muzzle rise and recoil, provide a measure of protection for the muzzle, some may be used as impact devices to make up for the absent bayonet. However, installing brakes on barrels without external threading is difficult, and they add length and weight to the front, sharp prongs catch on gun case lining. Some designs channel the blast to the back, making it even harder on the shooter's ears. A soft recoil pad is probably more useful, reducing the wear on the shoulder during extended training sessions, and preventing flinch.

Knowing your target is a basic safety rule. Most gun-fights happen in low light. A flashlight is essential, but few sporting guns have rails on the forend. Clamp barrel or rib mounts allow offset flashlight installation, with pressure switches running to the forend. This is where short barrels come into play again, obscuring less of the light pattern.

Finally, just as handguns need holsters, shotguns need slings. A basic two-point sling allows stowing the weapon without setting it down. Wrapped around the support arm "hasty" style, a sling steadies the gun for longer shots and improves control of the muzzle rise. That works great with autoloaders, but can cause short-stroking on pump shotguns – try before relying on this technique in a fight.

In the end, doing a full-makeover on a sporting shotgun can cost as much as buying a dedicated defensive model. In restrictive jurisdiction, it may be worth doing. If the makeover is partial, such as just adding a longer tube of better sight, it can produce a more effective weapon for a small investment.

# C-More Systems

RTS2R

Railway

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

## Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	P84-25374	\$79.99
Scout Scope Mount for SKS Rifle	P84-25373	78.99

# ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag<sup>®</sup> (ORB)

featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease.

Whether you're going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: Can remain in bag as a pocket or extend up through the zipper to fit longer barrels
- Available in black or coyote brown
- Dimensions: 28" x 7" x 6"

# AMMO SHORTAGE? CHANGE CARTRIDGE!

By Duane Thomas

One result of the perfect storm of COVID-19/riots/election year that attended 2020, combined with the fact 9mm Parabellum has become America's go-to self-defense handgun cartridge, has been a huge increase of the price of 9mm, both in factory-loaded ammo and reloading components, specifically small pistol primers. Tales of 50-round boxes of no-big-deal, 115-grain factory 9mm hardball that would have sold for 12 bucks nine months ago now costing \$40 reach my ears. Do the math, that's \$800 a case, which would have cost \$169 with careful shopping less than a year ago. And, history shows us, will cost that little again next year. The election-year feeding frenzy has become an every-four-years, predictable phenomenon. Small pistol primers are similarly selling as if their silver-colored cups were made of platinum, well into the triple-digits for a brick of a thousand. I refuse. Even if I had the money to blow, I'd refuse. Some of us have come to the conclusion there's a simple answer to riding out the current 9mm shortage: switch to a different cartridge in the interim.

I was a slow sell on this idea, myself. Like a lot of people, I was fixated on 9mm. I started the ammo crunch, around the beginning of 2020, sitting pretty, probably with a lot more 9mm than most people, both in factory ammo and reloading components. I could have continued being 9mm-rich til the current ammo crunch was over but for one fact: I'm a shooter, not an ammo hoarder. Even cutting my practice sessions down to fewer than I'd like, and the number of rounds per session to fewer than I'd like, even shooting fewer matches than I wanted, bottom line eventually I burned through my 9mm hardball.

As I was obsessing and planning over how to get more 9mm reloading components, a funny thing started happening. While looking around my apartment

for other things, I kept coming across boxes of .45 ACP handloads I'd forgotten I'd even done. "Oh look, it's a hundred rounds of .45 ACP. Oh look, there's another 50-round box of .45 ACP. Oh look, I just found another 150 rounds of .45." It's like God was trying to tell me something.

I had three bricks of Federal Large Pistol Primers just lying there not bothering anyone. I had thousands of X-Treme 230-grain Round Nose bullets. I had a decent supply of Vihtavuori N310 (acquired through Brownells), my favorite .45 ACP powder. Time to crank up the ol' Square Deal set up for .45 ACP. So I did.

You might say, "Well, that's cool, Duane, but the

truth is that if you start shooting .45, in a few months you'll have burned through all that and be right back where you were with 9mm." Except I went online and found that Federal Large Pistol Primers are easily-available at the pre-feeding frenzy price. I went to the X-Treme website and discovered that, while they're

**When the 9mm ammo shortage hit, being able to pull a good .45 ACP like this Wilson 1911 out of the gun safe was an easy solution to the problem.**

out-of-stock on anything 9mm, they're in-stock for both 230-grain and 200-grain .45 Round Nose bullets. Brownells is in-stock on N310.

Easily available, extremely affordable hardball ammo for practice is usually a strong point in favor of the 9mm. For the next little bit of time that situation has reversed, and the fact that practice ammo is either unavailable or, if available, only at high cost, heavily weighs AGAINST the 9mm. More to the point, anyone handloading a cartridge that takes a large pistol primer, like for instance .45 ACP, has a huge advantage over anyone whose preferred cartridge takes small pistol primers.

A lot of people have standardized on 9mm for all their pistol shooting. Right about now, folks who didn't, and still have .45s in their gun stock, are feeling like psychics.

# 101 Classic Firearms

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast. Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's most important firearms. *About the Author:* John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endorsement member of the National Rifle Association.

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

# New Products from

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. *This one happens to be filled with once-fired, processed (polished, sized, deprimed, primer pockets swaged) 9mm cartridge cases (sold separately when available) prepared at Dillon Precision on our new CP 2000 Case-Processing Machine.* The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

**Stackable Utility Box P84-40194 \$13.99**

Berry's Powder Funnel Set provides a wide range of flexibility when it comes to reloading. The two-funnel set comes with inserts that allow loading calibers from .17 to .50 caliber. Constructed of tough translucent polycarbonate material, they are covered by a lifetime warranty and made in the USA.

**Powder Funnel Set P84-40191 \$6.99**

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

**Single-Pistol Case P84-40192 \$9.99**  
**Double-Pistol Case P84-40193 15.99**

## AMMOBRASS, LLC

The AmmoBrass Swage Setter is for use with any swaging devices such as Dillon's Super Swage 600, Dillon 1050/1100 presses, and almost any other swaging device to assist you in properly setting your swage rod and swage back-up die.
