Keeping 3-Gun  
in the Family!

Page 8

# Clean, Accurate & Consistent GIVE IT A SHOT!

**CLEAN SHOT** Clean shot has become a favorite of competition shooters because of its consistency of ignition, efficiency, virtual lack of residue, ease of loading, low smoke and consistent velocity and accuracy. Loads almost all pistol calibers. Popular with IPSC, IDPA and Cowboy Action Shooters.

**MAJOR PISTOL** Major Pistol is made of a high intensity pistol propellant. The gas generation rate is appropriate for cartridges 9mm, 10mm auto, .257 SIG, .45 Colt light bullet magnum pistol loads and other high intensity pistol cartridges.

**ULTIMATE PISTOL** Ultimate pistol has no comparable market equivalent. It has a faster burn rate than auto pistol and slower than clean shot. Every manufactured batch is tested for superior ignition in both standard and lead free primers. Perhaps the most versatile of all propellants across the .380 auto, 9mm Luger, .40 S&W, 38 special, 38 Super and .45 Automatic Cartridges.

**HEAVY PISTOL** Ballistic results of this propellant show its appropriate for magnum pistol applications, 300 blackout supersonic lightweight projectiles and some other specialty ammunitions. In comparison to other magnum pistol propellants we find Heavy Pistol exceptionally clean, accurate with either cast or jacked projectiles and exhibits low muzzle flash.

**AUTO PISTOL** For loaders interested in attaining standard +P velocities in 9mm Luger and optimized propellant for .357 SIG, as well as correct energy levels for cycling carbines with subsonic load, this propellant is a wise choice. It will also perform well with difficult to cycle .380 Autos, .44 SPL, .45 Colt, Heavy Bullet .40 S&W and some light to moderate bullet .357 magnum loads. It can take your .45 Auto to amazing velocities.

**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# We READ Our Mail!

Just a note to say thanks to Steve Frew in Technical Support for the recent help with my Dillon RL 550B. It was having primer feed problems and he suggested replacing the entire assembly. The new parts were recently installed and after a bit of fine tuning of the primer slide's horizontal movement using the adjustment screw (#14037), the machine is back to reliable and predictable operation. I'll continue using my Dillon reloader and will recommend your products to anybody who will listen. Great stuff and good support, which helps a lot. Another reason to buy Dillon is because it's blue, which means it's faster than the competition. Everybody knows that.

Mike Pile – Virginia City, NV

As a data geek I couldn't help to review the data in the article Redding vs Dillon Seating Die. First, the standard deviations seem not match the data, whether I use standard deviation of the sample of project d for the population. For Redding I get a std p=.00281 and std s=.00284. For Dillon it is .00288 and .00291. Second, by normalizing the data is now nonparametric. Third, in order to properly compare the process you need a minimum of 3 lots for each. That is three machines and three dies. 20 samples each should be enough. Fourth, the data from the Dillon and Redding dies is combinable. That is, there is no statistical difference. BTW I did this for most of my career.

Chuck Whipple – 40xclean@gmail.com

I must humbly admit that for my March/April 2021 article comparing Redding and Dillon seating dies, my spreadsheet's Standard Deviation formula contained an error, resulting in my publishing faulty information. I reported that the Redding Die had a .0013 SD, while the Dillon produced a .0008 SD. After I correctly adjusted the cell ranges, the Redding's SD calculated to .0028, and the Dillon's was .0031. The extreme spread calculations remain unchanged with the Dillon being the slightly better of the two. This being the case, my hypothesis that the Redding's spring system would produce less consistent rounds was incorrect. I now see that with all things balanced, my experiment showed that the two dies produced statistically identical products. That said, I still believe that the story's overall premise still stands as proven: that Dillon provides a far more economical seating die to Redding, relative to the quality of their outputs versus purchase price. My apologies to **The Blue Press** for not catching this mistake sooner. The error was entirely my own.

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

Dillon's  
RT 1500  
shown  
installed  
on an  
XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **62164** is **\$374.99**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$21.99** each. Upper lock rings, **13559**, are **\$7.99** each.

## MILITARY BRASS?

**Eliminate the "Grunt Work" with  
Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

|                     |       |         |

# Case Preparation Equipment

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

**Rapid Polish 290**

8 oz. bottle. **13804** **\$9.99**  
Case (20 pc.) **20255** **149.99**

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle **13733** **\$15.99**  
Case (20 pc.) **20256** **223.99**

10 bottles of polish/10 of lube<sup>^</sup>  
Case (20 pc.) **21375** **\$186.99**

## Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator<sup>^</sup> **20675** **\$84.99**  
CM-500 Case/Media Separator<sup>^</sup> **21045** **\$52.99**

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon created the CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV-2001<sup>^</sup>, US 110v **20493** **\$219.99**

## Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.  
15-pound bag **13287** **\$23.99**

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!  
10-pound bag **13496** **\$15.99**

# Claudia Vidanes — Competitive Shooter,

By Kimmie Dillon

Our May/June cover model is 3-Gun shooter, Claudia Vidanes. The Southern California native has been shooting competitively since she was 12 years old. In 2019, Claudia graduated from California State University-Fullerton with a degree in Business Administration-Marketing. One thing's for sure, the future is bright for this intelligent, petite lady who loves to shoot!

Reloading is a family pastime for Claudia and the Vidanes family. Claudia knows exactly what equipment she can trust to deliver the performance she needs in competitions: the Dillon XL 750. So for her **Blue Press**

photo shoot, we thought it would be fitting to photograph her with her favorite machine. Then we decided to add in another 750 (for balance-haha!) along with her 3 competitive firearms and patriotic shotgun. We had a great photo session and then away we went to the range at Rio Salado Sportsman's Club. Claudia performed some drills and demonstrated her sharpshooting skills. You can check out the behind-the-scenes videos at <https://vimeo.com/536560574>.

Claudia also comes from a deep family heritage in shooting sports. Her father, Jojo Vidanes, is an American sport shooter who won the overall 2008 IPSC Handgun World Shoot Modified division title. He has a senior category gold medal in Open division from the 2017 Rifle World Shoot and a senior category silver medal from the 2018 Shotgun World Shoot. Jojo also runs the Norco Running Gun IPSC Club in San Bernardino, California.

