ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

WARNING: The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered. We constantly strive to live up to his standards. Please let us know if we're not succeeding.

Rapid Trim 1500 Case Trimmer[^]

Dillon's
RT 1500
shown
installed
on an
XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **62164** is **\$400.00**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$24.19** each. Upper lock rings, **13559**, are **\$8.79** each.

MILITARY BRASS?

**Eliminate the "Grunt Work" with
Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Case Preparation Equipment

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle. **13804** **\$9.99**
Case (20 pc.) **20255** **149.99**

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle **13733** **\$15.99**
Case (20 pc.) **20256** **223.99**

Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator[^] **20675** **\$100.00**
CM-500 Case/Media Separator[^] **21045** **\$70.00**

great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon created the CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Five Surprising Health Benefits of Shooting

By Maureen P. Sangiorgio – NRA-Certified Firearm Instructor/Range Safety Officer
Johannes Laessig Photos

According to The National Shooting Sports Foundation, total gun sales for Americans in 2020 came in at a whopping **21 million**. In addition, Friday, March 20, 2020, now holds the record for the most NICS checks conducted by the FBI in a 24-hour period. Granted, all records checked that day don't necessarily reflect a firearm purchase. The system is also used for administrative purposes, such as application and renewal of concealed-carry permits. Last year also took the title for most background checks performed in a single week. That occurred from March 16 to March 22, with volume coming in at a staggering 1,197,788.

There are several reasons people purchase a firearm, including self-protection, hunting, target practice, sport

shooting, and competition. Many also believe it's their Second-Amendment right, and their passport to freedom put forth by our ancestors. Youth sport shooting and hunting programs offer the younger set a right of passage into adulthood.

But it may surprise you to know that shooting offers various psychological and physical health benefits, especially if you shoot on a regular basis. Read on to find out the five surprising health benefits of shooting.

1. Boosts confidence. After I qualified as a firearm instructor, I spent many months renting handguns then purchasing the ones I shot best with, always moving up in caliber. I noticed that the larger the gun, the higher the caliber, the more my confidence soared! It's very rewarding when you step out of your comfort zone, try something difficult, and succeed at the endeavor. When you push through, and come out on the

other side of the challenge, your self-esteem benefits. According to a recent Mayo Clinic study, high self-esteem can have a positive effect on your relationships, and ups your ability to take feedback, lowering stress.

I've had many of my beginner students tell me that after they've shot some of my larger, high-caliber handguns, then had to face a difficult situation in their lives, they compared the two experiences, and felt more confident because shooting my gun was more difficult! One of my students told me, "I was nervous about an upcoming test, but I thought about how I felt after shooting your .357 Magnum, and the test was a piece of cake. If I could shoot that gun, I can handle just about anything!"

2. Increases Hand-Eye Coordination. When you focus on a target, and work on your aiming, you increase your hand-eye coordination. Spending time at the range shooting at the bullseye will also eventually improve your marksmanship, and it will also tell you which is your dominant eye. For most shooters, best shooting is accomplished by firing the gun with their dominant hand, and aiming with their dominant eye.

If you are unsure which is your dominant eye, here's how to determine just that, according to the National Rifle Association:

- **First**, focus on a distant object with both eyes open.
- **Second**, extend the arms forward with the hands brought together to form a hole between the thumbs, and look at the object through this hole.

- **Third**, bring the hands close to the face, still observing the object. When the hands are just a few inches from the face, the hole between the hands will be directly in front of the dominant eye.

3. Builds Core Strength. Shooting a small, lightweight handgun won't do much to build core strength, but shooting a large, heavy firearm will increase your core and upper body strength. If you're not holding that gun steady, you will not shoot accurately.

When you achieve the proper stance for shooting, you will automatically build your core muscles, which supports proper posture. When your abdominal muscle tone is poor, and the strength there is weak, your lower back must then hold additional pressure and weight from everyday, simple tasks such as walking and other normal, weight-bearing exercises. Whenever you strengthen your abdominal muscles, this allows the weight of your upper

body to be more evenly distributed over the front and back, which naturally improves balance.

To achieve a good shooting stance, lean forward so your weight is moved to the balls of your feet. Slightly bend your elbows, and move either your left or right foot forward, whatever is comfortable for you.

4. Connects to nature. Whether you're hunting, or shooting at an outdoor range, participating in this type of shooting will connect you with the great outdoors. When hunting, you spend days outside in the forest or field, stalking prey. When target practicing at an outdoor range, you are immediately in touch with nature.

To be honest with you, that's one of the things I love the most about shooting. I shoot at an outdoor range all year long (yes, even in the cold Pennsylvania winters), and as soon as I step out of my SUV, I feel at one with nature. For most people, being outdoors is very calming and soothing. You will feel your stress melt away, and forget about your troubles while you're outdoors. Studies have even shown that spending time outdoors, communing with nature, lowers blood pressure and stress levels.

