**ATTENTION DILLON CUSTOMERS:** Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

# Dillon's Bill of Rights for Reloaders

**All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:**

- 1. Right of Quality** – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.
- 2. Right to Test and Send-Back** – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.
- 3. Right of Service** – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.
- 4. Right of Warranty** – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*
- 5. Right to be Heard** – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

**Editor's Note:** The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered.

We constantly strive to live up to his standards.  
Please let us know if we're not succeeding.

# Rapid Trim 1500 Case Trimmer<sup>^</sup>

Dillon's  
RT 1500  
shown  
installed  
on an  
XL 650.

The RT1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT1500 is equipped with a

quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT1500 Case Trimmer **62164** is **\$435.00**. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **\$25.00** each. Upper lock rings, **13559**, are **\$9.00** each.

## MILITARY BRASS?

**Eliminate the "Grunt Work" with Dillon's Super Swage 600**

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system

assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

# Case Preparation Equipment

### CV2001 – The Industry Standard

Dillon’s CV2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no “hobby” machine! The bowl and base are constructed of 7/32” thick injection molded high-strength polypropylene which is impact and abrasion resistant.

### Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10” x 14”,

**Rapid Polish 290** is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You’ll use less each time you clean your cases.

*Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases!*

*Rapid Polish 290*

8 oz. bottle.	<b>13804</b>	<b>\$9.99</b>
Case (20 pc.)	<b>20255</b>	<b>149.99</b>

Dillon’s **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you’ve done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you’re ready to load. Try a bottle. You’ll never use a grease pad again.

8 oz. bottle	<b>13733</b>	<b>\$15.99</b>
Case (20 pc.)	<b>20256</b>	<b>223.99</b>

10 bottles of polish/10 of lube^	
Case (20 pc.)	<b>21375      \$186.99</b>

### Vibratory Case Cleaners Case/Media Separators

<b>CM2000 Case/Media Separator ^</b>	<b>20675</b>	<b>\$125.00</b>
<b>CM500 Case/Media Separator ^</b>	<b>21045</b>	<b>\$89.00</b>

and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18” x 22”. The tub keeps the mess off the floor and bench. It’s fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

### Limited Work Space?

Dillon created the CV750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV2001 and is every bit as tough – just more compact. To accompany the CV750, the CM500 does the same job as the larger CM2000 Case/Media Separator; and, like the CV750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV2001 ^, US 110v	<b>20493</b>	<b>\$290.00</b>

## Don’t Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.

12-pound bucket    **13287      \$24.50**

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!

10-pound bucket    **13496      \$16.50**

# DILLON: A MEMOIR

**Reviewed by Duane Thomas**

*Dillon: A Memoir*, a biography of Mike Dillon, subtitled *A Life of Warbirds, Reloaders & Machine Guns* is divided internally into four main sections:

*Early History* deals with Mike's childhood and family life, most importantly meeting and marrying his wife, Carol. I found it highly amusing to read that initially Carol's parents did not approve of her engagement to Mike Dillon. Surely their beautiful, highly educated, school-teacher daughter could do better than a guy whose idea of a worthwhile job was flying a biplane really low over cotton fields and dumping pesticide on them. They would have needed to be psychic to realize that one day this man would be a self-made multi-millionaire.

*Warbirds* is plane-centric and covers Mike's hobby of buying and restoring old World War II military aircraft, his time flying fire-fighting airplanes for the Forest Service, his training and service as a commercial pilot for TWA, and his foray into being an airborne photographer and writer for aviation magazines.

*Dillon Precision Products* is the story of Mike inventing and marketing the world's finest reloading machines.

Finally, *Dillon Aero* addresses Mike re-engineering the balky, unreliable GE M134 Minigun and improving

it to the point it's become an ultra-reliable and highly esteemed weapon.

## TRAGEDY

In 1972, Mike Dillon is a 37-year-old former crop-duster, and current commercial pilot with TWA, with a hobby of buying, restoring, flying, and reselling WWII military aircraft. He's also a serious full-auto firearms enthusiast.

While in the process of restoring a North American T-6 – a WWII trainer – Mike allows another experienced pilot friend to fly the T-6. On takeoff he decides to attempt a roll with disastrous results: a crash that kills the pilot and his passenger. In the aftermath of the tragedy, Mike discovers that in addition to violating his "no aerobatics at low altitude" rule, his friend had also let the insurance lapse. The widow says to him, "Obviously I owe you a new plane." He tells her, "You don't owe me a thing. I lent the airplane to your husband. That was between him and me."

At this point the stars align, it truly is eerie in retrospect how events occurred to guide Mike Dillon toward starting Dillon Precision. How his kindness in letting this traumatized woman

off the emotional and financial hook would shape the course of the rest of Mike's life.

## "ONE MORE THING"

The widow says to him, "Well, I should give you

**Author Thomas' GLOCK 34 has fired a bit over 50,000 rounds. That couldn't have happened if the vast majority of that ammo had not been assembled on Dillon reloading machines.**

something.” Her husband had a couple of guns: a Thompson submachine gun and ex-military-issue 1911 .45. Today those would be valuable collectibles, in 1972 they were just a couple of guns. Then, in a moment that will lead to the creation of a company that will positively affect hundreds of thousands of people, she says, “Oh, I’ve got one more thing for you.” The “one more thing” is her husband’s Star Machine Works reloader.

So, Mike’s got his Star. He also has a select-fire M16 and really wants a way to reload .223 ammunition to make it more affordable to shoot. The joke among full-auto enthusiasts being, “A fully automatic firearm is a very efficient method of converting money into noise.”

### **A SUPERSTAR COMETH**

So, being Mike Dillon, a natural-born tinkerer, of course he takes the Star apart, examines its component pieces, their relationships, and how the machine works. In short order, Mike figures out how to adapt and modify the Star to reload .223. In addition to a new shellplate and dies, and other small bits, he also redesigns and modifies the Star’s linkage to give it greater “throw,” it can now reload longer rifle cartridges instead of just short pistol rounds. He loads up some .223 on his modified Star, shoots it, and life is good. Then friends start asking him if there’s any way he could manufacture and sell them a kit so they can do the same thing.

Mike’s friend, Peter Kokalis of *Soldier of Fortune* fame, somewhat sarcastically suggests Mike call his Star/.223 system the “Superstar Conversion” kit. Mike takes Peter seriously, thus the first product from the company that will eventually become Dillon Precision: The Superstar Conversion Kit.

### **“YOU SHOULD BUILD AN ENTIRE MACHINE”**

At the urging of customers and with a generous donation from a commercial reloader with a note that says, “Get to work!” Mike decides to build an entire machine that can handle reloading just about anything. He now thinks of his “day job” as a TWA pilot as the most boring thing on Earth, the good news being that hours in the air between takeoff and landing, and long layovers in-between, gives him a lot of time to think about what his new reloading machine will be.

Mike wants it to be able to load 1,000 rounds an hour – which is an insane output by the standards of the time, when most handloaders have to perform each action in the process individually on single-stage reloading presses. It should operate smoothly, and be simple, and durable, and if a part does eventually wear out or break, it should be able to be replaced by the end user with a minimum of effort in, say, 20 minutes tops.

At the time, Mike is not thinking of selling his machine to individual shooters – even for him that idea is too far out there. He doesn’t think hobby shooters need a machine with that sort of output. His target market is

gun shops that sell ammunition and commercial ammo reloading companies.

### **THE PROTOTYPE**

By 1977, sales of the Superstar Conversion have ebbed, but Mike has already moved on and has a working prototype of his new progressive reloading machine. Offering his Superstar customers the opportunity to pre-order a yet nameless machine, he is unsurprised when pre-orders amount to \$40,000. Mike Dillon is a believer in Mike Dillon, he KNOWS his machine is something special. He KNOWS he truly can build the world’s finest reloading machine. If he genuinely can deliver a progressive reloading machine that makes serious shooters’ lives easier, why WOULDN’T they want it?

### **THE COMPANY**

Mike forms the company: Dillon Precision Products. On September 4th – a day that should be a national holiday for every handloader – in 1977 the company is incorporated with the state of Arizona: Carol Dillon, treasurer; Mike Dillon, president. They pay a graphics person to design the now-iconic DP logo.

Mike names his machine the RL1000, a combination of “rapid load” and “1,000 rounds an hour,” in reference to the idea that this machine should be able to reload 1,000 cartridges per hour. (The Star can do about 300.)