**KD** – At what age did you start shooting? Tell us about how you first were introduced to shooting.

**CV** – I was 12 years old when I did my first local shooting competition. My dad has been the match director of Norco Running Gun since 1996. Ever since I was born, I would play with the other shooters' kids while the adults were shooting the match. I would even go with my dad at 5:00 AM to set up the match but I didn't shoot until after the 2008 IPSC Handgun World Shoot in Bali, Indonesia. My dad became the Modified division World Champion. I was a total fan watching

him shoot and walk up to get his gold medal. I saw kids my age (11 years old) and even younger than me competing. It motivated me to start as soon as we got home. A couple of months later in 2009, I competed in my first Norco Running Gun local match. I have been competing ever since!

**KD** – What firearms are you currently using in your 3-Gun matches?

**CV** – My dad, Jojo Vidanes, is a custom gunsmith/manufacturer. Formerly known as JV Dynamics, now JV Industries LLC ([jvindustries.net](http://jvindustries.net)), which focuses on IPSC/USPSA/3-Gun firearms. My 3-gun gear is set to open division.

**Handgun:** JV Industries 2011 type pistol, 9mm major (my dad started 9mm major cartridge when the power factor was lowered from 175 to 165 by USPSA); Trijicon SRO scope; Bar-Sto 5.5" barrel; Caspian stainless steel slide; JV Industries compensator and custom mount; Cheeley grip; and 1.3-lb trigger.

**Rifle:** JV Industries SPR-15 Phantom Strike; Trijicon TA-11 with RTS-2 red dot, side mounted; PRI carbon fiber handguard; SureFire 5.56 muzzle brake; adjustable gas block; 18-in stainless steel match barrel with 1:7 twist; custom buffer system; and a Geissele high speed national match trigger.

**Shotgun:** JV Industries VEPR-12; low-mounted RTS scope; features carbon fiber full-length handguard; internal choke system by Briley/Dissident Arms; two-sided charging handles; extended mag release; includes magwell, compensator, and reworked action with 1.5 trigger pull.

**KD** – Our readers are also going to want to know more about your patriotic shotgun on the Blue Press cover. It's pretty spectacular!

**CV** – The American Flag VEPR-12 was built specifically for the 2018 Shotgun World Shoot in France. It was my first-time being part of the national team. Prior to this world shoot, I was always competing as an individual. Our goal was to be patriotic. We're always proud to represent Team USA.

**KD** – What advice can you share for other ladies

Claudia and her father Jojo with the family XL 750.

# Reloader, Model with a Big Personality!

who are interested in entering shooting competition?

**CV** – Just jump right into it! The community has several people who are more than willing to help, especially other ladies. Reach out on social media with questions if there aren't any ladies locally. Something to keep in mind is that everyone starts somewhere. That mindset should help with the intimidating factor of a first match.

It's only normal to feel nervous at the first match but what helps is getting familiar with the safety rules and scoring prior to the actual shooting. At anyone's first match, my advice would be to solely focus on safety, not getting disqualified.

Competition shooting has different safety standards from regular shooting range visits, other disciplines, etc. Once the shooter is comfortable with the safety aspect, move on to improvements in scoring. Everyone has a different learning pace. Focus solely on your own performance.

**KD** – You've also traveled internationally to compete. Tell us about some of your favorite matches and places you've visited.

**CV** – My family and I have competed in over eight countries. Some countries include Russia, Sweden, France, Hungary, Philippines, and New Zealand. For all of the international competitions, we try to spend more than a few days before the match to acclimate to the new time zone/weather and to also tour around.

The first ever Rifle World Shoot in 2017 (Kubinka, Russia) was spectacular! The opening ceremony had MiG fighter jets flying over us for over 30 minutes, cosmonauts at the international space station greeting us, and tanks surrounding us. The range itself was phenomenal, with half of the stages being 300m deep. At all of the bays, there were covered stadium seating for both shooters and spectators. The courses were technical, with easy to miss targets by being off one step. My dad earned his second world title, IPSC Senior World Champion-Open, Semi-Automatic division. The entire experience was like no other. Match organization was exceptional. Out of all the countries we've traveled to,

it's surprising to say that the Russians are really similar to ourselves. The college students who helped reset stages were very excited to hang out with us.

The 2019 Rifle World Shoot in Karlskoga, Sweden will forever hold a place in my heart. It was my little sister's first ever world shoot! To be honest, I was extremely nervous for her as she only shot a few rifle matches for a couple of months. She did awesome and I couldn't be any prouder! Isa and my dad won silver for the family team division.

We've traveled to the Philippines two different times for competitions. It's great to not only compete in the

country my parents grew up in, but to also visit family members. The sport gives me another opportunity to see my family that I don't get to see often.

**KD** – Since your very first match, you have likely learned A LOT. Can you please share with our readers some of the wisdom you are gaining?

**CV** – Something I still struggle with is the mental game of competition shooting. All I want to do is go fast, so sometimes I have a difficult time with accuracy. One thing I've learned that is something I should practice and not just preach is SMOOTH IS FAST. For all of my great runs, it felt like slow motion. The actual movement and shooting feels slow

to me because I am so focused, but once I hear the actual time it's faster than I thought!

Stage planning plays a huge role in shooting performance. I've learned that if I am able to close my eyes and visualize my stage plan, including where I am aiming on targets with no-shoots/hardcovers, I will be able to execute the plan successfully.

**KD** – Please describe your favorite shooting drill.

**CV** – I've always used our family's Saturday local match as my practice. My favorite stage designs have always been field courses. Being tiny, one of my proud abilities is being able to move efficiently. I can get to shooting positions fairly quickly!

It's always a fun challenge when the farther targets at

**The Vidanes family (from left: Claudia, Isa, Jojo and Marissa) at the 2019 Rifle World Shoot in Sweden.**

# Dillon's Benchtop Mounting Plates

**62005 \$89.99**

**62006 \$89.99**

As seen in the Dillon videos, these plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine (and loaded cartridge chute if necessary) directly to the top of the mounting plate.

