Attention Dillon Customers: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

1. Right of Quality – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.

2. Right to Test and Send-Back – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.

3. Right of Service – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.

4. Right of Warranty – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*

5. Right to be Heard – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered.
We constantly strive to live up to his standards.
Please let us know if we're not succeeding.

All the electrical and/or electronic components of Dillon equipment and all Dillon textiles are covered by a one-year warranty from date of purchase. Any modifications performed to Dillon machines, or the addition of any unapproved equipment, including automated or mechanical add-ons from other manufacturers, is expressly not recommended and will void the Dillon warranty.

CP2000^

Dillon's DEDICATED Case-Processing Machine!

- Made in the USA
- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL1100 and Super 1050, the CP2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass! If you're loading mass quantities of ammo, the CP2000 will make your task MUCH easier.

Rapid Trim 1500 Case Trimmer^

Dillon's RT 1500 shown installed on an XL650.

The RT1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. *(Vacuum cleaner and hose not included.)* The RT1500 is equipped with a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT1500 Case Trimmer **62164** is **$399.00.** (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **$25.00** each. Upper lock rings, **13559**, are **$9.25** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

20095
$150.00

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	**62124**	**$28.00**
9mm Adapter	**62168**	**22.00**
.40 S&W Adapter	**62169**	**22.00**

Dillon's 303 Stainless Steel Headspace Case Gages Won't Rust!

Headspace Case Gages are essential for setting your rifle size die, and make it easy to ensure that your loaded pistol rounds will function in your firearm.

Case Preparation Equipment

Vibratory Case Cleaners Case/Media Separators

CM2000 Case/Media Separator^	20675	$139.00
CM500 Case/Media Separator^	21045	$99.00

CV2001 – The Industry Standard

Dillon's CV2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon created the CV750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV2001 and is every bit as tough – just more compact. To accompany the CV750, the CM500 does the same job as the larger CM2000 Case/Media Separator; and, like the CV750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV2001^, US 110v	20493	$299.00
CV750^, US 110v	19455	234.00
Euro 220v CV-2001^	22047	320.00
Euro 220v CV-750^	19473	260.00

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle.	13804	$12.99
Case (20 pc.)	20255	199.99

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle	13733	$15.99
Case (20 pc.)	20256	223.99

10 bottles of polish/10 of lube^		
Case (20 pc.)	21375	$209.99

Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.

12-pound bucket **13287** **$26.50**

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!

10-pound bucket **13496** **$20.00**

COACHWHIP

A STUNNING TRIBUTE TO SIDE-BY-SIDE SHOTGUNS OF THE OLD WEST.