The RL1000 is far different from the simple Superstar Conversion Kit which only contained a few pieces. The RL1000 has 112 parts. On days off from TWA, Mike makes parts on his milling machine. He and Carol assemble machines in their garage. In November 1978 they have enough machines ready to commence selling them.

### **“MAKE IT SMALLER AND LESS EXPENSIVE”**

The RL1000 sells for \$1,850 which is a lot of money in the late 1970s. Mike jokes with customers it would take gobs of money to make an inexpensive machine. At this point, the RL1000s are essentially being made one at a time, by hand.

The RL1000 is a modest success. Most of them sell to commercial reloaders, and the occasional police department. The Dillons are able to pay off their bank loan and have money left over. Mike figures if he can make a smaller machine, and sell it for less money, little enough that the individual shooter can afford one, ah, there’s the ticket. He could sell a boatload of those.

The RL300 (“300 rounds an hour”) is introduced in 1981. Mike is right, moving from “handmade” to “mass production” costs money. Putting together the first RL1000 cost \$3,000. Putting together the first RL300, specing out all its tolerances to the Nth degree to allow mass production and getting set up to do it, costs \$100,000.

Once production commences, the RL300 is less expensive to make than the RL1000, but still costly. At this point, Mike knows how to produce a reloading machine, he just needs to figure out how to make money at it.

## "NOW MAKE IT EVEN LESS EXPENSIVE"

For their next machine, Dillon replaces the RL300 with the RL450 (you can guess what that stands for), and third time is the charm. Mike figures out how to drop production costs while maintaining quality, the machine sells for \$365, and actually makes money with each unit sold. In 1983, Dillon's gross revenue comes out to \$1.7 million. Not bad. But the flood is just around the corner. From here, the book goes into detail about the phenomenal growth of Dillon Precision Products, especially the flood of orders that came after Mike decided to go "factory direct."

### THE MIKE DILLON LEGACY

These days, we have more serious, highly skilled shooters in the world, especially in the United States, than at any time previously. This fact can, I believe, be traced mostly to three phenomena:

1. The wave of states passing concealed carry permit laws. There was a time not that long ago when most states did not have a concealed carry permit system in place. Today, it's a rare state that doesn't have some provision for anyone who can pass a background check to be able to get a CCW, and many have gone to permitless, Constitutional carry. This has greatly increased the number of gun owners, and X number of those have become serious shooters.

2. The existence of the muff-type hearing protector,

which came out of the aerospace industry of the 1950s, specifically to protect the hearing of people working around jet engines which are ungodly loud. Previous generations of dedicated shooters sacrificed their hearing to their hobby, using a variety of makeshift wannabe noise-blockers inserted into the ear canal (wax plugs, shell casings turned backward, and whatnot). When shooters adopted the muff-type hearing protector for their own use, suddenly you could be a serious shooter and not suffer major hearing damage as a result.

3. Mike Dillon. Factory ammunition has always been expensive. In decades past, you had to be pretty well-off to afford to shoot enough to attain a really high skill level. Reloading machines existed but were too costly for the average person to afford. When Mike Dillon invented, and successfully marketed, reliable, efficient, and not-terribly-expensive reloading machines, that's when the brakes really came off. Suddenly, huge numbers of people were able to shoot enough to build a nice skill level, because we could AFFORD it.

*Dillon: A Memoir* is the story of a man who, in a very real, measurable way, changed the world. Certainly, he changed the world of the gun for high-volume shooters. It would be impossible to overstate how much serious shooters owe Mike Dillon, and I for one found the details of how that happened absolutely fascinating. If you have any interest in the topic yourself, I believe you will, too. 

# Mr. Bulletfeeder<sup>®</sup>

## by Double-Alpha

**Mr. Bulletfeeder** has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

# Dillon Automation's DA3000

## For Dillon Precision's CP2000 and RL1100

Introducing the new Dillon Autodrive 3000!

- Fully automates the Dillon Precision CP2000 and RL1100.
- Case Preparation rate up to 3000 rounds per hour!
- Reloading rate up to 2000 rounds per hour!
- DA3000 easily installs on your Reloading and Case Prep machines.
- Simply press the "Start" button – no more manual cycling of the machine.
- Adjustable Cycle Rate and Dwell.
- Dillon custom-built Industrial Controller.
- Integrated safety controls and shield.
- Field-tested and proven patented design.
- One-year warranty on the DA3000.
- Maintains your Dillon-Factory machine warranty.
- Made in Scottsdale, Arizona USA.

## PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package. 13606, \$29.00 ea.

# Dillon's Range Bag<sup>^</sup>

**33389 \$139.99**

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4" x 7" x 8" and features two interior pockets measuring 6-1/2" x 6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5" x 7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12" x 8" x 1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

## "Border Shift" Ammo Bag<sup>^</sup>

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	13755	\$35.99
I.D. Card Holder <sup>^</sup>	14575	2.99

## Dillon Pistol Case<sup>^</sup>

Our pistol case was designed to hold and protect your pistol and carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

**12709 \$39.99**

# XL750<sup>^</sup>

# Dillon Die Sets

## Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

## Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

## Crimp Die (Pistol)

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

### Dillon Carbide Pistol Dies (Three-Die Sets)

### Spare Decapping Pins

Package of 10	21528	\$9.00
---------------	-------	--------

## Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

## Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

## Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

1 550 Index Ball Spring	

## UNIVERSAL MOUNTING HARDWARE KIT

Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

**14355, \$9.75**

# BL550<sup>^</sup>

## Dillon's Basic Loader

**\$415<sup>00</sup>**  
**15399**

Reloading Dies and Caliber Conversions sold separately  
Pictured with optional accessories:  
Strong Mount 22051 \$98.00

Dillon's RL550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL550 is essentially an RL550 without the automatic priming and powder systems.

Capable of loading over 160 calibers – just like the RL550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL550 loader! The interchangeable toolhead (Page 26) makes it quick, easy and inexpensive to change calibers.

**AUTO PRIME SYSTEM<sup>^</sup>** 16627 \$125.00

**PRIMER SYSTEM EARLY WARNING<sup>^</sup>**

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. 20302 \$40.00

**AUTO POWDER SYSTEM<sup>^</sup>**

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. 20251 \$139.00

**OPTIONAL MAGNUM RIFLE POWDER BAR**

21353 \$47.00

**AUTO EJECT SYSTEM<sup>^</sup>**

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. 22120 \$45.00

**BL550 POWDER DIE<sup>^</sup>**

Extra powder dies for your BL550 make it easier to set up additional toolheads for loading different calibers.

**Powder Die:** 16629 \$28.00

**Oversize Die:** 16626 30.00

**Plastic Funnel:** 16617 9.50

**POWDER MEASURE ADAPTER**

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL450, AT500, BL550 or RL550. (Requires the use of an RL450 powder die – see below.) 20029 \$35.00

**RL450 Powder Die** 20308 35.00

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL750/650 owners with limited overhead clearance, the XL750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550/XL750/650	<b>22051</b>	<b>\$100.00</b>
XL750/650-only	<b>22052</b>	<b>98.00</b>
"SDB"	<b>22223</b>	<b>110.00</b>

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

**Stock #62005, \$100.00** is for:

XL750, XL650, RL550 and Square Deal "B". **Stock #62006, \$100.00** is for:

RL1100, CP2000, Super 1050 and RL1050 as well as *any* Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL550 and XL750/650 when equipped with the RL550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	<b>22214</b>	<b>\$64.00</b>
1050 Tray Kit	<b>22215</b>	<b>64.00</b>

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

**16306 \$55.00**

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL650 with Wrench Set	<b>11555</b>	<b>\$46.00</b>
RL550/XL750 with Wrench Set	<b>11541</b>	<b>44.00</b>

## "D-TERMINATOR" Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

*NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.*

**\$149.99**  
**10483**

Dillon's **"Belted Magnum" Powder System** features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

**97126 \$220.00**

The **Powdercheck System** (available for XL750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

**21044, \$99.00 each**

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

**17950 \$65.00**

Dillon's **1" Bench Wrench** fits our 1" Die Lock Rings which give you more space on the toolhead.

**10842, \$15.00 each**

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

## Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the

plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

## Dillon AkroBins<sup>^</sup>

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

## Dillon Utility Boxes<sup>^</sup>

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

# Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

19972

# Passing the Test

## Did you buy the right handgun?

**By Maureen P. Sangiorgio**  
**NRA-Certified Firearm Instructor/Range Safety Officer**  
**Photo by Oleg Volk**

Several times a year, I give a presentation on handgun basics and safety at local gun stores and army/navy stores. When I gave one a few months ago, a young couple was in the store looking at shotguns, getting ready for hunting season. He made a bunch of suggestions, but when she picked up the Mossberg 20 gauge, I could just tell by the look on her face, the twinkle in her eye, that she made up her mind.

