ATTENTION DILLON CUSTOMERS: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered.

We constantly strive to live up to his standards.
Please let us know if we're not succeeding.

All the electrical and/or electronic components of Dillon equipment and all Dillon textiles are covered by a one-year warranty from date of purchase. Any modifications performed to Dillon machines, or the addition of any unapproved equipment, including automated or mechanical add-ons from other manufacturers, is expressly not recommended and will void the Dillon warranty.

CP2000[^]

Dillon's DEDICATED Case-Processing Machine!

- Made in the USA
- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL1100 and Super 1050, the CP2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP2000 will make your task MUCH easier.

Rapid Trim 1500 Case Trimmer[^]

Dillon's
RT 1500
shown
installed
on an
XL 650.

The RT1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT1500 Case Trimmer **62164** is **\$435.00**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$25.00** each. Upper lock rings, **13559**, are **\$9.00** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound

cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

Blue Press

Case Preparation Equipment

CV2001 – The Industry Standard

Dillon's CV2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14",

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon created the CV750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV2001 and is every bit as tough – just more compact. To accompany the CV750, the CM500 does the same job as the larger CM2000 Case/Media Separator; and, like the CV750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

Pistol: 1918 Colt M1911 .45 ACP

Blue Press Combat Classic Evaluation Drill Score: 144

Shooting Impressions:

Reliability was 100 percent from a gun manufactured 105 years ago. Handling was superb, with the 1911 pistol being one of the best designs to fit a wide variety of hand sizes. Despite its large size and weight of over three pounds loaded, most users can fire and manipulate the gun with ease once properly trained.

The small “hump & bump” sights of the original 1911 are reflective of that era, and while a typical 20-year-old can see them much better than those with some age, the sights remain a very serious negative on a combat side-arm. Hence, I rate the issue sights on the original 1911 a major weakness.

Trigger pull weight for the early 1911 pistols typically was a 6- to 7-pound sear release. Hardly ideal for good shooting performance. Remember the need for a service pistol to be safe in the hands of marginally trained recruits. Note that in photos from WWI, WWII, Korea, and Vietnam, it is common to see soldiers and Marines with the pistol in hand and their finger on the trigger. Winning pistol matches with a 1911 with a tuned trigger was not the requirement of the day.

On the early 1911 pistols, a long spur hammer and short grip safety tang often lead to “hammer bite,” where the web of the shooting hand gets pinched between hammer and grip safety. I taped my hand

prior to the 30-round range drill to avoid the bloody area in the web of my hand that is normal for me with the original 1911 (not 1911A1) pistols.

It should be understood that the large spur hammer was a carryover from the revolver era where handguns were typically cocked to single action and then fired for better accuracy. Even though the U.S. military began issuing a double-action revolver in 1892, the practice of single-action cocking the hammer was still ingrained in the Army from the 1873 Single Action Army .45 caliber revolver. The 1911 pistol was selected by the Calvary Board, and

drawing the pistol and then cocking the hammer for the first shot was the normal practice.

M1911 pistols of the WWI era were fitted with what is referred to today as a flat or square-bottom firing pin stop. This design reduced barrel unlocking by camming the hammer to full cock at a lower contact point. The negative was that it required more effort to retract the slide. As a result of soldiers having difficulty in racking the slide to load the pistol, later guns had the radius on the bottom of the firing pin stop reduced to allow cycling the slide much more easily. Today, many 1911 pistolsmiths utilize the square-bottom firing pin stop to reduce slide velocity and make the guns softer-shooting. “What goes around, comes around again.”

My 1918-manufactured M1911 is a typical issue example that was purchased from an individual who had received it as handed down from his grandfather to his father, and then to him. All he knew about this particular M1911 was that his grandfather had served in France during the Great War and brought it home after serving in the trenches. Colt manufactured more M1911 pistols in 1918 for the U.S. military than at in any other time in history.

Shooting this old war-horse was a pleasure. Some guns speak to you when you take them in hand. This one certainly did. While the tiny sights, heavy trigger and hammer bite did little to enhance my shooting performance, it did get the job done. The M1911/ M1911A1 pistol served nearly 75 years before being replaced by the Beretta M9;

it remained in service well into the 21st Century with some military units. Today’s Internet commandos will tell you the M1911 is obsolete, yet its sales remain strong, with a number of firms still producing them. As some states impose 10-round magazine bans upon their citizenry, many gun owners see the M1911 pistol as a viable choice for a self-defense sidearm to protect their homes and families.

After putting this nice old 1918 M1911 to a range test over the **Blue Press** “Combat Classic” Evaluation Drill, I would assign it a grade of B-minus.

COMBAT CLASSIC EVALUATION

Type: Timed

Rounds: 30

Target: IDPA Silhouette

Range: 3,5,7,10 & 15 yards.

Start Position: Low Ready

Procedure:

Stage 1. 3 yards. On signal fire 2 rounds in 1.5 seconds strong hand point shoulder position.

Stage 2. 5 yards. On signal fire 2 rounds to the body and 1 round to the head in 3.0 seconds.

Stage 3. 7 yards. On signal fire 2 rounds in 2.0 seconds. REPEAT for a total of 4 rounds.

Stage 4. 10 yards. On signal fire 2 rounds, reload and fire 2 more rounds. (Start with only 2 rounds in the gun) Time is 8.0 seconds for auto pistol. 10.0 seconds for revolver.

Stage 5. 10 yards. On signal fire 2 rounds with both hands, 2 rounds strong hand only and then 2 rounds weak hand only. Time is 9.0 seconds.

Stage 6. 10 yards. On signal fire 1 round in 2.5 seconds. Repeat for a total of 5 rounds.

Stage 7. 15 yards. On signal fire 6 rounds in 8.0 seconds.

Note: 30 rounds total. 150 points possible.

The Arsenal of Democracy

America is All That's Left

By Alan Korwin

Scan newscasts, see anti-gun-snowflake crazies parading loose – including congressional minions – and lose faith. Fascist gangs with names like The Anti-Fascists. Even seemingly benign nationwide institutions like The “News” Media (who are anything but), might start persuading you that the lunatics are winning, or on the road there. America is washed up they bleat, our gun rights will be lost, the nation is doomed.

Deceptive people are working hard to make you feel this way, that’s obvious. Is it just happening by chance? No. You can debate “why” forever – is this a deliberate commie plot (it may as well be). Or the deep state seeking to commandeer your children, your mind, and enslave you (evidence exists for this). Maybe it’s a battle for the Commander-in-Chief’s chair with the nuclear codes (there’s some support for that). It could just be luck, coincidence, or overdue. Or it’s God’s will, who works in mysterious ways. I’ll debate that with you by email or over adult beverages. Why matters less than the fact it’s happening full bore. “Father Knows Best” is long gone. Truth be told, those days weren’t all they were cracked up to be anyway.

The founding principles of this armed nation are as golden today as ever. The fact that you own guns, plenty of ammo and know how to reload and use it all – this is crucially important. You must cling to your hold on those very tangible elements of American freedom. Those unshakeable talismans connect you to the core values that make us the winners and keeps the losers losers. Even if they can blast trash on TV all day. And in the movies. And the “news” papers, what few are left. And in the schools. Oh, the schools.

When you look into what’s happening in schools it’s enough to make you wretch. Safe spaces for cowering? Who are these people? Trigger warnings for thoughts outside the approved orthodoxy? Trigger warnings are for safety signs at a shooting range. Crying closets? Hang on to your (gulp) g-g-g-guns. You can’t even say gun in public school. You can’t teach about guns, wear shirts

with incorrect logos... the take-over of the education system is so complete and monolithic that the righteous, noble place firearms hold in our history has been all but expunged.

The “educators” (formerly teachers) who have done this deserve punishment. Severe retribution for harm they’ve caused is in order – denial of civil rights, 18 USC §241 et seq. – and re-education camps. At least dismissal. Instead, they get accolades – from their own quarters, not from ours. On our side, the number of firearm trainers expands. They’re busy!

A pendulum swings both ways. In reaction to stunning Marxist/socialist woke takeovers of so many things, from speaking real English and learning handwriting to doing math to civics to history in our public (i.e. government) schools, a whole spate of free-market learning institutions have sprung up. While public schools morphed to gun-free money-sucking cess-

pools of unionized underperformance, leaving the nation trailing in international rankings, the ground shook. Alternative schools bloomed everywhere – charters, magnets, academies, home schools, school choice, even think tanks – parents now have diverse choices for their kids, Adam Smith personified. Some of them brag about their marksmanship and related programs.

"Do your part in keeping America free. Build on the greatness for which we're famous. We are indeed the arsenal of democracy; if we fall, where will the world's masses, yearning to be free, run?"

Look at Gun Education

The total vacuum created by mainstream schooling on firearms opened opportunity for trainers nationwide – even a portion of the goods in the catalog you’re holding. Where the socialist teachers’ unions have done their dirty work and damaged the education system, we the people are putting in place the needed American fix. Like we always do.

You may have taken some exciting new self-defense and shooting classes. If you haven’t, why wait. Go, see, do. Take friends. Are you still worried for your country? Support colleges and high schools... with rifle teams. There’s so many – but “mess” media hides this from you, keeping you “mushroomed” (in the dark and under dung).

And guns going away? Bwahahahahaha! We have been and still are the arsenal of democracy. Gun sales are huge, ammo sales too. America is too well armed to get itself disarmed so easily. If we need anything it’s more reloading and more range time. What are you waiting for? Extra time is on aisle two.

Do your part in keeping America free. Build on the greatness for which we’re famous. We are indeed the arsenal of democracy; if we fall, where will the world’s masses, yearning to be free, run?

Newcomers rapidly abandon gun fear for enthusiasm, when exposed to reality. They can’t get enough ammo, or trigger time, they want to try every gun you have.

