**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# Dillon's Bill of Rights for Reloaders

**All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:**

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

**Editor's Note:** The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his wcompany from all the others at the time was the warranty and customer service he offered.

We constantly strive to live up to his standards.  
Please let us know if we're not succeeding.

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

Dillon's  
RT 1500  
shown  
installed  
on an  
XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-disconnect

power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **62164** is **\$425.00**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$25.00** each. Upper lock rings, **13559**, are **\$9.00** each.

## MILITARY BRASS?

**Eliminate the "Grunt Work" with  
Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	62124	\$27.00

# Case Preparation Equipment

### CV-2001 – The Industry Standard

Dillon’s CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no “hobby” machine! The bowl and base are constructed of 7/32” thick injection molded high-strength polypropylene which is impact and abrasion resistant.

### Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10” x 14”,

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You’ll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle.	<b>13804</b>	<b>\$9.99</b>
Case (20 pc.)	<b>20255</b>	<b>149.99</b>

Dillon’s **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you’ve done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you’re ready to load. Try a bottle. You’ll never use a grease pad again.

8 oz. bottle	<b>13733</b>	<b>\$15.99</b>
Case (20 pc.)	<b>20256</b>	<b>223.99</b>

10 bottles of polish/10 of lube^	
Case (20 pc.)	<b>21375      \$186.99</b>

## Vibratory Case Cleaners Case/Media Separators

<b>CM-2000 Case/Media Separator^</b>	<b>20675</b>	<b>\$110.00</b>
<b>CM-500 Case/Media Separator^</b>	<b>21045</b>	<b>\$80.00</b>

and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18” x 22”. The tub keeps the mess off the floor and bench. It’s fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

### Limited Work Space?

Dillon created the CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV-2001^, US 110v	<b>20493</b>	<b>\$250.00</b>
CV-750^, US 110v	<b>19455</b>	<b>190.00</b>

# Neck Sizing vs. Full-Length

By John Kleespies

Full-length sizing versus neck sizing of bottlenecked brass tends to be one of reloading's controversies. Most loaders will advise you to be satisfied with the full-length dies already in your Dillon and save yourself from the expense and headaches that neck sizing creates. And then there's the neck sizing advocates who contend otherwise, vehemently arguing that neck-sizing headaches aren't headaches at all... that they're more like happy little accidents that you should relish in as a member of the Grand Fraternity of Neck Sizers.

I personally tend to thumb my nose at fraternities and anything else that costs me money.

But, still, putting controversies to the test can be fun, so I pulled the trigger on a neck sizing die with the intention of comparing its product head-to-head against otherwise identical rounds that were full-length sized – and my analysis would span both the reloading bench and the firing bench.

An exact explanation of neck sizing may be in order here. When powder is fired in a gun, the brass poofs out to match the size of the chamber, both in its body as well as the neck. Of the two areas, the neck expansion is the most notable, as it causes the brass to stretch to a width that will no longer grip a bullet when it comes time to re-use the case.

Which brings us to our discussion at hand: how exactly to resize? A full-length sizing die squeezes the entire piece of brass into a slightly smaller state, whereas a neck-sizing die only reshapes the neck enough to grasp the bullet.

So... why? What real difference could only sizing the neck make? Theoretically, a lot.

For one, some folks will lecture you on the importance of neck tension – how tightly the brass holds the bullet in place. They will contend that finding a sweet spot in the pressure of that tension can directly affect your round's accuracy. Now, dear reader, entire chapters of books are written about neck tension, and I'm not going to get into

the depth of it here... but just know that it's a thing, and if you're planning to mess with it, you'll need a neck-sizing die.

More important to me than neck tension, though, is the other reason for using a neck die: a neck die allows you to reap the benefits of fire forming. Recall that when your brass is fired, it expands to fit the walls of your chamber. Hence, when you extract that fired piece of brass from your bolt-action, you will have a case that is fire formed to match your specific gun. Full-length sizing literally erases that fitment, whereas neck sizing leaves your case's body custom fitted to your firearm.

And that should pay a dividend in increased accuracy.

These theories are all fine and dandy, but I wanted to know how

they'd play in reality.

To find out, I chose a die manufacturer and made a few micrometer measurements to determine my optimal bushing size before making my purchase. Note that neck dies typically use interchangeable bushings for size adjustment, and different manufacturers may provide different instructions for determining your proper bushing size... so I'll leave this part of the process a mystery for you. If you decide to give neck sizing a try, just pick your preferred

**A Lapua case alongside a Winchester case: both cases were fire formed in the same gun and then sized with the same bushing. The Lapua case is good to go, but because of the Winchester's thinner case wall, the bullet falls straight through.**

# Sizing Bottlenecked Brass

die maker and follow their specific instructions. I then waited a week for die and bushing to arrive in the mail.

Upon receiving my package from Mr. UPS-man, I simply inserted the bushing into the die, strolled up to my RL 550, swapped out my existing full-length sizer with the bushing die... and promptly discovered that my new die wouldn't decap the brass like I expected.

Grrr.

A quick search of the junk drawer revealed a long-forgotten decapping die that was put to use in a single-stage press, and I was back in business. A few minutes later, thanks to the powder drop and bullet seater settings already being dialed into my 550's toolhead, the only difference between my newly neck-sized rounds and the bag full of full-length sized rounds in my range bag was that the full-length sized rounds were constructed with virgin Lapua brass, whereas the neck-sized rounds employed once-fired brass from that same batch of cases.

And, on the reloading bench side of the test... I quickly became the newest, dues-paying member of the Grand Fraternity of Neck Sizers. I absolutely did not expect how effortlessly the brass sized. Bear in mind that I'm coming from years of full-length sizing, and some of those .223 Remington sessions involving hundreds of cases literally left me with a sore arm afterwards... plus a fair bit of cussing at the bottlenecks dented due my using too much lube. And then there was another round of cleaning to remove said lube from the brass before heading back to the press.

Not the situation here! I discovered that when you're only sizing the neck, well... you're only sizing the neck! Honestly, the 550's arm required so little pressure to operate, if it wasn't for the fact that the brass could afterwards hold a bullet, I'd have assumed that I hadn't sized the cases at all.

And this was with no lube!

I immediately found myself re-envisioning my loading process. With full-length sizing, I prefer to size my brass after it's cleaned rather than dirty (a reloading controversy!) which then makes my paranoid mind want to clean it again to remove the lube contamination (another

controversy?) which is fine because that allows the decapped rounds to have their primer pockets and flash holes properly cleaned (necessary or another controversy???), but with neck sizing there's no lube!

Now, I can decap the dirty brass, then tumble it so that the primer pockets and flash holes are hit on the first cleaning, and I'll then effortlessly neck size the brass in the RL 550 using all stations at once with – did I mention it? – no lube!!!

Time saved!

So, that was my impression at the reloading bench, but remember that my intention with this test was to give neck sizing a fair shake against full-length sizing at both the reloading bench and the firing bench. With part one of the testing checked off, I'd found a clear winner: neck sizing by a mile.

Next, I loaded the truck and headed to the range.

