**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

## Dillon's Bill of Rights for Reloaders

**All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:**

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

**Editor's Note:** The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered.

We constantly strive to live up to his standards.  
Please let us know if we're not succeeding.

# CP2000<sup>^</sup>

## Dillon's DEDICATED Case-Processing Machine!

- Made in the USA
- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL1100 and Super 1050, the CP2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP2000 will make your task MUCH easier.

Small Rifle Casefeed Plate	21074	\$55.00

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

Dillon's  
RT 1500  
shown  
installed  
on an  
XL 650.

The RT1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (*Vacuum cleaner and hose not included.*) The RT1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT1500 Case Trimmer **62164** is **\$435.00**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$25.00** each. Upper lock rings, **13559**, are **\$9.00** each.

## MILITARY BRASS?

**Eliminate the "Grunt Work" with  
Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound

cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	62124	\$27.00
9mm Adapter	62168	22.00
.40 S&W Adapter	62169	22.00

20095

# Case Preparation Equipment

## CV2001 – The Industry Standard

Dillon's CV2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

## Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14",

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle.	<b>13804</b>	<b>\$9.99</b>
Case (20 pc.)	<b>20255</b>	<b>149.99</b>

## Vibratory Case Cleaners Case/Media Separators

<b>CM2000 Case/Media Separator</b> ^	<b>20675</b>	<b>\$125.00</b>
<b>CM500 Case/Media Separator</b> ^	<b>21045</b>	<b>\$89.00</b>

and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

## Limited Work Space?

Dillon created the CV750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV2001 and is every bit as tough – just more compact. To accompany the CV750, the CM500 does the same job as the larger CM2000 Case/Media Separator; and, like the CV750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV2001 ^, US 110v	<b>20493</b>	<b>\$290.00</b>
CV750 ^, US 110v	<b>19455</b>	<b>215.00</b>

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle	<b>13733</b>	<b>\$15.99</b>

## Gift Card

Not sure what gift to get that firearms enthusiast, collector, shooter, reloader or general all-around outdoorsy type? That can be a tough choice, but Dillon Precision can help! Our gift cards are valid for ALL products that we sell (not just Dillon-branded items) including firearms parts and accessories, reloading components, and all the other products in our catalog or online. Our Gift Cards can now be redeemed online during checkout OR through our Customer Support Team for phone orders.

*Digital Gift Cards ONLY – will be emailed to recipient right after checkout.*

# COMBAT CLASSIC:

## US M17 SIG SAUER 9x19 PISTOL

By Ken Hackathorn

Pistol: US M17 SIG Sauer 9x19mm

Blue Press Combat Classic Evaluation Drill: Score = 150

### Shooting Impressions:

Adopted as the new U.S. Army service pistol in 2017, the SIG Sauer M17 has become an instant “Combat Classic.” While each era of service pistol issue has had its fans and haters, the truth is that the M1911 was rarely praised by those who used it in combat. Likewise, the M9 Beretta pistol was damned by many in the last decade of its service. The latest issue M17 will likely see the same result in a couple of decades. The fact is that military pistols are rarely maintained well, troops get marginal training with them at best, and they’re treated as an afterthought.

The rifle is the main battle weapon and handguns are considered a necessary evil within the “green machine.” While Spec Ops units are usually trained to a much higher skill level, handguns are not taken all that seriously as far as providing an important role in combat. What makes the SIG Sauer M17 really stand out is the fact that many of the lessons concerning what the role of the military pistol should be and do were taken into consideration when the requirements were drawn up to replace the M9 Beretta.

The M17 is outstanding in that it is extremely reliable, easy to shoot well, and allows for interchangeable grip modules to fit small, medium, and large hands. It has probably the best trigger on any issue pistol ever put into US service, excellent sights, natural pointing ability, and ease of preventive maintenance that does not require careful lubrication to keep the gun running reliably. Metal-framed semiauto pistols typically must be properly lubricated to be reliable in operation (a common failure with most users).

The M17’s fire control unit is easy to remove for cleaning and the tabs that the slide grooves engage have minimum friction, so reliable function is vastly improved. Magazine capacity is 17 rounds and 21 rounds for the slightly longer issue magazines. Sights have tritium inserts, the frame has a “pic” rail for attaching lights/lasers, and the M17 does have ambidextrous manual safeties. This factor is best for two reasons. The plus to the great trigger/sear release on the M17 is that

it makes the pistol very easy to shoot well...and it also makes the pistol easy to shoot when you don’t want to make a loud noise. The manual safety provides a far safer handgun in the hands of lesser-trained personnel. Second factor is the issue that most pistol accidental discharges occur when loading and unloading the pistol. With the manual safety engaged, Private Bubba or Betty can load or clear the pistol while the safety is on...without the follow up loud noise so common with pistols that do not have a manual safety system so designed.

Even though the concept is to provide different size grip frame modules to fit different hand sizes, based upon my experience, the “medium” size module that’s standard will be what each soldier will be handed when removed from the rack in the arms room. Any request for a different

size grip module will be met with, “Shut up and move on.” I do wish the M17 grip module had just a bit more texture for a more positive firing grip. Shooting the M17 on the **Blue Press** Qualification Drill was boringly simple. The M17 is so easy to shoot well that I cleaned the course with a perfect score of 150 cold on my first try.

Everything from trigger reach, grip angle, ease of aligning the sights and finally the great trigger action was outstanding. My thumb position to engage and disengage the manual thumb safety was natural and easy (this may not apply to all hand sizes). I realize the “green machine” has become the “baby s#t tan” machine, but I can’t say that I’m enamored with FDE-colored guns. Seems that we tend to prepare for the last war we fought as

part of the US habit. Not a big deal, but it seems that a gray or sage green color would make more sense.

The M17 pistol seems well thought-out, even down to the point that you cannot seat a magazine into the pistol when the take-down lever is disengaged. The only thing that could go wrong with this new M17 is, once put into the hands of the average grunt – who could screw up an anvil – well, time will tell. I think that the M17 may be the finest service pistol ever issued to the US Army. But, after a few decades and low-bid replacement parts and magazines, it will likely be about as popular as the M1911 pistols were after most of those in service were nearly worn out and the M9s suffered the same fate.

As it stands, I give the SIG Sauer M17 a grade of A+. 

## COMBAT CLASSIC EVALUATION

Type: Timed

Rounds: 30 total, 150 Points Possible

Target: IDPA Silhouette

Range: 3, 5, 7, 10 & 15 yards

Start Position: Low Ready

### Procedure:

**Stage 1.** 3 yards. On signal fire 2 rounds in 1.5 seconds strong hand point shoulder position.

**Stage 2.** 5 yards. On signal fire 2 rounds to the body and 1 round to the head in 3.0 seconds.

**Stage 3.** 7 yards. On signal fire 2 rounds in 2.0 seconds. REPEAT for a total of 4 rounds.

**Stage 4.** 10 yards. On signal fire 2 rounds, reload and fire 2 more rounds. (Start with only 2 rounds in the gun.) Time is 8.0 seconds for auto pistol, 10.0 seconds for revolver.

**Stage 5.** 10 yards. On signal fire 2 rounds with both hands, 2 rounds strong hand only and then 2 rounds weak hand only. Time is 9.0 seconds.

**Stage 6.** 10 yards. On signal fire 1 round in 2.5 seconds. Repeat for a total of 5 rounds.

**Stage 7.** 15 yards. On signal fire 6 rounds in 8.0 seconds.

# The Process of Elimination:

By Oleg Volk

To a new user, the process of shopping for a handgun consists of a bewildering array of cryptic options. An experienced user faces the same, but usually has both an understanding of the details and personal preferences borne of prior experience.

What advice would you give to new users? Be methodical and pay attention to details. We are not talking about an elective purchase of the “fun big bore” or “a historic pocket gun like grandma had,” but rather purchasing a sidearm for carry or home defense. The reason for this systematic and almost pedantic approach is watching new and experienced shooters alike struggle to perform against the handicap of completely inappropriate equipment. While a young woman with small hands of limited strength could be expected to do poorly with a heavy-trigger snub-nose revolver, I would not have expected myself to struggle with Walther PDP-F in which the trigger was set too far back for my hand size. Switching to a standard PDP made all the difference. For users with small hands, the opposite would be true. For others, the difference was in the sights, the backstrap, the caliber of the firearm, or in some other entirely selectable feature.

The first and foremost issue is the physical fit of the gun. There’s no way to experience that but by handling a wide variety of models. Is the grip comfortable? Is the trigger placed correctly for access – this becomes doubly important when only one hand is available. The two-handed grip can compensate for a lot, but a high percentage of

self-defense episodes involve firing one-handed. For DA/SA semiauto handguns, and for DA revolvers, the ability to reach the trigger in the forward, decocked position is critical – that’s where the pull is also heavier, requiring maximum available leverage. Do any sharp edges or protrusions interfere with the

manual of arms, like racking the slide? For shooters with large hands, is the slide area great enough to get a purchase on it, will the slide clear the web of the hand on recoil? Can critical controls, like safety levers, be reached without shifting the grip? Can these controls be operated one-handed? This step is especially important for left-handed users. Is the grip textured enough for retention, is it smooth enough to avoid skin abrasion?