INTRODUCING THE HERITAGE® COACHWHIP

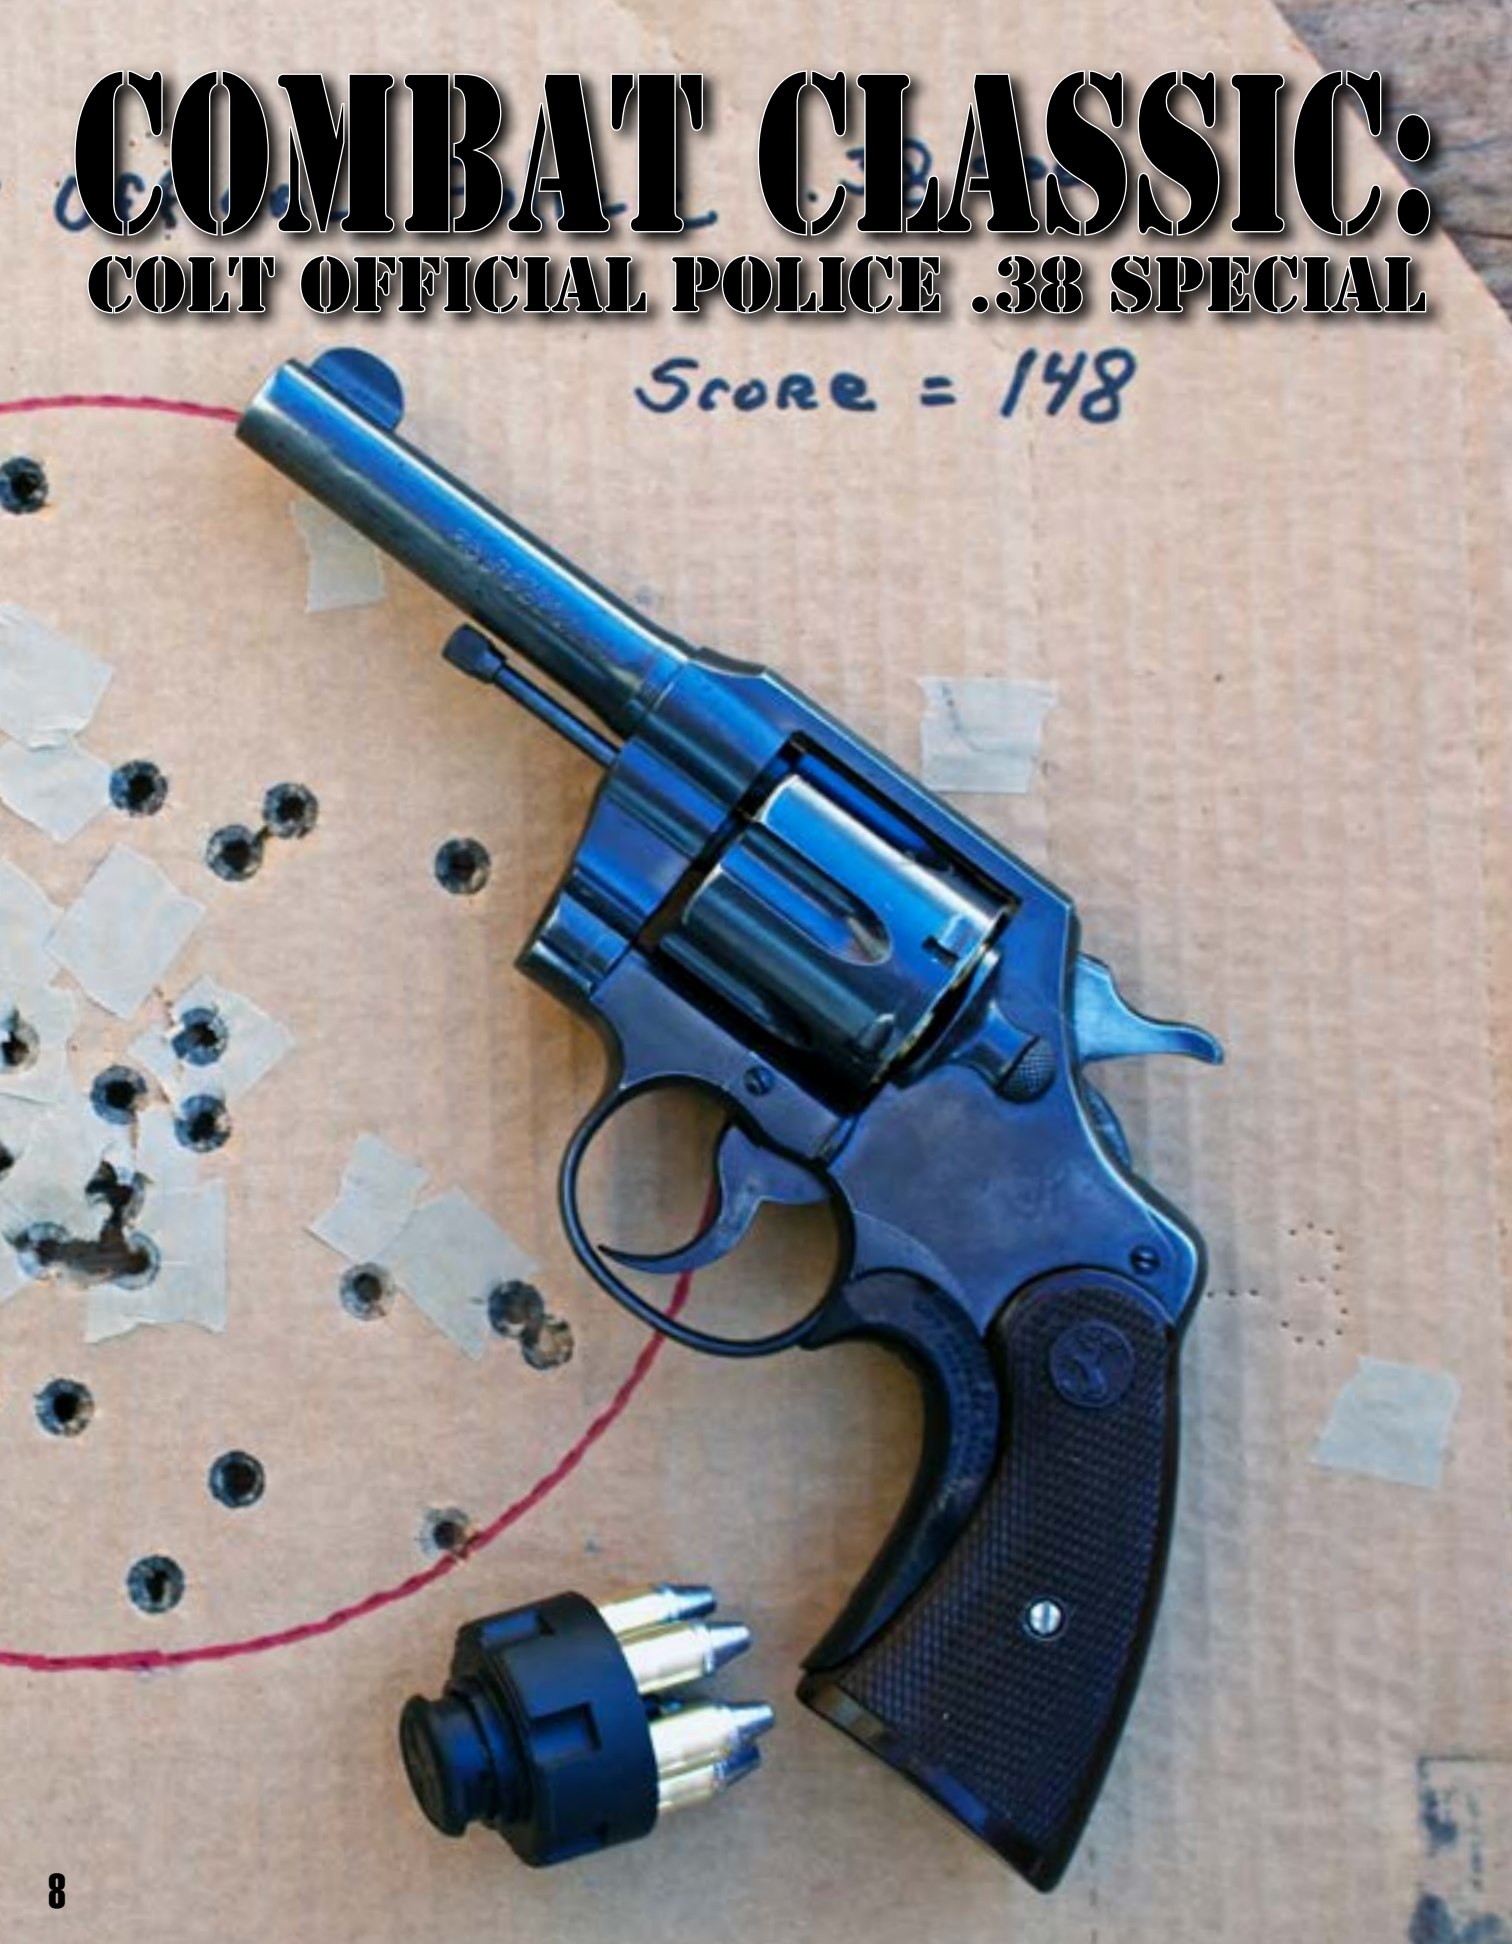

An heirloom-quality, side-by-side coach gun designed to transport you back to the rugged beauty of the American frontier. Whether displayed in a collection or put to use on the range, the Coachwhip is the perfect blend of tradition, craftsmanship and Western grit.