One mounting plate (**Stock Number 62005**) is drilled and tapped to accept the following loaders: XL 750, XL 650, RL 550 and Square Deal "B". The other mounting plate (**Stock**

**Number 62006**) accepts the following reloading machines: RL 1100, CP 2000, Super 1050 and RL 1050. Additionally, it accepts any Dillon reloading machine that is *mounted on the Dillon Strong Mount*, including the XL 750, XL 650, RL 550 and Square Deal "B".

The plates measure 9-3/4" x 11-3/4" x .375" thick, and plate mounting hardware is included.

## "Border Shift" Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

## Dillon Pistol Case<sup>^</sup>

Our pistol case was designed to hold and protect your pistol *and* carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-

round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

## PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. 13606, \$23.99 ea.

# Mr. Bulletfeeder®

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

### Mr. Bulletfeeder Set Up in One Caliber

## Claudia Vidanes... Continued from Page 9

30 yards have no-shoots and/or hardcovers.

**KD** – The Vidanes family is well-known and respected at shooting competitions. It must be incredible to have your entire family involved.

**CV** – Even when my sister, Isa, is not competing, her and my mom will come for moral support! When not all four of us are present, other shooters will ask for the absent members. We're known to travel and complete all together. Competitions have always been a great bonding opportunity for my family and me. All of our firearms are built by my dad, JV Industries. He's been competing since the early 90s and has been on the U.S. team several times. With multiple world titles and great sportsmanship, my sister and I very much look up to him. With my dad, sister, and me competing, reloading is an important factor in our shooting careers. The three of us use Dillon presses for all of our reloading needs.

**KD** – Why does your family only load on Dillon Precision presses?

**CV** – My dad was flying back home from the 1992 USPSA Nationals (Illinois) with Rob Leatham and Arnt Myhre. Rob asked my dad – then a beginning shooter – what he was loading on. Rob then told Arnt to hook my dad up with a Dillon press. Arnt said, "Call me on Monday," and the rest is history. My dad purchased

the RL 1050. He even ended up purchasing an additional three 1050s, so we now have a total of four in our household.

**KD** – How do you like our new XL 750?

**CV** – The ease of switching calibers with the XL 750 is a huge help. It's awesome that there are less parts. My dad, sister, and I switch back from shooting handguns (Open and PCC) and rifles. My family hosts and shoots a local competition, Norco Running Gun, EVERY single Saturday. Switching divisions/shooting double entries and shooting other local matches each weekend requires us to load different calibers.

**KD** – What are your dreams for the future?

**CV** – I hope to be a World Champion like my dad one day! I intend to compete for the rest of my life. In the future, I hope to become a business owner. Not sure which industry yet, but I think it'd be a fun challenge to start something of my own and see where it goes. I am part of the founder's group of one of the newest and largest shooting ranges in Southern California, called Route 66 Shooting Sports Park ([r66ssp.com](http://r66ssp.com)) in San Bernardino. I am currently the manager and one of the instructors. I focus on Firearm Safety Certificate classes, Intro to Competition, and ladies only classes. Working with beginners is my passion!

## HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

A heavy, high-quality tray large enough for the Federal primer package.

**13606, \$23.99 ea.**

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

## Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

|---------------|-------|--------|

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runoff will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

## Dillon Rifle Dies (Three-Die Sets)

**14355, \$7.99**

# BL 550<sup>^</sup>

## Dillon's Basic Loader

**\$319<sup>99</sup>**  
**15399**

Reloading Dies and Caliber Conversions sold separately  
Pictured with optional accessories:  
Strong Mount 22051 \$64.99

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming

and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

**AUTO PRIME SYSTEM<sup>^</sup>** 16627 **\$104.99**

**PRIMER SYSTEM EARLY WARNING<sup>^</sup>**

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 **\$30.99**

**AUTO POWDER SYSTEM<sup>^</sup>**

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 **\$114.99**

**OPTIONAL MAGNUM RIFLE POWDER BAR** 21353 **\$37.99**

**AUTO EJECT SYSTEM<sup>^</sup>**

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 **\$36.99**

**BL 550 POWDER DIE<sup>^</sup>**

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die:** 16629 **\$23.99**

**Oversize Die:** 16626 **24.99**

**Plastic Funnel:** 16617 **7.99**

**POWDER MEASURE ADAPTER**

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) 20029 **\$27.99**  
RL 450 Powder Die 20308 **27.99**

**NEW!**

## If You want to Become a Gunsmith You need to read this book!

**LEARN HOW YOU CAN BECOME A CERTIFIED GUNSMITH!**

*Becoming an American Gunsmith* shows you a path to follow to become a Certified Professional Gunsmith, without having to give up your lifestyle, income, leave home, or spend tens of thousands of dollars attending a campus based school.

Mr. Kelly details how mastering the Design, Function, and Repair (DF&R) training concepts revealed in this book will enable you to maintain, repair, build, and customize firearms as a Certified Gunsmith.

This information will provide you with the ability to follow your passion of working on firearms and ensure your personal freedom and financial security. Included:

- How to set up your shop
- Numerous suggestions and resources to help you establish a successful gunsmithing shop.
- What tools and equipment are *really* necessary

Read this book and learn how you can be a Certified Gunsmith, protecting and participating in the ongoing history of firearms in America.

**New Release Sale!** Reg \$14.95 plus s/h

**ONLY \$5 & FREE SHIPPING! SAVE 66%!**

**Blue Press 31**

# Dillon Reloading Accessories

**A Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All

mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

**Dillon's "Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**97126 \$179.99**

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**21044, \$74.99 each**

**Three or more, \$68.99 ea.**

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

**17950 \$52.99**

**Dillon's 1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

**10842, \$12.99 each**

**Two or more, \$11.99 ea.**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine. Maintenance Kit Only **22211 \$33.99**

## Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis

of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

|                         |       |         |

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

| Description             | Stock # | Each   | 6 ea.   | 12 ea.  |

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

# Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

19972 \$39.99

## AMMOBRASS, LLC Swage Setter

The AmmoBrass Swage Setter is for use with any swaging devices such as Dillon's Super Swage 600, Dillon 1050/1100 presses, and almost any other swaging device to assist you in properly setting your swage rod and swage back-up die.