So how do you know if you've made the right choice? As the holidays are upon us, let's say you were given, or

purchased yourself, a new handgun for Christmas. How do you know it's the right gun for you? Check out these tips from firearm expert Fred Mastison.

**Analyze the angle.** "When I am checking out a new handgun, the first thing I always look at is grip angle," says Mastison, president of Force Options Tactical Training Solutions, and internationally recognized as one of the top combatives and firearms instructors in the world. "There is a variety of grip angles in the handgun world. Glocks are about twenty-two degrees, and your average 1911 is about eighteen degrees. What you want to do is be able to make sure that it points naturally for you. That's why some people have such a challenge with the

GLOCKS because they have a grip angle that's so different from other guns."

If you are in a gun store, and not at a range, Mastison suggests you put the gun in your hands, get a good firing grip, and with just one hand, push the gun forward. "If the muzzle is level, the grip angle on that gun fits you well. If you feel yourself having to push down the muzzle a little bit, the grip angle is too steep. It is much easier to shoot a gun accurately if it has the right grip angle for you."

**Consider the capacity.** High-capacity handguns are all the rage now, but how do you know if they're right for you? Some of my students have small or weak hands, and when they go to shoot a high-capacity handgun, which can have a wider, larger, or longer frame to accommodate all those cartridges, they really struggle.

Another factor to consider when looking at capacity is what you're thinking of using the gun for – range practice, or concealed carry/self-defense? "Today, 15- to 17-round magazines are standard round magazines," explains Mastison. "If you're looking at a handgun with an extended magazine, I discourage you from using them as your everyday concealed-carry gun because they stick so far out of the bottom of the handgun, they make it very problematic to carry concealed. It may look cool, and you don't have to reload as much, but for concealed carry, they print big-time."

**Work that trigger.** "There are some guns that have a good grip angle, but the triggers are horrible," says Mastison. "Look for a handgun with a lower-pound trigger pull, such as about five pounds. Some have a nine-pound trigger pull, which is on the high end. Ask yourself what it feels like to squeeze that trigger. If it feels like it's really hard, and difficult to work, that could be a problem for people."

**Rate the recoil.** Another important factor here is recoil management. That's why it's best to rent before you buy. In my experience, I shoot more accurately with a larger, heavier gun because the weight of the gun absorbs the

recoil, not my hand and forearm. "Everybody is crazy about these little micro guns, but if you're shooting a micro gun in 9mm how easy is it for you to control," asks Mastison. "If it's snapping, and it's very difficult to get a second shot quickly and accurately, that is not your gun."

**Find features.** When gauging if a handgun is a good fit, it's also a good idea to look for features that are important to you. For example, many of my students are beginner females. They WANT external safeties on their handguns. They are more comfortable knowing that they have to push down that external safety lever or squeeze the grip (sometimes both!) for the gun to shoot.

However, many self-defense experts I shoot with, and interview for my stories, all tell me the same thing – in a panic, self-defense situation, you do NOT WANT external safeties on your gun. It eats up too much precious time to disengage that safety and gives you one more thing you have to remember to do in a stressful situation.

"I don't think any defensive firearm should have an external safety on it," says Mastison. "A lot of people look at a GLOCK and say it doesn't have a safety on it. Well, that's not really true. It has internal safeties, in addition to one on the trigger. If you put your finger to the side of that trigger, it will not move. Until that small foot in the center of the trigger is depressed, that gun will not fire the round. So that is a safety. Your finger must be on the trigger, and you must press the trigger. And I think that's where a lot of people get nervous about the gun

just going off, and that's just not the case."

According to Mastison, the challenge with an external safety is it's another mechanical device you have to defeat before you bring the gun into the fight. "You are already pressed, taxed, terrified, and yanking your gun out during a fight. You do not need the extra step of now having to wrestle with a safety in order to get your gun ready to go. It comes down the comfort and trust in the gun that it's not going to go off, and that comes with range time and dry practice."

## Get a Grip

When determining if a particular model handgun is a good fit for you, the most important issue here is grip. Follow these steps to get a good grip on your handgun:

- Grip the handgun very firmly, and make sure there is no space between your fingers, or between your hands when gripping the pistol.
- Pick up the pistol behind the muzzle with your support hand. Then, with your strong hand, make a "Y" of your thumb and fingers. Place your strong hand on the firearm so that the web is centered along the high back of the backstrap. This is the biggest mistake I see my students make. Their hand is too far down the backstrap. Keep your finger straight and off the trigger.
- Bring the support hand in to play and press your support hand fingers into the palm on your strong hand. Then make sure the thumbs are pointed straight, parallel to the slide or barrel. For semiautos, the support-hand thumb should lie directly forward of and below the strong-hand thumb. For revolvers, the support-hand thumb is positioned over the strong-hand thumb.
- To increase your grip strength, exercise with various types of fitness equipment to build up forearm and wrist strength. Squeeze a tennis ball or grippers in front of TV at night. Another tip is to do reverse curls, and to use rubber bands of different strengths to spread the fingers apart.

# DILLON RIFLE COMPANY

## The Tucker Rifle Case

This fine specimen is made with top-shelf materials that combine a classy composite quilting pattern with a rugged, laminated cotton and waterproof outer shell. The suede-like interior is adorned with fully adjustable hook and loop retention straps to keep your weapon in place at all times. It features a solid hook and loop inner spine that allows for quick attachment/detachment of the DRC Pods (sold separately). In our opinion, it has the best of both worlds, beauty and brains, what we like to call a bonafide stunner.

39 in. (l) x 3 in. (w) x 12.5 in. (h)

Made in the U. S. A.

Basic Black	40292	\$220.00
Above Average Grey	40290	\$220.00

## Mag Pod

Modular, compact and perfect for organization. The Mag Pod can hold three 30-round AR style magazines or your eye pro...or some candy bars (no judgement). It features a hook and loop strip along the bottom side so it can be nestled onto the inner spine of The Tucker Rifle Case and has a coated webbing grab handle for rapid attachment/detachment. This is the perfect Pod for organizing all your gear.

12 in. (l) x 3 in. (w) x 3 in. (h), Made in the U. S. A.

Super Green	40297	\$25.00
Basic Black	40298	\$25.00
Above Average Grey	40296	\$25.00

## Optic Pod

The Optic Pod's specialty is being a big softy on the inside. Padded and lined in a faux suede to help protect your valuable gun optics and/or sweet Dillon shades. This also features a hook & loop strip along the bottom side so it can also be nestled onto the inner spine of the Tucker Rifle Case. Protect your optics and get them in this cozy pod of a home today.

Super Green	40300	\$30.00
Basic Black	40301	\$30.00
Above Average Grey	40299	\$30.00

## The Jalapeño

You shoot a lot and your gun gets hot. Then, without thinking about it, you put your rifle into its case or someplace else equally tender. I have mauled several rifle cases, burned a car seat, and have at least one scar from doing exactly this. This is why we created The Jalapeño. Actually, we made the original The Jalapeño for the Minigun. With it, we could dump 3000 rounds in a minute or so, slip The Jalapeño over the barrel group, pull the gun off the mount and stow it right away.

23.5 in. (l) x 8 in. (w), Made in the U. S. A.

Super Green	40294	\$65.00
Basic Black	40295	\$65.00
Above Average Grey	40293	\$65.00

## Dopp Kit

What is a Dopp Kit you ask? Well, it is perhaps our most versatile pouch. The DRC Dopp Kit (or more commonly known as a toiletry bag) is a larger pouch with a triangular construction that allows it to stand alone. It can fit up to 1000 loose 9mm rounds, your ear pro, toiletries or any other range-day items. Made with waterproof, laminated cotton and features a large, coated webbing handle. It's the one Dopp Kit to rule them all.

13 in. (l) x 4.5 in. (w) x 5 in. (h), Made in the U. S. A.

Super Green	40303	\$30.00

# DILLON RIFLE COMPANY

The OPAR Operator Trigger is a complete-assembly pre-stage drop-in trigger purpose built to provide improved trigger pull weight, reset, clean feel, precision, and safety for day-to-day users, military and law-enforcement members and agencies. The trigger's form enhances precision capabilities through its Area-of-Engagement design. This is accomplished by helping shooters build muscle memory for their trigger-finger placement in a simple and natural way.

