ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his wcompany from all the others at the time was the warranty and customer service he offered.

We constantly strive to live up to his standards.
Please let us know if we're not succeeding.

Rapid Trim 1500 Case Trimmer[^]

Dillon's
RT 1500
shown
installed
on an
XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT 1500 is equipped with a quick-disconnect

power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **62164** is **\$425.00**. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$25.00** each. Upper lock rings, **13559**, are **\$9.00** each.

MILITARY BRASS?

**Eliminate the "Grunt Work" with
Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	62124	\$27.00

Case Preparation Equipment

Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator ^	20675	\$110.00
CM-500 Case/Media Separator ^	21045	\$80.00

CV-2001 – The Industry Standard

Dillon’s CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no “hobby” machine! The bowl and base are constructed of 7/32” thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10” x 14”,

and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18” x 22”. The tub keeps the mess off the floor and bench. It’s fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon created the CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV-2001 ^, US 110v	20493	\$250.00
CV-750 ^, US 110v	19455	190.00
Euro 220v CV-2001 ^	22047	280.00
Euro 220v CV-750 ^	19473	225.00

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You’ll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases!

Rapid Polish 290

8 oz. bottle.	13804	\$9.99
Case (20 pc.)	20255	149.99

Dillon’s **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you’ve done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you’re ready to load. Try a bottle. You’ll never use a grease pad again.

8 oz. bottle	13733	\$15.99
Case (20 pc.)	20256	223.99

10 bottles of polish/10 of lube ^		
Case (20 pc.)	21375	\$186.99

Don’t Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.

15-pound bag	13287	\$24.50
--------------	-------	---------

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!

10-pound bag	13496	\$16.50

Meet Lena Miculek

By Kimmie Dillon

Champion. Expert. Distinguished. These are just some of the words we think of when we describe Lena Miculek. We are proud to feature her as our first cover model for this special edition of **The Blue Press**. As an 8-time World Champion, Lena travels the world competing and instructing. She's also been recognized by the NRA as the World's Greatest All-Around Female Shooter.

Earlier this year, Lena stopped by Dillon Precision to join in on some sizzling fun. 118-degree record heat to be exact! While we here at Dillon are somewhat used to the Arizona heat, this day tested the best of us. Thanks to Lena and our entire crew for being such troopers!

Soon we will post videos of Lena introducing our new Dillon Autodrive 3000. This machine fits Lena and her famous family perfectly. The new DA 3000 is wicked fast, has plenty of field-testing, is extremely accurate and made in the good ol' USA. We are proud that Lena uses our Dillon products to help her stay at the top of her game!

KD – You are one busy lady who goes through A LOT of ammo. What do you think about our new Dillon Automation machines?

LM – When it comes to wanting to see true progress in shooting, that is made on the range. The fact that you can cut down the time you spend reloading opens up so many opportunities for everything else that you are doing.

KD – You shoot in large matches where the competition is intense. How important is the ammo you load?

LM – It's a cornerstone to the foundation of being able to win. Without good ammo, you don't even have the option of competing. You can show up and try but investing in quality products like Dillon equipment and a load that works to your standards is literally priceless.

KD – Outside of shooting, what are some of the things you do for fun?

LM – Truck camping, or overlanding, has become more than a hobby. It's become an addition to how I operate my life. For nine years, I would leave on a Friday and get home on a Monday. With flying, you don't actually get to see anywhere except the airport and the range. I've gotten to experience more of the United States this past year than I ever have in my nine years of traveling.

KD – What got you interested in overlanding?

LM – It's a way of facing a fear of being physically alone because I travel so much. Taking concealed carry seriously really helped me function solo. And then having a vehicle knowing that I have just about everything. I have water, I have clothes, I have food, I can sleep here, I can take care of my dog, and can take care of myself. It's another layer of being self-sufficient.

KD – Tell us what you like best about this type of travel.

LM – I like overlanding because of the opportunities that it opens me up for. In my vehicle, I have my hunting rifle, bow and arrow, blow gun, ninja stars, my dog, hiking and backpacking gear, and my kitchen setup. Just point me in a direction and I'll be doing something!

Recognized by the NRA as The World's Greatest All-Around Female Shooter!

Overlanding in Buffalo Pass, Colorado.

Jerry and Lena at the Sig Sauer Academy
in New Hampshire.

Kay and Lena – scenario training.

Lena shooting in Florida.

Lena and her SIG Copperhead truck gun.

KD – Overlanding is booming in popularity. I mean it's everywhere! Why do you think this form of exploring is becoming preferable to more traditional forms of adventure vacations like camping in a tent or an RV?

LM – You're more mobile than being in an RV. You can really go out in nature and not be that experienced, and you have the safety blanket of all of your gear being with you and sleeping in a vehicle.

KD – Please share with our **Blue Press** readers some of your personal favorite destinations. What made these journeys memorable?

LM – This year it was the Grand Tetons in the Wyoming and Idaho area. And Acadia National Park in Maine. It's a magical wonderland. Cadillac Mountain in Maine is known as the first place in the U.S. to see the sunrise.

KD – Where is the next adventure you are planning?

LM – In 2022, I will be doing an entire tour of the United States from Florida to New Hampshire, Oregon to California. I'm going to hit all of the places that I can!

KD – When you head out on an expedition, are you typically solo or with a group?

LM – Solo. But my sister and I went on our first trip, just us, and we drove everywhere. We covered about 5000 miles, and we just loved each other more at the end.

KD – It only makes sense that you need to protect yourself when you are out in the middle of nowhere. What firearms do you bring along on your trips?