# **“If Clear, Hammer Down, Holster”**

**NO MORE  
NEGLIGENT  
DISCHARGES**

**ROB'S  
ON  
POINT**

# No More Negligent Discharges

By Rob Orgel

Photos by Offensive Marketing Group

How many times do we hear a pop or bang after this order?

Why is this part of our procedure, and does it really help?

Does redundancy equal complacency?

The reason we do this is in order to have the shooter check the weapon to ensure it's clear, the Range Officer (RO) checks and verifies the weapon is clear, and with the slide forward, pressing the trigger provides a third verification that the weapon is empty. Unless it isn't.

## Who is actually inspecting?

If the gun goes off, it becomes painfully obvious that neither the shooter nor the RO actually inspected the weapon. Unfortunately, it's all too common given the need for fluidity during a match to either rush the inspection or not inspect at all. Two complacent parties during the clearing procedure can lead to a negligent discharge. So, that being said, aren't we really forcing people to press the trigger without thought?

## Violating the safety rules for the sake of...safety?

When we depress the trigger on our weapon, are we following the safety rules?

1. Always treat firearms as if they are loaded.
2. Never point a firearm at anything you're not willing to destroy.
3. Keep your finger off the trigger until you're ready to fire.
4. Keep the weapon on safe until you intend to fire.
5. Always be sure of your target and what lies beyond.

With our currently accepted clearing procedure,

we're violating at least some of these rules for the sake of safety.

## What's the rush?

In order to understand the circumstances that might lead to a negligent discharge during the clearing procedure, consider that the RO is in a hurry to clear the stage, make the range safe, and reset the course of fire for the next shooter. Such haste might cause the RO to overlook the proper safety check.

From the shooter's perspective, it could very well be the shooter's first or 600th stage. If it's the first, the shooter has just experienced a whole new level of stress. If it's the 600th, the shooter might be experiencing

complacency due to the redundancy of the procedure. Either way, sometimes the shooter overlooks the inspection.

Fortunately, BOTH the shooter and the RO have to not complete the inspection in order to get the result of a negligent discharge. Unfortunately, it DOES happen.

## Our habits follow us home

How do you store your firearms? A large portion of us in the shooting industry store our

weapons off safe and hammer down. While this can make sense on weapons with external hammers, it may not be advisable on rifles and striker-fired pistols.

The theory behind this manual of arms is to release the spring pressure from the hammer spring. But we might ask ourselves how often we replace hammer springs or even hear of them failing.

What's the gain? Saving a three-dollar spring that rarely needs to be replaced anyway?

What's the risk? Violating all the safety rules without a second set of eyes? In addition, not having a "safe" downrange area to point the weapon when we clear it, which can result in a new skylight...or far worse.

What are we teaching our muscles? When we're in a hurry or stressed – possibly loading or unloading after an emergency or preparing to handle an emergency, our muscles are following procedures our brain taught them. At that point, the brain is not telling the muscles what to do – they've already been programmed. If your regular clearing procedure involves taking a weapon off safe and pressing the trigger, your muscles will repeat the procedure without the brain, with potentially life-taking/life-altering results.

#### **How we can do better**

As the shooter, let's actually visually and physically inspect our own firearm. EVERY TIME.

As the range officer, VERIFY that the shooter is doing a proper inspection and then conduct a secondary visual inspection. EVERY TIME.

I advocate that for pistols the clearing procedure should be:

“Unload and show clear.

If clear, slide forward, holster.”

For rifles it should be:

“Unload and show clear.

If clear, leave the action open and safety on.”

#### **Doing better at home**

Let's actually adhere to the safety rules. Store rifles with the action open or closed and safety on; pistols slide forward with the safety on (if applicable) or ease the hammer down safely or use decocker.

#### **What about dryfire training?**

Dryfire offers great benefits at little to no cost. However, we must mitigate the risk as we WILL violate the safety rules for this training. All firearms training comes with safety risks, and how we mitigate these risks is very important.

For dryfire training, remove ALL ammo from your body and the training area, verify the weapon is clear, and then have someone else confirm it. This prevents you from having what you “thought” was an empty magazine. Another consideration for dryfire training is to know what lies beyond the wall of your training area. It should be a thick wall to begin with and what's beyond it should be known to stop a bullet should the weapon go off.

#### **Making the whole industry safer**

Given my career and time spent on foreign soil, I always thought the best things I've done for my country were overseas. As a combat instructor, I learned that the best thing I could do for my country and fellow service members was to instruct them in better weapons-handling procedures and the ability to survive a gunfight.

I believe that taking on the opportunity to make the industry safer is everyone's responsibility. Let's change our weapons-handling procedures and mentor the next generation to prevent this all-too-common negligent discharge.

# 5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

## "Plan B" Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster<sup>▲</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Holster 10252 \$29.99

## Mernickle Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

# Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

## Sack-Ups Protective Gun Sacks

**S**ack-Ups Protective Gun Sacks protect your firearms from the dings and scratches that tend to happen when you're rifling through your gun safe looking for...well...your rifle. They don't take up as much room as a gun case, but provide just enough padding to keep your guns safe...in your safe.

## HYSKORE Six-Gun Modular Pistol Rack

**T**he HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The modular feature of the rack also means that two or more racks can be connected together and reconfigured to take maximum advantage of all available space in your safe or vault. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

## Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

# Steel Challenge Shooting Association (SCSA)

## By John Kleespies

Steel shooters have long bragged about their “sub-minor” handloads reducing split times between plates, resulting in near-magical score improvements. The oft-repeated phrase is that “10 seconds gets chopped off the top” just through load development. This is a great story; however, the evidence tends to be anecdotal. Being a person who prefers hard data to “everybody knows,” I recruited a couple friends to put this shooting legend to the test.