For accuracy testing, in order to keep everything as fair as possible, I popped off a few fouling shots before getting to business. I started with the full-length sized rounds and alternated three-shot groups (Yikes, not five-shot groups – controversy!) between the two different types of ammunition. The distance was 100 yards, fired in the windless doldrums of sunrise, using a heavy-barreled .308 Winchester bolt-action rested on bags, all topped with a 16x scope. After a few hours, I headed home and measured the groups for comparison.

While I fired more than three groups for each type of round, I opted to only analyze the best three for each, based on the assumption that these groups represented the best reflection of my equipment's capabilities, rather than my personal shooting prowess.

Unsurprisingly, the best groups were

amongst the first I shot, before barrel fouling began to reveal itself. Measured center-to-center, they were:

Full-length – .639 inch, .67 inch, and .71 inch for a .673 inch average

Neck – .511 inch, .612 inch, and .67 inch for a .598 inch average

I'll let y'all come to your own conclusions with that data, but to my mind – and remember that we're talking about shrinking groups that are already sub-MOA – a

Full-length sized group above, neck-sized below.

.075" average gain is worthy of note. Photographs of the smallest group for each round is included alongside a quarter for comparative reference, but if you'd like to hold it in your hand at home, the full-length group could be exactly covered with a quarter, whereas the neck-sized group disappeared beneath a nickel.

Obviously, this test has made me a fan of neck sizing; however, I would be remiss if I didn't clarify its downfalls. Y'know, the Fraternity's happy little accidents that I mentioned earlier?

First and foremost, while handloading is at its best a craft of personalizing ammunition, this practice may take the personalization process a step too far for some shooters. Neck sized brass is very literally fire-formed to one specific rifle, so if you're bulk reloading the same cartridge for use in multiple firearms, this is not the route for you. I only own one rifle chambered for .308 Winchester, therefore this is a non-issue in my world. For the guy who owns a walk-in gun safe, this may be a deal breaker.

Plus, the specificity of neck sizing goes even beyond limiting your rounds to a single firearm and extends into the choice of brass itself. Why? Because different makes of brass have different wall thicknesses, so one case will require one size of bushing, whereas a different make of case with a thinner or thicker wall will need a differently sized bushing.

To illustrate this point, take note of the accompanying photograph which shows a Lapua case alongside a Winchester case: both cases were fire formed in the same gun and then sized with the same bushing. The Lapua case is good to go, but because of the Winchester's thinner case wall, the bullet falls straight through and becomes a rattle toy.

Therefore, if I want to continue using this bushing after I've shot out my current box of Lapua cases, then finding myself any old batch of brass ain't gonna cut it – I'll need to purchase another box of Lapua.

And on the safety side of things, it is essential to note that neck sizing should never be employed for use with autoloading rifles. Remember that with a bolt-action, the custom-fitted round is eased into the chamber at a much slower velocity than that experienced inside an auto-loader. Experts have warned that the strike force from a high-speed bolt crashing onto a fire-formed round may result in a slam fire due to the brass' tight fit into the chamber. I've never tested this theory myself, I don't plan to, and neither should you – just don't do it, please.

In all fairness, my one reloading and shooting session hardly makes me an expert on neck sizing; however, its initial impression on me is so strong that I doubt I'll be convinced to leave the Fraternity. The increased accuracy is selling point enough, but with the added ease of sizing the brass, I wish that I'd started neck sizing years ago. 

# DILLON RIFLE COMPANY

The OPAR Operator Trigger is a complete-assembly pre-stage drop-in trigger purpose built to provide improved trigger pull weight, reset, clean feel, precision, and safety for day-to-day users, military and law-enforcement members and agencies. The trigger's form enhances precision capabilities through its Area-of-Engagement design. This is accomplished by helping shooters build muscle memory for their trigger-finger placement in a simple and natural way.

It has a clean 5.0 to 5.5-pound trigger pull weight with a short trigger reset. The OPAR Operator's patent pending pre-stage trigger mechanism design has an inset secondary trigger providing an additional safety mechanism to reduce the chances of an accidental discharge. The OPAR Operator is compatible with AR-15 and HK416 rifles using the Mil-Spec 0.154-inch pins.

# Dillon Automation's DA 3000

## For Dillon Precision's CP 2000 and RL 1100

Introducing the new Dillon Autodrive 3000!

- Fully automates the Dillon Precision CP 2000 and RL 1100.
- Case Preparation rate up to 3000 rounds per hour!
- Reloading rate up to 2000 rounds per hour!
- DA 3000 easily installs on your Reloading and Case Prep machines.
- Simply press the "Start" button – no more manual cycling of the machine.
- Adjustable Cycle Rate and Dwell.
- Dillon custom-built Industrial Controller.
- Integrated safety controls and shield.
- Field-tested and proven patented design.
- One-year warranty on the DA 3000.
- Maintains your Dillon-Factory machine warranty.
- Made in Scottsdale, Arizona USA.

# Mr. Bulletfeeder®

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

# Dillon's Range Bag<sup>^</sup>

**33389 \$139.99**

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4"x7"x8" and features two interior pockets measuring 6-1/2"x6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5"x7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12"x8"x1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

## "Border Shift" Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	13755	\$25.99
I.D. Card Holder <sup>^</sup>	14575	2.99

## Dillon Pistol Case<sup>^</sup>

Our pistol case was designed to hold and protect your pistol and carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

**12709 \$39.99**

# XL 750<sup>^</sup>

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

## Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon's double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Package of 10	21528	\$8.00

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

### Dillon Rifle Dies (Three-Die Sets)

.223 Remington	10839	\$140.00
.308 Winchester	15574	140.00
.30-06 Springfield	10840	140.00

# BL 550<sup>^</sup>

## Dillon's Basic Loader

**\$395<sup>00</sup>**  
**15399**

Reloading Dies and Caliber Conversions sold separately  
Pictured with optional accessories:  
Strong Mount 22051 \$95.00

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and

powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

**AUTO PRIME SYSTEM<sup>^</sup>** 16627 \$120.00

### PRIMER SYSTEM EARLY WARNING<sup>^</sup>

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$37.00

### AUTO POWDER SYSTEM<sup>^</sup>

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$130.00

**OPTIONAL MAGNUM RIFLE POWDER BAR** 21353 \$45.00

### AUTO EJECT SYSTEM<sup>^</sup>

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$43.00

### BL 550 POWDER DIE<sup>^</sup>

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die:** 16629 \$27.00  
**Oversize Die:** 16626 29.00  
**Plastic Funnel:** 16617 9.00

### POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) 20029 \$32.00

**RL 450 Powder Die** 20308 32.00

# Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	<b>22051</b>	<b>\$95.00</b>
XL 750/650-only	<b>22052</b>	<b>93.00</b>
"SDB"	<b>22223</b>	<b>105.00</b>

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

**Stock #62005, \$95.00** is for:

XL 750, XL 650, RL 550 and Square Deal "B". **Stock #62006, \$95.00** is for:

RL 1100, CP 2000, Super 1050 and RL 1050 as well as any Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>22214</b>	<b>\$60.00</b>
1050 Tray Kit	<b>22215</b>	<b>60.00</b>

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

<b>16306</b>	<b>\$52.00</b>

## “D-TERMINATOR” Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

*NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.*

**\$149.99**  
**10483**

Dillon's **“Belted Magnum” Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**97126 \$205.00**

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**21044, \$93.00 each**

An **Aluminum Roller Handle** gives your reloader an entirely new “feel,” reduces operator fatigue, and makes primer seating easier.