COMBAT CLASSIC:
COLT OFFICIAL POLICE .38 SPECIAL

By Ken Hackathorn
Colt Official Police .38 Special Revolver
***Blue Press* "Combat Classic" Evaluation Drill Score = 148**

History:

In 1908 Colt Firearms introduced the "Army Special" revolver which was a vastly improved version of the Colt New Army & New Navy revolver. Built on a larger frame to house the .41 Colt cartridge, it was also chambered in .38 Special and .32-20. Colt had high hopes that the Army Special would be chosen as a future US Military sidearm. While the adoption of the 1911 pistol killed those hopes, the Army Special became a popular seller in the commercial market.

While most police officers carried their smaller .32 and .38 S&W caliber revolvers under their uniform tunics, usually in a pocket or small belt holster prior to WWI, the rise of the Sam Browne uniform belt became the norm after 1918. Cops quickly gave up revolvers like the smaller Colt Police Positive models and changed to the larger .38 Special frame service revolvers like the Army Special. By 1927 Colt realized that the Army Special was quickly becoming the choice of police agencies nationwide. Colt changed the name of the Army Special to Colt Official Police. Minor changes were made such as larger profile sights and some cosmetic improvements.

By 1930, the Official Police .38 Special caliber revolver was extremely popular. Colt had a slight lead in the police service revolver market over Smith & Wesson. After WWII, the winds of change began to favor the Smith & Wesson Military & Police Hand Ejector .38 Special revolvers. They quickly took over the Police market and in 1969 Colt dropped the Official Police revolver from their catalog, replacing it with a newer MkIII design…which never really took off. For most of the first half of the 20th Century the Colt Official Police was the preferred sidearm of large agencies like the NYPD and the Chicago PD.

Shooting Impressions:

My personal Colt Official Police .38 Special revolver is an early post-war 4" barrel model that was previously owned and carried by a Chicago PD officer. It is typically loaded with CCI snake shot .38 Special loads and does a great job of dispatching the rattlesnakes that seem to be very common during the warm months around my home. During colder months, it is kept close at hand but loaded with .38 Special 158-grain JHP ammo. This old Official Police shows plenty of wear from carry but is mechanically perfect. With an old Pachmayr grip adapter in place, it fits my hand just fine.

Off to the range one brisk afternoon to try my luck on the ***Blue Press*** "Combat Classic" evaluation shooting drill. 30 rounds of 158-grain .38 Special service loads were used to see just how well this old veteran "copper" gun would do. It should be noted that prior to the 1960s, most police officers practiced and qualified shooting strong hand only cocking the hammer and shooting single action only. Design wise, Colt revolvers always had a slight edge over Smith & Wesson's in this department. Once police agencies started to teach officers to shoot double action, Colt came up short compared to Smith & Wesson. Also, Colt revolvers, due to the design, simply are not as robust as the S&W design when subjected to double-action shooting. Colts go out of time rather quickly compared to S&W models. Although, S&W wheelguns do have their own form of fleas as well.

My test Official Police has the typical heavy, stacking double-action trigger pull that is common with Colt revolvers. Plus, the Colt requires the cylinder release to be pulled to the rear compared to the S&W being pressed forward. It is generally accepted the S&W design is easier, thus faster. I haven't shot my Colt Official Police much except for offing a few rattlesnakes each summer.