To explain: Steel Challenge Shooting Association (SCSA) events utilize eight standardized stages that are shot for speed, one shot per target, and the accumulated time is counted for score. A full SCSA match will incorporate 124 scored target transitions. “Transitions” mean time, and time means score.

One way to reduce transition time is to lessen gun bounce between shots: less bounce means that the recoiling muzzle will return to target faster. Lowering a round’s “power factor” through handloading is a common means of reducing bounce. Power factor (pf) is derived by multiplying a bullet’s velocity by its grain weight, and then dividing by 1000.

In the United States Practical Shooting Association (USPSA), the minimum power factor for competition is set at 125. In SCSA, there is no power factor floor, so some competitors reduce their powder weights to shoot “sub-minor” loads under the assumption that it will increase their transition speed...and these competitors often beat everyone else who shows up with their 125pf+ USPSA loads or – worst of all – boxed ammo.

Here’s a newsflash: nobody is going to find a sub-minor load at Walmart. It has to be hand loaded, and it has to be crafted on a precise machine like a Dillon so that it can be depended upon not to squib.

For my test platform, I chose the Pistol Caliber Carbine, Optic (PCCO). A series of hand loads with varying power factors were shot by three competitors while tracking their splits to see if the mythical 10-second gain is achievable – and in PCCO, a 10-second gain can mean the difference between being considered an “A Level” shooter or a “Grand Master.”

I enlisted two other shooters to assist me with my experiment, each of us embodying a different skill level. First, Spencer Garrett is a new SCSA shooter who represents a solid example of an “average” but developing shooter. With 15 years in competitive shooting, I filled the “better than average” slot. Finally, we were joined by multi-time SCSA Senior division world champion Mike Setting who has been in the game since the early ‘90s. Mike’s capabilities are, let’s just say, way more than above average.

Using my PCCO rifle – which most folks would consider more “Armageddon-minded” than “race gunned out” – we opened the testing session with a chronograph to calculate various power factors.

Thanks to my longer 14.5” pinned barrel, Federal’s 124-grain American Eagle clocked in at 152pf, and Winchester 115-grain White Box registered 160pf. We then measured some of my handloads that were simply my 115-grain Steel Challenge rounds but packed with an additional 1.2 grains of powder, and...ringing in at

# Performance Gains Through Handloading

160pf, I suspect that I've accidentally discovered the WWB load recipe. Based upon data and feel, I checked off my hot 115-grain load as a good representation of store-bought ammunition.

Targeting a rack of five 6" round plates spaced 18" apart and 8 yards from the shooting box, we recorded our transition times between plates. With the 160pf load, Spencer's average splits came out to .56 seconds, mine were .41, and Mike's were .40. With that, we had our base times, and I had a pretty good feeling about myself – I could keep up with Mike!

But that didn't last long.

We moved on to my personal Steel Challenge load, which is simply my 135pf USPSA load but with the 125-grain bullet swapped out for a 115-grain projectile. This is a common practice amongst shooters who compete in both venues, as it allows the handloader to create reduced power ammunition without adjusting his toolhead. My SCSA load is slightly sub-minor at 119pf and is a good representation of what a USPSA shooter might use at steel matches. Here, I picked up my speed slightly to a .37 second average...and Mike began his pull away from me, averaging .34 splits. Spencer's time dropped to a .54.

Gains were definitely seen with my sub-minor ammo, but nothing that added up to the "ten seconds off the top" which the legend promised. Nonetheless, I had one more trick up my sleeve.

We ended the experiment with Mike's Steel Challenge load...which was so light it wouldn't reset my trigger due to my heavy buffer system. Nonetheless, they functioned perfectly through Mike's race gun, so we switched to his rifle. At 86 power factor out of his 5.5" shrouded barrel, Mike considered this to be his "hot" load.

Stepping into the shooting box, I brought my splits down to a .32 average, while Spencer saw a similar improvement to a .50 split. And Mike? He averaged .26 seconds!

With that data in hand, I was able to make a few extrapolations about switching from store-bought ammunition to handloaded cartridges. Ultimately, we confirmed that reduced power loads result in faster shooting. We also found that sub-minor ammunition can indeed subtract 10 seconds off the clock...with some stipulations.

The "standard gun with a simple load" data is interesting because it shows what a shooter can do with a firearm that is probably sitting in his safe right now. By simply switching from full-power loads to a basic handload, it appears that a shooter can decrease his SCSA

time in PCCO somewhere in the range of 2.5 to 7.5 seconds. This is an immediate, substantial performance gain without the shooter having to modify his gun...or spend any time practicing! Remember, an SCSA speed reduction measured in seconds is typically obtained only through years of practice – and perhaps thousands of dollars doled out to coaching clinics.

This trick wipes out a lot of hard work, and all the shooter needs is – literally – a Dillon progressive loader to crank out the rounds.

The third column takes it to the next level. In this scenario, the 86pf load was reduced enough that some gun modification needed to occur, using a Pace Setting Design tunable buffer ([pacesettingdesign.com](http://pacesettingdesign.com)) and a competition barrel and bolt from TACCOM ([tacom3g.com](http://tacom3g.com)) among other things. Furthermore, a handloader isn't going to get that low on the power factor scale without investing some effort into load development. This means gradually and safely reducing his powder level until the load is reliably tuned to a specific gun.

That work clearly pays off, though. Between moving from my standard carbine with its full-power loads to Mike's sub-minor race gun, I achieved the mythical 10 second gain and then some. That's huge! To put it in a frame of reference, at the 2019 Sig Sauer World Speed Shooting Championship, 11 seconds in the PCC division meant the difference between 1st and 34th place. And Mike's gain was tremendously higher!

Along those lines, what surprised Mike and me the most was just how much sub-minor shooting performance amplified relative to the increased skill of the shooter. It appears that reduced loads allow an expert to concentrate on his finely-honed fundamentals, more confidently calling his shot through the trigger squeeze and thereby shifting to the next target sooner. It also offers an interesting perspective on how to accelerate an emerging shooter's learning curve: by switching to sub-minor loads, the trainee can deliberately practice achieving proper sight picture, maintaining it through the trigger squeeze, visually acquiring the next target, shift, and repeat...without the distraction of increased recoil and muzzle bounce.