LM – For my own self-defense, I always have my P365 and P238. My dedicated truck gun is a Copperhead.

KD – A personal question – do you carry concealed?

LM – Yes ma'am.

KD – How important is it to get specialized training for carrying a concealed firearm?

LM – I am someone that has the answers for how to shoot guns. Holy cow – concealed carry is a struggle. From products to training, it's a whole other world. It's a battle and I understand it now and I'm going to attack it with the same intensity that I attacked everything that I've done in the past.

KD – How can our readers sign up for one of your courses through Sig Sauer?

LM – I'll have updates on my Instagram and Facebook. The courses will be taught through the Sig Sauer Academy. I will be putting competition on a bit of a pause in order to have more time teaching this year. I'll be teaching in Florida, New Hampshire, Utah, Oregon and Arkansas.

KD – Any final thoughts?

LM – Fear is the ultimate thief of life. And he's a liar – you can't trust him. Through concealed carry and a general preparedness in my life, I'm able to live free.

KD – So true! Thanks for hanging out with us, Lena. We look forward to your next visit to our family business. And we'll make sure the weather is a bit tamer.

☀️ Kimmie

Dillon Automation's DA 3000

For Dillon Precision's CP 2000 and RL 1100

Introducing the new Dillon Autodrive 3000!

- Fully automates the Dillon Precision CP 2000 and RL 1100.
- Case Preparation rate up to 3000 rounds per hour!
- Reloading rate up to 2000 rounds per hour!
- DA 3000 easily installs on your Reloading and Case Prep machines.
- Simply press the "Start" button – no more manual cycling of the machine.
- Adjustable Cycle Rate and Dwell.
- Dillon custom-built Industrial Controller.
- Integrated safety controls and shield.
- Field-tested and proven patented design.
- One-year warranty on the DA 3000.
- Maintains your Dillon-Factory machine warranty.
- Made in Scottsdale, Arizona USA.

Mr. Bulletfeeder[®]

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. 13606, \$27.00 ea.

Dillon's Range Bag[^]

33389 \$139.99

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4"x7"x8" and features two interior pockets measuring 6-1/2"x6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5"x7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12"x8"x1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

"Border Shift" Ammo Bag[^]

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	13755	\$25.99
I.D. Card Holder [^]	14575	2.99

Dillon Pistol Case[^]

Our pistol case was designed to hold and protect your pistol and carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

12709 \$39.99

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package.

13606, \$27.00 ea.

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon's double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Spare Decapping Pins		
Package of 10	21528	\$8.00

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Strong Mount 22051 \$95.00

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and

powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

AUTO PRIME SYSTEM[^] 16627 \$120.00

PRIMER SYSTEM EARLY WARNING[^]

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$37.00

AUTO POWDER SYSTEM[^]

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$130.00

OPTIONAL MAGNUM RIFLE POWDER BAR

21353 \$45.00

AUTO EJECT SYSTEM[^]

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$43.00

BL 550 POWDER DIE[^]

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

Powder Die: 16629 \$27.00

Oversize Die: 16626 29.00

Plastic Funnel: 16617 9.00

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.) 20029 \$32.00

RL 450 Powder Die 20308 32.00

Unscrew Yourself

Unscrew your sizing die to feel how smooth a Dillon runs with professionally processed brass

- Super Vel factory processed brass
- Roll sized *and* full-length resized
- Camdex commercial-grade processor
- Primer pockets swaged to SAAMI specs
- Ringers and Berdan pockets removed
- Air pressure verified: no case cracks

Dillon Reloading Accessories

A Strong Mount increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	22051	\$95.00
XL 750/650-only	22052	93.00
"SDB"	22223	105.00

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

Stock #62005, \$95.00 is for:

XL 750, XL 650, RL 550 and Square Deal "B". **Stock #62006, \$95.00** is for:

RL 1100, CP 2000, Super 1050 and RL 1050 as well as any Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our Bullet Tray is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	22214	\$60.00
1050 Tray Kit	22215	60.00

The Low Powder Sensor provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

16306	\$52.00
--------------	----------------

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

“D-TERMINATOR” Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.

\$149.99
10483

Dillon's **“Belted Magnum” Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

97126 \$205.00

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

21044, \$93.00 each

An **Aluminum Roller Handle** gives your reloader an entirely new “feel,” reduces operator fatigue, and makes primer seating easier.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the

plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes[^]

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

DILLON

RIFLE COMPANY

DRC Staff Article

Six years ago, Chris Dillon and Brodie Renner attended the Shot Show in Las Vegas. “We walked through the semiautomatic rifle arena and came out disappointed,” Chris said. “There was nothing exceptionally new or dramatically different. Brodie looked at me and said, ‘Someone ought to do something about this.’ So, we did.” The Dillon Rifle Company.

There was no footprint; no plan for building an agile, exciting, R&D-based business in the firearm industry. Starting at ground zero, Chris was able to put his vision of a better engineering organizational structure into play. “I hate repetition. At some level, there must be a better way to take control of the process, to fire the imagination.”

“Idea generation is the information flow needed to create great products. Those products are created by strong teams. So how do we keep the information as pure from point A to point B? Every add, be it person or system equals more corrupted information flow.”

As time progressed, Chris became committed to the idea that four or five people is the ideal size of group that allows largest information and creativity retained without degradation. “The personal level of communication is most easily understood and achieved with the greatest retention. The team will naturally create their own culture, and produce their best work, in the best way for their team. On larger projects, teams engage on a lateral – not vertical – hierarchical structure. An even playing field – in a truth-to-work environment.”

