**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# Dillon's Bill of Rights for Reloaders

**All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:**

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

**Editor's Note:** The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his wcompany from all the others at the time was the warranty and customer service he offered.

We constantly strive to live up to his standards.  
Please let us know if we're not succeeding.

# CP 2000<sup>^</sup>

## Dillon's DEDICATED Case-Processing Machine!

- Made in the USA
- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL 1100 and Super 1050, the CP 2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP 2000 will make your task MUCH easier.

**\$1799<sup>00\*</sup>**

CP 2000 with Small Primer Swager 66200

CP 2000 with Large Primer Swager 66201

Case Trimmer, Trim Die, Short Trim Die Toolhead, Universal Decapping Die and Second Back-Up Expander Die Sold Separately

Total price as pictured with optional accessories: \$3043.00

Universal Decapping Die	22127	\$36.00
Small Rifle Casefeed Plate	21074	\$48.00

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

Dillon's  
RT 1500  
shown  
installed  
on an  
XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-disconnect

power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **62164** is **\$425.00**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$25.00** each. Upper lock rings, **13559**, are **\$9.00** each.

## MILITARY BRASS?

**Eliminate the "Grunt Work" with  
Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

**20095  
\$135.00**

6.8 SPC Back-Up Rod	<b>62124</b>	<b>\$27.00</b>

# Case Preparation Equipment

## CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14",

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle.	<b>13804</b>	<b>\$9.99</b>

## Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator ^	<b>20675</b>	<b>\$110.00</b>
CM-500 Case/Media Separator ^	<b>21045</b>	<b>\$80.00</b>

and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon created the CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV-2001 ^, US 110v	<b>20493</b>	<b>\$250.00</b>
CV-750 ^, US 110v	<b>19455</b>	<b>190.00</b>

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

A man wearing a grey knit beanie, large black headphones, and yellow-tinted sunglasses is smiling. He is dressed in a black jacket with a thick fur collar and a colorful patterned scarf. He holds a blue and black thermos in his gloved right hand and a black rifle in his gloved left hand. The background is a blurred outdoor setting with a wooden target board visible on the right.

# Ten Top Cold-Weather Shooting Tips

*Oleg Volk photo.*

**By Maureen P. Sangiorgio**  
**NRA-Certified Firearm Instructor/Range Safety Officer**  
**Photos by Oleg Volk & Yamil R. Sued**

For as long as I can remember, I've always preferred the cooler weather to the hot, summer months. My mother swore it was because I was born in January! Also, living in Pennsylvania, if I only went to the range when it was warm outside, I would only be shooting maybe six months of the year.

This time of year, whether you're headed out to the range, or hunting, frigid temps and cold winds can affect your shooting skills. And according to recent research, if you're outside in the cold for too long, it not only impairs your thinking, it stays impaired for a few hours after you've warmed up. As a matter of fact, the study showed that spending just two hours in fifty-degree temps can affect your cognitive function, so imagine how even colder temps can affect your brain.

Follow these tips to find out how you can keep your shooting skills up when the temperature goes down.

**Dress in layers.** According to [Alaska.org](http://Alaska.org) (hey, they would know best!), wearing several layers is the best way to trap heat close to your body. Two or more thin layers will be much warmer than a single, heavy layer of the same thickness. Each layer should be a little looser and heavier than the one beneath. For example, if your first layer is thermal underwear, your next layer should be fleece, topped with a thick, heavy, goose-down parka. You can try synthetic down parkas, but in my experience, REAL goose-down parkas are the warmest.

**Grab some Grabbers.** It's also important to keep your feet warm. Purchase boots rated much colder than the temperatures you're expecting, such as -20° or more. You can also purchase a foot-warming product called Grabber® Foot Warmers. I've tried a few brand names, but I like these the best.

They just seem to keep my feet warmest the longest. They are single-use, air-activated heat packs that provide up to five hours of continuous warmth for your feet. Available at True Value, Ace Hardware, and Amazon. (For more info: <https://grabberwarmers.com/>)

**Lighten the lube.** When you're shooting in the winter, it's important to clean and lube your gun with oil made for cold, wet weather. "Thicker lubricants can make firearms seem sluggish in recoil or even cause malfunctions," notes Julie Golob, IPSC Ladies Classic World Champion, US Army Athlete of the Year, and 9-time IPSC Medalist.

Bio-Syn Extra Firearm Lubricant CLP is a specially formulated light lubricant that was developed to provide lubrication in a wide range of temperatures, including extreme subzero temperatures. This product is for use in cleaning, lubricating and preservation of all types of firearms with an operational temperature range of -60 to +160 °F. (<https://renewablelube.com/products/bio-synextra-firearm-lubricant-clp>)

Another good product for cold-weather shooting is SLiP 2000 Gun Lube. This lubricant has an operational temperature all the way down to -130° F. (<https://slip2000.com/>)

**Keep your hands warm.** Key to good winter shooting is to keep your hands as warm as possible. "Wear gloves, use hand warmers and keep your hands in your pockets until it's time to shoot," advises Golob. "Growing up in upstate New York, competing in frigid conditions with deep snow, I remember shoving hand warmers inside the grip of my pistol and keeping the gun covered until it was my time to shoot. I kept my hands as warm as I could, placing my fingers under my armpits when I was on the line and waiting for the commands to shoot. Keeping

my hands as warm as possible and preventing the grip from getting too cold helped. If you live in a climate with chilly spring and fall seasons with long winters and

1. Dress in layers.

2. Grab some Grabbers.

3. Lighten the lube.

4. Keep your hands warm.

5. Check your grip often.

6. Focus on the basics.

7. Schedule a practice session.

8. Practice dry fire.

9. Watch for frostbite.

10. Rethink breakfast.

**Julie Golob competes at the IDPA Indoor National Championships.**  
*Yamil R. Sued photo.*

you plan to carry a firearm in the cold, learning how to shoot with gloves is an important skill."

**Check your grip often.** "Shooting in the cold can be a significant challenge, especially if you're used to shooting in ideal conditions," notes Golob. "In low temperatures it can be hard to tell just how much you're gripping a pistol. You lose dexterity in your trigger finger for both a smooth press and for speed."

**Focus on the basics.** According to Golob, the cold and windchill can also become a mental distraction. "Your discomfort may produce a loss of patience, even worse, it could cause bad habits. Generally, the tighter the fit on the firearm, the more significant cold can play a factor in reliability. The combination of the effects of cold on you and your firearm can result in a poor shooting performance."

**Schedule a practice session.** Cold air is denser than warm air, so the cold winter temps can affect your bullets, slowing them down. Some powders are more sensitive than others, so try to schedule a practice session where you get to the range at about the same temperature as you expect when you go hunting.

**Practice dry fire.** I hear you – it's difficult to be motivated to shoot when the temperatures drop. Keeping up with dry fire can help you maintain your shooting skills. "Whether you're at a range, a competitor, or use your firearm for home or self-defense, practicing dry

fire skills at home will help until you are able to get to the range," says Golob. "If you have access to an indoor range, even better. Just know that as the temperatures drop, the demand for range time at indoor ranges increases."

**Watch for frostbite.** According to the Cleveland Clinic, frostbite is a potentially permanent condition that happens when your body tissues, like fingers, toes, and ears, are injured by exposure to cold weather or cold water. Even though exposed skin gets frostbitten first, it can still happen to covered skin. You can tell you have frostbite when the skin becomes hard and white.

"Going to the range with a plan, whether it's indoors or outside is important to ensure you don't waste valuable time for productive shooting," says Golob. "If you are shooting outside try to keep warm and take mini breaks. If at any point you no longer feel the training is productive or that it's so cold you lose dexterity, it's time to head inside and dry fire instead."

**Rethink breakfast.** Want to boost circulation to your hands and feet? Put down that fatty breakfast pastry and reach for a bowl of warm oatmeal. Studies show that fatty foods help slow circulation, while whole grain, high-fiber foods help increase circulation to the extremities. And be sure to wash down your oatmeal with a large glass of orange juice. Oranges are very high in antioxidants, which also help increase circulation.

# Dillon Automation's DA 3000

## For Dillon Precision's CP 2000 and RL 1100

Introducing the new Dillon Autodrive 3000!

- Fully automates the Dillon Precision CP 2000 and RL 1100.
- Case Preparation rate up to 3000 rounds per hour!
- Reloading rate up to 2000 rounds per hour!
- DA 3000 easily installs on your Reloading and Case Prep machines.
- Simply press the "Start" button – no more manual cycling of the machine.
- Adjustable Cycle Rate and Dwell.
- Dillon custom-built Industrial Controller.
- Integrated safety controls and shield.
- Field-tested and proven patented design.
- One-year warranty on the DA 3000.
- Maintains your Dillon-Factory machine warranty.
- Made in Scottsdale, Arizona USA.