Here’s a hot tip: Agree in advance to clean your guns together. Your disciples (that’s what they are) usually end up buying one of the guns you introduced them to – with your help at the counter, at a store you suggest. Shop keepers love you for it. It’s all good. You don’t see that in the “news” do you?

No, the losers only seem like winners in newsprint and TV – which you know darn well is fake. Gun haters – the losers – are unstable. Lacking a set of values or real facts they flit from one nutty gun myth to another. They call you violent, racist, and sexist, but every name they call you describes them – in classic psychological projection. We have the guns, but they start street riots and burn property. We get along just fine; they measure people by how many colors are present. We’re real men and real women – they can’t figure out which bathroom to use.

No, the losers aren’t winning, they’re whining. It’s global whining. Read some Founders’ writings again, try the Declaration, America’s standards have stood the test of time and will continue, with your happy unwavering support.

Award-winning author, writer, consultant, and musician Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for more than three decades. Now writing his 15th book, Why Science May Be Wrong, see his work or reach him at GunLaws.com. 

ATHLON RIDICULOUSLY GOOD OPTICS

MIDAS TSP1

The Athlon TSP1 prism scope gives you great versatility. This device is equipped with a prism for a crisp, vivid image. The prism-based design allows for a more compact scope without sacrificing optical quality. The Midas TSP1 features the ability to toggle between both red and green illumination. Forget to turn it on? Batteries run dead? No worries, the etched reticle is visible even without a battery installed.

Athlon prism scopes are nitrogen-filled, fog proof and shock proof, allowing for reliable use in a wide range of environments. Reticles are etched directly on the glass to make sure you have consistent point-of-aim at all times. Illumination on or off, the reticle is always visible.

SPECS: 1X magnification, 21mm objective lens, 66' FOV@100 yards, Red/Green dot, 1MOA click value, AAA battery, 6.25 Oz weight, 2.7" length.

PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. 13606, \$33.00 ea.

Dillon's Range Bag[^]

33389 \$139.99

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4" x 7" x 8" and features two interior pockets measuring 6-1/2" x 6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5" x 7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12" x 8" x 1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

"Border Shift" Ammo Bag[^]

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	13755	\$35.99
I.D. Card Holder [^]	14575	2.99

Dillon Pistol Case[^]

Our pistol case was designed to hold and protect your pistol and carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo

boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

Safety Tips for Travelers

Spotting Danger Before It Happens Just Might Save Your Life One Day

By Maureen P. Sangiorgio

NRA-Certified Firearm Instructor, Range Safety Officer

According to the travel website www.thevacationer.com, nearly 85 percent of all American adults intend to travel this summer. That means nearly 219 million American adults plan to hit the road for either a business trip or a summer getaway. No wonder American vacationers and travelers spend nearly 1.1 trillion dollars each year!

A few years ago, sadly, that wasn't the case. Thanks to COVID-19, there was a 72-percent drop in international arrivals worldwide between January and October of 2020, according to the World Tourism Organization. Thankfully, the majority of COVID restrictions have been lifted, and travel is picking up again. But it's important to note that leaving home to travel in unfamiliar territory does come with a certain level of risk. Common crimes targeting tourists include street scams, robberies, kidnappings, and even murder.

Whether for business or pleasure, read on to find out top tips on how you can help lower your risk of becoming a victim while traveling.

Conduct a threat assessment.

"A threat assessment is the process of determining the level of risk associated with a particular region and making decisions based on the severity of that risk, while considering your defenses and vulnerability," says Gary Quesenberry, author of, "Spotting Danger for Travelers." Quesenberry is a retired Federal Air Marshall, and CEO of Quesenberry Personal Defense Training LLC. "During a threat assessment, you're just trying to determine if the area you want to visit is safe."

For foreign destinations, Quesenberry recommends the US Department of State website (<https://www.state.gov/>).

There, you can read travel advisories and alerts for the places you plan on visiting. You can also review entry and exit visa requirements, and gather info about local laws and customs, medical facilities, and transportation safety. The State Department also allows travelers to enroll in their Smart Traveler Enrollment Program or STEP. With STEP, you can get country-specific travel advisories delivered right to your inbox, speed up passport recovery, be alerted to evacuation info, and even receive urgent information from home.

Quesenberry also recommends Google Earth, which maps out routes, determines distance to and from points of interest, and discovers popular but hard-to-find places.

Another great resource is the CIA World Fact Book, which is created annually and offers complete and up-to-date information on the world's nations. "It covers everything from infrastructure issues to political conditions and the likelihood of civil unrest," says Quesenberry. "You can also find out about a country's demographics, crime rates, weather patterns, and police departments."

Pack right. In addition to your clothing and toiletries, be sure to pack the following items when traveling: **rubber door wedges, clear Scotch tape, motion alarms, and phone chargers.** Found

at local hardware stores, rubber door wedges are inexpensive items that are lightweight, and won't take up too much space in your luggage. When you arrive at your hotel, place the wedges underneath each door before you go to bed. They will slow down intruders, giving you time to contact security if someone tries to break into your hotel room.

Why the Scotch tape? According to Quesenberry, if you pack items in drawers or cabinets inside your hotel

room, place a small piece of clear Scotch tape at the corner of the drawer or cabinet door. Then, if someone is rifling through the drawers and cabinets in your room, you will be able to tell because the tape will be broken. You can also place the tape at the bottom of your door when leaving. If you return to your hotel room, and the tape is broken, you know someone entered your room while you were gone.

Small, battery-operated portable motion alarms can be used inside your hotel room as an added layer of security. These alarms will draw attention to your situation and scare away many intruders.

Finally, when traveling, be sure to pack several international electrical adapters and portable phone chargers. When I travel even just a few hours away, I always toss a few phone chargers in my car in case there is a problem with the car charger.

Nix social media...until you return. According to the home security company ADT, 78 percent of burglars use Facebook and Twitter to target personal properties. If you “check in” at a movie theater, restaurant, or any social event, criminals who are watching now know that you will be away from home for a few hours. Now imagine if you “check in” at a travel destination, where you will be away for a few days or longer? It’s best to post pictures of your vacation after you’ve returned home.

Identify potential problems. When traveling, just as when you are back home, it’s always a good idea to practice situational awareness, and try to identify problems before they begin. “When you scan your surroundings, always look for actions that indicate signs of potential violence,” advises Quesenberry. “Look for pre-incident indicators, such as hidden hands. The hands are what can kill you.” Another indicator is if the person who caught your attention doesn’t have a reason for being where they are.

Also look for a sudden change of movement. “If you feel that you are being followed, and suddenly change where you are moving, keep an eye on the people around you,” says Quesenberry. “If someone inexplicably changes their direction of travel to match yours, you could be their target.”

Another indicator is to observe what people are wearing. If someone is wearing clothing that is very inappropriate for the weather, and/or the event, they may be trying to hide something. This happened to me when I was visiting my aunt in the nursing home she was in at the time. It was a hot, summer day. While my aunt was having her lunch, I met my cousin for a bite at a nearby restaurant. While we were sitting inside in air-conditioned comfort, I noticed a group of young guys hanging around the front of the restaurant wearing hooded sweat-shirts and keeping their hands in their pockets. I told my cousin we needed to leave immediately. It’s a good thing because I found out later that group of hoodlums robbed the restaurant!

Beware of small talk with strangers. If someone you don’t know approaches you and tries to make small talk, or ask for directions, be careful. Are you in a position or location that would make it difficult for you to escape? Oftentimes, there are two or three people involved in this scam, and while one person distracts you with small talk, another person quietly pick-pockets you or another person that you’re traveling with or will try to rob you with a weapon such as a knife or firearm.

Plan your escape. Chances are, when traveling, we find ourselves in unfamiliar settings. Whenever you enter a restaurant, theater, or any other tourist attraction, always look for the exits. If you can’t find the exit, are there places for you to hide? Is there anything around you that you can use to toss at or at least distract the attacker, giving you and your family a few precious seconds to get away? Also look for items nearby that you can use to create space between you and the attacker, such as quickly moving to another room, closing the door, and calling for help.

De-escalate the situation. If there is no way to escape, de-escalation is the next best option. “The quickest way to de-escalate a bad situation is just to give the attacker what they want,” says Quesenberry. “But you have to keep in mind this only works with a predator who is using you to get something, such as your wallet. There’s no guarantee that handing over your valuables will stop that person from hurting you, but it will increase your chances of safely getting away.”

You can also try to communicate with the bad guy to try to de-escalate the situation. Try to keep a safe distance but stay close enough so you two can talk. It’s also a good idea to speak calmly, but with confidence. Finally, don’t act scared, but don’t act too intimidating. “Trying to be overly intimidating toward potential attackers will only inflame their egos and escalate the situation,” warns Quesenberry.

Fight...if you must. As a worst-case scenario, if you have tried avoidance, communication, and de-escalation, and nothing is working, confrontation may be the only solution to the problem. “This is a scary realization for a lot of people,” notes Quesenberry. “That’s why I recommend seeking out competent instruction in some form of self-defense. There is no one best way to defend yourself in a fight, but whatever approach you decide to take, take it wholeheartedly, like your life depends on it. Chances are, it does.”

According to Quesenberry, when it comes to confrontation, speed, surprise, and aggression are the keys to survival. “Once you’ve been backed into a corner with no visible means of escape, there’s no point in waiting for the aggressor to attack. As soon as possible, remove yourself from the situation and contact security or local law enforcement ASAP.”