A self-described ‘ordinary guy,’ Chris Dillon, is a true collaborative leader. “I bring together these incredibly talented people, and provide the resources, environment, and trust for them to spread their wings. I’m continually blown away by the functionality and beauty of what DRC teams create.”

The energy from this open management style is

embodied in the people who work there, an enthusiastic crew of men and women who believe in each other, the company they’re building and the work they’re doing.

“I’ve always hated the phrase ‘failure is not an option’,” Chris says. “While it’s not the desired option, it’s always possible. People don’t understand how failure in manufacturing and design can be a great thing. It’s a sign of progress – how lessons are learned, methods improved upon. Failure is part of the success process. A fear of it kills creativity.”

The bigger and more complex a company becomes, the more cautious and more risk averse they become. The desire for growth is replaced by the want to sustain it.

But DRC is committed to staying lean and adaptive. Identifying and taking aggressive risks comfortably and continually, while maintaining the quality and trust customers of the Dillon Companies expect. “Build the best products, sell them at a fair price and always treat the customer in the way you wish to be treated.”

With a stellar team in place, DRC opted to start with a manageable project; to design and build a trigger. They developed the OPAR Operator Trigger, a pre-stage, drop-in, AR trigger.

When the trigger build was completed, it was time to teach the DRC team the business side of doing business. From marketing, orders, lead-times, warehousing and shipping, to the thousands of little things people are unaware of until they stumble across them. “At DRC, we are collectively different, but exploring all aspects of the business together.”

The success of the OPAR Operator Trigger has instilled a sense of achievement in the DRC team. A confidence and purpose they take with them onto future projects.

Headquartered in Scottsdale, Arizona, DRC also has a multi-media division: No Roads. Chris believes, “You have to be open to new things and other ideas to be groundbreaking.”

**Law Enforcement
Officers...**

**Sport
Shooters...**

So, How Can the Dillon Rifle Company Launch Without any Rifles?

Chris wants customers to experience the ride with DRC, to have a front-row seat in the excitement of growth and product development. With an aggressive but doable schedule, DRC's first rifle is scheduled to release in May 2022. The second is slated for October 2022. These will be two separate types of rifles. Not AR derivatives, they are new semiautomatic rifles of various designs. Everything from the trigger to new aesthetic features, safety, and futuristic components.

"You need to live and breathe the project," Chris says. "Love and bleed for whatever you're making. If you believe in someone else to do it, build your own team. Hang in there with us. We'll get there...eventually."

The Dillon Rifle Company is a growing-excited company.

Why DRC Started With the Trigger

"We're on a nighttime helicopter insertion in Iraq, and I'm sitting on the ramp going over our mission in my head. Entry points, last location of the eight insurgents, the secondary objective, time on the objective before we had to EXFIL, MEDEVAC HLZs and so on. A routine I'd practiced a hundred times.

I hear a gunshot and feel heat between my legs. I immediately think we're taking fire. But everything's quiet, the helicopter's still heading toward the objective.

My good friend, fellow sniper, and one of the best operators our nation has to offer, just had an accidental discharge.

Somehow during the 30-minute flight his selector switched from 'SAFE' to 'FIRE'. When he adjusted his seating position on the ramp, his trigger snagged on something and fired the weapon. Because of the way we were packed in there, the muzzle flash went off right between my legs. If I was a bigger man, I would not have a second kid today.

Fortunately, no real damage was done to either me or the helicopter. We continued toward the objective and completed the mission with no friendlies wounded or killed.

That night could have gone very differently. Even among the ranks of the most elite operators using the best equipment available, mistakes can be made, and accidents will occur."

**Brodie Renner, Senior Chief (Ret)
Retired Navy SEAL**

DRC Manager of Non-Standard Weapons

This incident-inspired opportunity was the first ground-up design and build project for the Dillon Rifle Company: The OPAR Operator Trigger.

What is a Pre-Stage Trigger?

A pre-stage trigger is a trigger that requires two separate actions that must be completed in the proper sequence for the sear to trip.

DRC intentionally selected the term "pre-stage" in order to differentiate it from traditional Single or Two-Stage triggers. The OPAR Operator Trigger is specifically designed to reduce the likelihood of accidental discharges.

If a shooter places their finger on the side of a Mil-Spec M-16 trigger and applies a small amount of pressure against it, then draws their finger backward, the gun will fire. It takes an average of only 7.0 pounds of pressure to trip the sear, and the sear does not care where that pressure comes from.

This is the exact scenario that nearly put a bullet in Brodie Renner's leg. In the after-action report, it was determined that sometime during the flight, the rifle's safety had been bumped to the "FIRE" position. Following that, pressure had been applied to the trigger by a piece of kit or part of the operator's uniform causing the M-4 to fire.

The OPAR Operator Trigger addresses the vulnerability of an accidental discharge in two ways. First, a secondary trigger is inset in the primary trigger shoe. When depressed properly, the secondary trigger moves DRC's

Hunters...

The OPAR
Operator Trigger

Trigger Stop that prevents the sear from disengaging.

In order for the trigger to function, the inset trigger must first be depressed, or the primary trigger will lock, resisting firing. From a shooter's perspective, it's a normal trigger pull. Direct pressure to the trigger and the shooter will never know it's there.

The second vulnerability DRC addressed is the area on a trigger where when pressure is applied will cause it to fire. This is referred to as its Area of Engagement. On a Mil-Spec trigger this area is equal to 180°.