# Mr. Bulletfeeder®

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

# Dillon's Range Bag<sup>^</sup>

**33389 \$139.99**

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4"x7"x8" and features two interior pockets measuring 6-1/2"x6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5"x7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12"x8"x1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

## "Border Shift" Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	<b>13755</b>	<b>\$39.99</b>
I.D. Card Holder <sup>^</sup>	<b>14575</b>	<b>2.99</b>

## Dillon Pistol Case<sup>^</sup>

Our pistol case was designed to hold and protect your pistol and carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

**12709 \$39.99**

# Self Defense Matters

## 17-year-old teaches America lessons

By Alan Korwin

If Kyle Rittenhouse had not shot the rioters who were about to murder him – whatever their reasoning or justifications – he'd be dead. There would be no show trial, no debates, no examination of what self defense is about. Just another dead kid, with no mass-media circus – their bald-faced lies exposed at trial.

You and me, we all know self defense matters. Now the rest of the world must face it, in undeniable fashion. A unanimous verdict in a high-profile case, one in a long string of unambiguous verdicts, based on research and reality, has demonstrated for the world, despite endless resistance from anti-independence people, that the right to live and defend that life, is sacrosanct.

We – readers of this magalog – also know full well that the primary purpose of an armed public, and the Second Amendment that guards it, is not self defense but balance of power, a deterrent to tyranny. If all power is gathered in the hands of “authorities,” whether it's a tribe, government or a dictatorship, freedom cannot flourish. A monopoly of power, something elites and people in power inexorably seek, the preservation of individual liberty cannot thrive, let alone survive. So people in our land of the free – the most free the planet has ever known – are armed to the teeth. This is a good thing.

Unfortunately, through bad schooling, a corrupt education system, and a “news” media that does more to hide truth than reveal it, a significant chunk of the

populace doesn't know these basic principles. Yet when the jury system got the details of a life-or-death struggle in Kenosha, Wisconsin, they got it right. Only when someone is about to illegally end your life can you use deadly force to stop the threat, even if it means terminating a person.

The tool you use, even a rifle vilified by the uneducated, is not the issue. Did you act in an appropriate manner, at the right moment, no more and no less? You live to tell the jury and the world, instead of being dead.

People don't realize that the actions young Kyle Rittenhouse took that fateful day on August 25, 2020, to save himself from murder by an enraged mob, had been reviewed and approved by our own U.S. Supreme Court, in a series of cases stretching from 1894 to 1921. Back in those days, the lurid (juicy?) details of events were collected and included in the Court's decisions. Some read like dime-store western novels, preserved for you if you want the specifics. Bar-room brawls, a mutiny, some stranger in his wife's bedroom, attacked with a knife, arming yourself in advance against a threat, the moment of acting, your intent, using enough force, it's all in there. Self-defense law is not invented on the spot. It is long established. Key cases include:

**You may arm yourself in advance:** *Brown*, 1921

**You must begin from innocence:** *Logan* 1892; *Beard* 1895; *Rowe* 1896; *Brown* 1921

**You need reasonable belief and grounds for that belief:** *Beard* 1895; *Allen*, *Acers*, *Alberty*, *Wallace* 1896

**People don't realize  
that the actions young  
Kyle Rittenhouse took  
that fateful day ...  
to save himself from  
murder by an enraged  
mob, had been reviewed  
and approved by our  
own U.S. Supreme Court,  
in a series of cases  
stretching from  
1894 to 1921.**

## Combo Package

### .223 Conversion

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

## Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon's double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

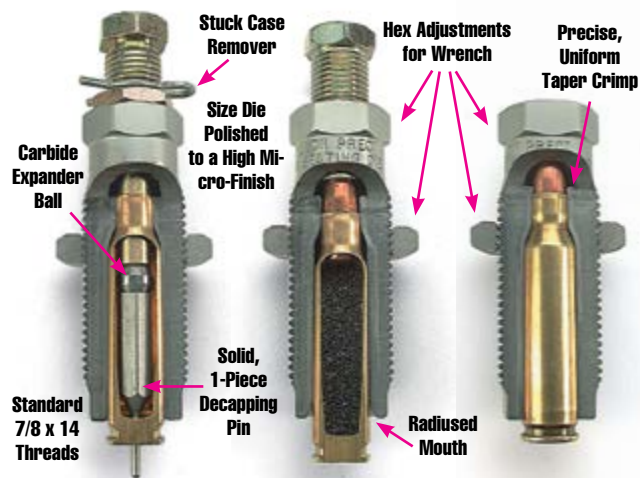

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

### Dillon Carbide Pistol Dies (Three-Die Sets)

.32 S&W Long/.32 H&R Mag.	14426	\$125.00

### Spare Decapping Pins

Package of 10	21528	\$8.00
---------------	-------	--------

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

# BL 550<sup>^</sup>

## Dillon's Basic Loader

**\$395<sup>00</sup>**  
**15399**

Reloading Dies and Caliber Conversions sold separately  
Pictured with optional accessories:  
Strong Mount 22051 \$95.00

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and

powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 25) makes it quick, easy and inexpensive to change calibers.

**AUTO PRIME SYSTEM<sup>^</sup>** 16627 \$120.00

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$37.00

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$130.00

**OPTIONAL MAGNUM RIFLE POWDER BAR** 21353 \$45.00

### AUTO EJECT SYSTEM<sup>^</sup>

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$43.00

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die:** 16629 \$27.00

**Oversize Die:** 16626 29.00

**Plastic Funnel:** 16617 9.00

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) 20029 \$32.00

**RL 450 Powder Die** 20308 32.00

# Self Defense Matters *Continued from Page 19*

**Intent must be to protect:** *Gourko 1894; Thompson 1894; Allen, Wallace 1896*

**Actions not words justify acting in your own defense:** *Allison 1895; Allen, Acers, Alberty 1896*

**Necessity – you may only act in the precise moment of need:** *Logan 1892; Starr 1894; Beard 1895; Rowe 1896*

**Necessity ends when the threat ends:** *Acers 1896; Brown 1921*

**Equal force is a factor:** *Logan 1892; Beard 1895; Allen, Alberty 1896*

**Retreat is not required:** *Beard 1895; Rowe, Alberty 1896; Brown 1921*

**Chase: Police can give chase sometimes, you generally cannot:** *Garner 1995*

If you followed the Rittenhouse trial as many of us did, you learned it is always more complicated than you thought. It may seem to you that you're justified, but the judge and jury must decide, not you, and agree, well after the fact, and under terribly difficult circumstances. That includes enduring fake news, jury threats, bad prosecutors and more, none of whom will be tried for their bad intent, malfeasance or negative impacts on your situation or verdict. The world isn't fair. It is only because Kyle's trial

was available to all eyes on TV the world could witness the grotesque abuse and lies perpetrated by the so-called "news" media. We've been calling out fake news for a long time. Now it is self-evident.

In my 12th book, *After You Shoot – Your gun's hot, the perp's not, now what?*, I created additional self-defense rules, adding to the familiar gun-safety rules we all learn. Rule #4 matters: "It's always better to avoid a gunfight than to win one," and when you look at what Kyle went through you understand it. Keep Rule #2 in mind when you walk out your door, armed: "When you drop the hammer plan to cash in your life savings for your lawyer's retainer. Avoid this unless your life depends on it."

After decades, I developed a rule that covers my entire gun-owner-guide series, in one line. If you remember one thing, make it this: **If innocent life doesn't immediately depend on it, don't shoot; and if it does, don't miss.**

Kyle Rittenhouse did that and is now a free man.

Award-winning author Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at [GunLaws.com](http://GunLaws.com).

## Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

# Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	<b>22051</b>	<b>\$95.00</b>
XL 750/650-only	<b>22052</b>	<b>93.00</b>
"SDB"	<b>22223</b>	<b>105.00</b>

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

**Stock #62005, \$95.00** is for:

XL 750, XL 650, RL 550 and Square Deal "B". **Stock #62006, \$95.00** is for:

RL 1100, CP 2000, Super 1050 and RL 1050 as well as any Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>22214</b>	<b>\$60.00</b>
1050 Tray Kit	<b>22215</b>	<b>60.00</b>

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

<b>16306</b>	<b>\$52.00</b>
--------------	----------------

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	<b>11555</b>	<b>\$44.00</b>
RL 550/XL 750 with Wrench Set	<b>11541</b>	<b>42.00</b>

Blue XL 750/650	<b>62136</b>	<b>50.00</b>
Black XL 750/650	<b>62137</b>	<b>50.00</b>

The **Square Deal "B" Toolhead Stand** holds your SDB toolhead, powder measure, dies and caliber conversion components (*not included*) in an orderly manner.