The first step in the weapon selection is the ammunition. If the projected foes are human or canine, a medium-power cartridge is the way to go – adequate terminal performance combined with moderate recoil. Wide availability puts 9mm Luger in the forefront of all other candidates: not only does that mean a wider variety of ammunition than most other cartridges, but also a reduced price. Being able to buy more practice ammunition for the same money is conducive to more-extensive

training. Smaller cartridges are also under consideration, but only as ersatz in case the firearm has to be tiny for concealment, or the recoil must be reduced to less than usual levels. With miniaturized handguns, caliber reduction often follows precisely to moderate the recoil. Larger cartridges are under consideration if the expected

**“The first and foremost issue is the physical fit of the gun.”**

# How to Pick a Handgun for a New User

threat is ursine. Heavily recoiling weapons don't allow for extensive practice, so the size and weight of the gun often grows with the cartridge, which in turn limits how conscientiously it will be carried. And with this, the next consideration is the carry method.

If a chest rig or a holster on a belt supported by suspenders are in play, then there's no real limit on how heavy the sidearm can be. Regular belt holsters impose a distinct limitation on the weight of the sidearm, excluding certain capable but hefty all-steel competition models from consideration. If the gun must fit in a pocket, the size and weight limitations can be very severe, usually to the detriment of the functionality. This brings us to considerations of dressing around the sidearm – is the shooter willing to wear holster-compatible outfits, or would a bigger sidearm end up carried off-body? Now we get to reviewing the user's typical wardrobe: what holsters work with an evening dress or a lifeguard outfit?

For a new shooter, this kind of deliberate investigation is possible at a well-stocked store or with the help of a well-equipped friend. Hand size and finger length are just the first considerations. Do selected pistols aim level when brought up to the line of sight? If a manual safety is used, is up or down motion of the lever more comfortable? On some handguns, grip panels and backstraps can be swapped to regulate fit to the hand, on others that's not an option. Can the user rack a striker-fired pistol, or would a hammer-fired model in which the hammer spring can be compressed separately from the recoil spring a better fit? How is the shooter's eyesight – can iron sights be used, or would a red dot optic be required?

I've met people who couldn't handle more than .22LR level of recoil or noise. One of them, age 87, needed the pistol for home defense: the ultimate solution was a small rimfire pistol for carry and an AR15-22 rifle for home defense. Handguns do not work well for everyone. I've worked with people whose work dress code kept them from carrying more than a mouse gun. One of them also could not handle much recoil, so the eventual solution was the opposite of expected: an all-steel service pistol carried off-body...far from ideal, but much better than nothing. The features of that handgun – low recoil, excellent trigger and sights, high capacity – trumped all other considerations for the friend whose other options were going to be underpowered and very hard to shoot accurately. I've met people whose astigmatism made red-dot sights impractical, poor vision in general made iron sights equally problematic: their solution was extensive point shooting training, combined with green lasers as a supplemental aiming method.

After all the various details are considered and the top

candidates have been picked, it helps to research the reputation of the specific brands and models. A pistol made by a currently active manufacturer would have greater support than a military surplus model. Something made by a reputable firm would do better than a cheaper product with a reputation for frequent breakage. Besides the obvious danger of it failing in battle, the expense of dealing with an unreliable weapon will swamp the extra upfront price of a better one. How expensive are magazines? All things being equal, more common magazines would be preferable: they are wear items and would eventually require replacement or a rebuild.

The proof is in the shooting, which is why stores with ranges and rental counters are so helpful...as are friends with a variety of handguns in their safes. If test firing shows similar results for several models, the logistical considerations help make the final selection. More often, one model or another ends up being vastly more comfortable or better performing than the others.

To new gun buyers, this multitude of considerations and options can be overwhelming. To make the process less intimidating, it can be done with a fitting of a sampler of dissimilar handguns at a store or a private collection. Trigger compatibility can be checked with dry firing. Sight compatibility with aiming and providing subjective feedback on clarity of the sight picture. Recoil control limitations, by starting with a .22LR and going up the scale gradually. The best way to test the initial selections would be to enroll in a class or work with a private instructor: several hours with a pistol should be enough to decide if it works well enough or should be replaced with something else. Prior to getting instruction, the opinion is too uneducated to select or deselect reasonably close choices. The good news is that usually any of the initial selections will work well enough for learning. For example, a person who picks a Glock 19, CZ75, Sig P320, and a compact 2011 won't be badly served with any of the four – but may develop a strong preference for one of them over the rest after just a couple of magazines. The role of the advisor is to make sure that the picks for possible carry don't include a Jennings .25, nor a Chinese TT33 clone, nor a gold-plated 1911 in .399 Unobtanium Magnum. This is especially important when the trainee already has some family heirloom with sentimental value but questionable suitability for practical use. Your job as the advisor is not only to help with the initial selection, but to annotate the entire trial and error process, enabling your friend to repeat this evaluation sequence time and time again in the future. Over time, their tastes and requirements may evolve, but the methodology of evaluating suitability of a sidearm will remain valid.

# RL1100<sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Heavier Frame for Greater Rigidity
- Upgraded Primer Pocket Swager

# On the Cover

This month's cover model is Claudia. Her furry friend is Bowie, a golden retriever. In this outtake photo, she's armed with a JV Industries (<https://www.jvindustries.net>) Limited Optic Delta Model – a double-stack 2011 with a 9mm threaded bull barrel, aluminum grip, diamond-like carbon coating, and an ambi safety. The optic is a Trijicon SRO, the weapon light is a SureFire XH35, and the modular suppressor is a Huxwrx Safety Co. Rad 9. The truck is a 1965 Ford F-100. To see more photos of Claudia and other *Blue Press* cover models, follow us @bluepress. You can also sign up on [dillonprecision.com](http://dillonprecision.com) to receive *The eBlue Press* via email. It's published every other month.

A heavy, high-quality tray large enough for the Federal primer package. 13606, \$33.00 ea.

# Dillon's Range Bag<sup>^</sup>

**33389 \$139.99**

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4" x 7" x 8" and features two interior pockets measuring 6-1/2" x 6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5" x 7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12" x 8" x 1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

## "Border Shift" Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	<b>13755</b>	<b>\$35.99</b>
I.D. Card Holder <sup>^</sup>	<b>14575</b>	<b>2.99</b>

## Dillon Pistol Case<sup>^</sup>

Our pistol case was designed to hold and protect your pistol and carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

# RL550C ACCESSORIES

## RL550 CALIBER CONVERSION KITS<sup>^</sup>

Contains: Shellplate, powder funnel and locator buttons.  
Available in all calibers;  
*please specify caliber desired.*

**RL550 CONVERSION \$75.00**  
(Exotic calibers, \$90.00<sup>^</sup>)

## AUTO POWDER MEASURE SYSTEMS<sup>^</sup>

Additional powder measures stay on the toolhead. Never change powder measurements again!

RL 550 Powder Measure

**20782, \$129.00 each**

Magnum Rifle Powder Bar

**21353, \$47.00 each**

X-Small Powder Bar

**20780, \$47.00 each**

## DELUXE QUICK CHANGE ASSEMBLY<sup>^</sup>

With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less

than a minute. Complete with:

- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, **22058, \$165.00**

Loading dies sold separately on Pages 23 & 34.

## POWDER DIES<sup>^</sup>

Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the "belling" adjustment.

**20064, \$21.00 each**

X-Large Powder Die,

**21253, \$28.00 each**

## TOOLHEADS

Don't adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

**13909, \$34.00 each**

## TOOLHEAD STANDS

The ultimate in convenience for keeping your reloading bench clean and uncluttered.

**22055, \$30.00 each**

## RL550 CASEFEEDER UPGRADE<sup>^</sup>

Available for most pistol cartridges – will not work with rifle cartridges.

Large Pistol **14450**

Small Pistol **14451**

**\$435.00 (110v)**

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

## Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

## Dillon Carbide Pistol Dies (Three-Die Sets)

## Spare Decapping Pins

Package of 10	21528	\$9.00
---------------	-------	--------

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

## Dillon Rifle Dies (Three-Die Sets)

## Dillon's Basic Loader

**\$415<sup>00</sup>**  
**15399**

Reloading Dies and Caliber Conversions sold separately  
Pictured with optional accessories:  
Strong Mount 22051 \$98.00

Dillon's RL550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL550 is essentially an RL550 without the automatic priming and powder systems.

Capable of loading over 160 calibers – just like the RL550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

**AUTO PRIME SYSTEM<sup>^</sup>** 16627 \$125.00

**PRIMER SYSTEM EARLY WARNING<sup>^</sup>**

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$40.00

**AUTO POWDER SYSTEM<sup>^</sup>**

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$139.00

**OPTIONAL MAGNUM RIFLE POWDER BAR**

21353 \$47.00

**AUTO EJECT SYSTEM<sup>^</sup>**

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$45.00

**BL550 POWDER DIE<sup>^</sup>**

Extra powder dies for your BL550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die:** 16629 \$28.00

**Oversize Die:** 16626 30.00

**Plastic Funnel:** 16617 9.50

**POWDER MEASURE ADAPTER**

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL450, AT500, BL550 or RL550. (Requires the use of an RL450 powder die – see below.) 20029 \$35.00

**RL450 Powder Die** 20308 35.00

# MORE KIMBER THAN EVER!

## KDS9c FEATURES

OPTICS-READY SLIDE

15+1 ROUND CAPACITY

SUPERIOR ERGONOMICS

REVERSIBLE MAG CATCH

LEARN MORE

For over 30 years, Kimber has crafted a reputation for superior quality 1911s. With the introduction of the KDS9c, Kimber doubles down on capacity and takes quality to the highest level. From tremendous accuracy to relentless reliability, the KDS9c comes standard with two 15-round magazines that give you the capacity you want and the accuracy you need. 10-round magazines are available in compliant states, and 18-round extended magazines will be available soon. The KDS9c delivers more Kimber than any pistol before it because a Kimber is what all guns should be.