By shrouding the secondary trigger inside the uniquely shaped trigger shoe, the Area of Engagement on OPAR triggers is narrowed considerably. There are currently two models of the OPAR Operator Trigger; the Operator Curved and Operator Straight.

Built for the CQB community, the Operator Curved has an Area of Engagement (AoE) of 100°. The Operator Straight has been designed with law enforcement, military, and general sportsmen in mind and has an AoE of 30°.

From the perspective of the shooter, OPAR Operator Triggers have a clean 5.0- to 5.5-pound trigger pull weight, crisp break, and a short trigger reset.

What Happens if the Trigger is Pulled Incorrectly?

A proper trigger pull is when the pad of the fingertip is placed on the center of the trigger and pressure is applied straight back towards the shooter's shoulder. Using normal technique, the OPAR works every time.

However, if only the trigger shoe is pressed, the trigger will lock, preventing the rifle from firing. DRC's trigger shoe is designed to be the first thing any 'foreign object' comes into contact with, this is where the trigger's overall shape comes into play. A shooter's trigger finger will naturally seek the center of the trigger, where the

inset trigger is. A strap or other unwanted object will tend to grab or catch the most pronounced part of the trigger, in this case, the trigger shoe and lock up.

Additionally, DRC's design allows for times when shooting is desired, but finger placement is less than ideal. In these situations, the trigger pull weight will rise noticeably. Imagine the soldier or police officer suddenly having to engage a threat using their firearm. In those situations, finger placement may not be perfect, but they will still have a functional rifle.

Why the OPAR Operator Trigger?

Dillon Rifle Company believes the number one quality of a professional is mindset. The ability to recognize that you're not perfect and there will be days when things do not go as intended. While you cannot prevent mistakes, you can mitigate them.

The Dillon Rifle Company

We have a vision of where we want to go. It won't always be in the direction you'll expect, but we hope that you enjoy the space that we create.

Sack-Ups Protective Gun Sacks

Sack-Ups Protective Gun Sacks protect your firearms from the dings and scratches that tend to happen when you're rifling through your gun safe looking for...well...your rifle. They don't take up as much room as a gun case, but provide just enough padding to keep your guns safe... in your safe.

HYSKORE Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The modular feature of the rack also means that two or more racks can be connected together and reconfigured to take maximum advantage of all available space in your safe or vault. The rack measures 11-1/4" wide x 7-1/2" deep x 6" high.

Red Cell:

Look Through The Enemy's Eyes

Be “the enemy” and look at yourself in the mirror. Let’s identify the kind of things the enemy is looking for in the way of easy opportunities.

**ROB'S
ON
POINT**

It's easy to make yourself a victim when you're distracted.

Who would you choose as YOUR victim?

Understanding "Red Cell"

Red Cell was a special adversary team organized to test US military base security systems and personnel. How can we apply this concept to ourselves? All you need to do is look at a person walking through a parking lot talking on or looking at a phone, not paying attention to his or her surroundings. After exiting a store, this gives the enemy an opportunity to observe where they're going and follow them home. Distracted people are easy targets.

Being alert, off your phone and aware of your surroundings is the best way to take yourself out of the "easy target" equation. Take it a bit further, think about where Red Cell comes from and apply the concept to yourself by pretending you're the bad guy!

As an exercise, look around the supermarket and pick out your theoretical "next victim." You'll find that

often, victims choose themselves! That lady choosing to focus on her cell phone instead of her surroundings is oblivious to the fact that you're studying her, her jewelry, her Apple Watch, iPhone 13 and her wardrobe. Watch to see if she remote starts her Lexus as she leaves the store. Note the license plate and casually follow her to the car.... You get the idea. We want to assume this perspective and figure out ways to defy it.

Let's Keep Our Awareness Up

Mentally observe and keep track of who we see – and who we see MULTIPLE times – as we're shopping. Take note of who's taking an interest in us as we move around the store. Often, this alone takes us out of victim candidacy.

To be clear, what I'm NOT saying is that everyone who has been victimized is at fault. What I AM saying is that just by being aware of your surroundings you

Awareness and attire that allows for concealed carry is a great deterrent.

can remove yourself from the “easy victim” category. This reinforces the concept that if I’ve had to draw my gun, I’ve done a lot **WRONG** to find myself in that position. Finally, this also reinforces the cliché that my favorite gunfight is one that doesn’t happen.

Equipment

The equipment I place on my body before I leave the house can lead to a lot of my success. Of course, to be an armed citizen is the best choice in my opinion. However, not carrying a firearm doesn’t mean that you’re out of options. A powerful flashlight – whether you carry a firearm or not – can easily be your most important piece of equipment. (See “I’d give up my gun before I’d give up my flashlight!” in the January/February 2021 *Blue Press*.)

How we dress ourselves can mark us as easy victims. For example, wearing comfortable flip flops can

“Tacti-cool?” Advertising what you’re carrying can be a bad decision.

attract bad behavior. When playing Red Cell, would you choose victims who can run, or victims who have handicapped themselves with flip flops or stiletto heels?

Then there’s the person with **TOO MUCH** gear. The “come and take it” shirt and multiple morale patches on a 12-pound pack that screams “gun.” If you’re not paying attention, someone just **MIGHT** come and take it when you’re in the parking lot. The operative part of concealed carry is **CONCEALED**.

Summary

In the end, what I’m asking is that we remind ourselves to avoid complacency. Maintain constant awareness of our surroundings, and finally keep in mind that we live and operate in an environment where the enemy is **ALWAYS** watching.