**17950 \$64.00**

Dillon's **1” Bench Wrench** fits our 1” Die Lock Rings which give you more space on the toolhead.

**10842, \$15.00 each**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

(Incl: RCBS steel size, expander, seat/crimp)		

# Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the

plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

# Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

# HENRY REPEATING ARMS

Celebrates 25 Years of  
“Made in America or Not Made at All”

## Henry's Classic Lever Action .22, Model H001

One million of the original H001 .22 rifles alone were sold by 2017, with the one-millionth rifle donated to a charity auction and raising over \$50,000 to benefit shooting-sports heritage organizations.

### By Oleg Volk

When the original Henry rifle by New Haven Arms Company came out in 1860, it was the high-tech weapon to have. Twice the magazine capacity of the Spencer, it was also less ammo-sensitive and faster in use. For the first time, cycling a rifle also cocked the hammer. Only two factors kept the 1860 model from becoming the standard: a weaker cartridge than the Spencer and the inability to mount a bayonet. The unsealed magazine with an external follower went away in the following decade. Once ammunition advanced from rimfire to drawn brass centerfire, the Henry served as a basis for further development of the Winchester line with a side-loading gate. By the end of the 19th century, stronger actions chambered cartridges like .45-90 Sharps. By then, the Henry brand was history and looked to stay that way until Louis Imperato and his son Anthony revived the name in 1996. This wasn't the first gun-related business for the family, but it was to be more durable than those before it. "I wanted Henry to be the best long-gun company in the firearms business. Period," said Anthony, "At that time, cities were suing gun companies that made handguns, and getting into the handgun business wasn't going to be an option. In short, being the best meant manufacturing a quality product, at a value to the consumer, backed by the best customer service in the industry."

The first offering from the new Henry Repeating Arms company was the H001 Classic Lever Action, an alloy-framed .22 carbine that set new standards for accuracy and functionality at a price most people could afford. Minding that the cost of the original Henry rifle – around \$40 in the 1860s – was a contributing factor to

limited post-war popularity, the Imperato family found a way to produce an affordable, quality product. From the start, the company motto was "Made in America and Priced Right." Long work hours, often without days off, was the only way for this plan to succeed, so Anthony located the original headquarters right by the same family home that provided the equity loan to launch Henry Repeating Arms. Success has manifested itself in many ways, including high sales. One million of the original H001 .22 rifles alone were sold by 2017, with the one-millionth rifle donated to a charity auction and raising over \$50,000 to benefit shooting-sports heritage organizations.

Offered primarily to hunters and recreational shooters, Henry firearms started with rimfire and expanded to cover many calibers, including full-power .45-70. From 1997, the company added the semi-automatic AR-7 Survival Rifle to its catalog. In the 2010s, the box magazine-fed Long Ranger lever action chambered for powerful rimless cartridges joined the product line-up, which extended the practical range of Henry's catalog. Right after that, they added tube-fed rifles that combined the original Henry's easier front-loading (and safer unloading) design with the more defense-oriented side-gate loading. Single-shot break-open designs and lever-action small-bore shotguns rounded out the extensive catalog, which now boasts over 200 SKUs in more than 23 calibers and gauges. The lever action still holds a special place in Anthony's heart despite branching out. "The lever action

is America's unique contribution to international firearms design. It was the dominant long gun of choice from the 1870s to the 1890s, and it put a lot of food on the table in those 110-plus years. I believe that Henry Repeating Arms

## **New Original Henry Iron-Framed .44-40, Model H011IF**

**Building off of the desirability of Henry's first brass-framed Original Henry Rifle, Henry reincarnated those rare iron-framed rifles, made entirely on US soil, just as B. T. Henry's rifles were. Henry's Iron-Framed Henry Original is true to B. T. Henry's 1860 patterns and patents.**

can take at least partial credit for not only resurrecting the lever-action market but taking it to new heights and bringing in a younger new generation of enthusiasts."

Henry Repeating Arms expanded its operations in 2006 when Anthony Imperato acquired certain assets of a parts supplier named Wright Products, including their 140,000 square foot facility in Rice Lake, Wisconsin, which now serves as the company headquarters. In 2021, the Wisconsin roots spread further with a new 85,000 square foot facility in Ladysmith. Now employing over 550 workers on a total of 335,000 square feet of production floor space, Henry is shipping over 300,000 guns annually, making it one of the largest American long-gun manufacturers and *the* largest lever-action producer. The accomplishments have come through despite massive challenges thrown up by nature. In October 2012, Hurricane Sandy hit the waterfront Bayonne factory, causing incredible damage: a third of the roof blew off, and three feet of saltwater sloshed across 109,000 square feet of machinery and inventory. Yet, with determination and grit, the employees and several key vendors all dug in and got Henry back up and running in about three months.

With new company president Andy Wickstrom announced in 2021, Anthony Imperato remains heavily involved in the business and its direction as the CEO. Representing the company is a passion for him and often a pleasant surprise to the customers who don't expect replies directly from the founder. "The brand has been very personal for me since day one. If someone spends their hard-earned money on a Henry, we make certain that they are satisfied no matter what it takes. I would feel embarrassed if it was anything less than that. I have empowered our entire staff to do what is needed, and I don't play Monday-morning quarterback. When consumers tell us that they are so pleased with our customer service, we reply that if they are happy, we are happy. We were obsessed with customer service starting from the get-go. Not only did we set the bar in our industry, but I could confidently say our level of customer service can stand on top in any industry." Excellent quality of the initial manufacturing allows for such policies to be sustainable.

Henry's advertising and marketing efforts were a complete departure from what was the norm 25 years ago,

including TV commercials and infomercials long before the rest of the industry embraced mass media. On the internet, numerous grassroots fan and user groups sprang up. Looking at the forums and discussion groups that focus on Henry's firearms, a high degree of brand loyalty is evident. A person buying just one Henry is relatively uncommon; more often, several Henry guns follow the first. Henry rifles and shotguns are also quite popular for special occasions and birthday gifts to spouses, kids, and relatives. This loyalty probably comes from two major factors. The first is the high quality and distinctive appearance of the products. A person gifting a Henry .22 to a teenager or a .44 Magnum to a hunter friend can be confident that the recipient isn't getting a lemon. That confidence is based on personal experience with the highly effective quality control backed by very eager and rapid customer service in the rare instance that it is actually needed. The other factor is the deliberate and close alignment of Henry's corporate values with mainstream American values.