*Kimber*

WHAT ALL GUNS SHOULD BE™

# DILLON RIFLE COMPANY

The OPAR Operator Trigger is a complete-assembly pre-stage drop-in trigger purpose built to provide improved trigger pull weight, reset, clean feel, precision, and safety for day-to-day users, military and law-enforcement members and agencies. The trigger's form enhances precision capabilities through its Area-of-Engagement design. This is accomplished by helping shooters build muscle memory for their trigger-finger placement in a simple and natural way.

It has a clean 5.0 to 5.5-pound trigger pull weight with a short trigger reset. The OPAR Operator's patent pending pre-stage trigger mechanism design has an inset secondary trigger providing an additional safety mechanism to reduce the chances of an accidental discharge. The OPAR Operator is compatible with AR-15 and HK416 rifles using the Mil-Spec 0.154-inch pins.

**Dillon Rifle Company AR-15 OPAR Operator Trigger, Curved**  
**11312 \$265**

## The Jalapeño

You shoot a lot and your gun gets hot. Then, without thinking about it, you put your rifle into its case or someplace else equally tender. I have mauled several rifle cases, burned a car seat, and have at least one scar from doing exactly this. This is why we created The Jalapeño. Actually, we made the original The Jalapeño for the Minigun. With it, we could dump 3000 rounds in a minute or so, slip The Jalapeño over the barrel group, pull the gun off the mount and stow it right away. 23.5 in. (l) x 8 in. (w), Made in the U. S. A.

Super Green	<b>40294</b>	<b>\$65.00</b>
Basic Black	<b>40295</b>	<b>\$65.00</b>
Above Average Grey	<b>40293</b>	<b>\$65.00</b>

## CED Edge Dual PCC Rifle Case

The CED Dual Rifle case gives you two in one! Two rifles and three modes of carry, all in one great PCC rifle case. Excellent protection for your expensive competition PCC and AR rifles, this case includes storage for two pistols and lots of magazines as well.

Comes with a handle, shoulder strap, and

backpack-style shoulder straps, which tuck away when not in use or can be removed if not needed.

The MOLLE PALS system across the front of the case, allows the user to add optional accessory cases to the rifle case itself.

The case measures 35.43" x 11.81" inside the main compartment.

**10977 \$99.99**

## CED PCC Mag Storage Pouch

The perfect companion for your range bag, rifle case or backpack! Holds up to six extended PCC straight magazines of up to 42 rounds and can accept magazine lengths up to 10 inches.

Measurements are: 12.75" Wide x 11.5" High closed (open approximately 12.75" x 19.0"). The pouch pocket length is 6.25."

**10978 \$15.99**

## CED PCC Rifle Sleeve

The CED PCC Rifle Sleeve is the ideal companion for competition stage use. It's a lightweight, water-resistant neoprene zippered sleeve that folds up easily to fit into a range bag or backpack. Perfect for covering and protecting your PCC rifle when carried in a trolley or wagon at the range. Weighs only 8 ounces and measures 33" inside.

**10979 \$19.99**

# Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL750/650 owners with limited overhead clearance, the XL750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL750/650	<b>22051</b>	<b>\$100.00</b>
XL750/650-only	<b>22052</b>	<b>98.00</b>
"SDB"	<b>22223</b>	<b>110.00</b>

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

**Stock #62005, \$100.00** is for:

XL750, XL650, RL550 and Square

Deal "B". **Stock #62006, \$100.00** is for:

RL1100, CP2000, Super 1050 and RL1050 as well as any Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our new kit for the SDB, RL550 and 750/650 can be used with or without our Strong Mount.

SDB Bullet Tray Kit	<b>22210</b>	<b>\$69.00</b>
550 Bullet Tray Kit	<b>22211</b>	<b>69.00</b>
750/650 Bullet Tray Kit	<b>22212</b>	<b>69.00</b>
1100/1050 Tray Kit	<b>22215</b>	<b>64.00</b>

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**16306 \$55.00**

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL650 with Wrench Set	<b>11555</b>	<b>\$46.00</b>
RL550/XL750 with Wrench Set	<b>11541</b>	<b>44.00</b>
SDB with Wrench Set	<b>19441</b>	<b>43.00</b>

*Note: Super 1050 Toolholders include Wrench Set*

The **Square Deal "B" Toolhead Stand** holds your SDB toolhead, powder measure, dies and caliber conversion components (*not included*) in an orderly manner.

**62225, \$47.00**

Our **Toolhead Stands** for the RL550 and XL750/650 are the ultimate in convenience for keeping your reloading bench clean and uncluttered.

**22055, \$30.00 each**

**Dillon's 1050 Toolhead Stand** is now available to store caliber quick changes for the 1050.

**62200, \$60.00**

**Equipment Dust Covers** are made of tough packcloth nylon and add security to your loading bench. Your reloader will be protected against more than dust as the machine covers come with a D-ring that allows the heavy duty zipper to be locked.

SDB/550 Cover	<b>13795</b>	<b>\$24.99</b>
XL750/650 Cover	<b>10443</b>	<b>39.99</b>

Master lock	<b>13083</b>	<b>6.99</b>
Pictured: SDB/550/650/750 Quick-Change Cover (for use with powder measure)	<b>11143</b>	<b>\$14.99</b>

Our **Primer Flip Tray** is a heavy, high-quality tray large enough for the Federal primer package.

**13606, \$33.00 each**

**Primer Pick-Up Tubes** are used to transfer primers from flip tray to priming system. Having extras pre-loaded with primers makes it easy to load a pre-determined amount of ammo without having to stop to pick up primers.

## "D-TERMINATOR" Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

*NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.*

**\$149.99**  
**10483**

Dillon's **"Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**97126 \$220.00**

The **Powdercheck System** (available for XL750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**21044, \$99.00 each**

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

**17950 \$65.00**

Dillon's **1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

**10842, \$15.00 each**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit Only	<b>22211</b>	<b>\$40.00</b>
w/SDB Spare Parts Kit	<b>97015</b>	<b>65.00</b>

## Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the

plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

**WARNING:** These products contain lead, which is known to cause birth defects, other reproductive harm and cancer. Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

# Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

19972

\$39.99

## AMMOBRASS, LLC Swage Setter

The AmmoBrass Swage Setter is for use with any swaging devices such as Dillon's Super Swage 600, Dillon 1050/1100 presses, and almost any other swaging device to assist you in properly setting your swage rod and swage back-up die.

## Lyman Powder Pal Funnel Pan

18399 \$8.99

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

## LabRadar Chronograph

LabRadar is the world's newest technology in obtaining projectile velocities of Rifles, Shotguns (slugs only), Handguns, Pellet Guns, BB Guns, Bow & Arrows, Crossbows, and Paintballs. Doppler Radar is the most precise method of measuring velocities available. Its accuracy is not dependent on light conditions or being exactly parallel to photoelectric sensors resulting in false readings.

- Track and obtain velocities up to 100 yards
- Easy Set-Up
- Get series statistics: Maximum Velocity, Minimum Velocity, Average Velocity, Standard Deviation, Extreme Spread
- Accurate with subsonic, transonic, supersonic projectiles
- Works under any light conditions
- SD card support for virtually unlimited shots and series recording
- Get velocity at multiple distances

**11861 \$625.00**

**LabRadar Protective Case** – This custom, padded case is constructed of 600 Denier fabric with a waterproof backing. It's great for storage at home or while going to the range. It includes a full-length zipper with pull tabs, padded sides and a rubber covered web handle. There is a large exterior pocket for storage of extra batteries or accessories that has a Velcro closure. A shoulder strap is included.

**11862 \$39.99**

**LabRadar Battery Pack** – A rechargeable USB battery bank is the perfect solution to power LabRadar. While the system works great on AA batteries, you can extend the shooting day with this rechargeable power bank. It is supplied with heavy duty 3M Dual Lock reusable fastening tape to attach the power pack to your LabRadar. A USB cable is supplied to connect to your LabRadar. The power pack is also compatible with cell phones and tablets. The battery also has a Type C connection for charging other devices

**11866 \$24.99**

## Taylor Freelance

### Blackened Brass Backstraps

Weight and felt recoil are directly related, so by adding weight, our brass backstrap calms the gun down, creating a smoother-shooting, softer-kicking, more-neutrally-balanced handgun. Adding weight to the frame also reduces the tendency toward "weak wrist" malfunctions common to all polymer frame handguns.

Canik Mete Backstrap	30345	\$59.99
Canik SF/SFX Backstrap	30344	59.99
Walther Full-Size Backstrap	30347	69.99
Walther PDQ/PDP Compact Backstrap	30346	57.99

**Taylor Freelance's +6 Mag Extension** for the PPQ extends your mags out to the maximum allowed in 3-Gun and USPSA Limited – giving you 21+1 instead of the stock 15. If you shoot a .40, our extension gives you +4+ to +5, for 16 or 17+1. Custom Wolff springs add feed power for reliability. NOTE: Not for use on 18-round magazines. May result in damage to ejector. NOTE: The stock magwell that ships on the PPQ SF Pro will not accept these basepads.