5. Increased Socialization. If there's one thing we've learned from the COVID pandemic is that as human beings, we need socialization. Granted, some people are more outgoing than others, but most people like to spend time with other people, to vent, bond, and generally connect

with those we have something in common with, such as friends and family.

Participating in the shooting sports is a great way to meet and connect with new people who share a similar interest as you. Whether at an indoor or outdoor range, or attending competition, you can always learn a new technique, ask for help, or make a new connection to add to your social circle. I have also found that there is a camaraderie amongst shooters. When I have needed help at the range, I have always been able to find it from a total stranger. I have also made some new friends because of shooting.

And it's not just my imagination – science backs up the many health benefits of regular, frequent socialization, such as longer lifespan, improved physical health, better mental health, and lowered risk of dementia.

So I say pack up your firearm and head to the closest range – it's not only enjoyable, but it's good for your health!

Dillon's Range Bag[^]

33389 \$139.99

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4"x7"x8" and features two interior pockets measuring 6-1/2"x6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5"x7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12"x8"x1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

"Border Shift" Ammo Bag[^]

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. 13606, \$26.00 ea.

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

DILLON

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package.

13606, \$26.00 ea.

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Spare Decapping Pins

Package of 10	21528	\$8.00
---------------	-------	--------

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runoff will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon's Basic Loader

\$370⁰⁰

15399

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:
Strong Mount 22051 \$85.00

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming

and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

AUTO PRIME SYSTEM[^] 16627 \$115.00

PRIMER SYSTEM EARLY WARNING[^]

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$35.00

AUTO POWDER SYSTEM[^]

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$125.00

OPTIONAL MAGNUM RIFLE POWDER BAR 21353 \$45.00

AUTO EJECT SYSTEM[^]

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$41.00

BL 550 POWDER DIE[^]

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

Powder Die: 16629 \$26.00

Oversize Die: 16626 28.00

Plastic Funnel: 16617 9.00

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) 20029 \$30.00
RL 450 Powder Die 20308 30.00

If You want to Become a Gunsmith - You need to read this book!

Becoming an American Gunsmith shows you a path to follow to become a Certified Professional Gunsmith without having to give up your lifestyle, income, leave home, or spend tens of thousands of dollars attending a campus based school.

Mr. Kelly details how mastering the Design, Function, and Repair (DF&R) training concepts revealed in this book will enable you to maintain, repair, build, and customize firearms as an AGI Certified Gunsmith.

This information will provide you with the ability to follow your passion of working on firearms and ensure your personal freedom and financial security.

Read this book and you will learn how you can be a Certified Gunsmith, protecting and participating in the ongoing history of firearms in America.

- How to set up your shop
- Numerous suggestions and resources to help you establish a *successful* gunsmithing shop.
- What tools and equipment are *really* necessary

Just pay \$5 shipping and handling.

1-800-797-0867

For complete details and to order go to:

www.GunsmithingBook.com

LEARN HOW YOU CAN BECOME A CERTIFIED GUNSMITH!

Be a Certified Gunsmith!

Study-at-home, get Certified, and start making money full-time, part-time or as a retirement income in as little as 90 days!

FREE VIDEO LESSON AND SPECIAL REPORT: "How-to Get Started in Professional Gunsmithing."

Your FREE complete information package will come with everything you need to know about how to get started Gunsmithing **INCLUDING a FREE One Hour Introductory Video Gunsmithing Lesson!** There is a HUGE demand for Gunsmiths and millions of guns out there that need PROFESSIONAL cleaning, maintenance, customizing, and repair. You can even work part-time right from your home!

(DISABLED VETERANS: Have the Government pay for your training! - Contact us for details.)

Study at home through our VIRTUAL GUNSMITHING CAMPUS™ and start making money in as little as 90 days - GUARANTEED! Your one time investment in AGI's course could provide you with a lifetime of income, opportunity and FUN!

Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

Blue Press 31

Dillon Reloading Accessories

A Strong Mount increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	22051	\$85.00
XL 750/650-only	22052	83.00
"SDB"	22223	95.00

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

Stock #62005, \$95.00 is for: XL 750, XL 650, RL 550 and Square

Deal "B". Stock #62006, \$95.00 is for: RL 1100, CP 2000, Super 1050 and RL 1050 as well as *any* Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our Bullet Tray is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	22214	\$55.00
1050 Tray Kit	22215	55.00

The Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

16306	\$50.00
--------------	----------------

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	11555	\$44.00

- Comes with its own AC adapter
- 100g scale check weight included

NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.