From the beginning, Anthony Imperato followed the idea of "Made in America or not made at all." American designed and manufactured, Henry Repeating Arms employs many and provides firepower for many more. The most important American product Henry invests in is skilled labor. So, when Wright Products, a key parts supplier from Wisconsin, planned to close domestic manufacturing, Henry absorbed their factory and part of their staff. That kept the brand all-American, and then-General Manager Andy Wickstrom eventually became the company president of Henry. And, speaking of presidents, George H. W. Bush once placed a personal phone call to commend Louis and Anthony for all they have done.

Henry Repeating Arms has long supported traditional American institutions in the sincerest way possible, with direct, highly efficient charitable donations benefitting organizations and individuals. Commemorative series and product donations to fundraisers have paid for urgent medical needs for kids, veterans' associations, youth shooting sports programs, civic organizations, and emergency services. The total donated exceeds tens of thousands of rifles and millions of dollars. Conducted with minimal overhead expenses, these initiatives set Henry apart even in a firearms industry already known for civic virtue. "I grew up in my family's police-equipment

## Henry's Big Boy X Model .44 Magnum, Model H012X

The Big Boy X-Model is packed with a high-performance feature set and plenty of room to add even more. The carbine-length barrel is topped off with highly visible fiber-optic sights, fore and aft, and the muzzle is threaded.

shop," says Anthony. "The store was directly across the street from the back of the NYPD headquarters. I saw and heard firsthand even as a youngster how tough it was to be a cop, and I have respected that ever since then. And even more so today. So honoring law enforcement, first responders, and some charitable endeavors for families of fallen officers is part of Henry's DNA. We have also been honored to have created special editions marking the 100th anniversary of the Michigan State Police, the New York State Police, other anniversaries such as Kansas Highway Patrol, and special projects with the Las Vegas Metro PD, the Maricopa County Sheriffs Department, and many others. My vision is to one day return to the law-enforcement business: I love it that much."

Henry is a staunch defender of the 2nd Amendment. A strong supporter of youth shooting sports programs such as the Youth Shooting Sports Alliance, NRA Youth

Programs, International Hunters Education Association, the Boy Scouts, 4-H, they have donated over 10,000 guns to teach youngsters firearms safety and competency. Wildlife conservation is supported through partnerships with Ducks Unlimited, the National Wild Turkey Federation, the Rocky Mountain Elk Foundation, Pheasants Forever, the Mule Deer Foundation, Whitetails Unlimited, and many others. Perhaps most of all, Henry values and supports members of America's armed forces, both active duty and veterans.

"Life is short, but your name and reputation live on forever," says Anthony. "We treat people right – better than they expect – and do our best never to let them down." Business is about relationships with customers and employees. It's also about vision and problem-solving. After twenty-five years, the innovation at Henry is kicking into high gear.

### All-in-One Torque Driver Kit

Featuring the Fix It Sticks All-in-One Torque Driver. Tighten down your scope rings, mounts, action screws, etc. while in the field, at the range, or at home. Kit includes: All-in-One Torque Driver (15 - 65 inch lbs); T-Way T-Handle Wrench; 15 different bits: T10, T15, T20, T25, [hex 3/32, 5/64, 1/8, 5/32, 3/16, 2.5mm, 3mm, 4mm, 5mm], P1, slotted #5; 1/2" Socket and 1/4" bit adapter set; and Zippered case with Molded Holder.

29835 \$112.00

### Replaceable Edition Shooting/Hunting Kit

This kit offers unmatched portability, functionality and versatility. Two Fix It Sticks (which combine to form a T-Handle) and 16 bits are held in a molded bracket for portability/storage. Extra room on each end can hold two additional bits. Includes two sticks, bracket, and 16 different bits: 2.5mm Hex, 3mm Hex, 4mm Hex, 5mm Hex, T-10, T-15, T-20, T-25, T-30, 1/8" Hex, 5/64" Hex, 3/32" Hex, 5/32" Hex, 3/16" Hex, Slotted #5, and Phillips #1.

29843 \$40.00

### Mini All-in-One Torque Driver

Tighten scope rings, red dot sights, mounting plates, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 6 - 25 inch-lbs).

29837 \$55.00

### All-in-One Torque Driver

Tighten scope rings, mounts, action screws, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 15 - 65 inch-lbs).

29836 \$60.00

### Scope Bubble Level Set

Level your optics with machined aluminum levels, featuring precise UK-sourced bubble vials. Kit includes: Magnetic level, NATO/Pic rail level/anti-cant device, and Protective foam carrier with pouch.

29839 \$50.00

### Scope Jack

A new way to level your optic, the Scope Jack works with any 1/4 inch driver to quickly and easily level your scope to your NATO/Pic rail. Just mount the Scope Jack to the rail under your scope and turn the drive handle until the lifting arm engages with the flat section under your turrets. Once the scope is level, maintain pressure while tightening your ring screws to keep optic level throughout the process.

29838 \$44.00

### Bolt Carrier Group Scraper

Custom bit that is designed to clean carbon off the various surfaces of the Bolt Carrier Group. Works with any standard magnetic 1/4" driver. Black Isonite finish for increased corrosion resistance and strength.

AR-15 (Top) 29840 \$10.00  
AR-10 29841 \$10.00

### Glock Tool Kit

Glock tool kit including two custom bits designed to aid in the assembly and disassembly of Glock Handguns / Front Sights. Includes: *Glock Front Sight Tool*, a 3/16" Hex Thin Wall Nut Driver - Integrated magnet holds the screw securely in place. Machined from Solid Steel Bar Stock. Works with any standard 1/4" bit driver. 3/32" Metal Pin Punch - Punch is sized to ensure easy removal of all Glock pins by hand. Machined from Solid Steel Bar Stock.

29842 \$16.00

### Remington Bolt Opener

Access your Remington 700 firing pin quickly and easily in the field with our compact custom bit. Levers the firing pin head with a "bottle opener" action. Molded synthetic polymer bushing protects bolt plug from damage.

# "Cool Guy" Guns

Why You  
May Not  
Want One!

## ROB'S ON POINT

Small guns are great  
for small spaces.

**The short and maneuverable MK18.**

**By Rob Orgel**

**Photos by Offensive Marketing Group**

HK MP7s and MP5s undoubtedly fall into the category of “cool guy” guns, but why are they so cool and who uses them and why? Their purpose is for very close-quarters battle operations where a weapon’s size becomes the most important variable. The “cool guys” who need them are equally specialized.

Scanning around the chow hall in Baghdad, your eye finds different guys with different-sized weapons that will help identify who they are. You quickly learn how to identify different specialty teams that are both US and foreign assets by their rifles or handguns.

A very typical trend has emerged: “The smaller the weapon, the more specialized the operator.” For example, a 39.5” M16A4 with a 20” barrel is an indication of dated and under-funded support units or extremely dated infantry units.

On the other hand, a Daniel Defense MK18 with a 10.3” barrel is an indication of a high-speed operator. If they’re “cool guys,” they have something even fancier like HK MP7s or MP5Ks.