**30340 \$39.99**

**Taylor Freelance's new +3 Mag Extension** for the PDP extends your mags out to the maximum allowed in 3-Gun and USPSA Limited competition – giving you 21+1 instead of the stock 18. Fits the full-size 18-round mag (not the compact). IMPORTANT: The Walther PDP and the Walther PDP COMPACT use DIFFERENT magazines. The PDP compact uses Walther PPQ magazines.

**30341 \$39.99**

**Push your Canik's firepower to the maximum with TF 140mm Mag Extensions.** Fits the full-size SF/SFX, and the compact SF Elite/Elite Combat! On the SF, get 22+1 capacity that's legal for USPSA/3-Gun competition (meets 140mm limit). Works with stock magazine spring (saving money). **BERETTA 92 USERS!** This basepad fits the Mec-Gar 18-round Beretta 92 magazine.

**30342 \$29.99**

# Mr. Bulletfeeder®

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

-------------	-------	--------

This holster is designed for an extreme high rise carry and offers the best of both worlds. Not only does it allow you to carry a full-size automatic handgun, it's also totally concealable. The unique design has Mernickle's patented stabilizer flap that goes behind the belt. This prevents the grip of the gun from tipping away from the body while doing daily activities. The high-rise position allows you to sit in chair or vehicle without needing to take the gun out of the holster.

XHR 1911 Holster **19018 \$124.99**

Conceal-Carry Performance Series  
Revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded.

4-5/8" Ruger Blackhawk	15765	109.99

Designed to be the ultimate in concealed carry for those not comfortable with an Outside the Waist Band (OWB) holster – the ISP offers a great carry solution! This holster gives the appearance of a front pocket wallet and breaks up the outline of your gun. The smooth Herman Oak leather inside protects the finish of the gun, but the suede outside ensures that the holster sticks in the pocket.

Sm Auto ISP	19019	\$39.99
Med Auto ISP	19020	39.99
Sm Revolver ISP	19089	39.99

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy.

1911 Holster	19947	\$175.99
Mag Pouch	19946	49.99

# Wild West Guns Lever Action Upgrades

The Original Big Loop that started it all, built for big guns, big guys, and gloved hands to give you the smoothest and most reliable lever-action throw

available! Tested Alaskan tough and built to last, WWG Big Loop Levers are precision wire cut and CNC machined to be the perfect fit for your Marlin Rifle! Don't be fooled by imitations, WWG big loops are ergonomically designed to be cycled while you're still looking down the sight making for a faster more accurate follow-up shot because charging bears won't slow down for you to reload! Wild West Guns Big Loop Levers fit Marlin 1895 Straight Stock and Pistol Grip and are also compatible with 336 models, available in Blue and Stainless.

1894 Big Loop Lever, Blue	21193	\$160.00

# Ed Brown 1911 Mags

Having spent over 50 years building custom 1911s, Ed Brown has tested just about everything possible when it comes to magazine design and performance. The tube is constructed from 0.025" thick, certified 410 stainless, which is heat-treated to 35 Rc for exceptional strength and corrosion resistance. For maximum strength, longevity and durability, the tubes and fixed base are TIG welded with the latest technology for maximum strength, longevity, and durability. The completed tubes are then highly polished inside-and-out to provide the smoothest possible operation. The patented follower design is made from heat-treated steel (not cheap plastic), with an extended front skirt, and an anti-friction finish. This ensures proper feeding and full engagement of the slide stop on the last round. The maximum tensile strength heavy duty spring provides a longer lasting spring life, with the proper up-force to ensure reliable feeding and slide stop operation.

# KynSHOT

## Hydraulic Recoil Buffers

The KynSHOT™ hydraulic buffers reduce recoil, muzzle rise and shoulder fatigue allowing for quicker target acquisition after the trigger is pulled. In addition, the KynSHOT buffers control the bolt carrier group operation thereby reducing excessive wear and tear on the mechanical cycling components.

KynSHOT hydraulic buffers are manufactured with premium seals, materials, and components in an aerospace grade manufacturing facility that is dedicated to quality. Each and every one of our product designs have undergone extensive impact, functionality, and life testing to ensure unmatched performance. This results in a product that can withstand and perform in harsh environments, including temperatures from -30°F to 150°F. The patented design and damping technology make the KynSHOT buffers the industry leading recoil mitigation buffer.

# HIPERFIRE® High Performance AR Triggers

## Competition HIPERTOUCH®

- Designed for the Ultimate In AR Performance
- HIPERFIRE®'s Most Popular Trigger
- Virtually No Take-Up/Pre-Travel,
- Very Smooth
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Straight Trigger Bow
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment

## Reflex HIPERTOUCH®

- Everyman's AR Trigger
- Virtually No Take-Up/Pre-Travel, Very Smooth
- Similar to the Competition except with Curved Trigger Bow
- As Run by Keanu Reeves in John Wick 2
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Semi-Auto Single-Stage
- Curved Trigger with a Backbone™
- Crisp, Clean, Trigger Break

## HIPERFIRE® PDI™

- Power Drop-In Trigger
- 2-lb. Pull
- MIL-Grade Hammer Strike, No LPS, Ever
- H&M BLACKNITRIDE+™ Finish
- Exceptionally Smooth Feel
- Enhanced Corrosion Protection
- Polished Look
- PCC Blowback Tough
- Hammer Collision Bumper
- Disconnecter Crash Protection
- Disconnecter Spring Crush Protection
- Curved Trigger Bow with a Backbone™
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment
- Changes the Trigger Lever Length to Further Adjust Pre-Travel
- Position Your Finger in the Same Place Every Time

## HIPERFIRE® X2S™ MOD-2

- Two-stage AR trigger
- Minimal, user adjustable, 2 – 3-pound first stage
- Minimal second stage wall with a 1-1/2-pound weight
- Total 3-1/2 – 4-1/2-pound pull with green or red springs respectively
- Distinct wall between first and second stages allows for effective “prepping” of the trigger for added control
- Clean, effortless break
- Weightless, imperceptible overtravel
- Cam-Over Toggle Engine allows for lighter pull weights without losing hammer strike energy
- Soft Start Lock-Up aids in eliminating rifle “flinch” after the break for more accurate shots at distance

# Emergency AR(epair) Kit

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring.

**19460** **\$19.99**

# MAGPUL PMAG Drums

MAGPUL's PMAG drum magazines are durable, lightweight, highly reliable and made in the USA. The unique drum configuration keeps the height of the magazine manageable and allows for prone firing and easier storage. Features an easy-to-use loading lever, paint pen dot matrix for easy marking, and a rear window for instant capacity indication.

*Regarding GLOCK pistol version: It is recommended that you install a new OEM magazine release on Gen 1-3 GLOCK handguns to support the extra weight of the magazine. Gen 4 GLOCK handguns will require an aftermarket metal magazine release. Installation of a new recoil spring assembly to ensure reliable feeding is strongly recommended. Individual variations between firearms may result in an extra power recoil spring being required. Use of the D-50 GL9 in pistol caliber carbines (PCC) is not recommended, because the increased length of the feed tower will be partially unsupported in most pistol caliber magazine wells. This unsupported condition may cause premature wear on the feed tower magazine catch, and (in firearms which deviate from factory magazine well specifications) may result in improper round presentation and failures to feed.*

### All-in-One Torque Driver Kit

Featuring the Fix It Sticks All-in-One Torque Driver. Tighten down your scope rings, mounts, actions screws, etc. while in the field, at the range, or at home. Kit includes: All-in-One Torque Driver (15 - 65 inch lbs); T-Handle Wrench; 15 different bits: T10, T15, T20, T25, [hex 3/32, 5/64, 1/8, 5/32, 3/16, 2.5mm, 3mm, 4mm, 5mm], P1, slotted #5; 1/2" Socket and 1/4" bit adapter set; and Zippered case with Molded Holder.

29835 \$112.00

### Replaceable Edition Shooting/Hunting Kit

This kit offers unmatched portability, functionality and versatility. Two Fix It Sticks (which combine to form a T-Handle) and 16 bits are held in a molded bracket for portability/storage. Extra room on each end can hold two additional bits. Includes two sticks, bracket, and 16 different bits: 2.5mm Hex, 3mm Hex, 4mm Hex, 5mm Hex, T-10, T-15, T-20, T-25, T-30, 1/8" Hex, 5/64" Hex, 3/32" Hex, 5/32" Hex, 3/16" Hex, Slotted #5, and Phillips #1.

29843 \$40.00

### Mini All-in-One Torque Driver

Tighten scope rings, red dot sights, mounting plates, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 6 - 25 inch-lbs).

29837 \$55.00

### All-in-One Torque Driver

Tighten scope rings, mounts, action screws, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 15 - 65 inch-lbs).

29836 \$60.00

### Scope Bubble Level Set

Level your optics with machined aluminum levels, featuring precise UK-sourced bubble vials. Kit includes: Magnetic level, NATO/Pic rail level/anti-cant device, and Protective foam carrier with pouch.

29839 \$50.00

### Scope Jack

A new way to level your optic, the Scope Jack works with Any 1/4 inch driver to quickly and easily level your scope to your NATO/Pic rail. Just mount the Scope Jack to the rail under your scope and turn the drive handle until the lifting arm engages with the flat section under your turrets. Once the scope is level, maintain pressure while tightening your ring screws to keep optic level throughout the process.