When the range day ended, I walked away with a greater appreciation of the benefits of sub-minor loading – and a new Pace Setting Design tunable buffer in my range bag. Now, I'm off to my reloading bench to begin crafting a sub-100pf load to pair with this new operating system. From there, I'll see how much faster I can shoot with the aid of my Dillon progressive, this PSD buffer, and a little less powder.

# HIDING THE GOODIES

## Skinner Sights HTF Garment Bag

**Reviewed by Peter Caroline**

Over the past 45 years, I've accumulated a large collection of gun cases, both plastic and metal, many bearing battle scars from the not-so-gentle attentions of airport baggage handlers. But nowadays, the traditional gun case is both an invitation to thieves and an alarm signal to hotel and casino managers.

Given the intrusive attentions of the TSA and the kabuki theater of COVID-19 precautions, I've given up on air travel, and now drive to all of my shooting destinations, but the need for concealment still exists. No matter how one arrives, walking into a hotel with a gun case may still draw unwanted attention. And the stereotypical musical instrument cases aren't much better, in terms of potential thievery. We live in interesting times.

Interesting times demand ingenious solutions, and one is indeed available. A while ago, I attended a writers' event at Gunsite. Skinner Sights' Andy Larsson was one of the exhibitors sponsoring the event, and he had an unusual garment bag on display. Ordinarily, I have little use for garment bags; my usual shooting wardrobe can be stuffed into a small duffel. Looking more closely, however, I could see that this garment bag was not primarily intended for carrying clothing. The handle is the tip-off. Made of a rugged polycarbonate material, it is about 3/4" thick and would probably support the weight of a small person, which is not recommended. Available in olive drab or black Cordura with heavyweight stitching and a heavy zipper, the bag will accommodate a rifle (up to 40"), a couple of handguns in detachable holsters with magazine

holders, three rifle magazines and six pistol magazines, a scope, knives, flashlight, cleaning kits, extra ammo and God-only-knows what all else. It would appear that the limit depends entirely on how much weight you are willing or able to carry. Hanging up in a closet with one's other attire, this bag would not attract any undue scrutiny. Ideally, it should hang at one end of the closet rod, so the rod doesn't bow or break under stress.

Recently, I acquired one of Skinner's garment bags, and just to satisfy my curiosity regarding its capacity, I filled the bag with assorted hardware. Here's the inventory: One M+M M-10 Zhukov 7.62x39mm rifle w/stock unfolded, three full 30-round magazines, a 3-9x scope, one Browning 9mm Hi Power with five full magazines, one Ruger SR1911 .45ACP with five full magazines, a multi-tool, two pull-through bore cleaners, an UpLULA magazine loader, a compact high-performance flashlight and a pocketknife. I also discovered that the Cordura exterior tends to attract pet hair, which oddly enough might be a good thing...a less-than-immaculate exterior could discourage further examination by a potential thief.

Having an extra measure of security is always a good thing... even more so when it involves guns. All things considered, the Skinner Sights® HTF Garment Bag is a highly useful accessory for those of us who travel with

guns, and it's quite affordable at the now-reduced price of \$189 plus shipping.

# ERADICATES COPPER FOULING AT MAGNUM VELOCITIES.

## INTRODUCING NEW IMR ENDURON 8133.

It's the slow-burning, copper-crushing magnum powder shooters have been waiting for. Engineered for Extreme Temperature Stability, Ideal Load Density and elevated confidence and success that comes from reloading with legendary IMR powders.

# Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means

that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy. Level-Right PRO 21777 \$69.99

The **Specialized Dynamics AR15/AR10 Armorer's Upper Receiver Block** is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

\$59.99

## The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: **NO MORE BROKEN BOLTS!** The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt

66680

\$99.99

This tool makes it simple to remove or install a new ejector and spring into the AR-15 bolt. Anyone who has tried to do this without a tool will be amazed at the reduction in the number of cuss words needed to perform the task. Comes with alignment and roll pin punch.

# Real Avid Gun-Cleaning Chemicals

## BORE-MAX™ BORE FOAM

Powerful gun-metal grade foaming solvent is specially formulated to expand and penetrate within the gun bore, rapidly and effectively dissolving performance inhibiting copper and powder fouling.

12oz. can Bore-Max **40215** **\$12.99**

## FOUL-OUT™ GUNK BLASTER

Foul-Out Gunk Blaster blows away grease and grime fast. This powerful gun-metal grade solvent quickly strips gun actions of burnt powder, oil and grease, eliminating malfunctions of moving parts due to fouling and build up. Quickly cleans chambers, actions, trigger groups, bolt groups, slides, choke tube threading, semi-auto gas ports, extractors, ejectors and other hard to reach areas.

12oz. can Foul-Out **40216** **\$12.99**

## GUN-MAX™ GUN OIL

Gun-Max's advanced gun-metal grade formula sets a new standard for protecting, lubricating and cleaning modern guns. Powerful inhibitors displace moisture delivering extended corrosion protection. Advanced anti-friction additives bond to metal surfaces for longer lasting lubrication of moving metal parts. Maximizes performance of semi-auto guns with high cycle rates. Formulated to excel in sub-zero temperatures and harsh operating conditions.

12oz can Gun-Max **40214** **\$12.99**

# Apex Tactical Specialties

## Action Enhancement Trigger for Springfield Armory Hellcat

The Action Enhancement Trigger for the Hellcat pistols is the easiest, quickest upgrade you can do to the trigger system that significantly improves the feel of the trigger pull, without reducing factory safety values. When properly installed, this drop-in trigger will:

- Reduce trigger pull weight to 5.0 to 5.5 lbs after break-in
- Smooth uptake and reset
- Reduce trigger overall travel and reset distance
- Deliver a crisp trigger break
- Directly replaces factory components without additional fitting
- Maintains factory safety values

| Handgun Smart Mat | 29042 | 19.99   |

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

29033 \$34.99

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

29032 \$39.99

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

21778 \$29.99

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

29034 \$9.99

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

29036 \$9.99

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

29037 \$9.99

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

29038 \$12.99

## Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

21776 \$79.99

## Swab-its

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$21.99

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. 19234 \$21.99

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$18.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$19.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$14.99

## MIL-COMM Extreme Performance Lubricants

**TW25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

## NEBO®

The NEBO® INSPECTOR RC<sup>+</sup> is a powerful 360 lumen rechargeable, waterproof (IP67) penlight. The INSPECTOR RC features FLEX-POWER and is equipped with a removable steel clip, 4x zoom and 3 light modes (high, low, strobe) and Soft-Touch Technology, which provides momentary operation when the light is off, with the slight touch of the button.