\$149.99
10483

Dillon's "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

97126 \$195.00

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

21044, \$90.00 each

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

17950 \$60.00

Dillon's 1" Bench Wrench fits our 1" Die Lock Rings which give you more space on the toolhead.

10842, \$15.00 each

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis

of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes[^]

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

I Love it When a Plan Comes Together!

By Rita Hodges

Photos by Elizabeth Robbins, Frozenintime Photography

I wasn't planning to buy another gun – really, I wasn't – but that always seems to be the exact moment something truly special comes along. This time, the something special was a minty 1971 Colt Python.

A few months ago, I found myself presented with the opportunity to pick up a small, eclectic lot of firearms, including a beautifully well-kept Python, from the original owner, a neighbor who had been an avid bull's-eye shooter in decades past, for a reasonable price, especially in the current market. With local gun store inventories noticeably light on anything that might spark my interest, this was not an opportunity I could let slip through my fingers. After some friendly negotiating, the Python (and a few of its friends) came home with me.

The Python with its classic full-underlug barrel and vent rib (mine came in the classic 6" length), highly polished Colt "Royal Blue" finish, and gold Colt medallions set into wooden grips is unquestionably a thing of beauty, but at some point, the original owner had installed a trigger shoe, popular among slow-fire bull's-eye shooters during the sport's heyday but an alteration that disqualifies my Python as a true collectible. As beautiful as it is, my Python is a shooter, but if I'm being completely honest, that's perfect for me. While I get a very satisfying rush from acquiring a new firearm, I much prefer acquisitions I can shoot and enjoy without fear of destroying the value of a rare gem.

I love this gun, which says a lot since I've never been much of a revolver girl. It's not that I dislike revolvers,

I've just had limited experience with them and naturally gravitate toward polymer-framed semiautomatics. But for some inexplicable reason, this one speaks to me. I saw it, held it in my hands, acquired a quick sight picture, and handed over the cash. Simple as that. Looking beyond its classic good looks and long history, the Python has a well-earned reputation as an enjoyable revolver to shoot. Though on the hefty side, weighing in at 44 ounces empty and 47.2 ounces once loaded with six rounds of Black Hills 158-grain CNL (Conical Nose Lead), it feels well-balanced, and its combination of weight and barrel length contributes heavily – no pun intended – to the Python's mild-mannered recoil.

My new treasure didn't come with a box or any of the original Colt paperwork, but my friend Duane Thomas directed me to a seller on [GunBroker.com](https://www.gunbroker.com) who specializes in authentic Colt boxes. There was an active listing for an original factory box with all the corresponding paperwork, specifically for my early 1970s Python. Per the seller, this would be as close as possible to what I would have gotten if I'd bought my Python, inside that box, back in the early 1970s, right down to the serial number hand-written on the bottom of the box in white grease pencil as it would have been at the Colt factory back in the late 60s and early 70s. This guy even tracked down the original grease pencil. I was nervous about dropping close to \$200 on a cardboard box but I convinced myself it would be really cool to pretend I was stepping back in time for just a moment to pick up this beauty brand spanking new at the counter of a local gun store.

As great as all this was, I found one thing to nitpick about. Granted it had a good bit more to do with the size and shape of my hands than the firearm, but the factory grips, which I assume would work really well for someone with larger hands, were a little too beefy for me, making the trigger reach more of a stretch than was completely comfortable. But this was not to be an issue for very long. While I was busy pondering the box purchase, Duane was off telling the story of the Python to his friend and **Blue Press** editor, Mark Pixler, who generously offered to gift me a set of smaller, thinner Colt grips he'd purchased many years earlier but hadn't been able to put to good use. How cool is that? That gave me all the encouragement I needed to hit the "Buy It Now" button on the GunBroker.com listing. All that was left to do was to patiently (or not so patiently, as the case may be) wait a few days for the new-to-me box and grips to arrive.

The box arrived first. It was expertly packaged inside two mailing boxes, carefully swaddled in bubble wrap and tissue paper, and both the product and the packaging far exceeded my expectations. I'm no expert on vintage Colt boxes, but as far as I can tell it is authentic and exactly as advertised. It included all the paper inserts that would have come in the box back in 1971 including the original owner's manual, a model-specific label on the end of the box, the hang tag that would have been looped around the trigger guard, and the handwritten serial number on the bottom. Tucking the Python snugly into the red interior of its fancy new box was an exciting moment. Worth every penny. If you ever find yourself in need of a vintage box for your Colt firearm, D.J.'s Colt Firearms & Accessories (vyjerryleeaughn@yahoo.com) is the place to go.