**62225, \$45.00**

Our **Toolhead Stands** for the RL 550 and XL 750/650 are the ultimate in convenience for keeping your reloading bench clean and uncluttered.

**22055, \$29.00 each**

**Dillon's 1050 Toolhead Stand** is now available to store caliber quick changes for the 1050.

**62200, \$58.00**

**Equipment Dust Covers** are made of tough packcloth nylon and add security to your loading bench. Your reloader will be protected against more than dust as the machine covers come with a D-ring that allows the heavy duty zipper to be locked.

SDB/550 Cover	<b>13795</b>	<b>\$24.99</b>
XL 750/650 Cover	<b>10443</b>	<b>39.99</b>

## “D-TERMINATOR” Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

*NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.*

**\$149.99**  
**10483**

Dillon's **“Belted Magnum” Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**97126 \$205.00**

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**21044, \$93.00 each**

An **Aluminum Roller Handle** gives your reloader an entirely new “feel,” reduces operator fatigue, and makes primer seating easier.

**17950 \$64.00**

Dillon's **1” Bench Wrench** fits our 1” Die Lock Rings which give you more space on the toolhead.

**10842, \$15.00 each**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit Only	<b>22211</b>	<b>\$38.00</b>

# Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the

plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

# Guns for Dessert Therapy for Hopeless Hoploholics

By Peter Caroline

I was seven years old when someone, whom my mother described as “an enemy of the family,” gifted me with a Daisy Golden Eagle BB gun. Little did I realize that it was the entry drug to literally hundreds of

successors, ranging from 2mm pinfire derringers to a .50 Beowulf Evil Black Rifle. I finally got my accumulation down to 2-digit levels last year, when Bobby Tyler made me an offer I couldn’t refuse. But the struggle continues.

Quitting, or a reasonable facsimile thereof, is made more bearable if you can find a fellow sufferer. My friend, neighbor and shooting buddy, Jim, is similarly afflicted. Like me, he has often said, "That's it...I'm not buying another gun!" Then we both laugh. But we have come up with a means of keeping our affliction tamed to an acceptable level. It's called brunch therapy. We set out for some breakfast spot noted for generous portions, and afterwards, stuffed to semi-consciousness, check out the local firearms emporiums. In most instances, we find nothing that appeals. In our latest foray, however, we struck gold. Literally.

We had enjoyed a hearty brunch at the Bisbee, Arizona, Breakfast Club. They make excellent potato pancakes accompanied by eggs, ham, bacon, sausages, toast, etc. We then staggered out to the car and headed for Sierra Vista, where there were several promising gun shops. At the first place we visited, we encountered a sign indicating that masks were *streng verboten*, a welcome relief in these days of the plague. They had an unusually large selection of guns, both new and used, both on the walls and under glass. Jim and I are both interested in vintage Smith & Wessons, and there were plenty to choose from. Jim spotted one specimen, an older .22, and requested a closer look. It was a K-22 Outdoorsman, the first of the Springfield firm's K-frame .22 revolvers. I noticed that the front sight sported a small gold sphere. The gun was in decent shape, the 3-lb. trigger pull was exemplary, and the price was well under four figures. Jim said, "I dunno... what do you think?" I replied, "If you don't buy it, I will!" He bought it.

Jim is a driven researcher. As soon as he got home, he hit the Internet. It turned out that his new acquisition was one of the earliest specimens of the K-22 1st Model,

made early in 1931. The first 500 specimens were distinguished by a spherical gold front sight insert, developed by Charles Call, a noted competition shooter of that time. The rear sight, fastened to the frame by one screw, was adjustable for windage and elevation, and identical

**"The first 500 specimens were distinguished by a spherical gold front sight insert, developed by a noted competition shooter of that time."**

to that of S&W's K-38 target model. Later in 1931, K-22s sported a stainless-steel ball inserted in the front sight. The K-22 was the first .22 rimfire revolver to include recessed chambers, a beneficial feature that S&W somehow never bothered to patent. Apparently, both Winchester and Remington had introduced a more potent powder formulation in their .22 rimfire rounds. This was the good news. The bad news was, at that time, .22 cartridges employed copper shell cases. The new, more-powerful powder produced ruptured cases, resulting in a number of injuries to shooters. The recessed chambers protected the shooter from these accidents. A subsequent switch to brass cases did solve the problem, but the recessed chambers are still a quality feature.

Of course, Jim sent away for a factory letter. It turns out that his revolver was the 435th in the initial production run of 500. It was a special-order item, shipped from the factory to a hardware company in Kansas City.

Both the S&W-marked trigger and hammer are blued, in contrast to the maker's usual practice of color casehardening. Why? Who knows? Firearms makers of that period were happy to accommodate their customers' individual preferences, at a price. In any case, its current owner will enjoy shooting it, as the factory intended.

Incidentally, I didn't walk away empty handed. I had noticed, nearly hidden by all the big revolvers, a tiny little S&W Model 61-2 Escort .22 semiauto pistol. It looked lonely and frightened. How could I, in good conscience, leave it there? But it's the last gun. Maybe.

**S&W Model 61-2 Escort .22 pistol.**

**WARNING:** These products contain lead, which is known to cause birth defects, other reproductive harm and cancer. Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

# Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

# DILLON

## RIFLE COMPANY

### DRC Staff Article

Six years ago, Chris Dillon and Brodie Renner attended the Shot Show in Las Vegas. “We walked through the semiautomatic rifle arena and came out disappointed,” Chris said. “There was nothing exceptionally new or dramatically different. Brodie looked at me and said, ‘Someone ought to do something about this.’ So, we did.” The Dillon Rifle Company.

There was no footprint; no plan for building an agile, exciting, R&D-based business in the firearm industry. Starting at ground zero, Chris was able to put his vision of a better engineering organizational structure into play. “I hate repetition. At some level, there must be a better way to take control of the process, to fire the imagination.”

“Idea generation is the information flow needed to create great products. Those products are created by strong teams. So how do we keep the information as pure from point A to point B? Every add, be it person or system equals more corrupted information flow.”

As time progressed, Chris became committed to the idea that four or five people is the ideal size of group that allows largest information and creativity retained without degradation. “The personal level of communication is most easily understood and achieved with the greatest retention. The team will naturally create their own culture, and produce their best work, in the best way for their team. On larger projects, teams engage on a lateral – not vertical – hierarchical structure. An even playing field – in a truth-to-work environment.”

A self-described ‘ordinary guy,’ Chris Dillon, is a true collaborative leader. “I bring together these incredibly talented people, and provide the resources, environment, and trust for them to spread their wings. I’m continually blown away by the functionality and beauty of what DRC teams create.”

The energy from this open management style is

embodied in the people who work there, an enthusiastic crew of men and women who believe in each other, the company they’re building and the work they’re doing.

“I’ve always hated the phrase ‘failure is not an option,’” Chris says. “While it’s not the desired option, it’s always possible. People don’t understand how failure in manufacturing and design can be a great thing. It’s a sign of progress – how lessons are learned, methods improved upon. Failure is part of the success process. A fear of it kills creativity.”

The bigger and more complex a company becomes, the more cautious and more risk averse they become. The desire for growth is replaced by the want to sustain it.

But DRC is committed to staying lean and adaptive. Identifying and taking aggressive risks comfortably and continually, while maintaining the quality and trust customers of the Dillon Companies expect. “Build the best products, sell them at a fair price and always treat the customer in the way you wish to be treated.”

With a stellar team in place, DRC opted to start with a manageable project; to design and build a trigger. They developed the OPAR Operator Trigger, a pre-stage, drop-in, AR trigger.

When the trigger build was completed, it was time to teach the DRC team the business side of doing business. From marketing, orders, lead-times, warehousing and shipping, to the thousands of little things people are unaware of until they stumble across them. “At DRC, we are collectively different, but exploring all aspects of the business together.”

The success of the OPAR Operator Trigger has instilled a sense of achievement in the DRC team. A confidence and purpose they take with them onto future projects.

Headquartered in Scottsdale, Arizona, DRC also has a multi-media division: No Roads. Chris believes, “You have to be open to new things and other ideas to be groundbreaking.”

**Law Enforcement  
Officers...**

**Sport  
Shooters...**

### **So, How Can the Dillon Rifle Company Launch Without any Rifles?**

Chris wants customers to experience the ride with DRC, to have a front-row seat in the excitement of growth and product development. With an aggressive but doable schedule, DRC's first rifle is scheduled to release in May 2022. The second is slated for October 2022. These will be two separate types of rifles. Not AR derivatives, they are new semiautomatic rifles of various designs. Everything from the trigger to new aesthetic features, safety, and futuristic components.