29838 \$44.00

### Bolt Carrier Group Scraper

Custom bit that is designed to clean carbon off the various surfaces of the Bolt Carrier Group. Works with any standard magnetic 1/4" driver. Black Isonite finish for increased corrosion resistance and strength.

AR-15 (Top) 29840 \$10.00  
AR-10 29841 \$10.00

### Glock Tool Kit

Glock tool kit including two custom bits designed to aid in the assembly and disassembly of Glock Handguns / Front Sights. Includes: *Glock Front Sight Tool*, a 3/16" Hex Thin Wall Nut Driver - Integrated magnet holds the screw securely in place. Machined from Solid Steel Bar Stock. Works with any standard 1/4" bit driver. 3/32" Metal Pin Punch - Punch is sized to ensure easy removal of all Glock pins by hand. Machined from Solid Steel Bar Stock.

29842 \$16.00

### Remington Bolt Opener

Access your Remington 700 firing pin quickly and easily in the field with our compact custom bit. Levers the firing pin head with a "bottle opener" action. Molded synthetic polymer bushing protects bolt plug from damage.

29844 \$20.00

## Master Sight Pusher™

The Real Avid Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Master Sight Pusher

16496

\$149.99

## 2" Bit Sets

Expand the bit selection of your **Fix It Sticks** Kit. Bits are all 2" in length. Bits come in molded polymer bit holder that links with other bit holders.

2" Bit Pack, Torx Bits includes:  
T10, T15, T20, T25, T27, T30

29847 \$20.00

2" Bit Pack, Metric Hex Bits includes:  
Hex 2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm

29845 \$20.00

2" Bit Pack, SAE Hex Bits includes:  
Hex 5/64, 3/32, 7/64, 1/8, 5/32, 3/16

29846 \$20.00

S&W Historian Roy Jinks setting at D.B. Wesson's desk in his recreation of D.B. Wesson's office.

# The Father of Smith & Wesson Collecting

Roy Jinks invites *The Blue Press* into his inner sanctum where he recreated D.B. Wesson's office

**By Cameron Hopkins, Photos by Ichiro Nagata**

A collector becomes a living repository of arcane details, obscure facts and little-known trivia. It's this attraction of adding to the body of knowledge that drives the most accomplished collector I've ever met, the official historian of Smith & Wesson, Roy Jinks.

A tall, affable man who exudes a blend of scholarly wisdom and childlike exuberance, Roy began his life's work of learning and teaching about Smith & Wesson in 1959 when he found himself at an NRA Convention answering historical gun questions in the Smith & Wesson exhibit. The company executives were so impressed with the bright, eager young man that they put him to work in 1963 answering mail as a more or less semi-official company expert. He was offered a full-time position as the Smith & Wesson historian in 1970. He was employed by the Springfield gunmaker for over 40 years, or Roy jokingly adds, "Through eleven presidents and five owners."

Roy was a founder of the Smith & Wesson Collectors Association in 1964. He has amassed the finest Smith & Wesson collection in the world, a breath-taking panoply that includes not only one-of-a-kind rarities but also

filing cabinets full of correspondence, literature, advertising and all manner of memorabilia.

There's a letter from General George S. Patton when he ordered his .357 Registered Magnum from Smith & Wesson. There's a note from J. Edgar Hoover when the FBI ordered Smith & Wesson revolvers for every Special Agent. There's an invoice to Buffalo Bill and an acknowledgment from Winston Churchill. The files bulge with correspondence from presidents and czars, kings and princes, sultans and potentates.

Clearly guns fascinate Roy, but so too does the history of Smith & Wesson. The company was founded in 1852 by D.B. Wesson and H. Smith, but it was Daniel Baird Wesson more so than Horace Smith who was to drive the company forward. Horace was 18 years older than D.B., more of a father figure and considerably more conservative. Smith was the manufacturing guy, focused on the tidal wave of changes brought by the industrial revolution and how to use them to produce D.B.'s inventions more efficiently.

## The Gun Guy

D.B. was the gun guy. He apprenticed with his brother

**The “finest gun ever made in America,” Horace Smith’s Model 1-1/2 made for the Paris Exposition in 1867.**

Edwin who was a renowned rifle maker – “The finest percussion target rifle maker in America,” Roy said – and then went to work in the Whitney Armory. He was fascinated with repeating firearms and developed a lever-action handgun that was dubbed the Volcanic by no less an admirer than *The Scientific American* because it poured forth fire “...like a volcano.”

Another gun guy, Oliver Winchester, saw the potential for D.B.’s lever-action mechanism, so he bought the patent rights and the original Smith & Wesson company, and changed the name to the Volcanic Repeating Arms Co. It would form the foundation for Winchester’s long association with lever-action rifles. After a succession of name changes the Volcanic Repeating Arms Co. became the Winchester Repeating Arms Co. in 1866.

Meanwhile, D.B. and Horace started afresh with an even better idea. They obtained an exclusive license from Rollin White to manufacture a revolver with a bored-through cylinder, something that Samuel Colt had neglected to include in his revolving cylinder patent, which by now had expired anyway. The result was the Smith & Wesson Model One, a seven-shot .22 rimfire. It was enormously popular in that it was small, easily concealable and – uncommon in the era – waterproof.

When the Civil War broke out in 1861, Smith & Wesson was selling trainloads of White-patent, bored-through-cylinder revolvers. By the end of the war in 1865, D.B. and Horace were the only residents of Springfield,

Massachusetts to each earn a six-figure income, according to a report in the Springfield newspaper of the day which listed the incomes of the city’s most prominent citizens. D.B.’s paycheck was \$165,000 that year which, allowing for inflation and factoring in the buying power of gold in his day, equates to approximately \$19 million today.

Make no mistake, D.B. and Horace were rich men. In the 1870s, D.B. bought out Horace, the first and last Smith to ever work at Smith & Wesson. Out of respect and loyalty, D.B. continued with the name Smith & Wesson.

### **The Inner Sanctum**

“You want to see the finest gun ever made in America?” Roy asked with a glint in his eye. “It’s a Model 1-1/2 that belonged to Horace Smith. He had it made for the Paris Exposition in 1867. It’s engraved by Gustav Young.”

I was inside Roy’s walk-in gun vault, which is accessed behind a hidden section of oak paneling in his office. The office is no ordinary place of work, it is D.B. Wesson’s very office from the original Smith & Wesson factory. When the company moved in 1950 to 2100 Roosevelt Avenue, the factory was left abandoned except for D.B.’s office which was used by the Lady Garment Worker’s Union. When the city decided to build a new street through it, from its original factory, Roy made special arrangements with the city to lease the old building for one week for the sum of one dollar. He had a plan.

In that week, skilled carpenters painstakingly removed every nail and every board from D.B. Wesson’s office.

A S&W Model 3 revolver (top) and a Schofield.

They took everything that was and was not nailed down – the fireplace, the rugs, the desk, even the pen D.B. used to sign checks.

D.B. Wesson's office was literally reassembled in Roy's house. The desk is D.B.'s desk. Inside the drawers are notebooks and pens and paper clips and all the typical detritus of a desk, exactly as it had been when Doug Wesson, the last of the Wesson family to own the company, last sat there. In one corner is an original crate that was used to ship a dozen Schofield revolvers out West to the Indian Wars. There, above the fireplace, is the very hand-carved S&W "meatball" logo that D.B. ordered.

But the real treasures lie inside the vault. Roy plucked gun after gun to share with me. The finest gun ever made in America? It was Horace Smith's ornately engraved Model 1-1/2 from the Paris Exposition.

And with that, Roy handed me a velvet fitted box with the Gustav Young engraved revolver once owned by Horace Smith. I was holding the finest gun ever made in America, the gun that Ulysses Grant had admired, the gun that so impressed the Czar of Russia that he commissioned his very own model and caliber, the gun that

put Smith & Wesson on the global map. I admired it and handed it back to Roy with all the care of a heart surgeon.

Roy showed me a percussion rifle that was handmade by D.B., serial number 48. He unveiled a pair of percussion pistols, the first pair of pistols ever built by D.B., his so-called "apprentice guns" that he built when he worked for his brother Edwin Wesson. He thumbed through his files and pulled out a letter from Annie Oakley and a picture of Ike, both Smith & Wesson customers.

You marvel at this room of unfathomable magnificence full of so many splendid guns and you wonder... which one is Roy's favorite? "If I had to pick one gun that had quality and craftsmanship, it would be the Model Three American. The other gun that enamors me is the Triple Lock, but if you want to know what's the best gun D.B. ever made, it's this one...." Roy said as he reached for a side-by-side shotgun with what appeared to be Damascus barrels.

"This is a 12-gauge shotgun made by the Wesson Firearms Company. Those aren't Damascus barrels, they're laminated steel. You look at the fit and finish, the detail work, and you'll see that these shotguns were every bit the equal of the best British shotguns. In 1870 when it

was made, a Wesson shotgun sold for \$270, the same as a Purdey or a Holland."

I walked like a zombie from Roy's vault, a vacant stare, mesmerized, reeling from sensory overload. I felt gorged, like I'd eaten the most decadent meal ever served. At the same time, I felt peculiarly guilty, like a voyeur who's seen something he shouldn't. I'd held C.S. Axtel's gold medal, felt the cool steel of D.B. Wesson's gold-plated Model One First Issue, seen General George Custer's order from Tiffany's for a pair of Model Two Armies.

Roy Jinks has poured a lifetime of effort into Smith &

Roy with a percussion target rifle made by D.B. Wesson.