It has a clean 5.0 to 5.5-pound trigger pull weight with a short trigger reset. The OPAR Operator's patent pending pre-stage trigger mechanism design has an inset secondary trigger providing an additional safety mechanism to reduce the chances of an accidental discharge. The OPAR Operator is compatible with AR-15 and HK416 rifles using the Mil-Spec 0.154-inch pins.

## CED Edge Dual PCC Rifle Case

The CED Dual Rifle case gives you two in one! Two rifles and three modes of carry, all in one great PCC rifle case. Excellent protection for your expensive competition PCC and AR rifles, this case includes storage for two pistols and lots of magazines as well.

Comes with a handle, shoulder strap, and

backpack-style shoulder straps, which tuck away when not in use or can be removed if not needed.

The MOLLE PALS system across the front of the case, allows the user to add optional accessory cases to the rifle case itself.

The case measures 35.43" x 11.81" inside the main compartment.

**10977      \$99.99**

## CED PCC Mag Storage Pouch

The perfect companion for your range bag, rifle case or backpack! Holds up to six extended PCC straight magazines of up to 42 rounds and can accept magazine lengths up to 10 inches.

Measurements are: 12.75" Wide x 11.5" High closed (open approximately 12.75" x 19.0"). The pouch pocket length is 6.25."

**10978      \$15.99**

## CED PCC Rifle Sleeve

The CED PCC Rifle Sleeve is the ideal companion for competition stage use. It's a lightweight, water-resistant neoprene zippered sleeve that folds up easily to fit into a range bag or backpack. Perfect for covering and protecting your PCC rifle when carried in a trolley or wagon at the range. Weighs only 8 ounces and measures 33" inside.

**10979      \$19.99**

# KynSHOT

## Hydraulic Recoil Buffers

The KynSHOT™ hydraulic buffers reduce recoil, muzzle rise and shoulder fatigue allowing for quicker target acquisition after the trigger is pulled. In addition, the KynSHOT buffers control the bolt carrier group operation thereby reducing excessive wear and tear on the mechanical cycling components.

KynSHOT hydraulic buffers are manufactured with premium seals, materials, and components in an aerospace grade manufacturing facility that is dedicated to quality. Each and every one of our product designs have undergone extensive impact, functionality, and life testing to ensure unmatched performance. This results in a product that can withstand and perform in harsh environments, including temperatures from -30°F to 150°F. The patented design and damping technology make the KynSHOT buffers the industry leading recoil mitigation buffer.

# HIPERFIRE® High Performance AR Triggers

## Competition HIPERTOUCH®

- Designed for the Ultimate In AR Performance
- HIPERFIRE®'s Most Popular Trigger
- Virtually No Take-Up/Pre-Travel,
- Very Smooth
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Straight Trigger Bow
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment

## Reflex HIPERTOUCH®

- Everyman's AR Trigger
- Virtually No Take-Up/Pre-Travel, Very Smooth
- Similar to the Competition except with Curved Trigger Bow
- As Run by Keanu Reeves in John Wick 2
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Semi-Auto Single-Stage
- Curved Trigger with a Backbone™
- Crisp, Clean, Trigger Break

## HIPERFIRE® PDI™

- Power Drop-In Trigger
- 2-lb. Pull
- MIL-Grade Hammer Strike, No LPS, Ever
- H&M BLACKNITRIDE+™ Finish
- Exceptionally Smooth Feel
- Enhanced Corrosion Protection
- Polished Look
- PCC Blowback Tough
- Hammer Collision Bumper
- Disconnecter Crash Protection
- Disconnecter Spring Crush Protection
- Curved Trigger Bow with a Backbone™
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment
- Changes the Trigger Lever Length to Further Adjust Pre-Travel
- Position Your Finger in the Same Place Every Time

## HIPERFIRE® X2S™ MOD-2

- Two-stage AR trigger
- Minimal, user adjustable, 2 – 3-pound first stage
- Minimal second stage wall with a 1-1/2-pound weight
- Total 3-1/2 – 4-1/2-pound pull with green or red springs respectively
- Distinct wall between first and second stages allows for effective “prepping” of the trigger for added control
- Clean, effortless break
- Weightless, imperceptible overtravel
- Cam-Over Toggle Engine allows for lighter pull weights without losing hammer strike energy
- Soft Start Lock-Up aids in eliminating rifle “flinch” after the break for more accurate shots at distance

The Specialized Dynamics AR15/AR10 Armorer's Upper Receiver Block is made from billet aluminum and holds your upper receiver securely in order to make it easier to install barrels, free-float tubes, muzzle devices, etc. One block fits AR15s and ArmaLite and DPMS platform AR10s.

**43234** **\$59.99**

# Emergency AR(epair) Kit

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down dent and spring.

**19460** **\$19.99**

# MAGPUL PMAG Drums

MAGPUL's PMAG drum magazines are durable, lightweight, highly reliable and made in the USA. The unique drum configuration keeps the height of the magazine manageable and allows for prone firing and easier storage. Features an easy-to-use loading lever, paint pen dot matrix for easy marking, and a rear window for instant capacity indication.

*Regarding GLOCK pistol version: It is recommended that you install a new OEM magazine release on Gen 1-3 GLOCK handguns to support the extra weight of the magazine. Gen 4 GLOCK handguns will require an aftermarket metal magazine release. Installation of a new recoil spring assembly to ensure reliable feeding is strongly recommended. Individual variations between firearms may result in an extra power recoil spring being required. Use of the D-50 GL9 in pistol caliber carbines (PCC) is not recommended, because the increased length of the feed tower will be partially unsupported in most pistol caliber magazine wells. This unsupported condition may cause premature wear on the feed tower magazine catch, and (in firearms which deviate from factory magazine well specifications) may result in improper round presentation and failures to feed.*

### All-in-One Torque Driver Kit

Featuring the Fix It Sticks All-in-One Torque Driver. Tighten down your scope rings, mounts, actions screws, etc. while in the field, at the range, or at home. Kit includes: All-in-One Torque Driver (15 - 65 inch lbs); T-Way T-Handle Wrench; 15 different bits: T10, T15, T20, T25, [hex 3/32, 5/64, 1/8, 5/32, 3/16, 2.5mm, 3mm, 4mm, 5mm], P1, slotted #5; 1/2" Socket and 1/4" bit adapter set; and Zippered case with Molded Holder.

29835 \$112.00

### Replaceable Edition Shooting/Hunting Kit

This kit offers unmatched portability, functionality and versatility. Two Fix It Sticks (which combine to form a T-Handle) and 16 bits are held in a molded bracket for portability/storage. Extra room on each end can hold two additional bits. Includes two sticks, bracket, and 16 different bits: 2.5mm Hex, 3mm Hex, 4mm Hex, 5mm Hex, T-10, T-15, T-20, T-25, T-30, 1/8" Hex, 5/64" Hex, 3/32" Hex, 5/32" Hex, 3/16" Hex, Slotted #5, and Phillips #1.

29843 \$40.00

### Mini All-in-One Torque Driver

Tighten scope rings, red dot sights, mounting plates, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 6 - 25 inch-lbs).

29837 \$55.00

### All-in-One Torque Driver

Tighten scope rings, mounts, action screws, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 15 - 65 inch-lbs).

29836 \$60.00

### Scope Bubble Level Set

Level your optics with machined aluminum levels, featuring precise UK-sourced bubble vials. Kit includes: Magnetic level, NATO/Pic rail level/anti-cant device, and Protective foam carrier with pouch.

29839 \$50.00

### Scope Jack

A new way to level your optic, the Scope Jack works with Any 1/4 inch driver to quickly and easily level your scope to your NATO/Pic rail. Just mount the Scope Jack to the rail under your scope and turn the drive handle until the lifting arm engages with the flat section under your turrets. Once the scope is level, maintain pressure while tightening your ring screws to keep optic level throughout the process.

29838 \$44.00

### Bolt Carrier Group Scraper

Custom bit that is designed to clean carbon off the various surfaces of the Bolt Carrier Group. Works with any standard magnetic 1/4" driver. Black Isonite finish for increased corrosion resistance and strength.

AR-15 (Top) 29840 \$10.00  
AR-10 29841 \$10.00

### Glock Tool Kit

Glock tool kit including two custom bits designed to aid in the assembly and disassembly of Glock Handguns / Front Sights. Includes: *Glock Front Sight Tool*, a 3/16" Hex Thin Wall Nut Driver - Integrated magnet holds the screw securely in place. Machined from Solid Steel Bar Stock. Works with any standard 1/4" bit driver. 3/32" Metal Pin Punch - Punch is sized to ensure easy removal of all Glock pins by hand. Machined from Solid Steel Bar Stock.