"Plan B"

Very-Bad-Day Planner Holster

Dillon's "Plan B" Very-Bad-Day Planner Holster[™] holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

Should You Swap Out Your Handgun Grips?

By Maureen P. Sangiorgio
NRA-Certified Firearm Instructor/Range
Safety Officer, Photos by Oleg Volk

As soon as the elderly woman approached me, I had a feeling there was going to be a problem. I was volunteering as a Handgun Instructor at a local range event, and the woman could barely walk. She handed me the case containing her handgun, with shaking, gnarled hands. It was a large semiauto handgun, in 9mm caliber. When I showed her proper grip, she struggled to get a firm grasp on her firearm, and could not even hold up the gun. She became frustrated, and turned to walk away. I told her to try my S&W M&P Shield EZ .380, which was a lot smaller than what she had. She was not only able to fit her hands around the gun, she also managed to fire off a few rounds, and even hit paper! Problem solved.

The Importance of Good Grips

The grips (also called panels or stocks) are the parts of the pistol that your hands wrap around in order to control the firearm. Handgun grips come in a variety of shapes and materials ranging from wood such as walnut, in addition to polymer, foam, rubber, and ivory. The latest trend is to use exotic materials such as mammoth tooth and tusk. Grips also come in various textures such as rough, smooth, firm, and soft.

"Handgun grips help the shooter determine the direction the gun is pointing, and control the energy or recoil generated by a round discharging inside the barrel of the gun," says professional shooter Chris Cheng, History Channel's Top Shot Season 4 Champion, and author of the book, "Shoot to Win."

According to Cheng, the connection between the physical handgun grip parts and how your hands fit on the gun is critical. "An effective handgun grip is an essential foundational skill that will impact your accuracy and speed. Having a strong grip will reduce the likelihood that the gun will move while taking a shot. If your grip is poor, as your finger moves to pull the trigger, you are increasing the likelihood that the gun will move and throw off your shot."

In addition to improving accuracy, having the right grips on your handgun will enable you to shoot faster. "This is because as you recover from the previous shot, your sights move, and the slide will move straight back toward your face and then forward. In order to string together multiple shots on target, you

want your sights to end up exactly right back on target with each shot. Having the proper grips on your gun is essential to accomplish this.”

“I remember when I was less experienced, I would take a shot and hit my target, but then I’d need to spend 10-15 seconds reorienting my grip because my grip was poor,” recalls Cheng. “The gun, along with the sights, moved in my hand when the shot went off. Once I focused on improving my grip, it was like a lightbulb moment went off. I was now able to shoot more quickly and accurately when taking multiple shots. Your choice of pistol grip accessories will have a direct impact on how your hands fit on the gun and how much control you have over placing shots quickly on target.”

How To Tell If It’s Time to Swap Out Grips

According to Cheng, if your single shots aren’t hitting your target or you cannot take repeated shots within a few seconds of each other and place them all on target, your grip is probably in need of analysis. “One way to diagnose this is to film yourself shooting either via a friend or using a tripod to hold your cell phone and focus in on your hands while you record yourself

The connection between the physical handgun grip parts and how your hands fit on the gun is critical.

shooting,” suggests Cheng. “When you replay the video, watch to see if and how your hands move when shooting, and if the gun wobbles around each time you take a shot. If the gun is wobbling then you may want to consider modifying your grip with the grip accessories available on the market.”

Another tip is to check your trigger finger placement. “A good grip generally gives the user a firm positive control where the gun has minimum or zero movement in one’s hands as shots are fired,” says Cheng. “The right set of grips also helps align the orientation of your hands in relation to the trigger so that your trigger finger placement is in an optimal location. The optimal location for your trigger finger is approximately the middle of the first finger pad, and it should be in full contact with the middle-lower part of the trigger. Breaking this down further, if too much of your finger is on the trigger then you increase the chances that you ‘pull’ a shot to the right, for a right handed shooter. Too little finger on the trigger and you’ll increase the chances that you ‘push’ your shot to the left. The size, shape and thickness of your handgun grips can impact where your trigger finger lands.”

If your finger is too low on the trigger then you risk “dropping” your shot low and your finger possibly falling off the trigger after a shot. Finger too high on the trigger may result in you having to exert extra effort to overcome the mechanical resistance force of the trigger which will likely result in the gun moving in strange ways and throw off your shot.

“Modifying your grips is not only about maximizing the surface area contact of the gun with your hands, but making sure your hands are oriented in a way that allows for your trigger finger to be located in the correct position, while also allowing for a smooth pull to the rear and smooth trigger release and forward reset,” says Cheng.

New Grip Guide

So what choices do you have in terms of swapping out your handgun grips? “You can modify a grip by increasing or decreasing the width or thickness and by adding texture,” says Cheng. “Certain handguns like the iconic 1911 pistol allow for grips to be easily removed and replaced with a variety of grips made from different materials such as ivory, plastic, metal and other materials with various designs.”

According to Cheng, other handguns also allow for the side grips and the backstrap to be replaced. “The

backstrap impacts how far back or forward your hand will sit on the rear of the pistol’s grip. If I see a user’s trigger finger too far into the trigger guard and they can’t reposition their hand in a way to reduce the amount of trigger finger on the trigger, then I might recommend adding thickness to the backstrap. This will increase the distance of the gun from the palm of the hand, and by extension pull the trigger finger ‘back’ and ‘out’ of the trigger guard.”