RL550C[^]

STANDARD FEATURES:

- Made in the USA
- Accommodates Over 160 Calibers
- Uses Standard 7/8" x 14 Dies
- Loading Rate: 400-600 Rds./Hr.
- Comes With One Caliber Conversion
- Interchangeable Toolhead Assembly
- Automatic Powder Measure
- Automatic Primer System
- Lifetime "No-B.S." Warranty
- **RISK FREE 30-Day Trial!**

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Spare Decapping Pins

Package of 10	21528	\$9.00
---------------	-------	--------

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

BL550[^]

Dillon's Basic Loader

\$415⁰⁰
15399

Reloading Dies and Caliber Conversions sold separately
Pictured with optional accessories:
Strong Mount 22051 \$98.00

Dillon's RL550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL550 is essentially an RL550 without the automatic priming and powder systems.

Capable of loading over 160 calibers – just like the RL550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

AUTO PRIME SYSTEM[^] 16627 \$125.00

PRIMER SYSTEM EARLY WARNING[^]

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$40.00

AUTO POWDER SYSTEM[^]

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$139.00

OPTIONAL MAGNUM RIFLE POWDER BAR 21353 \$47.00

AUTO EJECT SYSTEM[^]

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$45.00

BL550 POWDER DIE[^]

Extra powder dies for your BL550 make it easier to set up additional toolheads for loading different calibers.

Powder Die: 16629 \$28.00
Oversize Die: 16626 30.00
Plastic Funnel: 16617 9.50

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL450, AT500, BL550 or RL550. (Requires the use of an RL450 powder die – see below.) 20029 \$35.00

RL450 Powder Die 20308 35.00

Dry-Fire Training:

By Rob Orgel, Emergency Response Tactical
Photos by Damien Black, Ballistic MG

I've posed this question to a lot of people, and you might be surprised by the answers I've consistently found. Everyone harps on the importance of dry-fire training. Many would suggest it's like doing homework and that you'll never master the skill without taking your practice home and refining your trigger press and sight alignment. I, however, strongly disagree. Let's breakdown the pros and cons into two groups. Then, let me expose you to my theory.

The Pros

You get to practice your holster work, which is one of the most important things about defensive shooting. We can see our sights remain steady as we apply trigger pressure or find an interruption in our sight alignment, which is commonly referred to as recoil anticipation. We can then iron this out. We become more familiar with our weapon.

The Cons

Some argue this causes damage to the weapon, but I don't believe it's really a problem. If we're not doing it 100 percent correctly, we may be reinforcing bad techniques. Most importantly, we are essentially mis-handling our weapon.

Now, that last item on the cons list is the most important of them all. A basic pros and cons list would suggest that it's a good idea to practice dry fire. I'm going to dive deep into how the cons should be screaming at you and that the other pros don't apply to the range.

In the cons department, we're mis-handling our weapon by violating all the safety rules to practice with it. We're teaching our body that it's OK to take our weapon out of the holster, take it off safe, and press the trigger without

having the intention of the gun going off. This is why so many people have accidents during dry-fire practice. Let's break down what that accident looks like. You have a fire-arm discharge in your home where people you care about most reside. You might hurt someone you care about, or you might lose your gun rights. In the end this is quite a gamble for a minimal benefit.

Let's talk about the pros, or what some might argue are the benefits, of dryfire practice. Normally, when I have a new client, I ask them if they practice using dry fire, most will tell me they do. What I do next is walk them downrange with a magazine of ammunition. I'll hold their magazine and allow them

to draw their weapon on the range, with our eye and ear protection in place, and while facing downrange towards a target. I'll then have them dry fire their weapon. I'll reset their slide and repeat this process 5 to 10 times.

Finally, I'll reset the slide one more time, and then insert the magazine. The muzzle of the pistol will dip as they press off the next dry fire round, even though the pistol was held flat and consistently on the 5 to 10 presses beforehand. What this means is, during dry fire, we know the gun's not going to go off, therefore we do not need to fight recoil. Once I insert ammunition into the weapon, even though there's no round in the chamber, the mind switches gears and the body prepares for recoil. This proves that dry fire didn't help prevent recoil

anticipation, making it obvious that we're not becoming better at recoil anticipation or mitigating it during our dry-fire practice. I've done this experiment with dozens of clients, and the results are consistently the same.

Good or Bad Idea?

How to Enhance Dry Fire Safety

If we agree that practice at home can help us understand our trigger better or mitigate recoil anticipation, what's the best way to create a safe environment where redundancies will ensure that no one can possibly get hurt? In my opinion, the best option is still to practice on the range in a safe environment, where our gun can go off, even if it's an accident. If you don't have access to range opportunities like this, the next-best thing is having a device like a laser cartridge that you can insert into your weapon to ensure it cannot go off.

There are several different laser products on the market today, including dedicated laser training pistols, that will add another level of safety to dry practice. Now I can safely handle my weapon either on or off the range with a positive safety device in place. I can practice holster work and rapid sight alignment. This can be very valuable to me as a defensive shooter. This practice, I find, helps many people identify

Very often we train on the range in our range gear instead of our concealment gear.

holster issues. This now-safe device also gives me the opportunity to practice in different attire.

Some of us train on the range, and then winter comes, and we put on a coat. Now we find ourselves outside of the draw-and-cover garments we had trained on. Simply because clearing our winter coat is not organic to us, we find problems that can easily be ironed out with dry practice. The same thing applies when I'm in my running attire as we often have a different carry position, holsters, and garments for running. The end state is to have safety devices in place so you can get in your practice in a SAFE way.

Ultimately, dry practice is a good idea, but I'm not an advocate of pressing the trigger in your home. It's a good idea to honor the safety rules to prevent big problems. If you're one of the many who does press the trigger for dry practice, then use some type of device to ensure safety.

Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL750/650 owners with limited overhead clearance, the XL750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL750/650	22051	\$100.00
XL750/650-only	22052	98.00
"SDB"	22223	110.00

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

Stock #62005, \$100.00 is for:

XL750, XL650, RL550 and Square Deal "B". **Stock #62006, \$100.00** is for:

RL1100, CP2000, Super 1050 and RL1050 as well as *any* Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL550 and XL750/650 when equipped with the RL550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	22214	\$64.00
1050 Tray Kit	22215	64.00

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

16306 \$55.00

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL650 with Wrench Set	11555	\$46.00

Blue XL750/650	62136	53.00
Black XL750/650	62137	53.00

The **Square Deal "B" Toolhead Stand** holds your SDB toolhead, powder measure, dies and caliber conversion components (*not included*) in an orderly manner.

62225, \$47.00

Our **Toolhead Stands** for the RL550 and XL750/650 are the ultimate in convenience for keeping your reloading bench clean and uncluttered.

22055, \$30.00 each

Dillon's 1050 Toolhead Stand is now available to store caliber quick changes for the 1050.

62200, \$60.00

Equipment Dust Covers are made of tough packcloth nylon and add security to your loading bench. Your reloader will be protected against more than dust as the machine covers come with a D-ring that allows the heavy duty zipper to be locked.

SDB/550 Cover	13795	\$24.99
XL750/650 Cover	10443	39.99
1050 Cover	13239	39.99
Master lock	13083	6.99

"D-TERMINATOR" Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.

\$149.99
10483

Dillon's **"Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

97126 \$220.00

The **Powdercheck System** (available for XL750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

21044, \$99.00 each

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

17950 \$65.00

Dillon's **1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

10842, \$15.00 each

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit Only	22211	\$40.00
w/SDB Spare Parts Kit	97015	65.00
w/550 Spare Parts Kit	97016	65.00
w/750 Spare Parts Kit	97500	79.00
w/1050 Spare Parts Kit	97018	84.00

RF100 Automatic Primer Filler

The **RF100 Automatic Primer Filler** eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run! In about two minutes the primers are inside the protective metal housing.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the

plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon AkroBins[^]

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

LabRadar Chronograph

LabRadar is the world's newest technology in obtaining projectile velocities of Rifles, Shotguns (slugs only), Handguns, Pellet Guns, BB Guns, Bow & Arrows, Crossbows, and Paintballs. Doppler Radar is the most precise method of measuring velocities available. Its accuracy is not dependent on light conditions or being exactly parallel to photoelectric sensors resulting in false readings.

- Track and obtain velocities up to 100 yards
- Easy Set-Up
- Get series statistics: Maximum Velocity, Minimum Velocity, Average Velocity, Standard Deviation, Extreme Spread
- Accurate with subsonic, transonic, supersonic projectiles
- Works under any light conditions
- SD card support for virtually unlimited shots and series recording
- Get velocity at multiple distances

11861 \$625.00

LabRadar Protective Case – This custom, padded case is constructed of 600 Denier fabric with a waterproof backing. It's great for storage at home or while going to the range. It includes a full-length zipper with pull tabs, padded sides and a rubber covered web handle. There is a large exterior pocket for storage of extra batteries or accessories that has a Velcro closure. A shoulder strap is included.

11862 \$39.99

LabRadar Battery Pack – A rechargeable USB battery bank is the perfect solution to power LabRadar. While the system works great on AA batteries, you can extend the shooting day with this rechargeable power bank. It is supplied with heavy duty 3M Dual Lock reusable fastening tape to attach the power pack to your LabRadar. A USB cable is supplied to connect to your LabRadar. The power pack is also compatible with cell phones and tablets. The battery also has a Type C connection for charging other devices

11866 \$24.99

Taylor Freelance

Blackened Brass Backstraps

Weight and felt recoil are directly related, so by adding weight, our brass backstrap calms the gun down, creating a smoother-shooting, softer-kicking, more-neutrally-balanced handgun. Adding weight to the frame also reduces the tendency toward "weak wrist" malfunctions common to all polymer frame handguns.