"You need to live and breathe the project," Chris says. "Love and bleed for whatever you're making. If you believe in someone else to do it, build your own team. Hang in there with us. We'll get there...eventually."

The Dillon Rifle Company is a growing-excited company.

### **Why DRC Started With the Trigger**

"We're on a nighttime helicopter insertion in Iraq, and I'm sitting on the ramp going over our mission in my head. Entry points, last location of the eight insurgents, the secondary objective, time on the objective before we had to EXFIL, MEDEVAC HLZs and so on. A routine I'd practiced a hundred times.

I hear a gunshot and feel heat between my legs. I immediately think we're taking fire. But everything's quiet, the helicopter's still heading toward the objective.

My good friend, fellow sniper, and one of the best operators our nation has to offer, just had an accidental discharge.

Somehow during the 30-minute flight his selector switched from 'SAFE' to 'FIRE'. When he adjusted his seating position on the ramp, his trigger snagged on something and fired the weapon. Because of the way we were packed in there, the muzzle flash went off right between my legs. If I was a bigger man, I would not have a second kid today.

Fortunately, no real damage was done to either me or the helicopter. We continued toward the objective and completed the mission with no friendlies wounded or killed.

That night could have gone very differently. Even among the ranks of the most elite operators using the best equipment available, mistakes can be made, and accidents will occur."

**Brodie Renner, Senior Chief (Ret)  
Retired Navy SEAL**

**DRC Manager of Non-Standard Weapons**

This incident-inspired opportunity was the first ground-up design and build project for the Dillon Rifle Company: The OPAR Operator Trigger.

### **What is a Pre-Stage Trigger?**

A pre-stage trigger is a trigger that requires two separate actions that must be completed in the proper sequence for the sear to trip.

DRC intentionally selected the term "pre-stage" in order to differentiate it from traditional Single or Two-Stage triggers. The OPAR Operator Trigger is specifically designed to reduce the likelihood of accidental discharges.

If a shooter places their finger on the side of a Mil-Spec M-16 trigger and applies a small amount of pressure against it, then draws their finger backward, the gun will fire. It takes an average of only 7.0 pounds of pressure to trip the sear, and the sear does not care where that pressure comes from.

This is the exact scenario that nearly put a bullet in Brodie Renner's leg. In the after-action report, it was determined that sometime during the flight, the rifle's safety had been bumped to the "FIRE" position. Following that, pressure had been applied to the trigger by a piece of kit or part of the operator's uniform causing the M-4 to fire.

The OPAR Operator Trigger addresses the vulnerability of an accidental discharge in two ways. First, a secondary trigger is inset in the primary trigger shoe. When depressed properly, the secondary trigger moves DRC's

Hunters...

The OPAR  
Operator Trigger

Trigger Stop that prevents the sear from disengaging.

In order for the trigger to function, the inset trigger must first be depressed, or the primary trigger will lock, resisting firing. From a shooter's perspective, it's a normal trigger pull. Direct pressure to the trigger and the shooter will never know it's there.

The second vulnerability DRC addressed is the area on a trigger where when pressure is applied will cause it to fire. This is referred to as its Area of Engagement. On a Mil-Spec trigger this area is equal to 180°.

By shrouding the secondary trigger inside the uniquely shaped trigger shoe, the Area of Engagement on OPAR triggers is narrowed considerably. There are currently two models of the OPAR Operator Trigger; the Operator Curved and Operator Straight.

Built for the CQB community, the Operator Curved has an Area of Engagement (AoE) of 100°. The Operator Straight has been designed with law enforcement, military, and general sportsmen in mind and has an AoE of 30°.

From the perspective of the shooter, OPAR Operator Triggers have a clean 5.0- to 5.5-pound trigger pull weight, crisp break, and a short trigger reset.

### What Happens if the Trigger is Pulled Incorrectly?

A proper trigger pull is when the pad of the fingertip is placed on the center of the trigger and pressure is applied straight back towards the shooter's shoulder. Using normal technique, the OPAR works every time.

#### AREA OF ENGAGEMENT (A. O. E.)

However, if only the trigger shoe is pressed, the trigger will lock, preventing the rifle from firing. DRC's trigger shoe is designed to be the first thing any 'foreign object' comes into contact with, this is where the trigger's overall shape of comes into play. A shooter's trigger finger will naturally seek the center of the trigger, where the

inset trigger is. A strap or other unwanted object will tend to grab or catch the most pronounced part of the trigger, in this case, the trigger shoe and lock up.

Additionally, DRC's design allows for times when shooting is desired, but finger placement is less than ideal. In these situations, the trigger pull weight will rise noticeably. Imagine the soldier or police officer suddenly having to engage a threat using their firearm. In those situations, finger placement may not be perfect, but they will still have a functional rifle.

### Why the OPAR Operator Trigger?

Dillon Rifle Company believes the number one quality of a professional is mindset. The ability to recognize that you're not perfect and there will be days when things do not go as intended. While you cannot prevent mistakes, you can mitigate them.

### The Dillon Rifle Company

We have a vision of where we want to go. It won't always be in the direction you'll expect, but we hope that you enjoy the space that we create.

## Sack-Ups Protective Gun Sacks

Sack-Ups Protective Gun Sacks protect your firearms from the dings and scratches that tend to happen when you're rifling through your gun safe looking for...well...your rifle. They don't take up as much room as a gun case, but provide just enough padding to keep your guns safe... in your safe.

## HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb

moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The modular feature of the rack also means that two or more racks can be connected together and reconfigured to take maximum advantage of all available space in your safe or vault. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

### All-in-One Torque Driver Kit

Featuring the Fix It Sticks All-in-One Torque Driver. Tighten down your scope rings, mounts, actions screws, etc. while in the field, at the range, or at home.

Kit includes: All-in-One Torque Driver (15 - 65 inch lbs); T-Way T-Handle Wrench; 15 different bits: T10, T15, T20, T25, [hex 3/32, 5/64, 1/8, 5/32, 3/16, 2.5mm, 3mm, 4mm, 5mm], P1, slotted #5; 1/2" Socket and 1/4" bit adapter set; and Zippered case with Molded Holder.

29835 \$112.00

### Replaceable Edition Shooting/Hunting Kit

This kit offers unmatched portability, functionality and versatility. Two Fix It Sticks (which combine to form a T-Handle) and 16 bits are held in a molded bracket for portability/storage. Extra room on each end can hold two additional bits. Includes two sticks, bracket, and 16 different bits: 2.5mm Hex, 3mm Hex, 4mm Hex, 5mm Hex, T-10, T-15, T-20, T-25, T-30, 1/8" Hex, 5/64" Hex, 3/32" Hex, 5/32" Hex, 3/16" Hex, Slotted #5, and Phillips #1.

29843 \$40.00

### Mini All-in-One Torque Driver

Tighten scope rings, red dot sights, mounting plates, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 6 - 25 inch-lbs).

29837 \$55.00

### All-in-One Torque Driver

Tighten scope rings, mounts, action screws, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 15 - 65 inch-lbs).

29836 \$60.00

### Scope Bubble Level Set

Level your optics with machined aluminum levels, featuring precise UK-sourced bubble vials. Kit includes: Magnetic level, NATO/Pic rail level/anti-cant device, and Protective foam carrier with pouch.

29839 \$50.00

### Scope Jack

A new way to level your optic, the Scope Jack works with any 1/4 inch driver to quickly and easily level your scope to your NATO/Pic rail. Just mount the Scope Jack to the rail under your scope and turn the drive handle until the lifting arm engages with the flat section under your turrets. Once the scope is level, maintain pressure while tightening your ring screws to keep optic level throughout the process.

29838 \$44.00

### Bolt Carrier Group Scraper

Custom bit that is designed to clean carbon off the various surfaces of the Bolt Carrier Group. Works with any standard magnetic 1/4" driver. Black Isonite finish for increased corrosion resistance and strength.

AR-15 (Top) 29840 \$10.00  
AR-10 29841 \$10.00

### Glock Tool Kit

Glock tool kit including two custom bits designed to aid in the assembly and disassembly of Glock Handguns / Front Sights. Includes: *Glock Front Sight Tool*, a 3/16" Hex Thin Wall Nut Driver - Integrated magnet holds the screw securely in place. Machined from Solid Steel Bar Stock. Works with any standard 1/4" bit driver. 3/32" Metal Pin Punch - Punch is sized to ensure easy removal of all Glock pins by hand. Machined from Solid Steel Bar Stock.