“If a shooter feels they would benefit from modifying or swapping out their grips they should visit a site such as Brownells.com where one site shows many brands and options,” advises Jamey Wojtaszek, Director of Instruction, Pennsylvania Gunsmith School. “They may even shop their gun’s manufacturer’s website as grip choices are one of the most popular upgrades on most handguns. Rarely do the grips themselves require special tooling but you have to be careful. As a Gunsmith I know

that proper fitment of even flat head screwdrivers is of the utmost importance. Boogering up a screw or two on your new firearm will make a new set of grips look terrible. Also consider Loctite or some other thread locking agent may have been used escalating a rather simple task to laboring and costly repairs.”

If you feel that the tools and technique of swapping grips is out of your comfort zone, a Gunsmith should be able to provide that service for you. The Gunsmith

may even be able to give you a consultation on what grip modifications might be right for you. “The Gunsmith will have the experience and proper tools to accommodate this job on your behalf,” says Wojtaszek. “Also, don’t feel discouraged if you have a polymer-framed pistol. There may be no aftermarket options for these handguns, but there are still custom techniques that a Gunsmith can use to customize your grip. Grip texturing or stippling is becoming popular and common practice among many gunsmiths as of late. Again, this is something that should be saved for the professionals, but shooters should know these options exist.”

So how can you tell if you did the right thing, and swapped out your handgun grips? “The shooter will know they made the right choice of grip modification when the firearm either looks like the gun of your dreams or shoots like one,” says Wojtaszek. “In the end grips are changed for one or both of two reasons. Either the gun needs some attitude or enhanced function.”

Be an AGI Certified Gunsmith. Study and work from home with the Freedom and Security of being Your Own Boss!

FREE New Book and Introductory Video Gunsmithing Lesson Will Show You How!

If you want to experience the freedom and security of being a Gunsmith you need to get this FREE information package which includes a one hour video Gunsmithing lesson and a FREE copy of the new book "Becoming An American Gunsmith." (Just pay \$9.97 for priority mail shipping and handling)

This complete package explains how to become an AGI Certified Professional Gunsmith without having to give up your lifestyle, income, leave home, or spend tens of thousands of dollars attending a campus based school.

You will be able to study-at-home, get Certified, and could start making money full-time, part-time or as a retirement income, in as little as 90 days! In the book "**Becoming An American Gunsmith**," AGI President Gene Kelly details how mastering the Design, Function,

and Repair (DF&R) training concepts taught exclusively by American Gunsmithing Institute Master Gunsmiths will enable you to maintain, repair, build, and customize firearms as an AGI Certified Gunsmith. People who do not possess a comprehensive understanding of Design, Function and Repair are NOT gunsmiths, they are just parts swappers.

There is a HUGE demand for Gunsmiths and millions of guns out there that need PROFESSIONAL cleaning, maintenance, customizing, and repair right now. You can even work part-time right from your home! *This information package shows you how! (DISABLED VETERANS: You can have the government pay for your training - contact us for details.)* This package includes:

- Six actual gunsmithing lessons
- How to get your FFL
- Answers to the most commonly asked questions about gunsmithing
- How to set up your shop
- What tools and equipment are *really* necessary
- The truth about why, if you love guns, gunsmithing is the perfect career for you
- How to establish a successful gunsmithing shop

Through the American Gunsmithing Institute's study-at-home Virtual Campus,TM Master Gunsmiths teach you gunsmithing step-by-step using video instruction with cutaway firearms that take you deep inside the guns.

This FREE information package will come with everything you need to know about how to get started Gunsmithing INCLUDING a One Hour Introductory Video Gunsmithing Lesson! Just pay \$9.97 for priority mail shipping and handling!

You get everything shown here!

"Your program changed my life for the better. Hands down, the best knowledge base I have seen. The instructors are true Masters of their trade.

Thank you again for your dedication and perseverance."
James N. Woods, Gunsmith, CJ's Custom Shop

"Words can't express how thankful I am that you put the time and effort into making these courses on video! This is such a wealth of knowledge that I can refer to long into the future when I get those tough jobs and get in a bind and need help! The fact that I have an AGI Instructor with me anytime I need him is worth more to me than you will ever know! What an incredible treasure! Thank you so much!"
James E. Legg

Real Avid Level-Right™ PRO

el reticle is critical to long-range accuracy. For longer shots a canted reticle will or push a bullet's trajectory off of center. It gets worse the more the increases. A level scope means that

the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Level-Right PRO 21777 \$69.99

The Specialized Dynamics AR15/AR10 Armorers' Upper Receiver Block is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

29034 \$9.99

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

29039 \$29.99

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm. Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

29036 \$9.99

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect leftover carbon while applying the perfect amount of oil or solvent. The .223/.56mm bore brush scrubs baked on carbon from lands and grooves.

29037 \$9.99

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

29038 \$12.99

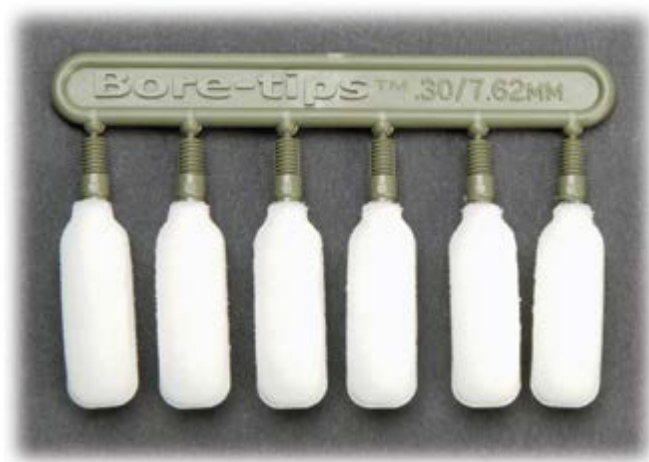

Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

21776 \$79.99

Swab-its

No s#!+, there I was...in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the **Blue Press** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

.22/5.56mm (6 ea.)	15310	\$6.00

HYSCORE Degreezer

The **HYSCORE Degreezer** consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. The set includes a cover with an integral holder for the brush. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

Slip 2000 Products

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$21.99

Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact.