Canik Mete Backstrap	30345	\$59.99
Canik SF/SFX Backstrap	30344	59.99
Walther Full-Size Backstrap	30347	69.99
Walther PDQ/PDP Compact Backstrap	30346	57.99

Taylor Freelance's +6 Mag Extension for the PPQ extends your mags out to the maximum allowed in 3-Gun and USPSA Limited – giving you 21+1 instead of the stock 15. If you shoot a .40, our extension gives you +4+ to +5, for 16 or 17+1. Custom Wolff springs add feed power for reliability. NOTE: Not for use on 18-round magazines. May result in damage to ejector. NOTE: The stock magwell that ships on the PPQ SF Pro will not accept these basepads.

30340 \$39.99

Taylor Freelance's new +3 Mag Extension for the PDP extends your mags out to the maximum allowed in 3-Gun and USPSA Limited competition – giving you 21+1 instead of the stock 18. Fits the full-size 18-round mag (not the compact). IMPORTANT: The Walther PDP and the Walther PDP COMPACT use DIFFERENT magazines. The PDP compact uses Walther PPQ magazines.

30341 \$39.99

Push your Canik's firepower to the maximum with TF 140mm Mag Extensions. Fits the full-size SF/SFX, and the compact SF Elite/Elite Combat! On the SF, get 22+1 capacity that's legal for USPSA/3-Gun competition (meets 140mm limit). Works with stock magazine spring (saving money). **BERETTA 92 USERS!** This basepad fits the Mec-Gar 18-round Beretta 92 magazine.

30342 \$29.99

Mr. Bulletfeeder®

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

This holster is designed for an extreme high rise carry and offers the best of both worlds. Not only does it allow you to carry a full-size automatic handgun, it's also totally concealable. The unique design has Mernickle's patented stabilizer flap that goes behind the belt. This prevents the grip of the gun from tipping away from the body while doing daily activities. The high-rise position allows you to sit in chair or vehicle without needing to take the gun out of the holster.

XHR 1911 Holster **19018 \$124.99**

Designed to be the ultimate in concealed carry for those not comfortable with an Outside the Waist Band (OWB) holster – the ISP offers a great carry solution! This holster gives the appearance of a front pocket wallet and breaks up the outline of your gun. The smooth Herman Oak leather inside protects the finish of the gun, but the suede outside ensures that the holster sticks in the pocket.

Sm Auto ISP	19019	\$39.99
Med Auto ISP	19020	39.99
Sm Revolver ISP	19089	39.99

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

4-3/4" SAA/Clones	11560	\$109.99
4-5/8" Ruger Blackhawk	15765	109.99

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy.

1911 Holster	19947	\$175.99
Mag Pouch	19946	49.99

Choosing a Suppressor: Go Long or Go Short?

A 9mm PPC like the B&T GHM9 fitted with a SilencerCo Omega 9K suppressor is a short, light, fast-handling, maneuverable package and pretty much perfect for home defense.

By Duane Thomas

A big question many people, when contemplating buying their first silencer, have is, “Should I go for a long silencer, for the maximum in noise reduction, or a short silencer, for the maximum in light weight and compactness?”

(**NOTE:** As the title, and first sentence, of this article indicates, I am not one of those people with vociferous opinions on whether to call noise reduction devices “silencers” or “suppressors.” Like most people, I use the terms interchangeably – and I’ll add the slang term “cans” in there, as well, just to keep things interesting.)

There are basically two theories on how to choose a silencer, regarding how long it should be:

1. The reason we have a suppressor to start with is to cut the amount of noise exiting the gun, to protect our hearing, and the hearing of any other innocents around, as well, should we have to fire it in the real world, without hearing protection. Therefore, it’s very important the amount of noise reduction be as high as possible. The can’s internal design can only do so much; bottom line, there’s no substitute for size – more baffles and a higher internal gas volume – which inevitably translates into a long can.

2. Once we’ve cut the amount of noise down to the point it’s hearing-safe, further reduction falls under the category of “theoretically nice but not actually

necessary.” If we chose a particular firearm – for instance, a 9mm PCC – specifically because we wanted a short, light, maneuverable weapon, the important thing when we add a silencer is to *keep* the overall gun/silencer combo as short, light, and maneuverable as possible. That means a short can.

Approach #1 people avidly peruse every available piece of data on exactly the amount of noise, as measured by a sound decibel meter, put out by every can on the market. The truth is that, for all that silencer companies like to tout a particular design’s superiority, everything works pretty much like everything else, at least as far as the amount of noise reduction for silencers of the same overall size. But there are people in the world who will buy a particular suppressor because it was advertised as generating a difference in testing of one decibel.

Recently I was having a conversation with Dave Matheny, the president of The Silencer Shop. (By the way, half the suppressors sold every year in the United States are sold through The Silencer Shop. silencershop.com) Dave said, “We used to have Mike Mers working here. And Mike is a big deal in the silencer community. One day we were talking, and he made a comment that I love: ‘A short can is a silencer-guy can.’ He’s right. People buying their first silencer tend to be very concerned it’s the quietest thing possible. So, they wind up with a huge, long, heavy can. Then they put that on their gun, and it

completely destroys the gun's balance. It's muzzle-heavy, it's hard to move and aim, and even to hold up on-target for any length of time. And they're like, 'Wow, this sucks.' After that, all they buy is short cans."

I asked, "How to you feel about the modular cans? My opinion: I'm not a fan. I think that having all those removable sections just adds complexity, and cost, and weight."

Dave replied, "I agree with everything you just said. But the truth is, I love modular cans. Not for my own use. I mean, I have a lot of modular cans. I have old, removed sections of modular cans all over the place in my house, and my office, and my car, and my shooting bags. The reason I love modular cans is they provide an easy way for first-time suppressor buyers to realize that short cans work better than long cans."

"First-time silencer buyers are scared to buy a short can. They're worried it'll be too loud. So, they buy a modular can instead. They figure, 'I'll run it with all the sections because that's how it'll be quietest. Maybe, as time goes by, I'll experiment with removing sections and see how that works out.'"

"They get their modular silencer, they put it on their gun with all the sections in place. And they have their very first range session with it. They fire it without hearing

protection, and sure enough, it's quiet. But it also makes the gun way too long and heavy. And it's not just that it's too long, and too heavy, all the extra weight it out there on the front of the gun. Basically, it sucks."

"Then they say to themselves, 'Okay, I might as well experiment with removing sections, and see how that works, just because I can. Because running all the sections obviously isn't working.' So, they remove a section, fire the gun, remove a section, fire the gun. Eventually they're down to one section, basically what they would've had if they'd bought a short can to start. And they're like, 'Oh wow, this is NICE. The gun is still short and light and maneuverable. The noise is a *little* louder, but not enough to matter.' By the end of their first range session, they've figured out that short cans work better. After that, all they buy is short cans."

SUMMARY

I won't even pretend to be unopinionated on this topic, myself. I'm a short-can guy. Combine a short can with good ammunition choice, it is in fact possible to have a gun/silencer combo that's hearing-safe AND short, light, nimble and easily maneuverable.

Machined out of spring stock, WWG Bear Proof ejectors live up to their name by being tough enough to handle the recoil of the big bore loads! The Bear Proof ejector fits all modern Marlin lever-action rifles. Bear Proof Ejector, Blue 21178 \$35.00 Bear Proof Ejector, Silver 21179 35.00

KynSHOT

Hydraulic Recoil Buffers

The KynSHOT™ hydraulic buffers reduce recoil, muzzle rise and shoulder fatigue allowing for quicker target acquisition after the trigger is pulled. In addition, the KynSHOT buffers control the bolt carrier group operation thereby reducing excessive wear and tear on the mechanical cycling components.

KynSHOT hydraulic buffers are manufactured with premium seals, materials, and components in an aerospace grade manufacturing facility that is dedicated to quality. Each and every one of our product designs have undergone extensive impact, functionality, and life testing to ensure unmatched performance. This results in a product that can withstand and perform in harsh environments, including temperatures from -30°F to 150°F. The patented design and damping technology make the KynSHOT buffers the industry leading recoil mitigation buffer.

HIPERFIRE® High Performance AR Triggers

Competition HIPERTOUCH®

- Designed for the Ultimate In AR Performance
- HIPERFIRE®'s Most Popular Trigger
- Virtually No Take-Up/Pre-Travel,
- Very Smooth
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Straight Trigger Bow
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment

Reflex HIPERTOUCH®

- Everyman's AR Trigger
- Virtually No Take-Up/Pre-Travel, Very Smooth
- Similar to the Competition except with Curved Trigger Bow
- As Run by Keanu Reeves in John Wick 2
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Semi-Auto Single-Stage
- Curved Trigger with a Backbone™
- Crisp, Clean, Trigger Break

HIPERFIRE® PDI™

- Power Drop-In Trigger
- 2-lb. Pull
- MIL-Grade Hammer Strike, No LPS, Ever
- H&M BLACKNITRIDE+™ Finish
- Exceptionally Smooth Feel
- Enhanced Corrosion Protection
- Polished Look
- PCC Blowback Tough
- Hammer Collision Bumper
- Disconnecter Crash Protection
- Disconnecter Spring Crush Protection
- Curved Trigger Bow with a Backbone™
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment
- Changes the Trigger Lever Length to Further Adjust Pre-Travel
- Position Your Finger in the Same Place Every Time

HIPERFIRE® X2S™ MOD-2

- Two-stage AR trigger
- Minimal, user adjustable, 2 – 3-pound first stage
- Minimal second stage wall with a 1-1/2-pound weight
- Total 3-1/2 – 4-1/2-pound pull with green or red springs respectively
- Distinct wall between first and second stages allows for effective “prepping” of the trigger for added control
- Clean, effortless break
- Weightless, imperceptible overtravel
- Cam-Over Toggle Engine allows for lighter pull weights without losing hammer strike energy
- Soft Start Lock-Up aids in eliminating rifle “flinch” after the break for more accurate shots at distance

Specialized Dynamics Armorer's Upper Receiver Block

The Specialized Dynamics AR15/AR10 Armorer's Upper Receiver Block is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

43234 **\$59.99**

Emergency AR(epair) Kit

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down dent and spring.