As such, I didn't really expect my score on the ***Blue Press*** Qual to be all that good. I also noted that the speed-load process was not nearly as easy as on a S&W K frame. Alignment on the Colt is just a tad slower. I still managed to make the reload time with ease. When it came time to tally the score, I was quite pleased…I had dropped only two points, a final score of 148 out of a possible 150. As such, I give the Colt Official Police .38 Special revolver a passing grade of a B-minus.

COMBAT CLASSIC EVALUATION

Type: Timed
Rounds: 30 total, 150 Points Possible
Target: IDPA Silhouette
Range: 3, 5, 7, 10, & 15 yards
Start Position: Low Ready

Procedure:

Stage 1. 3 yards. On signal fire 2 rounds in 1.5 seconds strong hand point shoulder position.
Stage 2. 5 yards. On signal fire 2 rounds to the body and 1 round to the head in 3.0 seconds.
Stage 3. 7 yards. On signal fire 2 rounds in 2.0 seconds. REPEAT for a total of 4 rounds.
Stage 4. 10 yards. On signal fire 2 rounds, reload and fire 2 more rounds. (Start with only 2 rounds in the gun.) Time is 8.0 seconds for auto pistol, 10.0 seconds for revolver.
Stage 5. 10 yards. On signal fire 2 rounds with both hands, 2 rounds strong hand only and then 2 rounds weak hand only. Time is 9.0 seconds.
Stage 6. 10 yards. On signal fire 1 round in 2.5 seconds. Repeat for a total of 5 rounds.
Stage 7. 15 yards. On signal fire 6 rounds in 8.0 seconds.

The NEW Ruger RXM

Collaboration Meets Customization

By Maureen P. Sangiorgio
NRA-Certified Firearms Instructor/Range Safety Officer
Photos Courtesy of Ruger

I've noticed a trend lately in the firearms industry… collaboration. So, it didn't surprise me when one of the more popular new handguns introduced at SHOT show was the new Ruger RXM. This new handgun is a collaboration between one of the nation's leading manufacturers of rugged, reliable firearms, and Magpul, one of the most respected and revered manufacturers of high-quality magazines and accessories. The new Ruger RXM has a variety of upgraded features, great ergonomics, and an affordable price that allows for almost endless customization.

"We couldn't be more excited about this collaboration between Ruger and Magpul as we make an entrance into one of the most iconic handgun markets of all time," says Todd Seyfert, President and CEO of Ruger. "The response so far has been incredible, and we're thrilled to be working with such a strong partner."

800-223-4570 • dillonprecision.com

So what does this mean for the consumer? "Consumers should consider purchasing this new handgun because they will get American made excellence," says David McDaniel, Director of National Accounts, Ruger. "It is built by two industry leaders with a proven legacy in the shooting sports industry. The RXM offers a feature-rich design that is packed with many customizable options to fit a variety of needs at an unbeatable value."

RXM's Upgraded Features

The RXM's slide features a black FNC nitride finish and allows for direct optic mounting of RMR, Delta Point Pro (DPP), and RMSc pattern optics. Co-witness height steel sights feature a tritium front night sight, providing an excellent sight picture, with or without an optic installed. Front cocking serrations and a precision-rifled barrel complete the premium slide assembly.

The pistol is equipped with a flat-faced trigger and easily actuated magazine release, slide release and takedown lever, but the best features are the ones you add. Most major components are designed for Glock Gen 3 compatibility with off-the-shelf parts, holsters, and accessories for nearly unlimited customization, and the RXM is designed to use 9mm magazines compatible with compact or larger double-stack Glock pistols, including Magpul GL9 magazines.

The Magpul EHG offers consumers premium features, including Magpul's 3/4-scale TSP texture, which provides a comfortable, secure grip. Other EHG features include textured indexing pads for consistent finger/thumb placement; a low-profile, flared magazine well for quick and easy magazine insertion; a trigger guard undercut and beaver tail that promote a high grip for better control; a magazine release scallop for easy access; and a universal-pattern accessory rail for use with a variety of lights and lasers.

"Engineered for comfort, the RXM boasts an optimal grip angle and an ultra-low bore axis, delivering a smooth, controlled, and enjoyable shooting experience," says McDaniel.