29842 \$16.00

### Remington Bolt Opener

Access your Remington 700 firing pin quickly and easily in the field with our compact custom bit. Levers the firing pin head with a "bottle opener" action. Molded synthetic polymer bushing protects bolt plug from damage.

# 5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

# Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

# Be an AGI Certified Gunsmith. Study and work from home with the Freedom and Security of being Your Own Boss!

## FREE New Book and Introductory Video Gunsmithing Lesson Will Show You How!

*If you want to experience the freedom and security of being a Gunsmith you need to get this FREE information package which includes a one hour video Gunsmithing lesson and a FREE copy of the new book "Becoming An American Gunsmith." (Just pay \$9.97 for priority mail shipping and handling)*

*This complete package explains how to become an AGI Certified Professional Gunsmith without having to give up your lifestyle, income, leave home, or spend tens of thousands of dollars attending a campus based school.*

You will be able to study-at-home, get Certified, and could start making money full-time, part-time or as a retirement income, in as little as 90 days! In the book "**Becoming An American Gunsmith**," AGI President Gene Kelly details how mastering the Design, Function,

and Repair (DF&R) training concepts taught exclusively by American Gunsmithing Institute Master Gunsmiths will enable you to maintain, repair, build, and customize firearms as an AGI Certified Gunsmith. People who do not possess a comprehensive understanding of Design, Function and Repair are NOT gunsmiths, they are just parts swappers.

**There is a HUGE demand for Gunsmiths** and millions of guns out there that need PROFESSIONAL cleaning, maintenance, customizing, and repair right now. You can even work part-time right from your home! *This information package shows you how! (DISABLED VETERANS: You can have the government pay for your training - contact us for details.)* This package includes:

- Six actual gunsmithing lessons
- How to get your FFL
- Answers to the most commonly asked questions about gunsmithing
- How to set up your shop
- What tools and equipment are *really* necessary
- The truth about why, if you love guns, gunsmithing is the perfect career for you
- How to establish a *successful* gunsmithing shop

Through the American Gunsmithing Institute's study-at-home Virtual Campus,<sup>TM</sup> Master Gunsmiths teach you gunsmithing step-by-step using video instruction with cutaway firearms that take you deep inside the guns.

**This FREE information package will come with everything you need to know about how to get started Gunsmithing INCLUDING a One Hour Introductory Video Gunsmithing Lesson! Just pay \$9.97 for priority mail shipping and handling!**

*You get everything shown here!*

*"Your program changed my life for the better. Hands down, the best knowledge base I have seen. The instructors are true Masters of their trade. Thank you again for your dedication and perseverance."*  
**James N. Woods, Gunsmith, CJ's Custom Shop**

*"Words can't express how thankful I am that you put the time and effort into making these courses on video! This is such a wealth of knowledge that I can refer to long into the future when I get those tough jobs and get in a bind and need help! The fact that I have an AGI Instructor with me anytime I need him is worth more to me than you will ever know! What an incredible treasure! Thank you so much!"*  
**James E. Legg**

# KelTec C50 Carbine

## Convert Your P50 for Long Range

**By Oleg Volk**

Few people who saw a KelTec P50 pistol had a neutral opinion on it. Looking like something out of a sci-fi movie, it looked futuristic. The manual of arms was unusual, an artifact of the initial design as a universally adaptable shooting module, configurable into a submachine gun, a drone cannon, or a handgun.

In pistol form, P50 boasts 50-shot capacity, feeding from inverted P90 magazines. The 9.6-inch barrel, fixed in the receiver, delivers match accuracy of about 2 MOA and high muzzle velocity. American Eagle 40-grain FMJ ammo develops 1920 fps, FN ammunition with 40 grain V-Max bullet around 1970 fps. Even firing the high-velocity 5.7x28mm cartridge, P50 has very slight recoil. P50 is quite light for its size at 3.2 pounds, and quite compact for the barrel length, at 15 inches overall. "For its size" doesn't ignore that it's a hefty weapon for a handgun. It works great inside a home or on a nature hike but stabilizing it with a tightened sling or just freehand is a bit of an art. P50 can hit point targets at extended ranges from a sandbag, but handheld it cries out for a brace or a stock. Helpfully, KelTec just introduced a C50 conversion kit.

The kit comes with a 16-inch threaded barrel and a uniquely shaped folding wire stock. The stock attaches to the bottom of the pistol grip. Folded to either side of the carbine, it has to be pulled down to clear the detent in the grip to unfold. Closing is accomplished the same

way, with the stock pulled straight down to disengage. The stock strut fits into molded recesses in the lower to create a non-snap package. Deployed, the stock is very solid thanks to half-inch steel tube construction. The stock goes back and then up to provide the surface for a solid cheek weld. A textured plastic buttplate is fairly compact but ample for the token recoil of this gun. Several screws are included with the barrel kit, hex and T wrenches are the only tools required for the swap. Everything else, including the recoil assembly, remain common between the pistol and the carbine form. The longer barrel and the robust stock put the weight of an unloaded carbine to about five pounds even. The neutral balance makes it feel even lighter in the hand.

C50's action is a plain blowback with dual recoil springs over the barrel. The remarkably slight recoil for a blowback 5.7 pistol is achieved through very long bolt travel, more than double the cartridge length. Polymer shock absorbers wrapped around each return spring also help. Simple mechanics make for easy fieldstripping. Using a cartridge, pull the recoil block forward and lift it out as a single unit away from the receiver. Then the charging handle comes out of the back and the fieldstripping is complete, with full access to the chamber of the hinged-open barrel. Reassembly is as quick and easy, just make sure the hammer is cocked before the receiver is closed.

C50 open for loading.

Press the magazine against the feed ramp to seat it.

Pull the stock downward to open or close it.

The C50 manual of arms is a combination of mainstream and unusual: the charging handle and the safety are AR-like, while the magazine swaps are closer to Vickers and Browning machine guns. To change magazines, run the charging handle to ensure that the hammer is cocked, press the action release lever located above the web of the strong hand to pop over the ventilated steel top cover, which is the actual receiver. While the action can be opened with the hammer down, it should not be closed that way. Without automatic bolt hold-open, running the charging handle cocks the hammer and ensures a clear chamber. With the cover raised, pull out the empty magazine, place a full one in its place with the ammunition facing up, the reverse of the P90 orientation, and close the cover. Rack the action to chamber the first round. The reloading procedure is a carry-over from the original design placing a premium on highly dust-sealed internals for a remote-controlled weapon. With 50+1 capacity, reloading doesn't have to be done as often as with other guns. P50 ships with two 50-round magazines. The shift in balance as the ammunition in the magazine is depleted is imperceptible.

C50's post and notch iron sights recessed within the Picatinny rail with only 0.8" offset from the boreline. 13 inches of sight radius with elevation adjustment on the front and windage adjustment on the back allow good accuracy to 35-40 yards. Low-mounted red dot sights have offset of 1.5-1.8", they make one-inch 50-yard groups each. The boreline sits a bit high over the grip, but the muzzle flip is still negligible. In the carbine form, the support hand provides most of the aiming, making the pistol grip position even less relevant. The long top rail and the shorter dust cover rail allow for lights, lasers, and other accessories. Because of the hinged action, lights cannot protrude more than two inches forward of the dust cover rail.

For firing standing, the included two-point sling steadies the pistol well but the stock works even better and faster. Depending on how it is carried, the stock may be folded to either side. A QD socket in the back of the lower is ideal for a single-point sling. If a two-point sling is desired, a QD socket may be added to either of the forward rails.

The ambidextrous safety lever blocks the sear and disengages the trigger. The wide-face 5-pound trigger has long pull but feels light and smooth, almost like a well-tuned double action. The geometry of the trigger pull favors a two-handed hold to avoid dipping the muzzle right before the shot, so the conversion to carbine greatly improves practical accuracy. The reset is nearly at the start of the travel, with a very light feeling. The 5.7x28 cartridge's dispersion at 50 yards is under an inch and with a very flat trajectory, effective range is about 200 yards. The rifle-length barrel adds about 150 fps compared to the already high velocity from the long barrel of the P50. American Eagle 40-grain FMJ gets up to 2060 fps, FN ammunition with a 40 grain V-Max bullet zips by at 2130 fps. The caliber loads include ball, expanding, and frangible ammunition to fit almost any task outside of large game hunting.