19460 **\$19.99**

MAGPUL PMAG Drums

MAGPUL's PMAG drum magazines are durable, lightweight, highly reliable and made in the USA. The unique drum configuration keeps the height of the magazine manageable and allows for prone firing and easier storage. Features an easy-to-use loading lever, paint pen dot matrix for easy marking, and a rear window for instant capacity indication.

Regarding GLOCK pistol version: It is recommended that you install a new OEM magazine release on Gen 1-3 GLOCK handguns to support the extra weight of the magazine. Gen 4 GLOCK handguns will require an aftermarket metal magazine release. Installation of a new recoil spring assembly to ensure reliable feeding is strongly recommended. Individual variations between firearms may result in an extra power recoil spring being required. Use of the D-50 GL9 in pistol caliber carbines (PCC) is not recommended, because the increased length of the feed tower will be partially unsupported in most pistol caliber magazine wells. This unsupported condition may cause premature wear on the feed tower magazine catch, and (in firearms which deviate from factory magazine well specifications) may result in improper round presentation and failures to feed.

All-in-One Torque Driver Kit

Featuring the Fix It Sticks All-in-One Torque Driver. Tighten down your scope rings, mounts, actions screws, etc. while in the field, at the range, or at home.

Kit includes: All-in-One Torque Driver (15 - 65 inch lbs); T-Way T-Handle Wrench; 15 different bits: T10, T15, T20, T25, [hex 3/32, 5/64, 1/8, 5/32, 3/16, 2.5mm, 3mm, 4mm, 5mm], P1, slotted #5; 1/2" Socket and 1/4" bit adapter set; and Zippered case with Molded Holder.

29835 \$112.00

Replaceable Edition Shooting/Hunting Kit

This kit offers unmatched portability, functionality and versatility. Two Fix It Sticks (which combine to form a T-Handle) and 16 bits are held in a molded bracket for portability/storage. Extra room on each end can hold two additional bits. Includes two sticks, bracket, and 16 different bits: 2.5mm Hex, 3mm Hex, 4mm Hex, 5mm Hex, T-10, T-15, T-20, T-25, T-30, 1/8" Hex, 5/64" Hex, 3/32" Hex, 5/32" Hex, 3/16" Hex, Slotted #5, and Phillips #1.

29843 \$40.00

Mini All-in-One Torque Driver

Tighten scope rings, red dot sights, mounting plates, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 6 - 25 inch-lbs).

29837 \$55.00

All-in-One Torque Driver

Tighten scope rings, mounts, action screws, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 15 - 65 inch-lbs).

29836 \$60.00

Scope Bubble Level Set

Level your optics with machined aluminum levels, featuring precise UK-sourced bubble vials. Kit includes: Magnetic level, NATO/Pic rail level/anti-cant device, and Protective foam carrier with pouch.

29839 \$50.00

Scope Jack

A new way to level your optic, the Scope Jack works with Any 1/4 inch driver to quickly and easily level your scope to your NATO/Pic rail. Just mount the Scope Jack to the rail under your scope and turn the drive handle until the lifting arm engages with the flat section under your turrets. Once the scope is level, maintain pressure while tightening your ring screws to keep optic level throughout the process.

29838 \$44.00

Bolt Carrier Group Scraper

Custom bit that is designed to clean carbon off the various surfaces of the Bolt Carrier Group. Works with any standard magnetic 1/4" driver. Black Isonite finish for increased corrosion resistance and strength.

AR-15 (Top) 29840 \$10.00
AR-10 29841 \$10.00

Glock Tool Kit

Glock tool kit including two custom bits designed to aid in the assembly and disassembly of Glock Handguns / Front Sights. Includes: *Glock Front Sight Tool*, a 3/16" Hex Thin Wall Nut Driver - Integrated magnet holds the screw securely in place. Machined from Solid Steel Bar Stock. Works with any standard 1/4" bit driver. 3/32" Metal Pin Punch - Punch is sized to ensure easy removal of all Glock pins by hand. Machined from Solid Steel Bar Stock.

29842 \$16.00

Remington Bolt Opener

Access your Remington 700 firing pin quickly and easily in the field with our compact custom bit. Levers the firing pin head with a "bottle opener" action. Molded synthetic polymer bushing protects bolt plug from damage.

29844 \$20.00

Master Sight Pusher™

The Real Avid Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Master Sight Pusher

Hex 5/64, 3/32, 7/64, 1/8, 5/32, 3/16

29846 \$20.00

Stribog RSR9A3 Carbine

By Oleg Volk

The tale of this gun starts in 2015 in the form of a compact submachine gun. Just as the HK MP5 was once revolutionary in its accuracy, controllability, and reliability, the Stribog took those qualities to a whole new level. A simple blowback weapon inside an extruded aluminum receiver, it evolved into a more sophisticated but not much more complex roller-delayed blowback mechanism. Significantly simpler than the HK solution, the Stribog uses a single horizontal roller acting on a ramped cutout in the bolt carrier, providing the same effect without the difficult reassembly.

The design has been offered in the US in the form of 4.5- and 8-inch barreled pistols, lately popular with braces. Stribog magazines also evolved: first straight 10-20-30-rounders, then curved 30-rounders, then metal-reinforced curved 30-rounders, with an expectation of US-made black polymer 35-rounders. The 30-rounders range in price from \$9 to \$30. F5 Manufacturing even makes an aluminum 50-round drum. Since GLOCK magazines are the *de facto* standard in the US, Stribog variants making those have also been produced. In late 2022, the much-beloved “friends of the people” in ATF moved to restrict pistol braces. As a direct response to this imposition, Grand Power produced a rifle version of Stribog with a 16-inch barrel, at first with the GLOCK-compatible lower only. Two versions of it are now available from Global Ordnance, the basic model with a fixed-length folding stock already used on European models, and the deluxe version with a more adjustable folding stock. The second variant also has an extended MLOK forend. These rifles weigh 6 and 6.5 pounds, with the deluxe version being closer to 7 as configured for my test with the superb Primary Arms 3x compact prism scope.

Ergonomically, Stribog is excellent: non-reciprocating charging handle can be switched from side to side, streamlined but easily accessible slide stop and safety levers are ambidextrous, as are the magazine-release buttons. The right-side release reachable with the trigger finger drops the magazine free, while the left-side release facilitates magazine retention. Takedown for cleaning is extremely simple as well: push one captive pin to hinge the upper receiver, push the buttstock down along the retaining grooves, pull the internals out as a single assembly containing the recoil spring and guide, a guide rod, and a double rubber recoil buffer. The gun runs very clean even when sound-suppressed and can easily go a thousand rounds or more before maintenance is required.

The two side-folding stock options present an interesting dilemma. The basic Slovak design has a fixed length of pull and drops low enough to permit the use

Common magazines with GLOCK pistols, much greater effective range, more velocity, and less muzzle blast make the Stribog RSR9A3 Carbine a winning choice.

While proprietary, the standard Stribog magazine gives many options, while Glock variants provide commonality with the most popular magazine type in the US.

of built-in iron sights integrated into the top Picatinny rail. While the sights are in no way adjustable, they align well enough for effective shots out to 50 yards or so. The deluxe stock unlocking button isn't recessed but sprung heavily enough to preclude accidental folding. The stock features length of pull adjustable from 11.8- to 14.8-inches, and a two-position cheek rest, but sits too high for the built-in irons to be used. It does line up perfect to allow AR15-height optics to be used. With the 3.5-inch height over bore, what little muzzle flip the gun may have had with the original stock disappears entirely. If iron sights are wanted, they can be installed on the Picatinny rail above the folded backups. If a longer sight radius is desired, a riser rail can be placed on the front of the extended MLOK forend, giving a whopping 20.5-inches of sight radius. I settled for an optic for simplicity, along with a Viridian forend laser as a close-range backup.

Extremely configurable, the Stribog SP9A3G works equally well up close and at 150 yards. The long barrel and optics maximize the potential of 9x19 Luger cartridge.

Felt recoil, already minimal in the pistol version, is nonexistent in RSR9A3. A wide rubberized buttpad makes you wonder if the rifle is a .22 rather than a 9mm. The report is milder than from the pistol form with the default 1/2x28 threaded muzzle, milder yet with a Kaw Valley Precision linear compensator, and really tiny with a sound suppressor. Roller-delayed action reduces the ejection port pop to a minimum. Reliability, as has been traditional with this action, has been 100 percent with a wide variety of brass- and steel-case ammunition. Accuracy is the same consistent 2MOA that all Stribog models have shown, but it's easier to realize in the rifle form. The skeletonized straight trigger measures heavier than it feels, between 5 and 7 pounds, depending on where the gauge is placed. The trigger is single stage, not match grade but better than most AR15s to say nothing of the MP5. Broadly similar to AR15 trigger in design, it can be further improved but I found it plenty good for accurate shooting.

The overhanging bolt is compact, simple, and fairly lightweight.

Roller-delayed blowback gives less ejection port pop and lower overall weight.

The carbine feels hefty but balances very well. I found it easy to shoot accurately off-hand or stabilized by a sling. The stock has left and sight QD sling sockets placed high enough to keep the gun from rolling, and the forend gives many options for placing the forward MLOK socket. The short Picatinny rail section under the receiver, originally meant for lights and lasers, now works well for a vertical foregrip. Textured front on the supportive magazine well can also be used for a sentry hold, making it easy to keep the rifle aimed for a long time.