29842 \$16.00

### Remington Bolt Opener

Access your Remington 700 firing pin quickly and easily in the field with our compact custom bit. Levers the firing pin head with a "bottle opener" action. Molded synthetic polymer bushing protects bolt plug from damage.

29844 \$20.00

## Master Sight Pusher™

The Real Avid Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Master Sight Pusher

16496

\$149.99

## 2" Bit Sets

Expand the bit selection of your **Fix It Sticks** Kit. Bits are all 2" in length. Bits come in molded polymer bit holder that links with other bit holders.

**2" Bit Pack, Torx Bits** includes:  
T10, T15, T20, T25, T27, T30

29847 \$20.00

**2" Bit Pack, Metric Hex Bits** includes:  
Hex 2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm

29845 \$20.00

**2" Bit Pack, SAE Hex Bits** includes:  
Hex 5/64, 3/32, 7/64, 1/8, 5/32, 3/16

29846 \$20.00

all of our best in 2023!**

# You Should Have

## By Rob Orgel

With anything, there are always two sides to the coin. Muzzle brakes offer significant reduction of recoil and muzzle rise. The other side of the coin? They can significantly increase the volume of the muzzle blast. Therefore, neighbors to either side of you may not enjoy your muzzle brake. Personally, I care less about my neighbors' experience and more about my ability to engage a target effectively and multiple times if necessary.

To best assess various muzzle devices and their effectiveness – since I believe headspace and experience play a very large role in target engagement – I took a group of shooters from my shooting club with vastly different levels of experience. Some of these folks have muzzle brakes and some do not; one of them doesn't yet own an AR15. Using this testbed of shooters, I set them up with 10 different muzzle devices for testing. The testing was to fire two rounds each on identical

platforms (11.5" AR15 SBRs) and at the end of each engagement they would give me a number from 1-10 grading their general experience and how they perceived recoil reduction. The results were extremely interesting and relatively consistent regardless of background.

*I want to make a reference to the Hiperfire muzzle-device experiment. Their use of a frictionless measurement device, from a scientific experiment, supersedes any other muzzle-device testing I had seen before. Our experiment, however, is based on shooter experience, not strictly recoil reduction. I do highly advise you to check out their experiment and its results.*

## Test Subjects

Of course, I included myself in the experiment as the first shooter and for the opportunity to demonstrate safety. I would consider myself an experienced shooter.

**Maura** has seven months of training under her belt, and she owns three ARs. She's also relatively petite.

# a Muzzle Brake

**ROB'S  
ON  
POINT**

**Robert** has two years of AR15 training and owns several AR15s, some with muzzle brakes and some without.

**Leyna** does not yet own an AR15 and has only fired one, once before in her life.

**Anthony** has used several different muzzle devices in the past on multiple platforms.

**Will** has been shooting for approximately a decade but has never used a muzzle brake before.

## **The Equipment**

Everyone started off using the standard “birdcage” type muzzle device (M16A2). The second muzzle device was a **Midwest Industries** muzzle brake. Third was a **TRYBE Defense CIB**. Fourth was a **Guntec Micro Comp**. Fifth was the **Precision Armament Hypertap®**. Sixth was the **Phase 5 FATman**. Seventh was the **Fortis Manufacturing Inc. RED™**. Eighth was the **Hiperfire® Hipercomp**. Ninth was the **Griffin Armament Paladin®**. Tenth was the **Surefire ProComp**.

The included table shows each shooter’s experience with each muzzle device rated from 1 to 10.

After comparing all the numbers, we picked the two front runners. They were the larger in size, but highly effective TRYBE Defense muzzle brake as well as the extremely effective, but upsetting to the neighbors,

Hypertap from Precision Armament. We then allowed every shooter to rotate through these two again and choose their favorite. All but one chose the Hypertap. Most said it was a close race, others said there was a noticeable difference.

Some additional notes gained from this experiment on each muzzle device:

The standard birdcage is highly ineffective for recoil.

The TRYBE Defense CIB is highly effective, even though it did not take first place in recoil reduction, it does provide an outstanding shooter experience while reducing muzzle blast as observed by the shooter. This makes for a great candidate on some of the shorter barrels.

The Precision Armament Hypertap is incredibly effective beyond any muzzle brake any of us had tested until now. Your neighbors, however, will not enjoy the experience.

The Hiperfire Hipercomp was very effective with recoil reduction. However, many shooters felt the hot breeze of the muzzle brake, therefore did not rate it very highly.

The Griffin Armament Paladin was not only highly effective but also directed the muzzle downwards to reduce recoil and muzzle rise, this was unlike any other.

The Surefire Pro Comp – which I had historically believed to be one of the best – maintained a solid eight on a scale of 1 to 10 by comparison. The Surefire also was extremely unpleasant for the neighbors. This is an interesting perspective, as I had personally believed it to be the best before this experiment.

In closing, all participants of the experiment including myself gained a lot from this experiment. Also, those who have muzzle brakes, and those who have chosen

not to invest in them have all gained lots of value and perspective (all have reported that they will be buying new muzzle brakes from the knowledge they have gained from this test).

This side-by-side test gave us a chance to feel different qualities and capabilities with first-hand experience. Personally, I will be purchasing several more of both the Hypertap and the TRYBE Defense CIB. I also have a new reason to

re-investigate the Griffin Armament suppressors, as I am very impressed by their suppressor adapter. Not a single participant is interested in shooting or owning an AR15 without a muzzle brake going forward.

# 5.11 Tactical®

Double Duty TDU®

Trainer

Operator

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

# BLADE-TECH™

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The PreciseFit ratchet system allows you to quickly tighten or loosen the belt in 1/4" increments up to 6" for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. **One size – adjusts to fit all.**

# Comtech's STINGER

**THE STINGER:** Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

19495 \$9.99

# BLADE-TECH™

## "Signature" OWB Holster

Over the last 21 years Blade-Tech has been dedicated to perfecting the OWB holster. In collaboration with industry leading polymer experts, Blade-Tech created an incredibly strong proprietary blend of polymers, that allowed them to precision mold the "Signature OWB holster" with extreme accuracy for a perfect fit every time! Features a positive lock trigger guard, adjustable retention screws and Tek-Loc™.

40029 \$12.99

This holster is designed for an extreme high rise carry and offers the best of both worlds. Not only does it allow you to carry a full-size automatic handgun, it's also totally concealable. The unique design has Mernickle's patented stabilizer flap that goes behind the belt. This prevents the grip of the gun from tipping away from the body while doing daily activities. The high-rise position allows you to sit in chair or vehicle without needing to take the gun out of the holster.

XHR 1911 Holster **19018 \$99.95**

Designed to be the ultimate in concealed carry for those not comfortable with an Outside the Waist Band (OWB) holster – the ISP offers a great carry solution! This holster gives the appearance of a front pocket wallet and breaks up the outline of your gun. The smooth Herman Oak leather inside protects the finish of the gun, but the suede outside ensures that the holster sticks in the pocket.

## Nighthawk Custom Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

# Ruger's Gentle Giant

## A Closer Look at the Ruger Super Redhawk

**By Clayton Walker**

One's first steps into the world of magnum handgunnery are sure to create a few new brain wrinkles. Who can forget the experience of a handgun shouting louder than the voice of God himself and throwing a literal fireball downrange? After touching off their very first round, those new to the experience often turn around with an ear-to-ear smile and ready to voice an exclamation of surprise rarely suitable for young ears. So common is this phenomenon that I've learned to load only one round for new shooters, at least at first, as muzzles tend to wander in the midst of their excitement!

Of course, there's no such thing as a free lunch. I would venture to guess that all of us have personal experience with the bone-jarring recoil that is so often an inescapable part of magnum performance. While scientific advances in powder and metallurgy have allowed us to stuff more and more power into increasingly smaller and lighter handguns, our own bodies set a clear ceiling on what's feasible to control.

To wit: while it's possible to shoot 300-grain .44 Magnum ammo through a short-barreled, Scandium revolver, most shooters' wrists will give out long before any part of their gun does. Even Smith & Wesson's first .44 Magnum, which eventually became known as the Model 29, was often too much of a good thing. Following a demand surge in the early 1970s thanks to "Dirty Harry," there were no shortage of customers who'd taken their .44 Magnum on a maiden voyage and immediately returned to the gun shop to trade it in – along with a nearly-full box of ammunition.

Most shooters have concluded, and not unreasonably, that magnum handgunnery is a pay-to-play proposition. As that old saying goes, if you can't stand the heat, get out of the kitchen. Still, I'd bet a lot of these shooters haven't spent much time with Ruger's Super Redhawk, a beast of a revolver that tames the .44 Magnum better than anything else I've found.