Ejection is up and to the front right. The barrel is threaded 1/2x28 for a flash hider or sound suppressor, and the muzzle

**The stock fits neatly into the forend grooves on either side of the lower.**

**The ejection port faces up.**

**The receiver holding the recoil assembly, the bolt, and the charging handle.**

**En bloc recoil system, with black plastic recoil buffers visible over the springs.**

**The lightweight plastic lower with the firing mechanism visible on the left.**

ships with a knurled thread protector. Muzzle blast is already moderate but adding a Kaw Valley Precision linear compensator effectively channels the noise downrange. Any steel .22 sound suppressor rated for 5.7x28 will work on the C50, but the amount of blowback from the ejection port will increase slightly.

C50 improves on the already formidable of defensive

utility of the P50. Slightly increased stowed length is offset by a significant improvement in control. With only one-fifth of the powder used in 5.56x45mm, 5.7x28mm round runs a lot cooler. The extra barrel surface helps radiate the heat, making C50 quite comfortable to hold even after 100 rounds fired end to end. For the \$300 list price, the carbine conversion kit provides a lot of utility.

# Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

# Blast From The Past!

## My Love Letter to the CED 6000

By Duane Thomas

A few years ago, I had my car broken into. Of all the things stolen from it, the one that upset me the most was my CED 6000 electronic timer. I'd been using that thing for double-digit years. We had BONDED, the way you bond with a treasured piece of equipment that always works, and never lets you down. By the time (pun intended) my CED 6000 departed me, it had been long discontinued, so I couldn't easily replace it. Or replace it at all. I could never find one for sale, even doing a fairly intensive 'net search. The people who own these things don't seem to be letting go of them.

It could be argued the CED 6000 is obsolete technology; the more evolved, and hugely smaller, CED 7000 is a going concern. But I loved my CED 6000, as big and clunky as it might seem by modern standards. Recently, it having been a while since the last time I'd tried, I decided to check the Internet in general and eBay in particular: I found one (count 'em, ONE) used CED 6000 for sale in America. \$165. Ah, eBay, the last refuge of incurable optimism. With a brand-new CED 7000 selling for \$129.99 through **The Blue Press**, who would possibly pay that much for this big honkin' old thing? BOOM! MINE. When it showed up, I was reminded all over again why I love this timer.

The current-production CED 7000, as is the case with so many electronic devices these days, adjusts its settings via internal menus. Once you learn how to navigate them,

it's no problem, but I would not describe the process as intuitive. You absolutely NEED the owner's manual, while adjusting the presets, and the first few times you

operate the timer. The older CED 6000, by contrast, takes advantage of the real estate offered by its size to give you large, well-marked buttons.

Want to set the par time (the interval between the start buzzer and a second buzzer, measuring out a particular time limit, let us say five seconds, to accomplish a particular task) on the CED 7000? Start pushing buttons and navigating menus. On the CED 6000, by contrast, there are external buttons marked in 10-second, one-second, and tenth-of-a-second intervals. Want to clear it out? Push the button marked CLEAR. Simple.

Want to adjust the time lag between pushing the start button and the buzzer sounding to either Fixed (it's a three-second delay), Random (it alternates in a non-predictable fashion between three, four or five seconds), or Instant (the buzzer sounds as soon as you press the button)? On the CED 7000, again, start navigating menus. On the CED 6000, there's a button marked F/R/I. Again, simple.

Want to turn the timer On or Off? On the CED 7000, doing that requires holding down the Clear button for two seconds. No big deal once you know how to do it,

but without the owner's manual I probably never would have figured it out. On the CED 6000? There's an On/Off button.

**The CED 6000 has large, clearly marked buttons and controls allowing you to do anything on this timer you really need to do.**

On the CED 7000, the Start and Review buttons are small, rectangular, and located on top of the timer. On the CED 6000 it's a comparatively huge flipper paddle, on the front of the timer. I can't say I find one easier or harder to operate than the other, they're just different.

On the CED 7000, the screen lights up when you push any button, then blinks off a few seconds later. On the CED 6000, the screen does not light at all, unless you push a small, recessed button on the side of the timer. Both systems are fine. The automatic-light feature on the CED 7000 does save you a step, you don't have to push a button to read the screen in low light. On the other hand, there is something to said, on the CED 6000, for having control over when your timer screen does and doesn't light up.

The CED 7000 accomplishes a lot of its extreme compactness through having a built-in, rechargeable battery that is not user replaceable. One reason the CED 6000 is so big, it has a battery compartment and feeds off an easily available, user-replaceable, 9-volt battery. If you're out on the range, and your CED 7000's charge depletes, you're out of luck. Even if you carry around its charging cord in your Dillon Range Bag (I do) it takes a while for the CED 7000 to recharge enough to be usable for any real amount of time. With the CED 6000, if you also carry around a spare 9-volt battery in your Dillon Range Bag (I do), you can just replace the battery and you're back in action. I say this as someone who has done that, many times.

Four areas in which I will admit the CED 7000 eclipses the CED 6000:

1. The CED 7000's buzzer is considerably louder. It's debatable how important that is, but it's a fact. It can be a bit shocking, the first time you hear it, to experience that hugely loud buzzer coming out of that teeny little timer.

2. Even given the fact the CED 7000's screen is about half-again smaller than the CED 6000's, the letters and numbers on its display are larger. Pretty cool, that.

3. Adjusting the sensitivity of the microphone on the CED 7000, to avoid picking up echoes, and giving you non-existent extra "shots" when shooting indoors, or anywhere allowing sound to bounce back off surrounding surfaces toward the timer, is fairly easily accomplished once you know how the menus work. It's just a matter of adjusting a number, 1 through 8, up or down. With the CED 6000, you have to insert an extremely

thin-bladed, flathead screw-driver (think eyeglasses) though a hole in the plastic timer body, and adjust a small, slotted screw down inside the timer. It's a fairly fiddly procedure.

4. Finally, let's not kid ourselves, it is WAY smaller. I can carry my CED 7000 in that Velcro-flapped pocket on the front of my Dillon Range Bag, so it takes up no storage space inside the bag at all. The CED 6000, by contrast, is large enough it has to be stored inside the bag.

Yes, by modern standards the CED 6000 is big, and outdated, and some might even say a bit clunky. I am quite capable of realizing the CED 7000 is superior technology, and I'll keep using it as my primary range timer. It's just a better system. But over on the emotional side of my brain, where logic doesn't matter, the truth is I MISSED my CED 6000. After years of not having one, now I do again. I'm very happy about that. The next time my CED 7000's battery totally discharges when I'm on the range – if I pay attention to keeping it charged-up, that never happens, but the truth is, I don't always do that – I can whip out my trusty old CED 6000 and have a thoroughly enjoyable trip down memory lane.

**"I am quite capable of realizing the CED 7000 is superior technology, and I'll keep using it as my primary range timer. It's just a better system."**

## Real Avid Level-Right™ PRO

el reticle is critical to long-range accuracy. For longer shots a canted reticle will push a bullet's trajectory off of center. It gets worse the more the increases. A level scope means that

the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Level-Right PRO 21777 \$69.99

The **Specialized Dynamics AR15/AR10 Armorers' Upper Receiver Block** is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

43234 \$59.99

## Lyman Mechanical Trigger Pull Gauge

Lyman's mechanical trigger pull gauge is a simple, accurate and cost-effective way to measure the weight of your firearm's trigger pull. Made of tough machined aluminum and steel components, the gauge will stand up to years of use. The gauge features a rolling trigger shoe, "T" handle, a sliding indicator that holds your highest weight and a zero-adjustment wheel.

- Reads from 0 to 12 pounds
- 2-ounce increments
- Highest weight indicator
- Aluminum and steel construction
- "T" handle and hanging loop for storage

# Apex Tactical Specialties

## Action Enhancement Trigger for Springfield Armory Hellcat

The Action Enhancement Trigger for the Hellcat pistols is the easiest, quickest upgrade you can do to the trigger system that significantly improves the feel of the trigger pull, without reducing factory safety values. When properly installed, this drop-in trigger will:

- Reduce trigger pull weight to 5.0 to 5.5 lbs after break-in
- Smooth uptake and reset
- Reduce trigger overall travel and reset distance
- Deliver a crisp trigger break
- Directly replaces factory components without additional fitting
- Maintains factory safety values

**29032** **\$39.99**

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

**21778** **\$29.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

**29034** **\$9.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

**29039** **\$29.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm. Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

**29036** **\$9.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect leftover carbon while applying the perfect amount of oil or solvent. The .223/.56mm bore brush scrubs baked on carbon from lands and grooves.