Fast-forward a couple more days, I had another box waiting for me when I checked the mail. Inside the parcel was a very pretty and, from all outward appearances, brand-new pair of replacement grips with the classic gold Colt medallions. Wow – again, better than I expected. The Python was unique among Colt revolvers in that it was the only one allowed to wear gold medallions in its grips, all the rest had to be content with silver medallions. The only Python that ever wore grips cut to the dimensions of the grip frame from the factory was the rare 2-1/2" Python. When that gun wasn't a big seller, obviously Colt dumped those grips, complete with gold medallions, on the commercial market where eventually they came into Mark's possession, and decades later to me.

I pulled out my Grace USA maple-handled screwdrivers and went to work swapping out the grips. The new grips were a perfect fit. Thin enough to allow me to get a good purchase on the grip of the gun and shorten the trigger reach just the right amount. The

replacement grips do change the look of the gun a bit, but I think both sets of grips are aesthetically pleasing in different ways – the original grips take more of the spotlight for themselves, while the replacements put all the focus on that lustrous Royal Blue finish. It's always nice to have options.

It was time to go to the range. I decided to err on the side of caution and limit myself to .38 Special rounds rather than risk subjecting my new baby to the abuse of full-power .357 Magnum loads. Unfortunately, neither I nor anywhere I looked locally or online had the ammo I wanted – 148-grain wadcutters. I shared my dilemma with Duane, and again Mr. Thomas came to my rescue with two boxes of Black Hills 158-grain CNL rounds, one in .38 Special and one in .357 Magnum. Intended for Cowboy Action Shooters, both the .38 and .357 loads are specced by Black Hills to deliver the same low velocities, it's just they're in different cases. Time passed slowly as the cowboy rounds winged their way across the country to my mailbox. Finally, ready for a range date!

I headed over to the Johns Creek Indoor Gun Range in Johns Creek, Georgia, a nicely appointed range staffed with folks I've always found to be friendly, knowledgeable and helpful. I picked out a few practice targets and, for comparison purposes, I bought 50 rounds of bulk range ammo in .38 Special – not wadcutters but, per the guy at the counter, they were 147-grain rounds. Close enough.

The Python did not disappoint. Even though shooting a revolver feels foreign and a bit awkward to me, the Python was a total pleasure. The first thing I noticed was the solid cylinder lockup and perfect timing – quality all the way. I started out with the range ammo just to get accustomed to the feel of the firearm, cocking the hammer before each shot to start and then experimenting with the heavier double-action trigger pulls. I then proceeded to shoot several cylinders each of the Black Hills .38 Special CNL and .357 Magnum CNL loads, using the same approach. With all ammo sampled, the Python was a gentle giant with a smooth double-action trigger pull that gets heavier as you get closer to the break, known as stacking, and a crisp break at the top of the stacking, very little muzzle movement and almost no felt recoil. I don't profess to be an expert shooter – in the grand scheme of things I'm a relative newcomer – but let's just say the Python was accurate to the level of the shooter, and, I would imagine, well beyond.

In the end, with a little luck and a lot of help from friends, my unplanned purchase turned out to be a pretty good plan. And I do love it when a plan comes together! Should a minty Colt Python someday cross your path, I highly recommend you grab it with both hands and hold on tight.

Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

HEADSPACE

**ROB'S
ON
POINT**

**DO YOU
HAVE THE
HEADSPACE
NECESSARY
TO SURVIVE
A GUNFIGHT?**

Post shoot, stress and emotion can be overwhelming.
Have a plan so you don't find yourself lost after the shoot.

Create "Bandwidth." Train your body to get it right, without thought. Now that your body knows what to do, your brain is free to see the whole scenario.

Have the skills and equipment to help after the fight has ended.

By Rob Orgel

Do you have the headspace necessary to survive a gunfight?

Are you willing to "put up your fists" and respond with violence?

Often there's a social interaction of conflict and we wish we had been more assertive in our own defense. When we replay that social interaction in our head or verbally, we try to become the person we would have wanted to have been. This is how we evolve into the person we need to be for the next social conflict.

Unfortunately, we do not get these opportunities when we're talking about gunfighting. This is the part where we need to train our mind and body to respond with a proportional level of force.

Bandwidth leaves us room to process the situation. If it takes our full focus and brainpower to draw our firearm and engage a target, it leaves us no space to interpret what's happening and make decisions about how to respond. For example, if it takes my entire focus to engage an assailant, I might not realize there are MULTIPLE assailants!

Applied to everyday life, when you're tying your shoes or brushing your teeth, you're not thinking about tying your shoes or brushing your teeth. You're thinking about what's in store for the rest of the day and how you're going to deal with it.

So, when I'm drawing my firearm, I'm not thinking about a proper firing grip or clearing a concealing garment – my body takes care of that for me, leaving my brain for more important work.

Post engagement, there are likely to be injuries, potentially fatal.