First, a caveat: those looking to find fault with Ruger's revolver will surely find nits to pick. Its factory trigger is usually a little gritty, heavy, and stagey when compared to its contemporaries. Its investment-cast frame causes it to be bigger and heavier than it has to be. And, while beauty is in the eye of the beholder, most consider the Super Redhawk's lines to be awkward and ungainly, especially alongside the S&W Model 29.

I find some of those complaints valid. The "SRH" is greatly improved by an aftermarket set of Wolf Springs, though its trigger still won't be quite as good as a Smith, Colt, or Dan Wesson. There are some sharp edges throughout the gun that speak to a lesser degree of refinement in fit and finish. It is a little piggyish. But as far as the rest goes: "Those aren't bugs – they're features."

First, the SRH weighs 53 ounces – that's about 17 percent more mass than a Model 29 with a similar barrel length. As such, it exhibits about 17 percent less recoil than the iconic Smith due to that fact alone. My SRH was also Mag-na-ported long ago. I consider this a useful addition: Mag-na-port's own figures and customer testimonials point to additional recoil reductions in the range of about 10 to 20 percent, with the porting more effective with hotter, higher-pressure loads. Sure, there's more noise,

but I find my ported 7.5" SRH quieter than most 4" .44 Magnums. "Quiet" being a relative term here.

Seeing the SRH's grips, one might have a pang for the kinds of fancy wood stocks found on many of the gun's competitors. Here, there's more than meets the eye. Wood grips offer no relief from the recoil impulse, and their checkering is known to abrade the palm when the gun bucks. Conversely, Ruger's rubber grips simply work. Neither too soft nor too firm, they cushion the shooter's hands even with the most punishing of .44 Magnum loads.

Put all this together, and you have an ideal platform for launching the kinds of fire-breathing rounds that big bore, magnum handgunners is all about. One of my good female friends stands no taller than 5' 4". Even as a relative novice, she was able to cluster six rounds of .44 Magnum at seven yards into a group no larger than a watch face. Frankly, I was stunned. However, it's good testament to the ease in which the Super Redhawk gives just about everyone power and the ability to direct it.

My personal happy place, however, lies in loading up ever-more genteel .44 Special loads. I often pair the traditional 240-grain "Keith" style SWC with faster powders like WST and Red Dot for a moderate velocity somewhere in the 800-fps range. The combination results in great accuracy with hardly any wear and tear on the wrist – even more so when fired from the SRH. An additional plus is that the bullets will cut fat, easily resolved holes on paper targets.

And while these loads are easy to shoot, they're no slouch in the power department, as they more or less replicate the ballistics of GI-type .45 ACP hardball.

Even if we're collectively overpaying for primers in still-uncertain times, the world remains the .44 handloader's oyster. Factory .44 is typically about \$45 per 50 in my neck of the woods. Even assuming a world where \$100 per 1000 primers becomes the norm, I can still crank out

.44 ammo for about 20 cents a round. That's some great value that translates to longer and more frequent shooting sessions.

Granted, the lines of the Super Redhawk might not be for everybody, and perhaps it won't turn heads like a S&W 29, Colt Anaconda, or Freedom Arms revolver. Regardless, the SRH deserves more respect than it gets, if only be-

cause I think it's about the closest we shooters can get to having our cake and eating it, too. The revolver gives us all the power with none of the pain, and for reloaders like us, we can tap into that effortless performance on the cheap.

Prices for all kinds of guns remain high in these later days of the COVID-19 era, but a search of completed auctions on the usual gun sites shows that patient bidders should be able to snag a clean Super Redhawk for under \$900. While

the .44 Magnum chambering is my pick, those wanting more power can hunt for one in .454 Casull or .480 Ruger. Regardless of whatever magnum cartridge you choose to wrangle, Ruger's gentle giant is ready to lend a helping hand.

The Super Redhawk is extremely user friendly and can be made even more genteel through a swap of sights, springs, and by MagnaPorting.

Some flaws: areas around the hammer and rear of frame are sharp and could be dehorned.

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

**29033** **\$39.99**

The 1911 Smart Wrench's ergonomic design fits comfortably in your hand while you remove the barrel bushing, and the strategically placed cavity catches the spring. Removes the barrel bushing from the Officer's and Government model 1911s.

**11656** **\$12.99**

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

**21778** **\$29.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

**29034** **\$11.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

**29039** **\$34.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm. Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

**29036** **\$11.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect leftover carbon while applying the perfect amount of oil or solvent. The .223/.56mm bore brush scrubs baked on carbon from lands and grooves.

**29037** **\$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

**29038** **\$12.99**

# Real Avid Gun-Cleaning Chemicals

## BORE-MAX™ BORE FOAM

Powerful gun-metal grade foaming solvent is specially formulated to expand and penetrate within the gun bore, rapidly and effectively dissolving performance inhibiting copper and powder fouling.

12oz. can Bore-Max **40215** **\$13.99**

## FOUL-OUT™ GUNK BLASTER

Foul-Out Gunk Blaster blows away grease and grime fast. This powerful gun-metal grade solvent quickly strips gun actions of burnt powder, oil and grease, eliminating malfunctions of moving parts due to fouling and build up. Quickly cleans chambers, actions, trigger groups, bolt groups, slides, choke tube threading, semi-auto gas ports, extractors, ejectors and other hard to reach areas.

12oz. can Foul-Out **40216** **\$13.99**

## GUN-MAX™ GUN OIL

Gun-Max's advanced gun-metal grade formula sets a new standard for protecting, lubricating and cleaning modern guns. Powerful inhibitors displace moisture delivering extended corrosion protection. Advanced anti-friction additives bond to metal surfaces for longer lasting lubrication of moving metal parts. Maximizes performance of semi-auto guns with high cycle rates. Formulated to excel in sub-zero temperatures and harsh operating conditions.

12oz can Gun-Max **40214** **\$13.99**

## Real Avid VIZ-MAX™ Bore Sighter

### THE FAST, EASY WAY TO ACCURATELY BORE SIGHT YOUR RIFLE.

Viz-Max™ is a revolutionary, yet uncomplicated, next generation V instrument. No more fumbling with extra pieces and underpowered lasers to find your mark. Housed in the rugged and protective exoskeleton is a precision machined, factory calibrated laser. The laser projects a powerful green dot providing maximum visibility and quick acquisition. The bore attachment is fast and easy with the hold-fast neodymium magnet.

**10134** **\$129.99**

## Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

**21776** **\$79.99**

# Real Avid MASTER GUN VISE™

## MULTI-AXIS BENCH-MOUNT VISE WITH TORQ-LOK™

One vise to rule them all. The first real bench vise made exclusively for guns and gun tools. Whether you're building and customizing, repairing and cleaning or mounting scopes and accessories, this vise improves every part of the GUN DIY® experience. Quickly reposition your gun to any orientation without ever removing it from the vise. Insert the Torq-Lok pin for applying heavy force. Use the removable and reversible Gun-Fit jaw sleeves (*not pictured*) for a specific gun grip or turn the leveling knob for simple scope mounting and leveling. Build. Customize. Repair. Mount. Clean. All hail the King....

10135

\$299.99

## Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

\$14.99

## Real Avid LUG-LOK® Upper Vise Block

Real Avid designed an upper block that leverages the strongest part of the gun – the barrel lugs inside the star chamber. The Lug-Lok is precision machined and precisely fits into all Mil-Spec uppers. It mates perfectly with the barrel lugs, while allowing you to rotate the upper to be able to work on different sides. The Lug-Lok is the safest, easiest and smartest way to lock down an AR15 or AR10 upper into a bench vise.

# Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted

practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Level-Right PRO

21777

\$69.99

# Real Avid ARMORER'S MASTER KIT™

This kit of Master Grade Tools and how-to information equips you to confidently tackle everything from building your own gun from the ground up to customizing or modifying an existing gun. With better tolerances, materials and expanded capability, every tool is carefully designed to make each job as simple and easy to execute as possible. Housed in a professional tool case and equipped with step-by-step instructions, you will be able to work smarter and create better guns regardless of your experience level.

31401 \$279.99

## ARMORER'S MASTER WRENCH™

The Real Avid Armorer's Master Wrench features best-in-class strength, precision fitment and ergonomic intelligence. Wrenches seat squarely for a no-slip fit on stubborn barrel nuts, castle nuts, muzzle brakes, or fixed stock receiver extensions. Industry first torque wrench attachment location is optimally positioned to provide consistent torque for all nuts. As a bonus, interchangeable hammer heads make the Armorer's Master Wrench a "Master" hammer as well! This is the right tool for the job... and for you.