**29037** **\$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

**29038** **\$12.99**

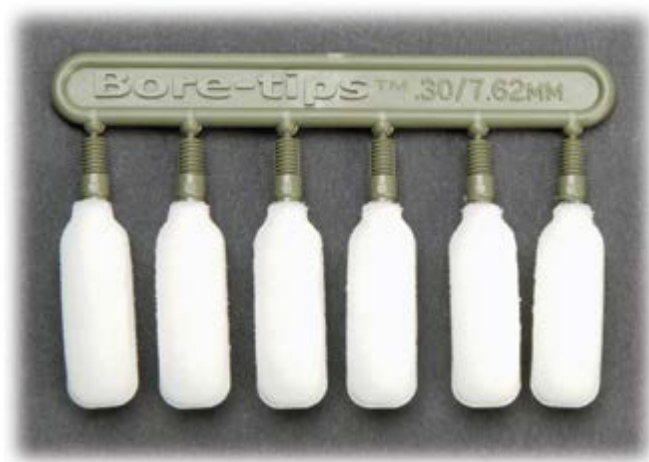

## Real Aid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

21776 \$79.99

## Swab-its

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	15310	\$6.00
.243/6mm (6 ea.)	15311	6.00
.30/7.62mm (6 ea.)	15312	6.00
.357/9mm (6 ea.)	15313	6.00
.40/10mm (5 ea.)	15314	6.00
.45 Caliber (5 ea.)	15315	6.00

**Gun-tips® Extended Reach Firearm Cleaning Swabs** by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

12583 \$9.99

For more than 100 years, consumers have trusted Ballistol to lubricate, penetrate, clean, protect, and preserve their firearms, leather gear, wood, metal surfaces, and more. With an astonishingly wide range of applications, this environmentally friendly multi-purpose oil has become an essential tool for shooters, hunters, fishermen, and handymen all over the world.

## HYSKORE Degreezer

The **HYSKORE Degreezer** consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. The set includes a cover with an integral holder for the brush. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$21.99

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. 19234 \$21.99

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$21.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$19.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$14.99

**TW-25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe 15732 \$14.99  
1.5 Ounces 15731 18.99

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard 15571 \$7.99  
Slide-Glide Lite 15572 7.99

## Sweet's 7.62

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia.

13128 \$12.99

## Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

66053 \$14.99

# "Big Fifty" <sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead

# Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5” x 35” on lightweight paper, this target’s versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you’ll need for your shooting session.

**11713    \$19.99**

# Shoot Out Targets

The Alpha Target is Shoot Out Targets’ Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3” in diameter and 1/2” thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43” tall and 22” wide when assembled.

# The Taurus GX4 Pistol

By J.B. Wood

Over the past few years, all the pistol-makers hurried to make what people were asking for – a little sub-compact 9mm. Taurus waited, making tiny changes to their excellent design. Well, the GX4 was worth waiting for.

It's polymer framed and striker fired, like some of the others – but there are important differences. Before we go into those, I will note that all the tiny 9mm pistols have a substantial amount of felt recoil, and somewhat stiff slide retraction. When choosing a carry piece, keep these factors in mind.

Let's look at the numbers first. The GX4 weighs – with magazine empty – 18.5 ounces. Length is 6.05 inches, height 4.30 inches, and width exactly one inch. Barrel length is 3.06 inches. The magazine holds 11 rounds, and you get two of them. I've seen a recent reference to an extended mag holding two or three more rounds, so watch for that one.

With the GX4 there was also a larger back piece for the grip frame. I tried it and found that my average hand liked the original (smaller) one best. Above and forward of the trigger, the nicely textured frame has checkered finger-rest pads.

The GX4 is striker fired, and on my sample, the single-action trigger pull averaged 6 pounds. Take-up is around an eighth of an inch, a clean let-off, and very little overtravel. For a personal-defense pistol, I think it's just right. In a tense situation, you really don't want a light trigger.

This one does have one of those little safety levers in it. It is laterally stable, well-fitted, and is less annoying than most of them. It works, perfectly. I will forgive Taurus for this one. Everybody is doing it. The lawyers tell them they must have some sort of external safety.

The other safety is internal and is always "on safe." It blocks the striker at all times and is cleared only in the

**Over the past few years, all the pistol-makers hurried to make what people were asking for – a little sub-compact 9mm. Taurus waited ... the GX4 was worth waiting for.**

The front sight has a large white dot.

The square-notch rear sight is cross-grooved on the back. It can be drift adjusted.

The Controls: Trigger, slide release, magazine release.

The GX4 and some of the test ammo, 9mm Honey Badger from Black Hills.

last fraction of trigger pull. If you are so inept that you drop the pistol on a hard surface, the striker-block safety will prevent firing.

After the last round is fired, the slide of the GX4 locks open. There is a small external slide release on the left side. When reloading, though, it's best to just pull back slightly on the slide and let it go. There are good slide-retraction grooves, front and rear. On top, an opening lets you see the rim of a chambered round.

The magazine release is in the usual location at the rear terminus of the trigger guard. It is shielded from inadvertent depression and is reversible for left-handers. The magazine will normally eject smartly, but if not, access openings allow a grip on the floorplate. On the back of the magazine are counter holes numbered 4 to 11.

On a pistol of this size and purpose, some might feel that the sights are of less importance, but these are very good. They are made of steel. The low-profile front has a large white dot. The rear sight has cross-grooving on the rear and a wide, square notch. It is laterally adjustable by drifting.

The front of the trigger guard is straight, with a small protrusion at its lower edge. All those who use that old version of a two-hand hold often find that their groups have moved in the direction of the support hand.

The serious ballistics guys all laugh at my shooting-test procedure. I often use a 100-yard sight-in target, the

black being about the same size as a "center of mass" on a combat type. For this one, I simply cut a big piece of cardboard into the shape of a human-sized torso. For ammo, it's usually whatever happens to be in the bag. In this case, it was Honey Badger from Black Hills, and some ordinary old full-metal-jacket loads.

In deference to aged bones, I put on a GripSwell glove before firing the GX4. As I noted earlier, any 9mm of this size will have brisk felt recoil. Distance was the classic seven yards, standing, two-hand hold. Will the GX4 keep five rounds in center-of-mass, and five in the "head"? Absolutely. Groups were never more than four inches. 50 rounds, no problems.

Materials of the GX4 are high-tech polymer for the grip frame, and stainless or other steel alloys for the rest. The black nitride finish will last a long time, and the barrel finish is even more durable. Taurus recently announced that the slide will also be offered in Tungsten Cerakote and Troy Coyote Tan Cerakote.

Suggested retail price of the pistol is \$392.42, or with the special slide finishes, \$419.61. Imagine a numbers guy at Taurus, translating Brazilian currency into US dollars. You may find it out there on the real market for a little less. Or, these days, maybe not. Anyway, at whatever price, the GX4 is a little jewel.

# Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your SAK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	25374	\$79.99
Scout Scope Mount for SKS Rifle	25373	78.99

# BERRY'S

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

**Stackable Utility Box 40194 \$20.99**

## Tri-Can Triple Ammo Can

# John Marshall on Classic Firearms: The Steyr Scout Rifle

"The man who owns a Steyr Scout has no need for any other rifle."  
– Lt. Col. Jeff Cooper

In 1984, in the *Gun Digest* issue of that year, firearms legend Jeff Cooper penned an article that described his concept of a single firearm that would be incredibly versatile. My wife coined a descriptive name for it – "The Swiss Army knife of rifles." Cooper called it a Scout Rifle. He was a distinguished firearms expert, an accomplished rifle and pistol shot and a former U.S. Marine Lt. Colonel who had seen combat in both World War II and Korea. A "Scout" to him was an individual who could operate independently in the field, making his way armed with just one firearm that could fulfill many roles – in survival, combat or hunting. He defined a scout rifle first and foremost to be a general-purpose rifle. "A general-purpose rifle is a conveniently portable, individually operated firearm capable of striking a single, decisive blow on a live target of up to 200 kilos in weight at any distance at which the operator can shoot with the precision necessary to place a shot in the vital area of the target."

After consultation with others, he initially specified seven desirable criteria for such a rifle. It should: **1)** measure less than a meter long; **2)** weigh under 3 kilos (6.6 pounds) with sling and scope; **3)** be capable of 2 minutes of angle accuracy; **4)** have a 19-inch barrel; **5)** be chambered in .308 Winchester; **6)** have a backup "ghost ring" rear and post front sight; and **7)** have a forward-mounted scope with about 10 inches of eye relief. Although a sniper rifle with a forward-mounted scope had been fielded in a little 6.5 mm Mannlicher carbine prior to WWII by the Germans, that non-traditional scope mounting feature had not been much accepted thereafter. An exception was another German development in WWII, a Model 98k carbine with a Model 41 scope. It actually made some sense, allowing the rifle to be carried in a more natural manner at its central balance point, clip loading of ammo, and less obstruction of the field of view when aiming. The .308 Winchester caliber was specified by Cooper because it was sufficiently powerful and available almost anywhere in the world.