Let’s break down why this is: As a specialty operator, your tactical responsibilities are often limited to short-range encounters. For example, if the mission is to engage or detain a high-value target (HVT) in a building, a team will set into place an outer cordon to protect the scene from outside contamination or enemy fighters. This team needs medium to long-range capabilities. An inner-cordon team provides overwatch on the location of the HVT and will have medium-range capabilities.

The team that conducts the raid is made up of “the cool guys.” So, the cool guys only really need to have short-range capabilities. Most all tactical responsibilities take place within the compound where the raid is happening, the other teams cover the outside threats. Now, these teams are extremely fluent in close-quarters techniques. It’s simply not beneficial for these teams to have 39.5” rifles. This is where the “cool guy” guns get to shine.

#### **Is the “Cool Guy” Gun Right for You?**

Short answer: Probably not, unless you’re ok with limiting your capabilities to short range. What makes the “cool guy” gun isn’t its reach. You should familiarize yourself with the PDW cartridges (9mm, 5.7x28, 4.6x30

**“Regular guy” guns with their extended-range capabilities.**

and .300BLK subsonic) and their capabilities. If all threats you might encounter exist inside 100-200 yards, these cartridges may still be capable, but limited.

### **“Regular Guy” Guns**

The average infantryman these days is issued a 14.5”-16” barreled rifle. These include the Colt M4, the HK416 and a few other of their 5.56x45 friends. Why do we choose these? Because these weapons offer effective capabilities out to 500-plus yards for the average infantryman. With additional training and skills, their effectiveness can be pushed out to much farther distances. This allows our infantry fighting force accuracy and capabilities organic to traditional warfare.

Let’s compare the “cool guy” guns with “regular guy” guns. The MP5K is an incredible weapon for a whole list of reasons; however, when exchanging bullets at 400 yards, even under-funded troops equipped with outdated battle rifles stand a better chance as compared to the limited range of the 9mm.

To decide which is the right weapon for you, you’ll want to weigh what you think you’ll be up against and how your fight might go. If you’re only interested in

protecting your home from assailants, the “cool guy” gun would be the perfect choice. If your potential needs and purposes are more diverse, you may want to consider the “regular guy” gun.

Drawing from my experience, during my first tour in Iraq in 2005, I carried a 39.5” rifle. I can appreciate the velocity and range capabilities of a 20” barrel, but I never want to carry one again. I have much love for the Daniel Defense MK18 – this is the current choice of the contracts I served on for 4 years after the military. However, with the MK18 its strength is also its weakness – the 10.3” barrel. The pros being room clearing and vehicle ops and the cons being that it *can do* medium range, but it surely doesn’t shine in that space. I personally enjoy that middle-ground space of guns with 14.5”-16” barrels – the M4-type weapon. And that’s what I carried in Afghanistan.

In conclusion, maybe it pays to be a regular guy. The typical military infantryman is armed to meet a wide variety of needs. So, from room clearing to long-range target engagement or predator hunting, a 16” AR-15 or a 14.5” M4 can take care of all your needs.

# SAFARILAND®

A lightweight defensive/competition pistol holster with low-cut sides and open top for a rapid draw. A trigger guard detent and adjustable tension device reliably secures the pistol in the holster during rigorous activity. SafariLaminate™ construction makes this holster tough enough for constant wear. Includes both injection-molded paddle and belt loop. IDPA and USPSA approved.

# 5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

# BLADE-TECH™

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

# Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

19495 \$9.99

# BLADE-TECH™

## "Signature" OWB Holster

Over the last 21 years Blade-Tech has been dedicated to perfecting the OWB holster. In collaboration with industry leading polymer experts, Blade-Tech created an incredibly strong proprietary blend of polymers, that allowed them to precision mold the "Signature OWB holster" with extreme accuracy for a perfect fit every time! Features a positive lock trigger guard, adjustable retention screws and Tek-Loc™.

# "Plan B"

## Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster<sup>▲</sup> holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Holster 10252 \$29.99

## Mernickle Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

# Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

# Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

# GALCO'S BLAKGUARD: Excellent, Not Expensive

By Duane Thomas

Photo by Andrew Hermer

In recent years, I've been having a hard time finding concealment holsters I'm actually willing to wear. At one time I had two favorites: the Blade-Tech Standard Belt Holster and the Comp-Tac Speed Belt Holster. Both now, sadly, no longer made. Thus, I was overjoyed to discover Galco's BlakGuard, because it has all the traits I want in a concealed carry holster.

## Materials

I like a Kydex (or other artificial material intended to work like Kydex) holster because it's a smoother, faster draw than leather. The problem with Kydex holsters is, let's be honest, over time they have a tendency to break. The BlakGuard is not made of Kydex *per se*, rather it's injection-molded plastic. The holster's most distinctive feature, it has a front panel that isn't actually plastic, it's what Galco calls Premium Center Cut Steerhide.

When we hear "center cut" as it applies to leather, we think "suede." However, Premium Center Cut Steerhide is not suede. Though it shares something of suede's flexible qualities,

it's a thicker, denser, tougher, more-durable material because it has a much tighter grain. Bob Hansen, Galco's former marketing director and current vice president, said

to me, "Steers are like cow marathon runners." I have a Galco AnkleLite ankle holster for a Ruger LCP, the holster body of which is made from Premium Center Cut Steerhide, that I wore for years, and it's still in great shape.

On the BlakGuard, the majority of the holster is injection-molded plastic, but the front portion, which gets twisted and stressed as we're drawing and reholstering the gun, and eventually breaks, is flexible steerhide.

## Straight Drop

I prefer straight drop, where the rear of the slide is right over the muzzle, the gun is carried straight up and down, instead of FBI tilt where the rear of the gun is tilted forward. I carry at the 3 o'clock position, in a true strongside carry, as opposed to the behind-the-hip, 3:30 or 4 o'clock position necessitated by FBI tilt. Partly because

3 o'clock is more comfortable when sitting in a car seat, since we're not literally sitting on the gun, and pushing the gun butt up into our floating ribs. Also, it's more

accessible when sitting in a car, again because the gun lies along our side instead of being pinned between our back and the car seat.

Also, straight drop allows us to “set” the position of our wrist with first hand contact to the gun, instead of having to bend our wrist backward to grab the gun, then straighten it out as we drive the gun forward.

Straight drop at the 3 o’clock position allows a much more directional, innately simpler draw stroke versus having to reach around behind our back, then bring the gun out in a semi-circle as when drawing from behind the hip.

The BlakGuard is straight drop.

### Height

Most concealment holsters are high ride, the theory being that will be more concealable. If your concealment garment is something like a short windbreaker, that makes sense. If you’re wearing something longer, it’s a non-issue, and a high-ride holster is definitely slower to draw from, because you must lift the gun much higher before it can clear the holster.

Most concealment holsters carry the gun such that the front of the trigger guard rides about halfway up the belt (granted my typical 1-3/4” gun belt) or in some cases even above the top of the belt. I prefer the front of the trigger guard to be at the bottom of the belt. And that is where it is with the BlakGuard.