31402 \$79.99

## BORE BOSS®

The single piece Dual Action Cable with integrated phosphor bronze brush and braided mop wraps around the unique Flex-Case Handle to keep the system stowed and organized. To use, simply flip, feed, clip and pull. Throw it in your pack, or put it in your pocket. It's the next best thing to a self-cleaning gun.

## AR15 FRONT SIGHT ADJUSTER TOOL

This smartly designed tool makes front sight adjustments quick and easy. The stainless steel shaft is knurled to create no-slip leverage when turning tight posts. It works on both A1 & A2 front sights and the compact design won't clutter up your bag.

31403 \$9.99

## THE AR15 SCRAPER™

### PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR15 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR15 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 12 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31404 \$19.99

## THE AR10 SCRAPER™

### PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR10 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR10 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 11 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31405 \$19.99

# Slip 2000 Products

## 725 Gun Cleaner Degreaser

should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! **NOTE:** To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. 19237 \$24.00

## Slip 2000 Carbon Killer

provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. **NOTE:** Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

15 Oz. 19234 \$24.00

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 \$28.00

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 \$22.00

Slip 2000 **Extreme Weapons Lubricant (EWL)** was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 \$21.00

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 \$24.00

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! **NOTE:** It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.

4 Oz. 11646 \$14.00

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 \$17.00

## MIL-COMM Extreme Performance Lubricants

**TW-25B** is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe	15732	\$14.99
1.5 Ounces	15731	18.99

**Brian Enos' Far Superior Slide-Glide** is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	15571	\$7.99
Slide-Glide Lite	15572	7.99

## Sweet's 7.62

**Sweet's Australian 7.62 Solvent** easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia.

13128 \$12.99

# Firearms Log Book

Organize vital information for all of your firearms into one log book. Identify and describe your specific firearm by manufacturer, serial number, model, action, finish, barrel length, repairs/modifications, attached accessories/optics, and other unique characteristics. Includes 30 forms. One form per page.

Forms also contain fields to record storage location, where you acquired the firearm, current value, date sold, and ample room for you to add your specific notes about each firearm. Fields are self-explanatory and provide all the required information for your collection, family, or potential insurance claims.

Collectors may want to consider separate Log Books for each category of firearms in their collection such as Rifles, Shotguns, Handguns, Revolvers, or by Manufacturer.

Total price as pictured here with optional accessories: **\$3741.00**  
 .50 BMG Carbide Size Die 50075 \$1175.00  
 .50 BMG Case Trimmer 50050 \$599.00  
 BFR Mounting Hardware Kit 50140 \$18.00

### 50 BMG CASE TRIMMER ASSEMBLY <sup>^</sup>

Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die. 50050 \$599.00

### 50 BMG CARBIDE SIZE DIE <sup>^</sup>

The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications. 50075 \$1175.00

### 50 BMG POWDER MEASURE ADAPTER <sup>^</sup>

For use with the RCBS .50 BMG powder measure. 50125 \$145.00

### 50 BMG PRIMER SEATING DIE <sup>^</sup>

One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch. 50200 \$250.00

### 50 BMG PRIMER POCKET SWAGER <sup>^</sup>

Makes it easy to remove the military crimp. 50001 \$499.00

### PRIMING CONVERSION <sup>^</sup>

Converts Swager to Priming System. 50003 \$135.00

### 50 BMG PRIMING SYSTEM <sup>^</sup>

Allows off-the-machine primer seating. 50002 \$499.00

### (1) SWAGER CONVERSION <sup>^</sup>

Converts Priming System to Swager. 50004 \$145.00

### RCBS .50 BMG LOADING ACCESSORIES <sup>^</sup>

.50 BMG Powder Measure 21896 \$129.99

# SL900 <sup>^</sup>

## STANDARD FEATURES:

- Made in the USA
- Automatic Indexing
- Auto Powder/Priming Systems
- Adjustable Case-Activated Shot System
- Factory Adjusted to Load AA Hulls
- Factory Adjusted Loading Dies
- The Original Tilt-Out Wad Guide
- Lifetime "No-B.S." Warranty
- RISK FREE 30-Day Trial Period!

All for ONLY...

## Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 \$19.99

## Schuster Mfg. Inc. Adjustable M1/M1A Gas Plugs

All Schuster Mfg. Inc. Adjustable gas plugs are made in the U.S.A. from hardened tool steel, Parkerized and feature a lifetime factory warranty. By adjusting the volume of gas, you change the speed of the op rod and the barrel harmonics. If you're working up your own handloads, a quarter of a turn WILL affect your group size. Includes instructions and the adjustment tool (Allen wrench).

# Their Ears

## What to tell your legislators...if only you had their ears A 9-point program to help get Congress back on the right track

By Alan Korwin

The carnival nonsense is done, we have new elected representatives. Were they legitimately elected? That debate will go on. Activists will probably shout back and forth at each other for years. But wouldn't it be nice if next time real issues would take the stage. America needs that – sound political debate.

Check out The Liberty Poll at [GunLaws.com](http://GunLaws.com), for real Qs pundits should ask, like, "If you're elected what laws will you repeal?" and "Do you support gun and marksmanship training in schools, and why?" Gun issues only get discussed after a mass murderer goes homicidal, the completely wrong time for sane debate. How about after we win Olympic Gold – a good side of guns?

Downplay the hot button issues of the day as important as they are, they will shine through anyway (inflation, enabled migrant invasion, communist Chinese fentanyl smuggling, wokeism infections) those topics keep changing. Get hard responses to issues of principle that really matter for the nation: All the Bill of Rights for all citizens. How do we get the officials in the current circus to listen up? This will help. We the people can press reporters to go down this road:

1. Will you pledge to never sign anything you haven't read, personally? Everyone knows this should be. Politicians have forgotten this. Sure, reading everything will slow things way down. That's the point. And absolutely no voting on 1,000-page bills that haven't been distributed yet – that would be malfeasance and grounds for removal from office. Harsh? Yes. Needed? Also yes. Followup: "Will you identify party leaders who coerced you to vote for a bill you haven't seen?"

2. Do you agree with this public sentiment: "Don't do so much." You're passing way too many laws, especially gun laws. Remember: Infringement is strictly banned.

Violating that clear constitutional ban violates your oath of office, grounds for censure or dismissal. Mostly we can get by from day to day without the next act. Pass less bills. Do less. Less is more. Somehow, the country runs while you're adjourned. Adjourn more. To do by not doing is the hardest endeavor. Endeavor that. What sort of limits might you set for yourself?

3. We're the bosses, you're the employees. The only reason you're in government is to serve us. We hire you to represent us. Figure out what most of us want, even if that's no fun, and do our bidding – if its constitutional. Do not run off on your own. If this arrangement doesn't appeal to you, get a real job in the private world. It's really nice out here.

4. Uphold your oath of office. You as a politician of course have not been immune to the moral turpitude that increasingly describes our culture. However, if done right, your job performance and moral example will set goals we can aspire to (not currently the case). So much money is at stake the temptation is overwhelming. Do not submit.

5. Do not even think of passing laws you know are reasonably suspect or are illegal or unconstitutional. You know what we mean, don't play coy. There are too many illegal laws on the books already. Taking undelegated powers is usurpation, treasonous tyranny, invoking by law a death penalty in the worst cases. And bureaucratic bafflebagg must be replaced with plain English. Anyone caught using bafflebagg will be fired and sent for remedial language arts.

6. Laws hidden in gigantic bills just to get them passed unnoticed or unchallenged are invalid, on procedural grounds, support this. We've seen you do this to our gun rights, dastardly incrementalism. Sure, it could make it almost impossible to get a lot of things passed. But that, of course, is the way it is supposed to be. To do otherwise is

to deny the will of the people and perform disgracefully.

7. Follow the doctor's prime directive – first, do no harm. If a bill has some pretty good stuff in it, but a few things aren't right, do not pass it. Get it right. Stop saddling us with problems you'll fix next time. Don't experiment upon us.

8. Get more done with tools you already have. By saving time on massive new legislation (that you're going to slow down, right?) – you can make sure our existing laws are enforced with an even hand. Every crime is already as illegal as laws can make it. Has been since forever. Arrest some of the two-million-plus hardened criminals you say the Brady law has found. They've signed up – name, address and signature – on your issued forms, yet only handfuls have been prosecuted. And street thugs. Put 'em all away – if they're really bad apples (the FBI strongly asserts Brady denials are mostly not).