For anyone who already has a Stribog, this rifle is an obvious acquisition. The long barrel maximizes terminal ballistics of lighter 9mm loads with 200-250 fps gain over pistols, and it reduces the muzzle signature of subsonics even further. The Seismic 185-grain HP load comes out at about 875 fps, eerily quiet through a sound muffler. The RSR9A3 is one of the most comfortable centerfire long guns I've shot in a long time. Nothing

on the gun is sharp or abrasive, so it may be handled at full speed without protective gloves. The forend and the receiver are well-ventilated, so heat retention isn't a problem either. The optic used for testing, Primary Arms SLx micro prism, deserves a special mention: the clarity and the wide field of view provided by this tiny, illuminated scope are exceptional. Other than the overly stiff illumination dial, it would have been perfect. The reticle is informative without being busy, and the BDC ladder is useful for precision with a pistol cartridge. Since the drop corrections were meant for 5.56mm rifle, we just have to recalculate the hash-marks for 9mm, an easy task with overlapping trajectory charts. Why go with a 9mm carbine in the first place? Cheaper ammunition, ability to shoot steel closer than 50 yards, and greatly reduced noise and recoil. Stribog makes a strong bid for the top spot in the current PCC lineup.

DILLON RIFLE COMPANY

The OPAR Operator Trigger is a complete-assembly pre-stage drop-in trigger purpose built to provide improved trigger pull weight, reset, clean feel, precision, and safety for day-to-day users, military and law-enforcement members and agencies. The trigger's form enhances precision capabilities through its Area-of-Engagement design. This is accomplished by helping shooters build muscle memory for their trigger-finger placement in a simple and natural way.

It has a clean 5.0 to 5.5-pound trigger pull weight with a short trigger reset. The OPAR Operator's patent pending pre-stage trigger mechanism design has an inset secondary trigger providing an additional safety mechanism to reduce the chances of an accidental discharge. The OPAR Operator is compatible with AR-15 and HK416 rifles using the Mil-Spec 0.154-inch pins.

Dillon Rifle Company AR-15 OPAR Operator Trigger, Curved

The Jalapeño

You shoot a lot and your gun gets hot. Then, without thinking about it, you put your rifle into its case or someplace else equally tender. I have mauled several rifle cases, burned a car seat, and have at least one scar from doing exactly this. This is why we created The Jalapeño. Actually, we made the original The Jalapeño for the Minigun. With it, we could dump 3000 rounds in a minute or so, slip The Jalapeño over the barrel group, pull the gun off the mount and stow it right away. 23.5 in. (l) x 8 in. (w), Made in the U. S. A.

CED Edge Dual PCC Rifle Case

The CED Dual Rifle case gives you two in one! Two rifles and three modes of carry, all in one great PCC rifle case. Excellent protection for your expensive competition PCC and AR rifles, this case includes storage for two pistols and lots of magazines as well.

Comes with a handle, shoulder strap, and

backpack-style shoulder straps, which tuck away when not in use or can be removed if not needed.

The MOLLE PALS system across the front of the case, allows the user to add optional accessory cases to the rifle case itself.

The case measures 35.43" x 11.81" inside the main compartment.

10977 \$99.99

CED PCC Mag Storage Pouch

The perfect companion for your range bag, rifle case or backpack! Holds up to six extended PCC straight magazines of up to 42 rounds and can accept magazine lengths up to 10 inches.

Measurements are: 12.75" Wide x 11.5" High closed (open approximately 12.75" x 19.0"). The pouch pocket length is 6.25."

10978 \$15.99

CED PCC Rifle Sleeve

The CED PCC Rifle Sleeve is the ideal companion for competition stage use. It's a lightweight, water-resistant neoprene zippered sleeve that folds up easily to fit into a range bag or backpack. Perfect for covering and protecting your PCC rifle when carried in a trolley or wagon at the range. Weighs only 8 ounces and measures 33" inside.

Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

How Springfield Armory's Hellion Changed My Mind About Bullpups

By Frank Jardim

After spending a week with Springfield Armory's Hellion, I conclude that it is among the most technologically advanced rifles a civilian can own. That wouldn't matter very much if it didn't also have some very fine shooting characteristics. I freely admit that I was never a fan of bullpups, but I've revised my attitude after shooting this one. It's a civilian legal version of the Croatian-designed and manufactured VHS-2 assault rifle made by HS Produkt. (That's the same company that makes the excellent Springfield XD and Hellcat line of pistols.) Though the VHS-2 has seen a lot of combat action around the world against ISIS in the hands of Iraqi and Kurdish troops, and is the issue rifle of the Croatian military, its profile doesn't generate the instant recognition that its old-school Cold War military peers do (for example, the Austrian Steyr AUG, British L85, and French FAMAS). The French began phasing out the FAMAS in 2017, but other nations, most small (for example, Ireland, and Luxembourg) but a few large (for example, Australia, Argentina, and Peru) have gone all in on bullpups with Belgium, Peru, and Israel developing their own successful designs.

It appears to me the once-radical bullpup concept has gained a bit more ground than it's lost in terms of acceptance in military circles in the last 50 years, but civilians haven't embraced them. For the soldier, bullpups offered the benefits of a full-length rifle barrel with shorter overall length advantageous for close combat in urban, jungle or dense forest battlefields. They are especially attractive to mounted infantry stuffed inside Armored Personnel Carriers or sticks of paratroopers trying get clear of their transport plane when the light goes green. So why haven't all armies adopted them? That answer involves political as much as technological factors and is beyond the scope of this story. I want to focus on why more American shooters aren't yet sold on the merits of the bullpup. I believe the answer is twofold. First, bullpups have always been expensive. (The Hellion's street price seems to be about \$1,700.) If consumers start thinking about how many AR platforms they can buy for the same money as a typical bullpup, they'll probably buy the ARs. Second, my own experience showed me that you have to shoot a bullpup for a while to get past its perceived weirdness and fully appreciate its capabilities. Handling it is not enough. In fact, I think handling without shooting can leave a traditional rifleman with a negative impression that makes the high purchase price even less justifiable. As a result, most Americans have never shot a bullpup to experience and evaluate it if for themselves. How lucky I am to be a gun scribe!

While comparatively high cost requires no further explanation. What I call the bullpup's "perceived weirdness" does. I say that because the present's weird technology can be tomorrow's familiar standard. When the first bolt-action repeating rifles were appearing in the late 1800s, you can bet they seemed pretty weird to American shooters reared on lever-action repeaters. After a solid 50 years, the same thing is still going on with bullpups. New technology usually has some new peculiarities, positive and negative, uniquely its own. The bullpup's compactness comes at the price of alien handling characteristics, mushy trigger pulls, and often awkward operating controls that have the downside of drawing your attention to your armpit instead of the target in front of you. While present in the Hellion, these innate shortcomings were by no means the fatal flaws I'd worried they would be. At 6.5 pounds of pull, its oddly three-stage trigger is better than

many Bullpups (and just about all AKs), but still overly long and not what anyone would describe as crisp.

Regarding its handling and controls, significantly, I found that the more I shot it, the more natural it felt and the more efficient I became with its once unfamiliar balance, proportions, and manual of arms. Speaking of arms, I think having fairly long arms helped speed my adjustment to the Hellion. There's a lot of rifle behind the pistol grip making it feel butt heavy, but not as bad as some bullpups. With an empty magazine, its balance point is just past the rear of the pistol grip, about one inch behind where the web of your thumb wraps around the backstrap. With a loaded 30-round magazine, the balance point only shifted about a half inch further back. The rifle is curiously heavy, about

8.5 pounds empty, which heightened the perception of clumsiness when I first picked it up.

More than the weight, I found myself initially struggling to manage the sheer mass of it. It seemed as thick as a big city phone book between the inside of my shooting arm and the side of my body. My shooting-hand wrist often rubbed uncomfortably against the magazine. At the start, I really disliked the way it handled, and I remain convinced that it is slower to shoulder than a conventional rifle. However, I soon realized this apparent flaw is also an important strength. Though it took slightly longer to bring the Hellion to bear, how the rifle behaved once I'd pulled the buttstock into my shoulder was delightful. The recoil forces generated by the action's reciprocating parts are held in close to the body where, in principle, they are more efficiently

absorbed and less disruptive to aim. All things being equal, I figured there should be less muzzle rise than a conventional rifle. Testing appeared to at least partially support this. Furthermore, the supporting hand naturally grasps the front handguard rather close to the muzzle in much the same fashion 3-gun competition shooters do their conventional rifles to better control muzzle jump in recoil and get on target faster. Because most of the rifle's weight is supported close to the body, it is somewhat less fatiguing to carry shouldered and ready to fire. You can carry it that way longer than a conventional rifle. If I had to make a quick shot at any moment, that's exactly how I would carry it. This means more to people using the rifle for law enforcement, military or competition shooting

I grew to really love the compact size of this gun, a civilian legal, semiauto version of the Croatian VHS-2 assault rifle.

than it does to recreational shooters, but anybody with limited upper body strength will also find it easier to support while shooting. Finally, because most of the rifle's physical mass and weight is behind the pistol grip, the rifle can be fired with one hand more easily than a conventional rifle. This could be significant if you had to shoot from a vehicle you were also driving, or if wounded in your supporting arm.

Noteworthy features of the Hellion include a five-position adjustable buttstock with non-slip rubber buttpad, excellent integrated iron sights (rugged steel, fold down/pop-up, fully adjustable, aperture sights with five, quick selectable, range settings), a two-position gas port control knob that allows the shooter to vent more gas when using a suppressor, a modular design with an unusually tight fit between the plastic receiver and sub-assemblies that makes it harder for dirt to get in and easier to clean out the dirt that does get in, improved controllability in rapid-fire, M-Lok foregrip, 13 inches of solid aluminum Picatinny rail on top, six quick-detachable sling swivel sockets, an aggressively textured BCMGUNFIGHTER™ Mod 3 pistol grip with storage compartment (that is swappable for any AR-pattern grip), it disassembles with no tools other than the tip of a bullet, has ambidextrous controls, including a non-reciprocating charging handle and forward assist, and the ability to switch ejection from the right side to left side in the field. The rifle also demonstrated it could shoot under 2 MOA at 100 yards with a broad range of factory ammo despite its trigger. Even inexpensive white box Winchester 55-grain FMJ loads made five shot groups under 2 inches, something I never expected with a 1:7 twist barrel. Other than the weight and trigger, the Hellion has a lot that should appeal to any rifle marksman.