### Belt Loops

I prefer what I call “split belt loops” with a slot between them, so I can straddle a jeans belt loop. The BlakGuard has split belt loops and can take up to a 1-3/4” belt. Plastic 1/4” spacers can be added, if you want to run a 1-1/2”, 1-1/4” or even 1” belt. Since I always wear a 1-3/4” belt, however, none of that is necessary for me.

Another area in which Kydex holsters typically break is the belt loops. On the BlakGuard, the belt loops are a separate plate held in place with Chicago screws. In the event they should break over time, just get a new belt loops assembly from Galco, unscrew the old belt loops assembly, replace it with the new loops, BOOM! the holster is repaired.

Put it all together, the areas of a Kydex holster that normally break, on the BlakGuard are either flexible steerhide (front panel) or replaceable (belt loops).

### Sight Track/Red Dot Optics

The BlakGuard has a molded-in sight track to accommodate even tall, high-visibility front sights. Some models of BlakGuard will accommodate red-dot optics, some will not. Checking the Galco website will clarify which is which: holsters compatible with most red-dot optics will contain the letter “R” in the product code’s suffix.

### Adjustability

How tightly the holster grips the gun can be adjusted via two Chicago screws. There is an internal “clamp” that goes around the front of the trigger guard, that works to hold the gun securely in place, but gives it up easily during the draw. Adjusting the top Chicago screw also adjusts how securely that unit clamps down.

My advice, when you get your BlakGuard, remove the screws, then apply blue Loctite to the threads before you set the tension how you like it. Otherwise, with use the screws will back out, and fall out. Ask me how I know.

### Color

To paraphrase Henry Ford’s famous quote about the Model T, you can have a Galco BlakGuard in any color you like, as long as you like black. Since I do, in fact, like black, that works for me.

### Gun Models

If I could point to one thing about the BlakGuard that I wish were different, it’s that it’s not available for some of my favorite guns, like the Beretta 92 and the SIG P320. Oh, well. Maybe one day. As it is now, my “common” guns like 1911s and service-sized Glocks all have BlakGuards.

### Cost

Amazingly, this is not even a particularly expensive holster. As I write this, a quick trip to the Galco website discloses a price of \$64.

### Summary

Put it all together, I am very glad the Galco BlakGuard exists. It provides me with a ready source for a holster I will actually wear. When I carry a 1911 these days, it’s in a Galco BlakGuard. I have used a BlakGuard as my daily concealed-carry holster, I have shot several matches using it, and I couldn’t be more impressed.

# ERADICATES COPPER FOULING AT MAGNUM VELOCITIES.

## INTRODUCING NEW IMR ENDURON 8133.

It's the slow-burning, copper-crushing magnum powder shooters have been waiting for. Engineered for Extreme Temperature Stability, Ideal Load Density and elevated confidence and success that comes from reloading with legendary IMR powders.

## Real Avid Level-Right™ PRO

el reticle is critical to long-range accuracy. For longer shots a canted reticle will push a bullet's trajectory off of center. It gets worse the more the increases. A level scope means that

the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Level-Right PRO 21777 \$69.99

The **Specialized Dynamics AR15/AR10 Armorers' Upper Receiver Block** is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

43234 \$59.99

## Lyman Mechanical Trigger Pull Gauge

Lyman's mechanical trigger pull gauge is a simple, accurate and cost-effective way to measure the weight of your firearm's trigger pull. Made of tough machined aluminum and steel components, the gauge will stand up to years of use. The gauge features a rolling trigger shoe, "T" handle, a sliding indicator that holds your highest weight and a zero-adjustment wheel.

- Reads from 0 to 12 pounds
- 2-ounce increments
- Highest weight indicator
- Aluminum and steel construction
- "T" handle and hanging loop for storage

# Real Avid Gun-Cleaning Chemicals

## BORE-MAX™ BORE FOAM

Powerful gun-metal grade foaming solvent is specially formulated to expand and penetrate within the gun bore, rapidly and effectively dissolving performance inhibiting copper and powder fouling.

12oz. can Bore-Max **40215** **\$12.99**

## FOUL-OUT™ GUNK BLASTER

Foul-Out Gunk Blaster blows away grease and grime fast. This powerful gun-metal grade solvent quickly strips gun actions of burnt powder, oil and grease, eliminating malfunctions of moving parts due to fouling and build up. Quickly cleans chambers, actions, trigger groups, bolt groups, slides, choke tube threading, semi-auto gas ports, extractors, ejectors and other hard to reach areas.

12oz. can Foul-Out **40216** **\$12.99**

## GUN-MAX™ GUN OIL

Gun-Max's advanced gun-metal grade formula sets a new standard for protecting, lubricating and cleaning modern guns. Powerful inhibitors displace moisture delivering extended corrosion protection. Advanced anti-friction additives bond to metal surfaces for longer lasting lubrication of moving metal parts. Maximizes performance of semi-auto guns with high cycle rates. Formulated to excel in sub-zero temperatures and harsh operating conditions.

## Apex Tactical Specialties

### Action Enhancement Trigger for Springfield Armory Hellcat

The Action Enhancement Trigger for the Hellcat pistols is the easiest, quickest upgrade you can do to the trigger system that significantly improves the feel of the trigger pull, without reducing factory safety values. When properly installed, this drop-in trigger will:

- Reduce trigger pull weight to 5.0 to 5.5 lbs after break-in
- Smooth uptake and reset
- Reduce trigger overall travel and reset distance
- Deliver a crisp trigger break
- Directly replaces factory components without additional fitting
- Maintains factory safety values

<b>29041</b>	<b>\$24.99</b>
<b>29040</b>	<b>19.99</b>
<b>29042</b>	<b>19.99</b>

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

**29033** **\$34.99**

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

**29032** **\$39.99**

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

**21778** **\$29.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

**29034** **\$9.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

**29039** **\$29.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm. Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

**29036** **\$9.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect leftover carbon while applying the perfect amount of oil or solvent. The .223/.56mm bore brush scrubs baked on carbon from lands and grooves.

**29037** **\$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

**29038** **\$12.99**

## Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

21776 \$79.99

## Swab-its

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	15310	\$6.00

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$21.99

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

**NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. 19234 \$21.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$19.99

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$21.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$14.99

**TW-25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe	15732	\$14.99
1.5 Ounces	15731	18.99

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	15571	\$7.99
Slide-Glide Lite	15572	7.99

## Sweet's 7.62

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia.

## Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

66053 \$14.99

# "Big Fifty" <sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2" 12 UNF Thread Dies

## Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 \$19.99

## Shoot Out Targets

The Alpha Target is Shoot Out Targets' Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3" in diameter and 1/2" thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43" tall and 22" wide when assembled.

# Meet Tetiana Gaidar!

**By Kimmie Dillon**

This month's **Blue Press** cover model is professional shooter Tetiana Gaidar. The Ukraine-born beauty started her life as a professional dancer where her hard work and dedication would lead her to appear on "So You Think You Can Dance." Eventually Tetiana's dreams became even bigger than the stage. Unable to own or shoot guns in her country, Tetiana would pack her bags and head to the U.S. to pursue her aspirations as a weapons specialist and actor.