Consider this: we're exchanging bullets in a place that wasn't designed for exchanging bullets, maybe filled with people who were not intended to receive them – including yourself. Having the knowledge, ability and confidence to apply a tourniquet or provide other medical aid could easily be lifesaving. If we haven't given our brain and hands these tools, we become helpless bystanders.

Finally, do you have the knowledge to converse with law enforcement in what amounts to a legal recap of the event? Have you thought about what you would say? Do you have your legal representative's contact information saved in your phone? Or do you plan to tell the police your opinion of what took place and hope for the best?

Saving the best for last:

PREVENT • AWARENESS • EXTRACTION

It's possible to prevent gunfights from happening if you have the awareness and ability to leave.

A question I always ask myself is, "What's best for

Place yourself in that environment, think through what would have been different if you had been there, but ask some new questions as well.

my family?" As I watch the evening news or consider recent violent events, and then "inject Rob," I ask, "If Rob had been there, what would have happened?"

In some situations, events would have had a better outcome. In some situations, events would have had a

worse outcome. In all situations, my family would have suffered. Being detained by police and entering into a legal battle would play a taxing role on my family. So, if I can prevent these results by being aware enough to know when to leave, that will be best for my family.

5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

"Plan B"

Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster[▲] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Sack-Ups Protective Gun Sacks

Sack-Ups Protective Gun Sacks protect your firearms from the dings and scratches that tend to happen when you're rifling through your gun safe looking for...well...your rifle. They don't take up as much room as a gun case, but provide just enough padding to keep your guns safe...in your safe.

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The modular feature of the rack also means that two or more racks can be connected together and reconfigured to take maximum advantage of all available space in your safe or vault. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

Effective Rangefinding

By Oleg Volk

Figuring out effective range is simple for an archer: shoot an arrow into the air, pace out to its impact point and mark that with a flag. The flag will help figure out plus-minus on the distance and windage depending on the weather. The task is rather more difficult for a rifleman: hundreds of yards take longer to pace out, while the bullet hole is harder to find. The rear sight leaf markings may be pre-calculated at the factory, but who can tell 340 yards from 370? That difference can easily mean missing a small and briefly visible target.

Higher velocity and higher ballistic coefficient reduce vertical drop and wind drift, but even specialized calibers eventually require accurate ranging for shooting past point blank. We should also remember that point blank range on a person might be 300 yards, but it's drastically smaller on a six-inch rodent. Walking out to a prairie dog hole would provide an approximate distance, but the target will scamper.

The first ranging method works very well but only on known-size targets. With iron sights, it's easy to tell if the front sight protector width corresponds to a person at 50 yards, while the front sight post equals a person's width at 300. The same works with monoculars or scopes with a rangefinding grid. Some use

a generic 5'10" man height as a reference, others the typical head size, more general minutes of angle or milliradians take more thinking but are more flexible. With a known-size object, such as a car tire or a door, careful math yields very accurate range estimations. Pity not all targets are of known dimensions, and not all of them stick around long enough to permit figuring at leisure.

The second method doesn't require a known-size target. Coincident image rangefinder takes a look at the target from two viewpoints and then rotates the view from one of them to coincide the two images. Knowing the viewpoint separation and the angle of the lens and mirror rotation, the instrument makers pre-calculate the corresponding distances. With the rangefinder base of two inches, a compact camera can provide fairly accurate focus from three feet to about thirty or forty. With the base of 10 feet and longer lenses on each end, a naval gunnery rangefinder can give a useful distance estimate out to several miles. This works great with high-contrast targets in good light but becomes difficult with camouflaged or low-contrast subjects. The base size required for accurate long-distance measurements becomes physically impractical unless mounted on a vehicle or a vessel. Finally, optical rangefinders are notoriously fragile

Opposite Page: The Vortex Ranger 1000 is a lightweight and economical solution for game out to 500 yards and reflective targets to twice that distance.

Above: A coincidence rangefinder for artillery is the same mechanism as used in rangefinder cameras, scaled up to provide accurate results to thousands instead of tens of yards.

Above Right: The Vortex Recon RT 10x monocular includes a milliradian-calibrated reticle and precalculated solutions for human figure at 300 to 600 yards. It works well for ranging known-size objects like people, vehicles, and road signs.

Right: Vortex Fury HD 5000 10x laser rangefinding binoculars provide a magnified view of the object being investigated. It permits more accurate pinpointing of small objects, along with regular observation of the target. It works past three miles on reflective targets.

and require regular service to stay in calibration.