3 LIGHT MODES (Rechargeable Battery)

- High (360 lumens) – 1 hour/125 meters
- Low (120 lumens) – 3 hours/70 meters
- Strobe (360 lumens) – 25 minutes/125 meters

3 LIGHT MODES (AAA Batteries)

- High (100 lumens) – 1 hour/90 meters
- Low (30 lumens) – 4 hours/50 meters
- Strobe (100 lumens) – 25 min./90 meters

## Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 \$19.99

# Shoot Out Targets

The Alpha Target is **Shoot Out Targets'** Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3" in diameter and 1/2" thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43" tall and 22" wide when assembled.

# Brownells' BRN-180 Rifle:

**Inset: An original AR-180 equipped with a suppressor and a 4x20 optic.**  
**Large Photo: BRN-180 matched lower and upper shown with Swampfox Trihawk scope and AAC M4-2000 round suppressor.**

**By Oleg Volk**

Brownells' BRN-180 rifle was one of the most eagerly awaited designs of late. Based loosely on the Armalite AR-18 automatic rifle, BRN-180 comes with significant upgrades in accuracy and versatility. 16» and 18.5» uppers compatible with AR-15 lowers were released in 2020, a classically styled lower specific to BRN-180 upper just came out in early 2021.

The original AR-18 was a stamped and welded alternative to the AR-15. Designed in the early 1960s, it was meant to be less expensive to produce. With the recoil springs contained entirely within the receiver, AR-18 could be fired with the stock folded. A short stroke piston also kept the receiver cooler during rapid fire. Lower sight height over bore and easier scope mounting also gave the advantage to the AR-18. Although AR-18 was never adopted by any army, it proved popular with civilian and paramilitary users.

Produced by Armalite, Howa, and Sterling, AR-180 – the commercial semiauto variant of AR-18 – also influenced several military rifles. Its simple and reliable gas system and bolt/carrier arrangement can be seen in HK G36, Bushmaster ACR, SAR80, SA80, Howa 89, and several others. Armalite revived the concept briefly

in 2001 as the polymer-lower AR-180B, but the durability of that creation was not the best. Brownells' BRN-180 lower is machined aluminum and significantly more robust.

The BRN-180 lower with the classic lines ships stripped and comes without a buttstock. Magazine release button and bolt release paddle are the same as on AR-15 lowers. Standard AR-15 lower parts kits fit, as do most AR-15 accessories. I chose to upgrade the trigger with a LaRue MBT-1S unit for a crisper let-off and a more pronounced reset. At 6 pounds, the trigger is actually heavier than stock, yet feels much lighter due to the utter absence of creep. The pistol grip shipped with that trigger did not fit due to the interference of the high beavertail with the back of the lower receiver. Any AR-15 stock fits onto the Picatinny tube adapter from Midwest Industries (Part# MI-STAP), I went with the MagPul SL-S for the visual resemblance to the original Armalite stock. The MI adapter can be attached high or low on the rear rail and can be set to fold to the left or to the right. The BRN-180 upper has a rubber bumper on the left to cushion the stock, but I chose to fold it to the right for more comfortable cross-body carry. Right-side folding does block the ejection port if the stock is

# A Greatly Upgraded Classic

attached high on the adapter. Folding to the left, while permitting firing with the stock folded, would have put the protruding hinge right by the cheekbone of a right-handed marksman.

My rifle is configured with the stock high to use standard AR-height optics. Setting it lower would have reduced height over bore from 2.9" down to about 2.2", but I wanted to use a specific optic. The Swampfox 3-power Trihawk prism scope seemed an appropriate update to the original 4x20 BDC optic used with AR-18. The 1960s scope used an external BDC turret, while the modern 3x30 uses a BDC reticle. Significantly brighter and higher contrast, this 3x scope gives more detail than the nominally stronger vintage glass. The field of view is, of course, incomparably wider at 52 feet at 100 yards vs 21 feet for the classic. The Trihawk currently available is similar to the model in my photos but has an improved flush mount.

The operating system uses a cup-shaped vented piston to tap the bolt carrier through an intermediate operating rod. Only slightly heavier than the direct-impingement gas tube of the AR-15, this keeps powder fumes away from the receiver and from the face of the shooter. A more extensively vented piston is also provided for use with sound suppressors. Take-down is simple: with the upper removed from the lower, pull the charging handle back to pop off the pressure-fitted rear cap. That gives access to the two rods on which the recoil springs slide. With the recoil assembly removed, the bolt carrier slides back until the charging handle lines up with the take-down opening in the back of the right side of the receiver. With the handle pulled out, the bolt and carrier come out and can be disassembled similarly to the AR-15. The recoil spring guides also kept the forend latch locked, and it can be pushed down to pull the entire forend forward and off the barrel. That gives access to the gas piston for cleaning. Compared to AR-15, the receiver has a lot of empty volume for grime, much like on an M3 Grease Gun or an M2 machine gun. Before firing, the opening

for the charging handle track is covered with a plastic flap. The dog-leg charging handle acts as the forward assist if needed, but its main advantage is in providing a stronger unlocking action compared to the AR-15 T-handle in the event of a case stuck in the chamber. As brass traces on its front indicate, it doubles as a brass deflector.