**KD:** Tetiana, you have such a unique set of talents: professional shooter, actor, dancer, gymnast and model. These skills are landing you some Hollywood roles! Tell us about the current projects that you are working on.

**TG:** I'll be featured on "Bosch: Legacy" coming out this March. I am the main assassin character for the three season-finale episodes. My character is hired by William Devane, to kill Titus Welliver (Harry Bosch). I have scenes with John Savage from "The Deer Hunter" and Michael Cudlitz from "The Walking Dead." They used all of my abilities to perform my own stunts and my special exotic-weapons tactical skills on the show. I have a sequence in an upcoming Jamie Foxx Netflix feature "Day Shift." Also, I was in the National Samsung Commercial that appeared during the Summer Olympics and the season premiere of "The Walking Dead" which still runs constantly on TV. And I just got back to LA from shooting for one of the lead characters for the game "Call of Duty."

**KD:** If you could play any character in a movie, what or who would your character be?

**TG:** Well, I definitely would love to play a female version of John Wick and a female version of the Joker. The Selene character from "Underworld" is cool, also in the first two "Resident Evil" films, I could visualize myself playing that part, but with much better weapons-handling skills LOL.

**KD:** When it comes to firearm scenes, directors must

appreciate having your shooting skills. Actors trained in firearms must bring a new level of safety to a movie set, correct?

**TG:** It's funny you ask that question. I was on set of "Bosch: Legacy" shooting scenes with guns, when the tragic Alec Baldwin incident happened. Everyone in Hollywood was panicking over the weapons scenes, but not on my set! Because I have such excellent training from Taran, I was able to assure everyone the gun was

loaded with blanks. It gave great relief to the director, actors and everyone that the firearms were not pointed directly at anyone on set.

**KD:** Growing up, did you have an interest in shooting?

**TG:** I grew up in Kyiv, Ukraine, so I wasn't exposed to anything with guns. The first time I saw guns was on the show "X-Files" where I fell in love with David Duchovny and told my mom, "I am going to live in America and be an FBI agent." My country didn't have guns until recently when we had to defend our homes and families from an unjustified invasion.

**KD:** What made you initially attracted to shooting?

**TG:** What got me really excited about weapons in action was when I saw John Wick with my family back home and got inspired to move to LA to pursue acting. I saw a video of Keanu training with Taran for a film and set up a goal for myself to meet Taran and train for my action films with him. It took me three years every day working hard to achieve my dream. I just won a cup and became a champion at Southwest Pistol

League Limited 10.

**KD:** Take us behind the scenes at Taran Tactical Innovations (TTI) where you are a shooting instructor. What's it like giving weapons instruction to celebrities?

**TG:** It's sometimes kind of a surreal experience when you're standing there training someone like Harrison Ford, or Kevin Hart when in the same week you might've been watching "Patriot Games" or "True Story." One of my favorite days at the range was with

my good friend Jon Bernthal, Aaron Taylor-Johnson and Olivia Munn. Another fun time of training was with UFC legends Bas Rutten, Chuck Liddell, Gina Carano, Royce Gracie and Luke Rockhold. Then we had like a director's day and had Antoine Fuqua ("The Equalizer"), Kurt Wimmer ("Equilibrium"), J.J. Perry ("Dayshift"), and Michael Bay ("Transformers"). But getting to work with Keanu on "John Wick 4" is still going to be my favorite time ever because the first John Wick movie inspired me so much that my whole life changed.

**KD:** Taran Butler is one of the most accomplished shooters out there. What advice does he share with you for training clients at his range?

**TG:** First, safety is emphasized throughout the class, but it's about the details of the draw, the reloads, the transitions from different styles of weapons, basically showing them all the tips that he's learned over his entire life. But what I like about Taran and working with him is that he is open minded. I am hungry for knowledge and getting more skilled and cross pollinating with other people. We just got back from W.O.F.T. (West Orlando Firearms Training) aka "Tactical Disneyland" near Orlando and added more stuff to our repertoire, like coffee-shop scenarios, carjacking scenarios, and low-light attack scenarios with Simunitions. It's a must-visit location for anyone who is serious about self-protection. We also get this kind of training down the street in Moorpark at Covered Six, another wonderful location with an incredible facility where Taran and I love to train.

**KD:** I'm sure there are some ladies reading this article who are interested in competitive shooting. How would you encourage them?

**TG:** First, watch videos of the best shooters out there. All the grandmasters: Jessie Harrison, J.J. Recaza and Taran. Look at their footwork. Start simple with a custom Glock 34 and a 9mm PCC rifle. Of course, I'm gonna recommend getting these from TTI because you can't beat that. Look up USPSA competitions in your area. The people are always very accommodating and nice. They'll tell you where to get what you need, where to get ammo, help you understand the course, and show you the walk-through. You'll make a lot of new friends and you'll learn to be incredibly proficient with firearms.

**KD:** Competitive shooting takes strength and endurance. What is your daily fitness routine to stay in top shape?

**TG:** The majority of my shape secret is diet. It is the key to looking – and most important, feeling – good inside and out. I always find at least 15 to 30 minutes to stretch and strength train. Cardio on an empty stomach in the morning after I'm done with my green juice and matcha latte. I do intermittent fasting, light lunches and salad with protein for dinner. Most of my diet is super clean: Pescatarian, organic, from farms, no sugar, no processed

or fast food, no alcohol or smoking or partying. I usually go to bed early to have 8 hours of sleep. I have my cheat days and I do eat meat sometimes to not let my body forget how to digest it. But I do try not to eat dairy at all, and this helps me to look and feel better.

**KD:** Incredible. You really set the bar high for physical training!

*Note to our valuable **Blue Press** readers: We have been planning to feature Tetiana on our **Blue Press** cover for a while now. When we photographed her on our range in Arizona, the world was different. Much different. Recently things have taken a turn in our world. Tetiana and her family are from Ukraine.*

**KD:** Shifting focus onto a more-serious note. Tetiana, please tell us what you and your family are going through.

**TG:** Me and my entire family are going through hell right now. Our lives are turned upside down, no one has slept or eaten since the first day of war. I'm still trying to rescue half of my family, my friends and their families, and all the people who are reaching out to me for help. When Russia suddenly started bombing Kyiv my dad said he couldn't describe what he felt when he was closing our apartment knowing that it will get bombed and everything will be destroyed – even our photo album from childhood. They had to grab only a few little bags with medications and food, the animals and try to escape which wasn't easy because my family didn't own a car. My grandmother died and a couple of actor friends died trying to help kids get across the border – shot by Russians. It took about five days for my parents to get to the border. It was the scariest and most heartbreaking thing I've been through.

**KD:** You are actively trying to help the people in Ukraine. Tell our **Blue Press** readers how they can assist your efforts?

**TG:** Everybody can help, even if it's a \$25 donation or simply speaking up on Instagram with a post or story to spread awareness of the tragic unjustified attack on freedom. Anything you can do will help save innocent people's lives like my family and friends. I'm working on creating a nonprofit organization, but it takes some time. Meanwhile, I'm taking donations on my Venmo account and I'm sending them to my family, friends, and the right people in organizations I personally know and trust. I make sure that all the donations are going to kids, mothers and everybody in need to keep them safe and to give them a roof over their head. I post all my actions with money and results where they go and how they help in my stories.