Fire Control Insert

The RXM features a removable stainless steel Fire Control Insert set inside an interchangeable Magpul Enhanced Handgun Grip for maximum flexibility in construction. According to the owner's manual, the modular design allows for the pistol to be reconfigured using interchangeable Magpul grip frames and most commonly available Glock Gen 3 slides, barrels, magazines, and internal components.

"The Fire Control Insert enables fast and effortless grip frame swaps," says McDaniel. "If someone purchases the standard model but later wants a different color frame, he has that option. If another customer prefers a slightly smaller grip on her RXM, they can easily make the change. Modularity is a key factor for today's consumers, and the RXM delivers that flexibility at an incredibly affordable price."

RXM SPECIFICATIONS

Model: 19400
Caliber: 9mm Luger
Capacity: 15 + 1
Grip Frame: Stealth Gray Magpul Enhanced Handgun Grip
Barrel Length: 4"
Front Sight: Tritium, Co-Witness Height

Barrel Length: 4"
Front Sight: Tritium, Co-Witness Height
Optic Ready: Yes
MSRP: $499.00

Team Ruger Captures First Divisional Wins With the New RXM™ Pistol

The new RXM has also shown its competitive edge by claiming several divisional wins this year. Team members Dave Olhasso and James McGinty braved the elements for the first match of the season at the IDPA Arctic Blast held at the Wilkes-Barre Rifle & Pistol Club in Hunlock Creek, PA, securing the RXM pistol its first set of divisional competition wins. Olhasso captured the top spot in the SSP (Stock Service Pistol) division using the RXM pistol, finishing with a final time of 89.82. Teammate McGinty claimed the number one slot in the CCP (Concealed Carry Pistol) division and first overall with a final time of 72.61, also competing with the RXM.

For more information on the new RXM, or any other Ruger products, go to: **ruger.com**.

MORE KIMBER THAN EVER!

KDS9c FEATURES

OPTICS-READY SLIDE

15+1 ROUND CAPACITY

SUPERIOR ERGONOMICS

REVERSIBLE MAG CATCH

LEARN MORE

For over 30 years, Kimber has crafted a reputation for superior quality 1911s. With the introduction of the KDS9c, Kimber doubles down on capacity and takes quality to the highest level. From tremendous accuracy to relentless reliability, the KDS9c comes standard with two 15-round magazines that give you the capacity you want and the accuracy you need. 10-round magazines are available in compliant states, and 18-round extended magazines will be available soon. **The KDS9c delivers more Kimber than any pistol before it because a Kimber is what all guns should be.**

Kimber

WHAT ALL GUNS SHOULD BE™

On the Cover

This month's cover model is Ciara with our new Precision Bullet Feeder on an XL750. See page 19 for more information about our Bullet Feeder. For more photos of Ciara and other Blue Press models follow us @ bluepress.

Dillon's Range Bag^

Borrowing design features from Dillon's original range bag, but with upgraded metal D-rings and clips for the shoulder strap, Dillon's "Retro" Gray Range Bag is constructed of heavy-duty ballistic nylon.

The primary compartment measures 14-1/4" x 7" x 8" and features two interior pockets measuring 6-1/2" x 6-3/4" with hook-and-eye closure flaps. An additional interior pocket measures 5" x 7-1/2".

The top cover can be quickly secured via hook-and-loop strips at the end or by two side zippers.

There are two zip-up outer compartments measuring 12" x 8" x 1-1/2". One of the outer compartments features extra padding for carrying a handgun, and the other has an external zippered compartment for pens, pencils, etc.

33389 $139.99

"Border Shift" Ammo Bag^

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black	**13755**	**$35.99**
I.D. Card Holder^	**14575**	**2.99**

Dillon's Pistol Case^

Our pistol case was designed to hold and protect your pistol *and* carry 200 rounds of ammunition! The back side of the durable, ballistic nylon case features two pockets that will accept Dillon's 100-round ammo boxes. The case features a heavy-duty, locking YKK zipper, closed-cell foam padding and a suede-textured fabric liner to protect your pistol's finish. Measures 14" x 9".