Is a heavy rifle a bad thing? That depends on if you carry it a lot. An infantryman's opinion is likely to be negative. Competition shooters, law enforcement and recreational shooters don't mind so much. The Hellion is heavy because it is a bit overbuilt, and that should appeal to many civilian consumers. It seemed peculiar to me that a rifle made almost entirely of plastic should weigh 8.5 pounds empty. Unlike most bullpups, and most rifles in general, the Hellion doesn't have a metal receiver. A metal barrel extension is molded into the plastic receiver, along with some metal reinforcements. The other principal metal components are the barrel and attached short-stroke tappet gas system, and an unusually heavy bolt carrier assembly. When I field-stripped the

rifle, I was surprised to see that the bolt carrier assembly rode on guide bars molded into the interior walls of the receiver. Before you condemn that, consider the success and longevity of the Remington Nylon 66 rifle. Plastics have come a long way since the 1950s.

The Hellion is made from the same proprietary polymer used in the VHS-2. Its special mix of ingredients results in great strength (more than aluminum), abrasion resistance, and tolerance to heat and cold. According to the engineers at Springfield Armory, the polymer is stable across temperate extremes and does not have issues until it reaches melting temperatures in the several-hundred-degree range, or liquid nitrogen temperatures (-320 F) on the cold extreme. That looks great in the lab and the specification sheet, but I figured there should be real world feedback on the battle performance of the VHS-2. What I found in my own research was all positive. Unlike the Heckler & Koch G36 rifle which also used a plastic receiver and was found to lose accuracy dramatically when it got hot in battle, the VHS-2 has a solid record of success in combat. Springfield Armory

engineers described it as "... probably one of the most durable designs for a firearm in existence." This was based on reports of "fantastic performance in the field, where the rifles held up very well and showed no patterns of parts breakage, some having over 100 thousand rounds fired with no major parts breakage." Obviously, they're Hellion fans over there at Springfield Armory,

but I was convinced this was a high-quality rifle days before I talked to them. The fit of the plastic parts was precise and tight in a way you rarely see outside of the top end conventional modern sporting rifles and the rifle was robustly made. If it were anthropomorphized, it would be a short, powerfully built, hairy chested, master stone mason.

I think the VHS-2 has the potential to be a highly successful military rifle by virtue of durability and accuracy alone. That will help civilian sales too, but probably not as much as exploiting the versatility of its modular design. I noticed while field stripping the rifle that the magazine well was a separate part and the barrel lock lever that retains the barrel in the barrel extension was only held in place on the bottom of the receiver with a cross pin. Clearly, there is the potential here for easy caliber changes by switching barrels, bolts and possibly magazine wells. I really hope Springfield Armory explores the possibilities here. If they don't, I wouldn't be surprised if someone else does.

Magazine changes take some getting used to. It took a while for me to be able to do it without looking.

Competitive Edge Dynamics

CED Reloading Machine Mirror Complete Unit – With the largest mirror in the industry, it allows easy viewing of BOTH the Case Feeder and the DAA Mr. Bullet Feeder in a single glance. Know exactly when to fill brass or bullets.

13669

\$23.99

CED Universal Reloading Machine Light – This custom made, heavy duty, LED light, provides 3 watts of intense lighting, illuminating your entire reloading machine's shellplate. With three light intensity selection levels, and a heavy duty 9" (23cm) long adjustable rubber coated neck, the CED Universal Reloading Machine light shines precisely where you need it. Made with two heavy duty powerful magnets that strongly secure to any metal surface, this universal light is compatible with all Dillon machines (550 needs the strong mount for use).

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

29033 **\$39.99**

The 1911 Smart Wrench's ergonomic design fits comfortably in your hand while you remove the barrel bushing, and the strategically placed cavity catches the spring. Removes the barrel bushing from the Officer's and Government model 1911s.

11656 **\$12.99**

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

21778 **\$29.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

29034 **\$11.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

29039 **\$34.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm. Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

29036 **\$11.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect leftover carbon while applying the perfect amount of oil or solvent. The .223/.56mm bore brush scrubs baked on carbon from lands and grooves.

29037 **\$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

29038 **\$12.99**

Real Avid Gun-Cleaning Chemicals

BORE-MAX™ BORE FOAM

Powerful gun-metal grade foaming solvent is specially formulated to expand and penetrate within the gun bore, rapidly and effectively dissolving performance inhibiting copper and powder fouling.

12oz. can Bore-Max **40215** **\$13.99**

FOUL-OUT™ GUNK BLASTER

Foul-Out Gunk Blaster blows away grease and grime fast. This powerful gun-metal grade solvent quickly strips gun actions of burnt powder, oil and grease, eliminating malfunctions of moving parts due to fouling and build up. Quickly cleans chambers, actions, trigger groups, bolt groups, slides, choke tube threading, semi-auto gas ports, extractors, ejectors and other hard to reach areas.

12oz. can Foul-Out **40216** **\$13.99**

GUN-MAX™ GUN OIL

Gun-Max's advanced gun-metal grade formula sets a new standard for protecting, lubricating and cleaning modern guns. Powerful inhibitors displace moisture delivering extended corrosion protection. Advanced anti-friction additives bond to metal surfaces for longer lasting lubrication of moving metal parts. Maximizes performance of semi-auto guns with high cycle rates. Formulated to excel in sub-zero temperatures and harsh operating conditions.

12oz can Gun-Max **40214** **\$13.99**

Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

Real Avid LUG-LOK® Upper Vise Block

Real Avid designed an upper block that leverages the strongest part of the gun – the barrel lugs inside the star chamber. The Lug-Lok is precision machined and precisely fits into all Mil-Spec uppers. It mates perfectly with the barrel lugs, while allowing you to rotate the upper to be able to work on different sides. The Lug-Lok is the safest, easiest and smartest way to lock down an AR15 or AR10 upper into a bench vise.

Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted

practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Real Avid ARMORER'S MASTER KIT™

This kit of Master Grade Tools and how-to information equips you to confidently tackle everything from building your own gun from the ground up to customizing or modifying an existing gun. With better tolerances, materials and expanded capability, every tool is carefully designed to make each job as simple and easy to execute as possible. Housed in a professional tool case and equipped with step-by-step instructions, you will be able to work smarter and create better guns regardless of your experience level.

31401 \$279.99

ARMORER'S MASTER WRENCH™

The Real Avid Armorer's Master Wrench features best-in-class strength, precision fitment and ergonomic intelligence. Wrenches seat squarely for a no-slip fit on stubborn barrel nuts, castle nuts, muzzle brakes, or fixed stock receiver extensions. Industry first torque wrench attachment location is optimally positioned to provide consistent torque for all nuts. As a bonus, interchangeable hammer heads make the Armorer's Master Wrench a "Master" hammer as well! This is the right tool for the job... and for you.

31402 \$79.99

BORE BOSS®

The single piece Dual Action Cable with integrated phosphor bronze brush and braided mop wraps around the unique Flex-Case Handle to keep the system stowed and organized. To use, simply flip, feed, clip and pull. Throw it in your pack, or put it in your pocket. It's the next best thing to a self-cleaning gun.

AR15 FRONT SIGHT ADJUSTER TOOL

This smartly designed tool makes front sight adjustments quick and easy. The stainless steel shaft is knurled to create no-slip leverage when turning tight posts. It works on both A1 & A2 front sights and the compact design won't clutter up your bag.

31403 \$9.99

THE AR15 SCRAPER™

PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR15 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR15 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 12 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31404 \$19.99

THE AR10 SCRAPER™

PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR10 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR10 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 11 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31405 \$19.99

Slip 2000 Products

725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$24.00

Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

15 Oz. 19234 \$24.00

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$28.00

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$22.00

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$21.00

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$24.00

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$14.00

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$17.00

MIL-COMM Extreme Performance Lubricants

TW-25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe	15732	\$14.99
1.5 Ounces	15731	18.99

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	15571	\$7.99
Slide-Glide Lite	15572	7.99

Sweet's 7.62

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia.

BUILDING AN IFAK

By John Kleespies

The Individual First Aid Kit is finding its way into civilian life as folks like me integrate them into our Get Out bags, but the concept of an IFAK originated in the military. An IFAK is a medical pouch that is physically attached to a soldier for instant provision of traumatic aid supplies. This soldier may treat himself with the kit, or he may be incapacitated so that a squad mate has to raid that soldier's IFAK to save his life. In other words, these first aid kits aren't about supplying Band-Aids for boobos – they are about saving lives, and mitigation of blood loss should be an IFAK's top priority.

Much like a GO bag, your IFAK should be specialized for your predicted situation. For instance, a 2019 resident

of Paradise, California might have forgone gunshot-type supplies like chest seals and used that freed space to prep his IFAK with extra burn gauze. By contrast, a citizen of Los Angeles in 1992 should have built an IFAK that had... well... let's just say that maybe he shouldn't have skimped on the gunshot supplies.

Given my area's propensity for disasters, both natural and man-made, I've built my IFAK to be more Los Angeles, California in nature than Paradise-like. With more than 80 percent of Americans living in urban areas, and civil unrest on the rise, too many folks are in the same boat as me.