9. Make sure every new law can pass the John Shaddegg test (former U.S. Congressman): Identify

where in the Constitution – specifically – the proposed law draws properly delegated authority (misapplying the general welfare clause is not a valid workaround); and the Tom Smith test (former Arizona House of Representatives): Answer the questions, "What's the problem?" and "How will this bill solve the problem?"

While you're at it, consider the Frances Barwood plan (former Phoenix City Council): For every new law proposed, two old ones must be repealed.

So tell me, spending is now measured in trillions. That's an increase over billions by an order of magnitude. Can you honestly say inflation is only at single digits? Good sidearms now cost high three figures? Are you folks lying? Tell me it isn't true. I'm listening. I'm all ears.

Award-winning author Alan Korwin has written 14 books,

ten of them on gun law, and has advocated for gun rights for nearly three decades. His 15th book, *Why Science May Be Wrong* is underway. See his work or reach him at [GunLaws.com](http://GunLaws.com).

# .30 Super Carry, a Perfect Niche Round

Opposite page, from left: Remington FMJ, Federal FMJ, Speer Gold Dot, and Federal HST, the .30 Super Carry rounds tested.

## By Oleg Volk

Since the introduction of .30 Super Carry cartridge by Federal Ammunition, it has been praised and criticized with about equal enthusiasm. With two pistols in hand, a Nighthawk Custom GRP 1911 and a more pedestrian Smith & Wesson Shield EZ30, I put the concept of a compact carry cartridge to the test.

Although developed independently of the historic precedents, .30SC dimensions resemble the Pedersen Device .30-18 and French 7.65x20mm Long ammunition, the latter used in military pistols and submachine guns through the 1950s. While not backward compatible with those cartridges, .30SC represents roughly the same leap of performance as .32 H&R Magnum did over .32 S&W Long. The .30 Super Carry is just a little more energetic than .32 H&R Magnum, launching the same 100-grain bullet at 1250fps, or 50fps faster from a similarly sized handgun. The benefits of these smaller-bore cartridges are the same: less muzzle flip and greater ammunition capacity than the larger caliber high-velocity cartridges like 9mm Luger and .357 Magnum. Compared to the less energetic .380 ACP and .38 Special, they retain higher capacity while offering significantly better terminal performance, especially penetration. The .380 ACP is light for the caliber, while the .30SC is heavy, especially in the 115-grain Speer Gold Dot form.

The capacity advantage is significant: the Shield EX30 holds 10 rounds instead of 8 in .380 ACP or 9mm form, the Nighthawk GRP holds 12 instead of 9, while the double-stack Shield Plus carries 16 instead of 13. In theory, the guns could be thinner as well, but two factors preclude that: the re-use of the frame and slide dimensions by the manufacturers to retain holster compatibility, and the high chamber pressure of the cartridge. Designed to push the same weight 115-grain projectile to nearly the same velocity as 9mm Luger, .30SC develops nearly 50 percent higher pressure to achieve that. The barrel strength requirements preclude significant shrinking of the overall package.

The other theoretical advantage over 9mm Luger is the faster split time during rapid fire. With all but one load using 100-grain bullets, .30SC recoils on par with baseline 9mm but with more of a push and less of a muzzle flip. In my experience, shooters of various experience levels could fire full magazines from .30SC pistols in about the same time as from 9mm magazines. The difference, of course, was that a full .30SC magazine holds 2-3 more shots, thus giving a much-improved hit probability. This would have less importance for a service-size pistol, but a definite plus for a compact

pistol carried with one or no spare magazines readily accessible. Compared to .380 ACP, the punchy .30SC produces more energetic recoil and a louder report, but also delivers greatly improved terminal performance. In the lineup, 9x18 Makarov bunches closer to .380 ACP, while .30SC tracks closer to 9mm Luger.

The inherent accuracy of this round is quite impressive. All shooters were able to stay on a silhouette target at 50 yards with GRP, and out to 30 yards with EZ30. Even the physically compromised testers had an easy time racking the lighter-weight recoil springs of the .30-caliber pistols, shooting them with one hand, and controlling muzzle flip during rapid fire.

Disadvantages? The main one is that of early adoption: currently, ammunition is offered only by Federal (HST, FMJ), Remington (HTP, FMJ), and Hornady (FTX). A minor one is reduced expansion compared to .355-caliber options, but the difference is so small as to be insignificant.

With this cartridge being new to the market, it's unlikely that it would wrestle primacy from 9mm the way that round won over .40 S&W and .45 ACP. However, it's very likely that it will be more available than .32 H&R Magnum and .327 Federal Magnum simply because subcompact handguns are a growing market segment while compact revolvers aren't. On the technical side, Federal did everything to ensure this caliber's success. In the performance lineup, it nearly splits the insufficient penetration of .32 ACP and the excessive punch of 7.62x25mm Tokarev, providing a reasonable performance envelope in a package that almost anyone can handle.

Looking at the specific launch platforms, the Nighthawk GRP is a typical high-end M1911: accurate, comfortable, with a crisp trigger and excellent sights. The only difference is the slightly extended magazine tube that might not fit all closed-top M1911 mag carriers. EZ30 proved nearly identical to the .380 ACP version in handling but showed significantly better accuracy at the range. Follow-up shots were in between the .380 and the 9mm versions of the same gun, but the increased capacity improved the number of hits per magazine. The main catch with that pistol also lies with its magazine: instead of a retention notch, the magazine body has a flared tab that can catch on the inside of a magazine pouch or a pocket. For carry, its white-dot sights could stand an upgrade to HiViz H3 combination tritium and fiber optic replacements, the rest of the design proved reliable and ergonomic. I am looking forward to even smaller 9mm designs being adapted to .30SC for the increased capacity and quicker follow-up shots.

## Smith & Wesson M&P Shield 4MOA Rear Sight

This Smith & Wesson factory sight features a clear polymer optic, a glass-filled nylon body and a snap-on cover. The microelectronic unit is contained within a robust waterproof encapsulated insert. The LED insert senses target light levels and controls the light output of the LED to give optimum visibility of the dot against the target.

# KNS Precision, Inc.

**Gen 2 Mod 2 Non-Rotating Trigger/Hammer Pins .154 Diameter.**  
33391 \$33.00

**Gen ST Non-Rotating Trigger/Hammer Pins .154 Diameter.**  
33392 \$38.00

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

**Stackable Utility Box 40194 \$20.99**

**KNS Precision, Inc. AR-15 Bolt Catch Retainer Pin.**  
33390 \$9.99

**Perma-Pin Firing Pin Retainer** for M-16 and AR-15 replaces the standard cotter pin found in the bolt carrier to retain the firing pin (as in original Stoner rifles). Made of tool steel. No modification to gun required.

**19927 \$9.99**

## Badger Ordnance Tac Latch

**Gen 1**

**Gen 2**

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/

AR-10 charging handle.

**Gen 1 10379 \$19.99**

**Gen 2 18477 19.99**

## Tri-Can Triple Ammo Can

The Tri-Can will change your life! The perfect organizational tool to fit any of your needs.

The tough injection molded plastic base and lid, rubber seal gasket, and cam-lock latch keeps your contents safe. Comes with a strong handle for those who are on the go!

The Tri-Can is made up of three individual cans and can be customized with up to three individual cells.

The individual can dimensions are 9.25"L x 3.125" Base W x 3.125" Top W x 2.5" H

**Tan 37998 \$27.99**

**Black 37999 27.99**

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

## Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

# DILLON: A MEMOIR

**R**ead the story of Mike Dillon's journey from washing aircraft for a crop-dusting company, to airline pilot, to creator of The World's Finest Reloading Equipment, and ultimately, to the man who revolutionized the M134 Mini-Gun!

Along the way his adventures included restoring a P40 Warhawk, fighting wildfires in WWII-era bombers converted to drop fire retardant and writing articles about flying warbirds for *Air Progress* magazine.

Not content to rest upon his laurels for creating the World's Finest Reloading Equipment, Mike finished out his career by re-engineering the M134 Mini-Gun, helping to arm the US and its allies to fight the War on Terror across the globe.

Mike's memoir is a compelling read: the story of a man who believed he could do anything he set his mind to, and actually did it!

*Pictured here are the original 1928 Navy Overstamp Thompson submachine gun Mike inherited from a friend who died in a tragic plane crash and a Star Machine Works reloader with Mike's "Super Star Conversion." These two items inspired Mike Dillon to found his own reloading equipment company. Read the book for details about how it happened.*