With a sling and a 20-round magazine, the 16" BRN-180 weighs 7.8 pounds, just under a pound more than the original. For that extra pound, we get a full-length M-LOK handguard, a variable-length stock with a recoil pad, and a significantly more rigid receiver and medium-weight 1:8 twist .223 Wyld barrel combination for better accuracy. With match ammunition and the 3x scope, 1.5 MOA is a reasonable expectation, likewise 2 MOA for good quality 62-grain ball. Felt recoil is minimal, and the classic three-prong flash hider is highly effective. Held in place with a faceted jam nut, the flash hider was easy to replace with an AAC quick-detach part for mounting M4-2000 sound suppressor. Even with the suppressor attached, the rifle retained a mostly neutral balance, permitting a steady hold on target with the aid of a hasty sling. Since the suppressor-compatible piston bleeds off more gas into the handguard, M-LOK slot covers around the gas block are recommended to keep it off the support hand. While the perception is of mere warm wind, the covers would keep the hand clear of gunpowder residue after a long range session.

Compared to a direct-impingement rifle with a rear charging handle, BRN-180 has minimal gas blowback and warms up much slower. Right-side only placement of the charging handle means the rifle is either rotated to the side for the left-hand access, or the stronger right hand is used to operate it. In practice, this is about as quick as breaking the cheek weld to run the ambi AR-15 charging handle. Overall, this control layout feels more intuitive than AR-15. Hopefully, this update of the original AR-180 will gain more well-deserved popularity than the original.

**Above:** The BRN-180's short-stroke piston uses interchangeable gas cups to allow cycling suppressed or unsuppressed.

**Left:** The short bolt carrier rides on two low-friction recoil spring guides. Dust can accumulate inside the receiver without affecting function.

# “YOU SEEM TO KNOW A LOT ABOUT GUNS...”

By Duane Thomas, Photo by Emily Huff

Return with me now to those thrilling days of yesteryear: The Lone Gunwriter rides again!

I'm at an indoor range, I sign in, as I'm grabbing my stuff to head out onto the range, a couple of other guys come in. Young, physically fit, high-and-tight haircuts, they might as well be wearing signs that say, “Rangers.” They have no equipment, they're renting everything, they say, “We want to shoot a .44 Magnum.” The counter guy reaches into the case and hands them a 6-1/2" Smith & Wesson Model 629 Classic.

We set up on the range, I'm in the middle, they're off to the right. I'm banging away with a 1911 .45, one of the guys comes up to me, his first words are, “You seem to know a lot about guns.”

All false modesty aside, I say, “Yeah, I do, actually.”

“Well, I'm really embarrassed to admit this, but we loaded up the gun, then we chickened out, and now we don't know how to unload it.”

I head down to their lane, sitting on the bench is the revolver with its hammer cocked. So, I figure this can be a teaching moment, I'll guide them through what

I'm doing to clear this out. And I won't assume they already know anything, I will make this all really clear.

I say, “Well, the problem here is you can't open up the cylinder to clear out the gun with the hammer cocked.” I pick up the gun and talk them through what I'm doing, as I do it. “So to start with, you put your thumb on the hammer. Then you depress the trigger, that frees up the hammer, so you can lower it. Then you press forward on the cylinder release latch, which is this little piece of metal here. That frees up the cylinder, which is this big round thing, so you can push it out. Then, because you haven't fired the gun and the cases haven't expanded and fire formed themselves to the chambers, which are the individual charge holes, you can just tilt the gun up and the cartridges will fall out. If you've actually fired the gun you'll have to use the ejector rod, which is this part right here, to get them out, like so.”

I am really proud of myself. I have done just a wonderfully comprehensible job of talking them through that. All without coming across like a jerk, I was really low-key about it.

You know what the guy says to me?

“What's a hammer?”

Okay, how a modern American male can make it to the age of majority, make it through U.S. Army Basic Training, make it through Ranger School, and not know what is a hammer, is beyond me. But I take it in stride, tell him what part of the gun is the hammer, and what it does.

He says to me, “Again, I'm really embarrassed to ask this, but could you shoot the gun for us, so we can see what it's like?” I would personally die before I said something like that. But, whatever. I pick up the ammo box, look at the end flap.

“Sure.”

I run a target out to about seven yards. I stuff the six rounds of .44 back into the gun and close it up, talking them through the process.

“I know you guys thumb cocked the gun, but I

prefer to do it double action, which means just pulling the trigger all the way through without cocking the hammer first.”

I fire them a nice, tight six-shot group. Then I unload the gun, again talking them through what I'm doing, as I'm doing it.

The guy says, “Oh wow, you shot that really good. The kick didn't seem too bad.”

“Well, there is a certain amount of recoil, but nothing YOU guys couldn't handle.”

I head back to my lane. Shortly thereafter, I hear the sound of gunfire, they're chatting happily away, just having a fine ol' time.

I didn't have the heart to tell them the counter guy, wisely I think, had given them a box of .44 Special instead of .44 Magnum.

# C-More Systems

RTS2R

Railway

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

# Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

## ERGO Grip

The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model.

19684 \$25.99

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

Stackable Utility Box 40194 \$15.99

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

## Dillon Teams Up With TechwearUSA

In response to everyone who has been asking us for Dillon Precision shooting jerseys, we've teamed up with **TechwearUSA** – Your Official Provider of Custom USPSA Gear!

The TechwearUSA AirFlex (\$70) is the ultimate performance layer and their lightest weight jersey. The TechwearUSA Premier Polo (\$95) is made of proprietary Techstatic fabric and is the ultimate competition polo. From its classic cut, added length to make sure it stays tucked in, fold-over collar, zipper front and side panels made from extra breathable mesh, every detail of this garment has been thought through to help you look, feel and perform at your best.

To order TechwearUSA's Dillon Precision men's and women's shooting jerseys, go to [techwearusa.com](http://techwearusa.com). By the way, the "USA" in TechwearUSA signifies that their apparel is MADE HERE!

# THINK FAST

STRIKER-FIRED

5.5LB TRIGGER

10+1 CAPACITY

RED-DOT OPTIC

\$399.99

**Think Fast:** Everything moves fast these days, but we know a few things about staying a step ahead of the competition. That's why we created the DVG-1RD; a striker-fired subcompact 9mm. The factory-equipped red-dot optic means faster target acquisition and our proprietary manufacturing process means big savings on a performance firearm.