The features recommended by Cooper would provide a light, handy, accurate and terminally effective rifle that could operate with either a scope or, if necessary, flip-up traditional sights. He advocated for a major firearms

company to make an off-the-shelf rifle that would satisfy his parameters. To get his project rolling, he crafted two prototype rifles, the second of which was based on a Remington 600 bolt action carbine, both chambered for the .308 Winchester. In the process, he reasoned that such things as an integral bipod, a magazine cut-off to allow single-shot loading, three sling-attachment points and additional ammo storage in the rifle would be desirable but not critical to the concept. He wanted the rifle to have "ruggedness, versatility, speed of operation" and practical accuracy while stressing the need for the shooter to hit quickly on the first shot.

In 1990, the Austrian firearms firm of Steyr Mannlicher began to show some interest in Cooper's ideas, and he met with them to discuss his prototypes. Unfortunately, Steyr was otherwise occupied at that time and could not make a firm commitment. Not to be deterred, Cooper invited Steyr's primary design engineer Ulrich Zedrosser to visit with him at Cooper's Gunsite firearms training facility in Arizona. Zedrosser accepted the invitation and was impressed with the performance and characteristics of Cooper's second prototype that Cooper had dubbed "Scout II" or "Sweetheart." Zedrosser began sketching out some ideas and he and Cooper put their heads together on a possible production design.

It took a while, but seven years later, in October of 1997, a prototype of the Steyr Scout Rifle was introduced at a gun writer's conference at the NRA Whittington Center in Raton, New Mexico. Although the gun looked (and was) radical, the response from those in attendance was quite positive. Accordingly, finishing touches were applied to the rifle and it was put into production in 1999. It weighed 6.6 pounds empty (around 7.3 pounds with a scope) and measured 38.6 inches in length. Its suggested introductory retail price was \$2,595.

The cold-hammer-forged barrel on the rifle measures 19 inches and is chambered for the .308 Winchester. This rather thin barrel has a one in 12-inch twist, with four grooves. It's fluted to save weight, dissipate heat more efficiently and help with rigidity. The muzzle is match-crowned and recessed. To provide lesser recoil perception, the barrel's axis is linearly aligned to a

point just barely above the heel of the stock. This nearly straight line of recoil also reduces the tendency of the kick to violently disturb the aim of such a lightweight rifle when fired. Another recoil-easing feature is that the comb of the stock slants down somewhat from the rear to the front, pulling the comb back from the shooter's cheek as the rifle is fired.

The removable polymer magazine holds five rounds. Optional 10-round magazines were available from the start. Magazines have two positioning detents, one over the other. Using the lower detent, the magazine seats higher and feeds normally. Using the higher detent, the magazine seats somewhat lower and becomes inactive, allowing single feeding with the magazine in reserve. It requires only an upward slap of the magazine to position it for normal feeding. The Zytel polymer stock incorporates a cavity forward of the heel which is designed to hold an extra loaded magazine for instant availability. The forward side panels of the stock can be moved forward to create a bipod which can be swiveled a bit to allow for uneven ground. As a tribute to Jeff Cooper, his initials are found in a medallion inlaid in the stock on the right side.

On top, the rifle has an extended Weaver-style rail which is ready to accept a longer-eye-relief low-power scope over the barrel, or a standard scope mounted over the bolt in the normal manner. This rail is incorporated into the receiver. On order, the factory can supply a Leupold M8 2.5X intermediate eye relief scope mounted to the rifle, and sight it in

before shipment. The supplied rings are numbered to the rifle. The rifle has built-in conventional sights that can be flipped up for use. The front sight (in a Zytel cap forward of the scope rail) is a post which is adjustable for elevation, and the ghost ring sight in the rear of the receiver is adjustable for windage.

The receiver and its integral scope rail are made of aluminum. The bolt locks into a barrel extension rather than the receiver. This allows for a much lighter receiver, which is subject to minimum stress. Both the barrel extension and its safety bushing are made of steel. The safety bushing completely surrounds the extraction area, giving extra insurance against case failure or a pierced primer. The bolt is full diameter in that the body and lugs are the same diameter. The bolt head has a recessed face. It incorporates four lugs in two 180-degree opposed rows. This gives the bolt a 90-degree bolt lift. There are lightening channels cut in the side of the bolt to save weight. The heaviest parts of the gun are the barrel and the bolt.

The trigger is a two-stage affair, with slight initial slack and the final pull being very crisp and fairly light at an average 3.5 pounds of pressure at letoff. The safety is a small wheel that rotates fore and aft, and is located centrally in the trigger group directly behind the bolt. When rotated fully forward, the rifle is ready to fire and a red dot shows on the top of the safety. When in the middle or "loading" position, a white dot is visible, the sear is blocked, and the bolt can be operated. In the rear or "safe" position, the sear is disengaged, and the "butter knife" bolt handle will be locked down in position with the white dot still visible. A spring-loaded plastic button will pop up on the wheel and prevent the safety from moving from "fire" to the "safe" or "load" position until it is depressed first. It also acts as a bolt release when depressed as the bolt is withdrawn. An indicator pin sticks out of the bolt shroud when the firing pin is cocked.

The action is secured to the gray-colored stock at the rear by two pillar-bedded stock bolts. The stock's length of pull can be adjusted from 12.7" to 16" using removable spacers which comprise a very useful recoil pad.

**Closeup of the action area of the Steyr Scout showing the safety selector wheel, cocking indicator hole, butter knife bolt handle, pop-up rear sight, rear scope mounting slot, ejection port, magazine release and one of the T-lock sling swivel mounting points.**

There are three T-lock sling swivel mounting points for either a conventional sling or the three-point "Ching sling" that was favored by Cooper for its versatility.

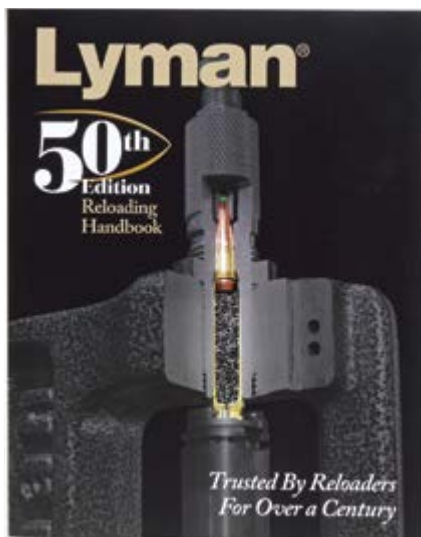

In use, the rifle is very portable, handles nicely, and the action is quite smooth in operation. Repeat shots can be done very quickly. I think Cooper was on target for this to be a fine firearm for someone operating independently in the field and having to rely

on only one firearm that can be employed for almost any situation – sniping, hunting, survival or self-defense. As he himself once wrote: "The essential element of the Scout Rifle is handiness. It is a general-purpose arm intended to do all things that a rifle might be called upon to do, except for certain specialties, such as formal target shooting and hunting pachyderms. Conceptually, it renders all extant general-purpose rifles obsolete. The man who owns a Steyr Scout has no need for any other rifle."

The Steyr Scout rifle has spawned several competitors in the years since its introduction, which is a tribute to its general acceptance. The original is still available at a somewhat reduced price from Steyr in various stock colors, albeit with a few later minor changes and several options as to calibers, even including .22 rimfires. It's still more expensive than its imitators, but remains the closest to Cooper's original specifications, checking almost all the boxes. It's radical but useful in many roles and remains a true classic.

# Lyman Reloading Manuals

**Lyman 50th Edition Reloading Handbook**  
– Featuring More Loads, the Newest Components, Most Manufacturers, and More Load Data than Ever!

# SAFARILAND®

## ENHANCED LIBERATOR HP 2.0

**Next Generation Multi-Mode Hearing Protection!**

**The Liberator® HP headset is the next generation in electronic hearing protection, offering crisp, clear audio in a durable, scratch-resistant, slim earcup.**

**26dB  
NRR**

- Three distinct hearing protection modes:
  - 1. ENHANCED MODE** – Blocks dangerous impulse noise, while enhancing nearby speech and audio.
  - 2. MOVE MODE** – Blocks all external noise.
  - 3. CLARITY MODE** – Blocks all external noise, while enhancing nearby speech and audio.
- Slim earcup design layered with sound barrier technology.
- High-definition speakers with enhanced electronics.
- Speed-change battery compartment works with either two AAA batteries or one CR123 battery.
- 160-300 hour run time (mode dependent).
- Easily converts to behind-the-head or helmet-mount suspension (available separately from Safariland).