D.B. Wesson's gold-plated S&W Model One first issue.

Gold-plated and engraved S&W First Model Hand Ejector.

Wesson. His devotion, passion, dedication and custodianship assures that future generations will benefit from the things that have given him so much personal enjoyment and edification. Roy's collection is a thing of importance, and it's much more than a room full of guns.

*Roy G. Jinks was presented with the Outstanding American Handgunner Award in 1994 for his lifetime work to promote handgun shooting and his work as Smith & Wesson's historian. His published works include: **A History of Smith & Wesson** and **Smith & Wesson 1857-1945** and **Smith & Wesson**.*

S&W's reception room recreates the mood of a bygone era.

A gold-plated S&W Safety Hammerless.

C.S. Axtel's Gold-Medal winning gun from the 1908 Olympics.

# BLADE-TECH™

## BLADE-TECH "Signature" OWB Holster

Over the last 21 years Blade-Tech has been dedicated to perfecting the OWB holster. In collaboration with industry leading polymer experts, Blade-Tech created an incredibly strong proprietary blend of polymers, that allowed them to precision mold the "Signature OWB holster" with extreme accuracy for a perfect fit every time! Features a positive lock trigger guard, adjustable retention screws and Tek-Loc™.

# 5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

# BLADE-TECH™

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

# Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

19495 \$9.99

# Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

# What is Talent?

By Duane Thomas

I've had people say to me, many times, "You're obviously a talented shooter." To most people "talented" seems to mean "has a high skill level." But what exactly is this wonderful attribute called "talent"? This is a topic I've given quite a bit of thought. What makes a talented shooter? Can we break that down and define it? I think so.

I was the firearms instructor at a local shooting range for eight years. In that time, I taught something over 600 people how to shoot, from the basic through reasonably advanced level. That's a drop in the bucket compared to some instructors, but it did allow me to watch quite a few people, most of whom had never fired a gun before, do it for the first time. I got to see how they approached the experience, how they reacted, and I formed some opinions based on that data.

Very occasionally, I'd have a student who just GOT it, they'd begin shooting, right off the bat, with no prior experience, at a much higher level than other people. Anyone who can do that, I consider innately talented.

I'd get one person like that, on average, about every two months. So, I started watching those people, trying to figure out what differentiated them, what allowed that sort of performance. And I began to notice they all had certain things in common.

## GENDER

To start with, we can rule out gender as a factor. There's a stereotype that, when it comes to shooting, women make better students than men because they have no ego investment in the process. Another stereotype says men make better students because they're physically stronger, and in shooting, upper body strength counts. I did not find either of those things to be true when it came to shooting well from the start. My "immediately surprisingly good" students were equally divided between men and women.

## INTELLIGENCE

We can also factor out high I.Q. as a prerequisite to be talented. While none of my "immediately good" new shooters were dumb, having an exceptionally high I.Q. was not necessary to begin shooting at a higher-than-normal level.

## HAND-EYE COORDINATION

So, if gender and high I.Q. didn't make a difference,

what did? What traits did every single "talented" shooter possess?

To start with, whether they knew it or not – and they didn't – they all had excellent hand-eye coordination. Without exception, this was NOT correlated to them having serious previous experience playing a sport.

One thing I used to do during a basic pistol class was talk about how cartridges are put together, both rimfire and centerfire. To demo the rimfire cartridge, I would disassemble a round of .22 Long Rifle and, among other things, tell them how it operated through having a ring of priming compound around the rim of the cartridge, inside

the case. I'd hold it up to my eye and say, "If you look, you can actually see it." I'd put the case down on the table in front of them, and say, "Here, look at it yourself." Then I'd watch how they picked up the case and put it down again afterward.

It is absolutely amazing how complicated most people can make picking something up and putting it down again. Reaching for it, their hand moves to one side, then to the other, then up, then down, quite possibly doing that several times, describing

this complex track to the case, before finally picking it up. Then the same thing, bringing it up to their eyes. Then yet again, setting it down.

But occasionally, just occasionally, I'd get a person who reached for the case in a straight line, brought it up to their eyes in a straight line, set it back down in a straight line. Fast, smooth, efficient. Before we even got to the live-fire shooting portion of the class, I knew this person would be one of my "immediately good" shooters. (Over an eight-year period, this only failed once, more about which shortly.) These were people with an innate sense of how to perform a physical task with the minimum amount of movement, the minimum amount of effort, necessary and no more. That's a huge advantage when it comes to developing any physical skill.

## FEAR

My "immediately good" shooters were not afraid of the gun. They just approached things very matter-of-factly. Therefore, they didn't have to overcome the fear-block, with which most people have to deal, while learning how to shoot. The one person I mentioned previously who, though they had great hand-eye coordination, did not do

well at actually shooting, had this working against them: they were scared of the gun.

### SYNTHESIZING NEW INFORMATION

All my “good” shooters had a superior ability to absorb new information and translate it into physical action. As instructors we tell people, “Hold the gun like this, stand like this, manipulate the trigger like this,” etc. But somewhere between our telling them, and them practicing it, then having to do it for real, it kind of gets lost. Then there are the people we tell, “Hold the gun like this, stand like this, manipulate the trigger like this,” etc. and they just... hold the gun like this, stand like this, manipulate the trigger like this, etc. That may sound simple, but I assure you, it is rarer than we might think.

### MIMICRY

While it’s not an absolute prerequisite, one trait frequently possessed by my “immediately good” new shooters, they tended to be excellent mimics. Again, generally they didn’t realize this.

We all know the stereotype – someone wants to learn how to dance, they go to a dance school, the instructor shows them the footsteps on the floor, and demos the dance. For some people, learning how to move their feet the same way requires multiple practice sessions, hours, days, weeks of repetition, before finally something in their mind clicks and they can do the dance. Then we have the people who watch the instructor do the dance once or twice – boom! – they can do it themselves. If they can see it, they can replicate it.

For this reason, I’ve never agreed with firearms instructors who refuse to demonstrate techniques themselves, live fire. To start with, that shows they lack faith (1) in their own ability to execute on demand, (2) that the techniques they’re teaching actually work. On top of that, let’s assume for a moment their techniques do work, and they can execute them, they are robbing students who are great mimics of an invaluable resource to learn new skills.

I’m cross-dominant, right master hand, left master eye. Thus, when I shoot, I turn my head one inch to the right, to bring my left eye in line with the sights. In basic classes, I always taught stance before sight alignment – and part of teaching sight alignment was figuring out which was the shooter’s master eye.

So, comes the day I’m teaching this one student, I’ve demoed the stance, I say to her, “Now you try it.” And she instantly falls into this absolutely perfect rendition of my stance, including having her head turned one inch to the right. It was eerie. I said, “Okay, we haven’t gotten yet to the point where we figure out which is your master eye, but obviously you already know it’s your left eye.” She said, “No, I’m doing it this way because that’s how you do it.” Turned out she was actually right-eye dominant, and we had to modify the technique a bit to work for her.

Bottom line, this person was an excellent mimic.

Again, I’m not saying this is an absolute prerequisite to being talented, to instantly begin performing at a higher-than-normal skill level when learning how to shoot, but there’s no doubt it helps.

### SO, WHAT IS TALENT?

I would say, when it comes to learning how to shoot, if a person has great hand-eye coordination, if they’re not afraid of the gun, if they have a superior ability to absorb and synthesize new information, and especially if they’re an excellent mimic, I consider that person talented.

### HOW IMPORTANT IS TALENT?

People who have a high skill level at anything don’t tend to like the T-word. They don’t appreciate being told, “You’re obviously talented.” To them, that’s a cop-out, that’s failing to acknowledge the hard work they’ve put into building their skill level. From their perspective, other people think they just happened to be born with this magical property, talent, that makes everything easy. In some cases, people actually do believe that.

However, in my opinion, good shooters sometimes take this rejection too far. I’ve heard it over and over again: “There’s no such thing as talent. There’s just a lot of hard work.” The subtext being, “If other people worked as hard as I have, they could do same things I can.” Because good shooters have had to work hard to attain their skill level, they think it’s all about hard work. The idea they might have started out with certain advantages – great reflexes, great hand-eye coordination, even a superior ability to absorb and synthesize new information and translate that into physical skills – never occurs to them.

The truth is, it’s not all talent, and it’s not all hard work. It’s both. You show me someone who is a world-class anything, a champion, and I will show you someone who started out with certain physical advantages, then worked their butt off to build on that.

Now, if you don’t start out with those advantages, does that mean it’s over before you even get started, you might as well forget ever being great? It does not. Because practice does count. There are way too many people in the world who rely on natural ability but are too lazy to work at developing that into a real skill level. In shooting, I call these people Flash Shooters. Because they’re flashy. They have great reflexes, great hand-eye coordination, they can make the gun fire really fast. It *looks* impressive. It *sounds* impressive. Then you check their targets afterward and realize they literally haven’t hit anything. Not. Even. Once. And if they do, on occasion, it was some peripheral hit that occurred completely by accident.

The talented slob is so common as to be a stereotype of its own. The person who starts out with average physical gifts but works hard can walk all over a talented slob. BUT – and this is important BUT – there’s nothing stopping the person who started out talented from working hard either. And if they do, that’s when we wind up with people who are very, very difficult to beat.