NOTE: Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. 19234 \$21.99

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$18.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$19.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$11.99

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$14.99

TW-25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe	15732	\$14.99
1.5 Ounces	15731	18.99

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	15571	\$7.99
Slide-Glide Lite	15572	7.99

Sweet's 7.62

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia.

Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

66053 \$14.99

Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 \$19.99

Shoot Out Targets

The Alpha Target is Shoot Out Targets' Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3" in diameter and 1/2" thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43" tall and 22" wide when assembled.

CASPER THE FRIENDLY GHOST GUN GROWS UP

By Duane Thomas

In the April 2018 issue of *The Blue Press* I reviewed my first-ever Polymer80 build. Since the media likes calling firearms built up on Polymer80 frames “ghost guns,” I named it “Casper.” Casper the Friendly Ghost Gun. Since then, I have modified this gun in several ways to make it a more capable tool. In this article we’ll discuss what I’ve done, and why.

OPTIC

Brownells [brownells.com] offers aftermarket GLOCK slides cut for a Trijicon RMR red dot optic, that’s the slide I chose for my build, and initially an RMR is what I had on the gun. The RMR has a superb reputation for durability and battery life. Unfortunately, it also has a small window; a thick frame that, at a particular distance (for me it’s 15 yards) makes it hard to shoot on cardboard USPSA/IDPA targets because the frame blocks my view of the sides of the target, I can’t tell where on the target the dot is, all I can see through the window is brown; and a bluish cast to the lens that, given my eyesight, makes it not particularly easy to see through.

I said to myself, “What I need is an optic with battery life equivalent to the RMR, durable, reliable, with a larger window, and a thinner frame, and clearer glass, that fits into an RMR footprint so I can just do a straight swap.” Enter the Holosun 507C [holosun.com]. I will be doing a follow-on article focusing strictly on the 507C. For the moment, let’s just say: The same claimed battery life as an RMR (and a solar panel to extend battery life even beyond that), a larger window, thinner frame, and clearer glass. I went for the green dot version, which I find considerably

more visible than a red dot. Long-term durability has yet to be established, but thus far the Holosun 507C is hanging in there beyond a round count at which certain other red dot optics have totally crapped-out on me.

BACKUP IRON SIGHTS

Casper Mk 1 was fitted with Trijicon suppressor-height sights. Which sucked. These sights proved so poorly regulated for elevation, they were shooting about seven inches high at 50 feet. I looked over my assortment of GLOCK front and rear sights, I saw a reasonably though not insanely tall red fiber optic jobbie from Dawson Precision [dawsonprecision.com]. The only rear sight I had that seemed like it might be of the appropriate height to work with the Dawson front was one of the Warren Tactical Series-Sevigny Competition units [warrentactical.com].

Unfortunately there was a flange coming off the front of the WTS-SC rear sight body that wanted to take up the same space occupied by the optic. Mr. Dremel and I had a conversation with that flange about its obstreperous attitude, said flange was whittled into oblivion, and the front of the sight rounded-off into something that, with the application of some cold blue (got mine from Brownells) actually looks really good. The resultant sight picture is down toward the bottom of the optic window, which I prefer over a true co-witness set-up where your backup sights are blocking the bottom half of the window.

Still, I figured there was no way my home-brewed sight set-up, combining as it did a front and rear sight from two different makers, would actually zero the gun. Took it to the range, BOOM! wouldn’t you know it: Perfectly zeroed for elevation. Go figure.

Opposite Page: Casper the Friendly Ghost Gun was born from a Polymer80 frame, topped by an optics-cut Brownells slide. Above: Two items Thomas chose – in the process of upgrading Casper from its initial form – were the Holosun 507C green dot optic and Timney Alpha Glock Trigger. He views both as huge upgrades from what was there before. *Holosun/Timney photos.*

Casper Mk 1 (see insert) as it first appeared in *The Blue Press* featured a Trijicon RMR red dot optic, suppressor-height iron sights, stock Glock trigger components, Lone Wolf drop-in barrel, stock grip texture, and Pearce Plug.

As Casper matured, it grew a Holosun 507C green dot optic, far lower-profile (and zeroed) hybrid Dawson/Warren iron sights, Timney Alpha Glock Trigger, fitted Wilson match barrel, stippled grip, and Slug Plug.

TRIGGER

At first I put the gun together using strictly factory Glock parts. This gave me decent trigger pulls, nothing to write home about. Then Timney [timneytriggers.com] released their Alpha Glock Trigger. Installed one of these into Casper, trigger pulls now go... wait for it... 2-1/2 pounds. And that's using the factory Glock firing pin spring for complete ignition reliability.

BARREL

Casper was put together at first using an old Lone Wolf [lonewolfdist.com] drop-in GLOCK 17 barrel I happened to have lying around. Over time, I installed an old Wilson Combat [wilsoncombat.com] oversize, requires-hand-fitting, match barrel also on-hand. It's not that hard to do, folks. That's one very nice thing about the basic Glock design: Doing things like fitting a match barrel to a Glock is so simple, anyone even modestly mechanically inclined can do it with a few simple tools. This is so easy even I

can do it. Accuracy with the Lone Wolf drop-in was, eh, decent. Accuracy with the fitted Wilson match barrel is, to absolutely no one's surprise, considerably better. There's really not a shot, at anything resembling reasonable distance, I would be scared to take with this gun.