To our **Blue Press** readers, donations are being collected by Tetiana through:

Taran Butler and Tetiana Gaidar with actor/ comedian Kevin Hart at Taran Tactical Innovations.

# Taran Butler: Hollywood's Go-To Gun Guru

By Kimmie Dillon

We've all done it. We settle in to watch a good action flick: popcorn in one hand and drink in the other. And just when we are really getting caught up in the plot, Hollywood gets the gun scenes all wrong. For those of us in the industry, it's entertaining and annoying at the same time. Filmmakers simply want the scene to be captivating. After all, jumping off a moving vehicle while firing automatic rifles in each hand looks pretty heroic! But time and time again, we sit and watch the never-ending magazine capacity. Reloading is usually only done when it adds to the drama as you seldom see spare magazines. And many cringe at the absence of trigger discipline. Somehow it seems that "finger-on-the-trigger" is portrayed as more cinematic in the eyes of Hollywood.

Thanks to Taran Butler, the quality of firearms handling in movies is getting a "Take Two." His

mission? One-by-one he is getting A-listers in Tinseltown up to snuff. Known as Hollywood's gun guru, Taran is a friend of ours here at Dillon Precision. As the owner of Taran Tactical Innovations, Taran shares his talents by providing advanced weapon training to the Hollywood elite, military and police. The Simi Valley Grandmaster is a 23-time Southwest Pistol League champion along with a list of major match wins too long to print. Have you seen him clear a plate rack from the draw in less than two seconds? Taran is a master with any firearm and is one of the best in the world.

**KD:** Taran, how did you start offering specialized firearms training to stars?

**TB:** I love films and I had the opportunity to start working on movies as far back as *Avatar*. I like making a difference on a good movie and also building friendships with many of these actors.

**KD:** What do you think is the key to a realistic gun scene in a movie?

**TB:** Having actors that actually know how to handle guns, a director who listens, and doesn't want to make everything insanely over-the-top and unrealistic.

**KD:** What are some of the movies that you have provided training for?

**TB:** "John Wick" two, three, four; "The Punisher" franchise; "Black Panther"; "Without Remorse"; "Suicide Squad"; "The Old Guard"; "Tenet"; "Gemini Man"; "Nobody"; "Kate"; "Avatar"; "SWAT"; "Hawaii Five-0"; "Stumptown"; "13 Hours"; "The Hunt"; "Cowboy Bebop"; "For Those Who Wish Me Dead"; "Hunters"; "Day Shift"; "The Continental"; "Titus," "Titus Legacy"; "Boss Level"; the new "Indiana Jones," and a whole bunch of others I can't remember at the moment.

**KD:** What makes Wick's handling of firearms look so effortless?

**TB:** Because Keanu put in the work. And the Director, Chad Stahelski, wanted to go levels beyond any other action film on the variety of weapons training and way more time and work involved than any other film.

**KD:** Explain to our *Blue Press* readers about the style of shooting that you teach for action films.

**TB:** The style of shooting that I train the actors is USPSA and 3-Gun based action shooting which is basically the fastest, most accurate style of handling weapons. Nobody on the planet is better or faster than a top three-gun competitor. I was lucky enough to win the Triple Crown. I'm still the only one that's ever done it, being the best in the world at three separate divisions of multi-gun shooting. The Director of "John Wick" saw my style and added it to the franchise for Chapter Two and we kept it going throughout the entire series till the end. Now, I've been lucky enough to work with the spinoffs that will be coming out next year.

**KD:** Generally, would you say actors are easy to work with?

**TB:** Yes, most of the actors I work with are easy to train, because they're all perfectionists. They want to get it right. They've mostly worked with choreography on fighting.

This is kind of an extension of that with repetition and I make them focus on the details.

**KD:** What's some of the worst gun handling you've seen in a movie or on TV?

**TB:** Rick Grimes of "The Walking Dead" always having his 6-inch Python's muzzle dripping down at everyone's feet and yet is somehow able to hit every zombie in the head; Michael Madsen in "Species," unbelievably lame; "American Assassin," awful grip and silly weapons handling; Alec Baldwin in the remake of "The Getaway"; and probably the worst in years would be "The Dark Tower."

**KD:** The death on the movie set "Rust" continues to spark movie-gun safety conversations. What are your thoughts on how this tragedy could have been prevented?

**TB:** "Rust" was a very low-budget, horribly produced mess with people working outside. Alec wanted it to be a woke "all women on board" production, so he hired an inexperienced girl who had a habit of bringing live ammo to the set so they could shoot at lunchtime or after hours. Supposedly, they were shooting in the early morning with live ammo and left a live round in the cylinder. Then you've got a reckless A.D. (assistant director) David Hall – who was actually on the set of "The Crow" where Brandon Lee was killed – grab the gun and give it to Alec. Alec lied about how the gun operates and fired without his finger on the trigger. One of the other options is the people

they got the blanks and dummy rounds from; it's possible they loaded live ammo and blanks and had them in boxes together. The truth is coming out. People will see what happened, but to me these are the two most likely reasons why this happened.

**KD:** Describe your dream movie that you would like to train actors for?

**TB:** I kind of just finished my dream movie, "John Wick 4" in France. It's hard to get much better than that.

Thanks, Taran for your time. We'll see you out on the range!

# C-More Systems

RTS2R

Railway

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

# Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your SAK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	25374	\$79.99
Scout Scope Mount for SKS Rifle	25373	78.99

# BERRY'S

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

**Stackable Utility Box 40194 \$20.99**

## Tri-Can Triple Ammo Can

The Tri-Can will change your life! The perfect organizational tool to fit any of your needs.

The tough injection molded plastic base and lid, rubber seal gasket, and cam-lock latch keeps your contents safe.

Comes with a strong handle for those who are on the go!

The Tri-Can is made up of three individual cans and can be customized with up to three individual cells.

The individual can dimensions are 9.25" L x 3.125" Base W x 3.125" Top W x 2.5" H

<b>Tan</b>	<b>37998</b>	<b>\$27.99</b>

## Dillon Teams Up With TechwearUSA

In response to everyone who has been asking us for Dillon Precision shooting jerseys, we've teamed up with **TechwearUSA** – Your Official Provider of Custom USPSA Gear!

The TechwearUSA AirFlex (\$70) is the ultimate performance layer and their lightest weight jersey. The TechwearUSA Premier Polo (\$95) is made of proprietary Techstatic fabric and is the ultimate competition polo. From its classic cut, added length to make sure it stays tucked in, fold-over collar, zipper front and side panels made from extra breathable mesh, every detail of this garment has been thought through to help you look, feel and perform at your best.

To order TechwearUSA's Dillon Precision men's and women's shooting jerseys, go to [techwearusa.com](https://techwearusa.com). By the way, the "USA" in TechwearUSA signifies that their apparel is MADE HERE!