# MAGPUL Magazines for GLOCK® Pistols

## GUN-MAX™ GUN OIL

Gun-Max's advanced gun-metal grade formula sets a new standard for protecting, lubricating and cleaning modern guns. Powerful inhibitors displace moisture delivering extended corrosion protection. Advanced anti-friction additives bond to metal surfaces for longer lasting lubrication of moving metal parts. Maximizes performance of semi-auto guns with high cycle rates. Formulated to excel in sub-zero temperatures and harsh operating conditions.

12oz can Gun-Max **40214** **\$13.99**

## Real Avid VIZ-MAX™ Bore Sighter

## Real Avid Smart TORQ™

### THE FAST, EASY WAY TO ACCURATELY BORE SIGHT YOUR RIFLE.

Viz-Max™ is a revolutionary, yet uncomplicated, next generation V instrument. No more fumbling with extra pieces and underpowered lasers to find your mark. Housed in the rugged and protective exoskeleton is a precision machined, factory calibrated laser. The laser projects a powerful green dot providing maximum visibility and quick acquisition. The bore attachment is fast and easy with the hold-fast neodymium magnet.

**10134** **\$129.99**

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

**21776** **\$79.99**

# Real Avid MASTER GUN VISE™

## MULTI-AXIS BENCH-MOUNT VISE WITH TORQ-LOK™

One vise to rule them all. The first real bench vise made exclusively for guns and gun tools. Whether you're building and customizing, repairing and cleaning or mounting scopes and accessories, this vise improves every part of the GUN DIY® experience. Quickly reposition your gun to any orientation without ever removing it from the vise. Insert the Torq-Lok pin for applying heavy force. Use the removable and reversible Gun-Fit jaw sleeves (*not pictured*) for a specific gun grip or turn the leveling knob for simple scope mounting and leveling. Build. Customize. Repair. Mount. Clean. All hail the King....

10135

\$299.99

## Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

## Real Avid LUG-LOK® Upper Vise Block

Real Avid designed an upper block that leverages the strongest part of the gun – the barrel lugs inside the star chamber. The Lug-Lok is precision machined and precisely fits into all Mil-Spec uppers. It mates perfectly with the barrel lugs, while allowing you to rotate the upper to be able to work on different sides. The Lug-Lok is the safest, easiest and smartest way to lock down an AR15 or AR10 upper into a bench vise.

# Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted

practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Level-Right PRO

# Real Avid ARMORER'S MASTER KIT™

This kit of Master Grade Tools and how-to information equips you to confidently tackle everything from building your own gun from the ground up to customizing or modifying an existing gun. With better tolerances, materials and expanded capability, every tool is carefully designed to make each job as simple and easy to execute as possible. Housed in a professional tool case and equipped with step-by-step instructions, you will be able to work smarter and create better guns regardless of your experience level.

31401 \$279.99

## ARMORER'S MASTER WRENCH™

The Real Avid Armorer's Master Wrench features best-in-class strength, precision fitment and ergonomic intelligence. Wrenches seat squarely for a no-slip fit on stubborn barrel nuts, castle nuts, muzzle brakes, or fixed stock receiver extensions. Industry first torque wrench attachment location is optimally positioned to provide consistent torque for all nuts. As a bonus, interchangeable hammer heads make the Armorer's Master Wrench a "Master" hammer as well! This is the right tool for the job... and for you.

31402 \$79.99

## BORE BOSS®

The single piece Dual Action Cable with integrated phosphor bronze brush and braided mop wraps around the unique Flex-Case Handle to keep the system stowed and organized. To use, simply flip, feed, clip and pull. Throw it in your pack, or put it in your pocket. It's the next best thing to a self-cleaning gun.

## AR15 FRONT SIGHT ADJUSTER TOOL

This smartly designed tool makes front sight adjustments quick and easy. The stainless steel shaft is knurled to create no-slip leverage when turning tight posts. It works on both A1 & A2 front sights and the compact design won't clutter up your bag.

31403 \$9.99

## THE AR15 SCRAPER™

### PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR15 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR15 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 12 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31404 \$19.99

## THE AR10 SCRAPER™

### PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR10 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR10 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 11 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31405 \$19.99

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$24.00

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

15 Oz. 19234 \$24.00

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$28.00

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$22.00

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$21.00

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$24.00

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$14.00

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$17.00

**MIL-COMM**  
Extreme Performance Lubricants

**TW-25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe	15732	\$14.99
1.5 Ounces	15731	18.99

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	15571	\$7.99
Slide-Glide Lite	15572	7.99

## Sweet's 7.62

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia.

13128 \$12.99

# Justified Defensive Concepts, LLC

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the **ONLY** target you'll need for your shooting session.

11713 \$19.99

## TCRT

### Advanced Ballistic and Engineered Solutions

TCRT targets are made of Linagard® Ballistics FR™ rubber, a purpose designed ballistic rubber.

The TCRT targets can be shot with solid pistol, rifle and shotgun ammunition – from .177 to 00 buckshot.

- Safe for indoor and outdoor use
- Self-healing – Extreme stretch of over 833%
- Can be painted to further highlight hits
- Will withstand very high shot count before requiring repair
- UV and ozone stable

# An Open Letter from Author Alan Korwin

In addressing gunless people with little real understanding of our rights to arms, I have found it helpful to disarm their penetrating fears by addressing basic issues in ways they can comprehend. I welcome you to adopt as much of this as you can in dealing with deniers of our rights and **The American Way**.

First, because it's not good to hate, expressed hatred or anger will cut my talk short. Second, because discussion of political candidates is divisive, this focuses only on issues.

**I'm a Utopian Pacifist.** I support no weapons of any kind on the surface of the Earth, in an era of enduring peace, prosperity and abundance.

It turns out this is impossible (Utopian) while the four horsemen of human havoc exist – angry, hungry, stupid, and wicked.

So, I support disarming everybody, **bad guys first**.

Until then, I find it hard to justify disarming **any** innocent sane person.

...

If we could wave a wand and make guns disappear, the brutal communist Chinese dictatorship would make new ones. And the Italians (Beretta), Brazilians (Taurus), Russians (AK-47), Austrians (GLOCK) – all the armed nations would be in business making the iron river. Including basement tinkerers.

Wands are fiction but you can imagine a gun-free world – just go back to pre-gun times. What you get is Genghis Khan with rampaging hordes, Julius Caesar and Roman Legion crucifixions, Vlad the Impaler, universal serfdom and endless millions horribly murdered. A gun-filled world is actually more civilized, with safer neighborhoods – even though evil criminals rampage all the time. Guns help control them. A gun-filled world is actually more civilized than a gunless one, with sword-bearing bad guys committing slaughter.

Most people are misled about guns for two reasons. One, you get no education on the subject, and two, because if it's in the news, and it's about guns, it's probably 100-percent wrong, leaving you misinformed. For example, we saw saturation coverage recently about

four people shot in Philly. They weren't shot, they were **murdered**. Media's subtle word choices affect everything. Shooting is a **sport**; murder is a **crime**.

Your entire perception shifts when you confront the criminal act, which media for complex reasons disguises or avoids. Seven thousand inner-city murders annually aren't solved, prosecuted – or covered. How would your perception shift if *that* got saturation coverage? When so-called gun control becomes crime control, we'll have peace.

One million DGUs (Defensive Gun Uses) every year are censored. How would our perceptions change if we faced saturation coverage of lives saved and crimes prevented by the presence of a citizen's gun, which

more often than not isn't even fired? You benefit from armed citizens – a serious crime deterrent, hidden from view – the “free-rider” effect. Police call those vanquished criminals “the good-riddance factor.”

This is also a medical problem, hoplophobia – which is fear of weapons – which the DSM (Diagnostic and Statistical Manual of Mental Disorders), and legacy media obscures. The inaccurate easy focus on guns should be on criminals, and mental derangement, and lack of impulse control. Criminal ideation, which is

not just shown but promoted in modern media plays a role as well.

America basically has two camps: The “just leave us alone,” camp, and the “We want to control you” camp. These are irreconcilable human and political characteristics.

If you ever thought, “they should just take all the guns away” – aside from how could that be done against armed people – who is “they”? Who makes them give up *their* guns? Should we just leave all “them” armed because police are so good? That balance of power between armed “officials” and the public is what created the most free nation ever known.

Look deeper at crime prevention for a moment. That, and self-defense, are honorable things, recognized since the Bible and Code of Hammurabi. Innocent life and

**“A gun-filled world is actually more civilized than a gunless one, with sword-bearing bad guys committing slaughter.”**

your homes are precious. They need protecting. Strict self-defense laws are clear, logical, proper and deserve support, especially considering corruption in leadership and judicial systems. Angry, hungry, stupid, and wicked people are a relentless threat.

Now, you're free to non-violently "let the lion eat you," and your family, and I support this. It's a question of free choice and pacifism. You can also use anything at hand, or the best things available, to protect yourself and survive – at your option. Do nothing and perish if you choose, saving the lions. But it is unjust and tyrannical to compel others to die for lack of proper tools or an arbitrarily imposed morality.

When thoughts turn to banning arms "for safety," remember: In dictatorships the spoken word is recognized as *more dangerous* than arms. "We would not allow ourselves to be challenged with guns, why would we

allow that with words, when that is far more dangerous."

– **Josef Stalin**

A closing thought about news reports: Watch out for "we" and "I think" and saturation coverage. These are clues that you're not getting news. "I think" means

news has ended and opinion follows. Read that line again. And always ask yourself who "we" is and their agenda. Also, distinguish between conspiracies which are constant (e.g., government agencies colluding with big tech to affect elections) and conspiracy theories (like a secret society eating babies in a pizza-parlor basement) which are lunacy.