STIPPLE JOB

The grip texturing on the stock Polymer80 grip was, frankly, a bit rough for my hands. I stippled the grip myself, not to make it rougher, as most people do, but to make it less rough. Watched a few YouTube videos on the process, said to myself, "That looks easy." It was. It's a fairly time-consuming, painstaking process, but when I was done I had a nice stipple job to Casper's grip.

One thing about stippling, it does trap dead skin. (Of course, so did the texturing that came originally on the Polymer80 frame.) Henceforth I will have a gun with a grip that is constantly black-and-white. Well, I guess I can live with that.

GRIP FRAME PLUG

That “arch” of plastic we find on the bottom of the rear mag well rib on a GLOCK can hang up on the extractor groove of the top cartridge in a magazine and stop a speedload cold. Therefore I always install a Pearce Plug [pearcegrip.com] to any GLOCK with which I’m going to do anything at all serious. This fills in and covers over that hole, and in effect turns the GLOCK mag well into a very low profile, effective mag funnel. Problem: The dimensions of the Polymer80 frame were different than a stock GLOCK in that area, a Pearce Plug protruded so far forward, when snapped into place, it would rub on the back of a magazine and prevent it falling free when I punched the mag button. I removed a bit of material with a belt sander, so it worked and let mags fall free during a speedload, but it didn’t look great.

My friend and fellow **Blue Press** writer, Rita Hodges, turned me on to a product called the Slug Plug from NDZ Performance [ndzperformance.com] which is a grip

frame plug designed to, theoretically at least, work with Polymer80 frames. She actually gave me one. Installing it into Casper, I found it not the greatest fit in the world, it also protruded too far forward, BUT, being made of a much harder plastic than the Pearce Plug, I was able to remove material with a belt sander, apply a final polish with a buffing wheel, and wind up with something that fits and functions well, and looks a lot better.

SUMMARY

So, those are the changes I’ve made to my Polymer80 build, as it evolved over time: A better optic that fits into the same footprint; backup iron sights that actually zero; a better trigger; a more accurate barrel; a stipple job that makes the gun considerably easier on my hands during long range sessions; and a grip frame plug that fits – and looks – better. I am well-pleased. Casper the Friendly Ghost Gun has grown up.

You can find more Duane Thomas articles at patreon.com/duanethomas.

The Holosun 507C fits in the same footprint as an RMR, though it did require trimming the forward flange on the Warren rear sight.

The front sight is a red fiber optic unit from Dawson Precision.

Timney’s Alpha Glock Trigger uses an aluminum pad with aluminum “second trigger lever.”

The stipple job was applied by Thomas himself using a wood-burning tool, then sanded down to the correct texture.

CLEAN AS A WHISTLE.

A VERY QUIET WHISTLE.

KNOCK OUT FOULING FOR 300 BLACKOUT.

Give your cleaning kit and hearing protection some well-earned time off. Because the first powder optimized for suppression and copper fouling elimination has arrived.

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your SAK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	25374	\$79.99
Scout Scope Mount for SKS Rifle	25373	78.99

BERRY'S

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

Stackable Utility Box 40194 \$20.99

BERRY'S

Tri-Can Triple Ammo Can

The Tri-Can will change your life! The perfect organizational tool to fit any of your needs.

John Marshall's book **101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development**, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. **101 Classic Firearms** is sure to be a prized addition to the library of any serious firearms enthusiast. Published by Dillon Precision, and printed and bound in the USA, **101 Classic Firearms** is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's most important firearms. John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo's Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association.

SAFARILAND®

ENHANCED LIBERATOR HP 2.0

Next Generation Multi-Mode Hearing Protection!

The Liberator® HP headset is the next generation in electronic hearing protection, offering crisp, clear audio in a durable, scratch-resistant, slim earcup.

**26dB
NRR**

- Three distinct hearing protection modes:
 - 1. ENHANCED MODE** – Blocks dangerous impulse noise, while enhancing nearby speech and audio.
 - 2. MOVE MODE** – Blocks all external noise.
 - 3. CLARITY MODE** – Blocks all external noise, while enhancing nearby speech and audio.
- Slim earcup design layered with sound barrier technology.
- High-definition speakers with enhanced electronics.
- Speed-change battery compartment works with either two AAA batteries or one CR123 battery.
- 160-300 hour run time (mode dependent).
- Easily converts to behind-the-head or helmet-mount suspension (available separately from Safariland).

Dillon Teams Up With TechwearUSA

In response to everyone who has been asking us for Dillon Precision shooting jerseys, we've teamed up with **TechwearUSA** – Your Official Provider of Custom USPSA Gear!

The TechwearUSA AirFlex (\$70) is the ultimate performance layer and their lightest weight jersey. The TechwearUSA Premier Polo (\$95) is made of proprietary Techstatic fabric and is the ultimate competition polo. From its classic cut, added length to make sure it stays tucked in, fold-over collar, zipper front and side panels made from extra breathable mesh, every detail of this garment has been thought through to help you look, feel and perform at your best.

To order TechwearUSA's Dillon Precision men's and women's shooting jerseys, go to techwearusa.com. By the way, the "USA" in TechwearUSA signifies that their apparel is MADE HERE!