The third method is by laser rangefinder, a simple type of LiDAR (light detection and ranging). Using a near-infrared laser pulse, the device times the return of the reflection and calculates the distance of the illuminated object. Although susceptible to error from heat mirage, laser rangefinders generally show less than 0.3 percent error in distance determination. The effective range depends on the power of the emitted, its collimation with the viewing optic, the quality of the electronics and their firmware. The main external factors are the clarity of the air and the reflectivity of the target. Driving rain or heavy snow will reduce effective range considerably. A competing source of infrared light, such as the sun, will also reduce effective range. A fuzzy black cat won't return the signal as well as a mirror-backed traffic sign at 90 degrees to the laser beam. As a result, a rangefinder rated for 800 yards might only be good to half of that range under non-ideal conditions.

A more serious source of error is missing the target with the beam outright. If the target is substantial, such as a vehicle at quarter mile, it's easy to acquire and center with an unmagnified rangefinder. A prairie dog at the same distance would be hard to even spot, and harder still to range without magnification. This is where a binocular type laser rangefinder comes in

handy: not only is it easier to find and center the magnified target in stereo, the likelihood of accidentally measuring the wrong object decreases drastically. Advanced rangefinders, like the Vortex Fury HD 5000 shown here, also permit ranging through foreground obstacles, or setting foreground priority to exclude similar, more distant objects. Some of them even accept input from portable weather stations to permit accurate ballistic corrections.

Multi-mode rangefinders allow switching from line-of-sight mode (great for calculating how tall a ladder is needed to reach a window) to horizontal component only (perfect for figuring out drop when shooting up or down). Line-of-sight mode is also applicable to firing at steep angles or very long distances: the device shows the actual distance and the angle from horizontal for use in ballistic apps like Strelak. Momentary single-burst measurements for distinct foreground targets at shooting ranges are backed up by a scanning mode for picking up deer behind shrubbery.

A combination of these three approaches will cover close to 100 percent of range-finding needs. If you must rely on just one method, laser rangefinder is the way to go. Over time, having a number of reference measurements done with precision equipment will also improve the quality of educated guesses done without any equipment at all.

GUN CONTROL ISN'T WORKING ...and maybe it never did

By Alan Korwin

The newest estimate of guns in American's hands is now at 390 million, larger than our population. Not the adult population – the entire population. If you're like me, you see this as a good thing, because guns are a good thing. They represent freedom, independence, safety, and more things than I plan to list in this short space. A person who asks why you need a gun, or why you need so many, is so far behind the eight ball... where do you begin? Why do you need so many shoes? In a free country like America, who tells you how many shoes you're "allowed" to have? That goes double for constitutionally protected property.

The fact that this nation is now seeing more vicious immoral street crime than we had in the days of Eliot Ness and the Untouchables, the 1920s during alcohol prohibition, puts the lie to so-called "gun control." We had no such thing back then. There were absolutely no federal "gun-control" laws until 1934, if you overlook a few minor hunting regulations in National Parks (the first was 16 USC §26 in Yellowstone). We had no background checks, or paperwork, registration of any kind, or age limits. People simply went into stores, like the Five & Dime (also known as Woolworth's), or local hardware shops, and bought whatever they wanted. Including machine guns.

Today, as you've read a million times, we're drowning in laws enacted at the federal, state and local level to control guns. A fat lot of good that has done! Every criminal of every description has managed to get everything on their Christmas wish list. But – they can't have any of it – legally. Under so-called "gun control," criminals can't even touch or buy or get any kind of gun or ammunition, but as you can see, it hasn't stopped them. Gun control has failed. It doesn't work. It is a 100-percent failure. Murderers laugh at gun control.

What works is law enforcement. Everyone knows this, including the Democrats who want to gut it. If that isn't insane, the word insane needs to be redefined. Democrats want to defund police at a time when the failure of gun control is so painfully obvious mass media has almost nothing else on its A-list, night after night. The illogic of banning guns, which the Left is pushing fast and furious, is coupled with an effort to disarm and disembowel police forces. They are having luck with that too. Police officers are quitting and departments have essentially been neutered nationwide. You folks in Dillon's audience know of what I speak.

No, what needs a new definition is so-called "gun control." This duplicitous relatively new scheme (not many decades old) is a method for controlling the public and increasing government power. It has nothing to do with stopping crime. Here's a basic truth, remember this: Gun control is not crime control. We have tons of the former, way too little of the latter.

Gun Control is Now Uncontrol

So why are criminals and malfeasants using their guns with such wild abandon, and such frequency? Without any semblance of stealth, or concern for innocents around them – even their own neighbors and children – they set day and night alight with gunfire. Wasn't murder a clandestine thing? Has "gun control" become uncontrol? Although the media would have you believe crime is rampant, that's a Big Lie if ever there was one. Criminal shootings aren't happening in American cities, or even Democrat-controlled cities, as the Right likes to frame it. It is happening in certain limited, select urban neighborhoods. The demographics are publicly available if you care to check (but not made clear by cable or broadcast "news" outlets). This isn't a suburban problem. It isn't a rural issue.