# A Die Hard Christmas Story

The quintessential  
mid-1980s-flavor  
AP-5 Nakatomi  
Plaza starter pack.

## By Mick Bjelopavlic

There are certain irrefutable facts in life. Two such facts are that the MP5 is a truly iconic firearm and that “Die Hard” is a Christmas movie. So, it was fitting that three days before Christmas last year, I picked up an AP-5 pistol. Ho, ho, ho! Now I have an AP-5!

The AP-5 is manufactured by *Makina ve Kimya Endustrisi* (Mechanical and Chemical Industries), otherwise known as MKE, in Turkey. MKE’s history can be traced back to the 15th Century, when the Royal Arsenal was built to manufacture cannon, powder and shot for the then Ottoman Empire. In 1832, it became the Arsenal of Ordnance and Artillery Marshalship, until 1923, when it was reorganized into the General Directorate of Military Factories. MKE was then formed in 1950 from a reorganization of the Turkish Defense Industry. Today, MKE is owned by the Turkish Ministry of National Defense and manufactures for the Turkish armed forces (and exports) everything from small arms and ammunition, through to artillery shells and self-propelled howitzers, aerial bombs, rockets, and explosives.

The relationship between Turkey and the German arms industry dates to 1887, when the first of 270,000 Mauser Model 71/84 rifles were delivered to Turkey. Turkey continued to import Mauser bolt action rifles from Germany (with whom it was then allied) of various types through World War 1. During WW2, Turkey remained neutral, and began to assemble and manufacture its own Mauser rifles.

Upon joining NATO in 1952, Turkey turned to fellow alliance member West Germany to help modernize their military. In 1967, Turkey adopted the HK G3 rifle and began license manufacture in 1968 at MKE in their Kirkkale Small-Arms Weapons Factory.

Following the success of the G3 rifle, Heckler and Koch (HK) began work in 1964 under the auspices of their Project 64 program to develop what was to become the MP5 submachine gun. Essentially a scaled down G3 roller-locked action chambered for the 9x19mm NATO

cartridge, the MP5 was introduced in 1966 and has gone on to be adopted by countless military and police units in countries spanning the planet. One of those countries was Turkey, whom HK granted a license, tooling, and technology transfer to MKE who began local manufacture of the MP5 family in 1985. As such, the MKE manufactured variant is a mid to late 1980s’ product, just like the movie “Die Hard.”

Century Arms imports the semiautomatic AP-5 and variants directly from MKE as pistols, and they are sold with a simple end cap on the rear of the receiver. They also used to be sold with optional pistol stabilizing braces, until the recent 2023 BATFE Brace Ruling (more about that later). As a pistol, this meant that under US import laws, the AP5 was allowed to be 100-percent

manufactured in Turkey.

The AP5 is the classic full-size version of the MP5, with an 8.9-inch chrome-lined barrel that is topped with a tri-lug mounting system as well as 1/2x28” threads to easily mount flash hiders and suppressors. The polymer handguard is the military slim type, and the grip housing is of the original HK “SEF” (*Sicher – safe, Einzelfeuer – single fire, Feuerstoss – burst fire*) style configured for right-handed use and uses polymer construction (yes, the MP5 submachine gun used polymer grip housings from the start, unlike the older US semi-automatic HK94 imports) and is attached to the receiver via two push pins in the same manner as the submachine gun version. The factory SEF style grip housing can be replaced

**AP-5 polymer grip housing (top) compared to late HK G3 “Navy Style” ambidextrous S-E-F polymer grip housing.**

**To fit to the AP-5, trim the length of the G3 housing to match the AP-5 and swap over AP-5 trigger components.**

with a surplus HK G3 Navy Style housing (just cut off some the rear tang to fit the MP5) or one from Magpul for those wanting a more modern look better suited for ambidextrous use. Magpul ([www.magpul.com](http://www.magpul.com)) also makes an extended ambi-safety compatible with SEF style grip housings. Original MP5 safeties are very difficult to reach for those of us with normal-sized hands, so the Magpul upgrade is a blessing.

Spend any time around HK type roller-locked firearms, and the subject of weld quality will invariably come up.

G3 and MP5 receivers are formed from a steel stamping to which the cocking tube, rear sight base, front trunnion, and other components are all welded together. Welding quality can vary from gun to gun – the weld quality on this MKE is outstanding, showing that it was put together by someone skilled at their job. As a point of comparison, I have inspected German-manufactured guns (including PSG-1 sniper rifles) where the welds were aesthetically challenged. They all functioned fine, despite that.

On January 31, 2023, the BATFE reinterpreted stabilizing braces as stocks, declaring all such equipped firearms as unregistered SBRs. As such, owners had until May 31, 2023, to either remove the brace or register as an SBR, during which time the \$200 tax would be waived. In addition, BATFE declared that Rule 922r (which specifies minimum needed US parts count to be compliant, which is six US parts in the case of the MP5) would not apply, since the firearm was already in an SBR configuration, and that the owner would not be “constructing” a new one. Also, no additional markings or engraving were required (when constructing an approved, registered SBR, the manufacturer/owner needs to engrave their details on the receiver or barrel). This meant that in the example of this AP-5, after receiving BATFE approval (which took about 45 days), an MKE-manufactured 2-position A3 collapsible stock was acquired from Atlantic Firearms ([www.atlanticfirearms.net](http://www.atlanticfirearms.net)) and installed in place of the brace, the result being a 100-percent factory MKE SBR. The MKE A3 stock is built identically to the German made version. Original style MP5 A3 stocks have become increasingly harder (and expensive) to obtain, so the supply of MKE parts is most welcome.

Out of the box, the AP5 had a 2-stage trigger that required 8.5 pounds of pressure to actuate, with a distinct wall at the second stage and a hint of stacking prior to hammer release. The reset is positive and goes back to the second stage. The feel is much like a GLOCK trigger with the plus connector installed. For those wanting a lighter pull, Timney ([www.timneytriggers.com](http://www.timneytriggers.com)) makes an SEF style compatible match trigger, which also counts as four US-made parts (hammer, trigger, sear,

housing) for 922r compliance for those who need it.

Shooting the AP5 is a very pleasurable experience, with a very light recoil impulse, making for fast follow up shots despite the trigger being on the heavier side. Upon firing, cylindrical rollers in the bolt head at the 9 and 3 o'clock positions engage recesses in the barrel trunnion, keeping the bolt closed until the bullet exits the barrel, whereupon the recoil forces continue to push the bolt assembly to the

rear to complete the extraction and ejection cycle. To aid extraction, the barrel chamber has cylindrical flutes or grooves, allowing propellant gases to effectively “float” the case, thereby giving fired cases their characteristic “HK stripe” pattern. This system allows for a much lighter bolt mass, especially compared to traditional blowback operated submachine guns and PCCs. The AP5 bolt mass is 10 ounces due to the roller-locked action versus around 22 ounces for a typical AR-pattern PCC, which translates to much lower felt recoil.

The MP5 was designed around the 9mm NATO 124-grain FMJ round and the AP5 chewed through multiple hundreds of 124-grain rounds of various brands with no malfunctions. The MP5 system is not without its shortcomings, however. Primary among those is the lack of a last-round bolt hold open, as the MP5 and its magazines were never designed to have one. Upon the inevitable click from an empty chamber, the HK manual-of-arms calls for the bolt to be locked to the rear, the empty magazine removed and a fresh one inserted, after which the operator applies the “HK slap” to close the bolt and charge the firearm. Performing a tactical reload on a closed bolt with chambered round requires the operator to slap the bottom of the fresh magazine like it owed them money – downloading by a round or two can help in that process for those with more tender hands.

To sum up, if Ralphie Parker from “A Christmas Story” had watched “Die Hard,” it wouldn’t be the Red Ryder BB gun he would have wanted – he would want to be John McClaine with the AP-5, kicking off the Holidays with the falling of Hans Gruber from the upper floors of Nakatomi Plaza. Yippee Ki-Yay! and a Merry Christmas to all!

**The AP-5 barrel is chrome lined and topped with a tri-lug mount as well as 1/2x28” threads covered with a protector to allow mounting of flash hiders and suppressors.**

**The MKE two-position A3 collapsible stock is true to the German original.**

# C-More Systems

RTS2R

Railway

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

Stackable Utility Box 40194 \$20.99

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

# DILLON: A MEMOIR

**R**ead the story of Mike Dillon's journey from washing aircraft for a crop-dusting company, to airline pilot, to creator of The World's Finest Loading Equipment, and ultimately, to the man who revolutionized the M134 Mini-Gun!

Along the way his adventures included restoring a P40 Warhawk, fighting wildfires in WWII-era bombers converted to drop fire retardant and writing articles about flying warbirds for *Air Progress* magazine.

Not content to rest upon his laurels for creating the World's Finest Loading Equipment, Mike finished out his career by re-engineering the M134 Mini-Gun, helping to arm the US and its allies to fight the War on Terror across the globe.

Mike's memoir is a compelling read: the story of a man who believed he could do anything he set his mind to, and actually did it!

*Pictured here are the original 1928 Navy Overstamp Thompson submachine gun Mike inherited from a friend who died in a tragic plane crash and a Star Machine Works reloader with Mike's "Super Star Conversion." These two items inspired Mike Dillon to found his own reloading equipment company. Read the book for details about how it happened.*