Our easy solution is to purchase or reproduce a military IFAK. The US military's most recent "JFAK"

was developed by the Department of Defense Center of Excellence for Trauma's Joint Trauma System. Let's just call 'em "JTS" for short. JTS kits have been rigorously planned and combat tested, so ignoring that base of knowledge would be foolhardy. Generally speaking, the JFAK contains combat tourniquets, various types of dressings (standard, burn, and hemostatic), support bandaging, chest wound seals, eye shields, combat medic reinforcement tape, nasopharyngeal airway tubes, gloves, and a cutting device.

As an organization, the JTS doesn't endorse particular products, but it has extensively tested and approved certain devices for its internal use. A list of those devices can be found at JTS' website, www.deployedmedicine.com, and anybody building their own IFAK should take note of their conclusions. For instance, tension bars on cheap tourniquets are notorious for snapping: knowing which tourniquets are reliable can mean the difference between life and death.

In addition to the JTS equipment list, the Deployed Medicine website also provides downloadable handbooks that specify the military's guidelines for casualty care. This plethora of free information is worth the look. And, of course, all of this should be combined with first aid training through organizations like the American Red Cross or the Stop the Bleed Coalition, because none of this equipment is worth a darn if you don't legitimately know how to use it.

On the surface, building an IFAK based on the JTS model may sound complex, but it's actually quite simple. Gauze and bandaging are in your bathroom right now. "Combat medic reinforcement tape" is derived from the soldier's trick of wrapping a few feet of duct tape around a Sharpie. Everything else can be found online.

Aside from the IFAK's contents, a few more considerations are important to remember.

As mentioned before, the IFAK should be – quite literally – connected to your body. While a backpack is the least secure method of carry, it's likely to be the go-to

for civilians who are combo-ing an IFAK with their GO bag. If you choose the backpack route, then make sure that the IFAK is an attached yet separate kit from the GO bag, itself. Remember, in the event of a traumatic injury, the last thing you need is to waste seconds trying to find that hemostatic gauze in the jumble at the bottom of your backpack.

To this end, I've MOLLE-attached my trauma kit to the exterior of my GO bag. An IFAK might also be attached to a combat vest, holster belt, or thigh rig. Based on my experience – if properly packed – a whole lot of life-saving can be arranged into a tiny space. For instance,

my 5.11 Flex Med Pouch is only 7.5" x 2.5" x 2.5", but I'm able to stuff gloves, a Combat Application Tourniquet, plain and QuikClot gauze, wrap, tape, sharpie, and vented chest seals into that small space, plus medical shears strapped to the side.

It is also vital to properly mark your IFAK, as you may be incapacitated and rescued by a Good Samaritan, who will need to find that IFAK. To help draw that Good Samaritan's eye, my IFAK is a different color from the rest of the GO bag and designated by a red cross patch stating my blood type and that I have no known drug allergies. While I do have other less trauma-related medical supplies separately stored in an external pocket of the GO bag, I don't have this section marked. The last thing I want is for a Good Samaritan to waste time digging through my Band-Aid pocket when they really

need to be ripping open the IFAK for a chest seal.

The sort of person who dismisses an IFAK as alarmist and unnecessary is the same person who doesn't stock emergency supplies, or have a GO bag, and tacitly expects folks like us to go out of our way to save his life when the "you-know-what" hits the fan. If you've read through this article, then you're not this person – you are the shepherd and not the sheep. Please, check out www.deployedmedicine.com, build an IFAK that works for you and your family, and be safe.

Serbian Magic

By Jonathan Kilburn

I'm a big fan of .308/7.62x51. It's one of the few calibers that lends itself to nearly all situations and encounters. Many NATO countries use 7.62x51 for their main infantry weapons while at the other end hunters have been taking game with .308 for 70 years. It's well suited for all sorts of uses with all sorts of projectile options.

It's not the best caliber for everyone. In fact, it has many drawbacks, mainly weight. The US adopted the 7.62x51 cartridge for military service in 1957, but in Vietnam we learned just how limiting heavy ammunition can be. And with heavy ammunition comes a heavy rifle to match, especially in semiauto configurations. But that hasn't prevented many governments from using and adopting it. Everything from the M14/M1A, CETME, G3, and a wide range of other weapons systems utilize the 7.62x51 with great efficiency.

While the AR15 is America's rifle, the AKM platform has been gaining massive popularity stateside as well. It's difficult to count the number of companies producing an AK to varying degrees of success. But one company has been making waves for a long list of AKM firearms: Zastava. In Europe, they are one of the oldest

firearms manufacturers and have an excellent reputation. In recent years, Zastava USA was created in order to import parts made in Serbia and complete the firearms domestically. Because of this American counterpart, Zastava's availability has increased as has their demand. It is also worth noting that all Zastava firearms are colloquially called "Yugoslavian."

In 2022 Zastava USA announced the release of their newest .308 AKM, the M77. While none of their AKM's are "true" to spec, they are close enough to be considered AKMs for the remainder of this article. This also isn't the first time Zastava has released this particular chambering. In 2014-2015 several M77PS rifles were imported, most namely through Century Arms, for the American market. These were modified, semiauto variants of the M77 used in the Lebanese Civil War and Yugoslav Wars but with a polymer thumbhole stock. The new version is every bit as proven, tough, and useful as the original.

From 2022 onward, the PAP M77 has a few features not seen on the previous versions and unique to Zastava as opposed to Saiga. This rifle features a 19.7-inch cold hammer forged barrel that is chrome lined. An adjustable gas block sets it apart from most other AKM-pattern

With a Hint of Hammer

The lefthand side of the receiver features an optics mount that will work with most “Yugo” optics mounts, like those from Midwest Industries.

rifles with the potential for suppression. A 1.5mm forged bulged trunnion reinforces and strengthens the entire construction of the rifle while giving an RPK look; and this bulged trunnion is also found in Zastava’s ZPAP lineup as well. Overall, the M77 weighs 8.6 pounds and can only accept the M77-pattern magazines. For a shooter who uses the entire range of the .308 caliber, an optics mount is placed on the left side of the receiver and the stock options come in either wood or Promag adjustable polymer.

On paper, the M77 seems like a great overall rifle, as it really is! It’s comfortable to hold and has a trigger that doesn’t bind with a short reset. Magazines insert easily with a well-defined shelf and recoil spring that isn’t taxing for the user. Combining the caliber with the perfect barrel length, Zastava has put together one of the few

firearms that fill the gaps missing in the AKM market. They do a great job at it, too!

In the hand balance is perfect. With a 19.7-inch barrel it’s not front heavy or difficult to maneuver. Loading it up with some steel cased Barnaul .308, we took to the range. 20-round steel magazines are common, and 10-round steel mags are available for freedom-challenged states. Each functions flawlessly. Feeding is effortless as the magazines gave a little extra space for compression against the bolt carrier.

When firing the M77, everyone on the range will know it’s a powerhouse. The stock itself sits high so a deep cheek helps with easy sight acquisition. This is both good and bad. For a heavy rifle, the recoil is quite strong. For me, the stock had a habit of knocking my ear-pro slightly

off center and breaking the seal. While not a deal breaker, the recoil hit much harder than expected, especially compared to a Saiga running the same ammunition. To rectify this, the gas block, which has three settings, was placed on the suppressed setting. Unfortunately, the rifle would not completely cycle, which is understandable.

Accuracy with this kind of recoil is strictly dependent on the user and quick sight placement. Users boast 1.5 MOA accuracy and while possible, I could only get 3 MOA with steel-cased Barnaul. Overall, that's mostly dependent on my handling of recoil and not bad given the variances of steel cased ammo! With handloading or higher quality

ammunition, it's completely conceivable to get 1.5MOA or even better not to mention the addition of muzzle devices to reduce climb.

Zastava's M77 in .308/7.62x51 is a battle-proven rifle that has both range and reliability.

Would this replace the Saiga 308 in my safe? Probably not, but even if a Saiga is available it probably isn't affordable. With the price of Saiga rifles and lack of a .308 AKM on the market, the Zastava M77 is a great option. Magazines are readily available and accessories specific to the "Yugo" pattern and easy to find. Midwest Industries makes optics mounts which work well, and Promag makes furniture that can be added or swapped with ease. The

Zastava M77 can be found at online retailers for \$1300-\$1400 USD while magazines are between \$40-\$46.

DILLON: A MEMOIR

Read the story of Mike Dillon's journey from washing aircraft for a crop-dusting company, to airline pilot, to creator of The World's Finest Loading Equipment, and ultimately, to the man who revolutionized the M134 Mini-Gun!

Along the way his adventures included restoring a P40 Warhawk, fighting wildfires in WWII-era bombers converted to drop fire retardant and writing articles about flying warbirds for *Air Progress* magazine.

Not content to rest upon his laurels for creating the World's Finest Loading Equipment, Mike finished out his career by re-engineering the M134 Mini-Gun, helping to arm the US and its allies to fight the War on Terror across the globe.

Mike's memoir is a compelling read: the story of a man who believed he could do anything he set his mind to, and actually did it!

Pictured here are the original 1928 Navy Overstamp Thompson submachine gun Mike inherited from a friend who died in a tragic plane crash and a Star Machine Works reloader with Mike's "Super Star Conversion." These two items inspired Mike Dillon to found his own reloading equipment company. Read the book for details about how it happened.

LIGHT Up Your Life

(start with your shellplate)

An LED light kit for your 550/650/750 reloading machine that simply plugs into the center of the toolhead. The power supply adapts to multiple international voltages and functions with or without an optional switch (included).

LED Light Kit with Switch
62014 \$75.00

Schuster Mfg. Inc. Adjustable M1/M1A Gas Plugs

All Schuster Mfg. Inc. adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

Dillon Shooting Mat

Dillon's shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. Dimensions: 66" x 27.75"