No, what's missing is that much maligned, flatly rejected, looked-down-upon and denigrated old American sense of morality, and ethics, and sense of family values, and yes, even religion, and [The American Way](#).

These have been so stripped out of our lives and our culture that even Olympic athletes don't honor the nation that got them to the podium when they manage to get there. With such abysmal self-esteem, such a vacuum for recognizing what has value, and such constant drubbing from so-called "entertainment" on mass media, it's no wonder that some people crammed into inner cities just parade around shooting each other and anyone else in range.

So-called "gun-control" isn't working and doesn't work. For you though, gun control is practicing, with new and better gear, so you're a better shot, if God forbid, you ever need it in a desperate situation. You have the Second Amendment to protect your right to do that. Every effort to deny that to you, that's the real crime.

Award-winning author Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at GunLaws.com.

ERADICATES COPPER FOULING AT MAGNUM VELOCITIES.

It's the slow-burning, copper-crushing magnum powder shooters have been waiting for. Engineered for Extreme Temperature Stability, Ideal Load Density and elevated confidence and success that comes from reloading with legendary IMR powders.

Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means

that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy. Level-Right PRO 21777 \$69.99

The Specialized Dynamics AR15/AR10 Armorer's Upper Receiver Block is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

Slip 2000 Products

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$21.99

Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. 19234 \$21.99

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$18.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$19.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$14.99

MIL-COMM Extreme Performance Lubricants

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 \$19.99

Shoot Out Targets

The Alpha Target is Shoot Out Targets' Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3" in diameter and 1/2" thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43" tall and 22" wide when assembled.

WHY GEN5 IS THE BEST GLOCK 19 EVER

By Duane Thomas

I have been told by the fine folks at GLOCK®, “We’re having trouble finding writers willing to do an article on the Gen5 GLOCK 19, because their attitude is, ‘It’s just another GLOCK 19.’” I *profoundly* disagree. The Gen5 GLOCK 19 may look like just another GLOCK 19 on the outside, but inside it’s been extensively re-engineered, to the point it’s really a different gun – and a better gun. Let’s take a close look at why that’s the case.

TRIGGER SPRING

In Gens1-4, the Achilles heel of the basic GLOCK design is the trigger spring. Fire a GLOCK much, dry fire it much, the trigger spring will break. It’s not a matter of “if,” it’s a matter of “when.” And when it does, the trigger begins failing to reset. I replace the trigger springs in my Gen1-4 GLOCKS every 5,000 rounds and that neatly avoids the issue. But in Gen5 they redesigned the trigger mechanism to take a durable compression spring instead of a comparatively fragile extension spring. HUGE product improvement.

SLIDE STOP SPRING

In Gens1-4, the slide stop spring is an eyelash-thick piece of curved music wire, that under hard use has been known to break. Admittedly this is more an issue on GLOCKS chambered for heavily recoiling cartridges, and the smaller the gun, the higher the slide velocity,

the bigger the problem. Thus, we’ve seen it on the .40 S&W chambered GLOCK 23, especially the subcompact .40 GLOCK 27, and to a certain extent the subcompact GLOCK 26 9mm, but it has not been unknown on the GLOCK 19 either. With Gen5 they replaced that thin piece of music wire with a compression spring.

SLIDE LOCK SPRING

In Gens1-4, the spring holding the slide lock (what GLOCK calls that little “key” under the barrel we pull down on to field strip the gun, so-called because it’s the part preventing the slide from coming forward off the gun when we fire it) in the upward position is a thin piece of sheet metal, which under hard use has been known to break or lose its tension. When that happens, the gun is out of commission. Again, we have seen this mostly on the GLOCKS 23/26/27; still, it could be an issue on the GLOCK 19, as well. With Gen5 they replaced that part; again, with a durable compression spring.

It’s eerie, with the Gen5 GLOCK 19 it’s like GLOCK went through the gun and redesigned and reinforced every area in which the GLOCK 19 has traditionally had issues. Probably because that’s exactly what they did.

SLIDE CONFIGURATION

Gen5 GLOCK 19s have the front edges of the slide beveled in “to ease reholstering.” Though it’s not like we’ve all been having hideous problems reholstering

our GLOCK 19s over the decades. Early Gen5 GLOCK 19s were produced without front slide cocking grooves, but all current-production guns have them.

AMBI SLIDE RELEASE

The Gen5 ambidextrous slide release has tabs on both sides of the gun, to adapt it for both left- and right-handed shooters.

MARKSMAN BARREL

At variance to the traditional, polygonally rifled GLOCK barrels, Gen5 has what GLOCK calls their Marksman barrel, basically a system of raised lands where the flats of the polygon meet. Brutal honesty does compel me to admit I have not seen a great increase in accuracy with my own Gen5 GLOCK 19. I must mention, however, that Erik Knise, instructor at the Firearms Academy of Seattle, an IDPA Master-class shooter who made his bones with the Beretta 92, a famously accurate gun, has told me that his own, totally stock Gen5 GLOCK 19 carry gun is “the most accurate gun I’ve ever owned.” After watching him hit a steel plate at 75 yards, both left-hand-only and right-hand-only, with one shot apiece (*Ping! Ping!*), I believe him.

NO FINGER GROOVES

The finger grooves on Gen3 and 4 Glocks have never bothered me. I’m one of the lucky ones, the finger grooves fit my hand like GLOCK used it for a mold. People for whom that’s not true hate the finger grooves. For those folks, the good news is that Gen5 is the first gen since Gen2 to have no finger grooves on the frontstrap.

MAG WELL

The magazine well has been opened up and flared significantly. Of course, the basic GLOCK design already had the best mag well on any factory autopistol. The truth is though, there’s nothing wrong with taking the best mag well of any production autopistol and making it even better.

There are several features on the Gen5 GLOCK 19 that were first introduced with Gen4, and have been wisely folded into the new gen, as well. For instance:

RECOIL SPRING

The Gen5 GLOCK 19 features a recoil spring system, introduced in Gen4, consisting of two guide rods, and two springs, reciprocating within and around each other. The Gen4 recoil spring system earned a lot of contempt because, originally designed for GLOCK .40s, it took GLOCK way longer than it should have to get it sorted out for 9mms. However, that has long since been accomplished, and it really is a superior system which allows, for all practical purposes, fitting a much longer recoil spring inside the same-length dust cover. This allows greater preload (the amount of force pushing forward on the slide when the action is closed) and also more energy to complete closing the slide as it returns forward after firing the gun.

GRIP TEXTURING

Starting on Gen4, and retained on Gen5, the texturing on the grip was changed to a series of raised bumps called by GLOCK “polymids” that really do a great job being smooth enough to allow the shooter’s hand to slide into place on the draw, but rough enough to really lock your grip into place once you tighten down your hand.

REPLACEABLE BACKSTRAPS

With Gen4, GLOCK took the Short Frame (SF) treatment applied to certain large frame GLOCKS and put it on the medium frame guns, too. This shortened trigger reach by two millimeters. That might not sound like a lot, but it is, and that didn’t just change trigger reach, it changed the overall shape of the grip. I have heard more than one person who previously disliked the shape of the GLOCK grip say they like the Gen4/5 treatment a lot better.

At the same time, GLOCK began offering four removable/replaceable backstraps for the guns.

1. A Medium unit (marked “M” on the inside of the overlay) that returns grip dimensions to Gen3.

2. A Large (L) unit that extends the front-to-rear dimensions of the grip – though obviously not the width – to that of a large frame GLOCK.

3. and 4. Medium and Large backstraps that have a beavertail built into them. I am fortunate I don’t get “slide tracks” from the GLOCK’s low-riding slide, but some people really get filleted. For those people, the beavertail backstrap overlays are worth their weight in gold. (More, actually, because they really don’t weigh that much.)

There is no such thing as a Small backstrap overlay; GLOCK considers running the grip “naked” sans overlay to be the Small option.

MAGAZINE RELEASE BUTTON

The Gen4/5 magazine release button is literally 3x the size of previous gens. It’s also reversible for left-handed users.

SUMMARY

I want to make this very clear: I am not saying, if you own a Gen2, 3 or 4 GLOCK 19 (other than a few prototypes that were made from cutting down Gen1 GLOCK 17s, there is no such thing as a Gen1 GLOCK 19 – the GLOCK 19 is very much a Gen2 phenomenon), this is an “All-hands-on-deck, you’re taking your life in your hands if you don’t instantly upgrade to Gen5!” emergency. I’m not saying that at all. I *will* say, if you were to place a Gen2, Gen3, Gen4, and Gen5 GLOCK 19 down on a table in front of me, and say, “You can have one of these to make your carry gun, your self-defense gun, your match gun, your ten-thousand-rounds-a-year gun,” I would UNHESITATINGLY take the Gen5.

The Gen5s are the best GLOCK 19s ever made.

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	25374	\$79.99

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

Stackable Utility Box 40194 \$20.99

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

10+1 CAPACITY

RED-DOT OPTIC

\$399.99

Think Fast: Everything moves fast these days, but we know a few things about staying a step ahead of the competition. That's why we created the DVG-1RD; a striker-fired subcompact 9mm. The factory-equipped red-dot optic means faster target acquisition and our proprietary manufacturing process means big savings on a performance firearm.