12709 $39.99

Dillon's Shooting Mat^

Dillon's Shooting Mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The "ground" side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles. *Dimensions: 66" x 27.75"*

18146 $89.99

Dillon's NEW Bullet Feeder

Dillon Precision's bullet feeder features the same quality and attention to detail you've come to expect from Dillon, and it has several key advantages compared to our competitors:

- Unparalleled reliability, with over 50,000 rounds tested, there have been ZERO bullets dropped upside down.
- Our new design works much better with longer high B.C. (Ballistic Coefficient) rifle bullets that are typically very cumbersome to use. Utilizing different bullet disks for shorter and longer bullets allows users to customize the bullet feeder to match a specific bullet type, without the need for "fine tuning."
- Dillon's modern manufacturing process results in low-cost conversion kits between calibers, while allowing for fast and efficient improvements throughout the development process. It also allows us to pass on a lower cost to our customers.

Dillon's Bullet Feeder comes with mounting posts for XL750/XL650 and RL1100/Super 1050 Reloading Machines, and at our introductory price of **$399.99**, it's much more affordable than its primary competitor!

Trunk Guns, Truck Guns and Others

By Barrett Tillman

You've often seen the statement: the cheap .22 in your pocket beats the full-house .45 in your safe. Similarly, the two-MOA rifle in your vehicle beats your half-minute rifle at home. Which raises the subject of trunk guns – rifles carried in personal vehicles.

Perhaps the best example in favor of trunk guns occurred in Austin, Texas in 1966 when former marine Charles Whitman established himself in the University of Texas Tower. In about 96 minutes he shot 48 people from as far as 400 yards, killing 16. The toll could have been higher except for armed Texans who pulled out their trunk guns and returned fire.

I grew up in Eastern Oregon where almost everybody's pickup had a rifle rack; some carried a rifle and a shotgun.

The cab-mounted gun rack had the advantage of immediate access to long guns, but it also posed problems. There was no way to hide the weapons, being prominently displayed, and thefts did occur. Maybe the best option I saw was a roof-mounted rack that held a long gun parallel to the top of the windshield. With the sun visors folded up, the firearm largely disappeared. But that was years later.

The Internet offers a huge variety of options including a pack/rack suspended from the back of driver or passenger seats. Some racks attach beneath folding rear seats.

There are strong boxes with drawers for a trunk or under seats. Pickup bed storage boxes can be low profile, some being concealable.

But note that RVs usually are not considered a home or residence. They are motor vehicles. Act accordingly.

Urban Trunk Guns

In the city, there's also reason to carry vehicular long guns, where legal. Compared to country folk, in urban settings you're likely to need far less range but more capacity (visualize mob violence) and penetration of vehicles or structures. Therefore, many shooters select semiautos with standard-capacity mags: usually 20-rounders for .308 and 20- or 30-rounders for .223s. Most carry a spare mag, but if we cannot solve a problem with 20 or 30 rounds of center-fire rifle, we probably cannot solve it, period. Time to dig in, wire in, and call for tac-air.

A friend of similar vintage packs an FN-FAL with two mags: ball and AP. It certainly suits the urban environment but loaded it weighs 12 pounds. Which is why it makes a dandy trunk gun rather than a get-out-and-hike rifle. But what if you're stranded and you need to get out and hike?

Another shooting partner likes his scoped folding-stock 10-22 in a tennis racket case. The thing is uncanny accurate, and invisible in the zippered container.

An urban long-range shot might be 300 yards. But at that distance we're mostly bulletproof. The "Beltway Snipers" who shut down much of the D.C. area for three weeks in 2002 usually shot from 50 to 100 yards.

Rick Furr, a significant international instructor, has taught Arizona vehicle firearms classes for decades. He says, "I recommend a Mini-14 with a 20-round mag in a zipper case. It isn't military looking, and you don't need a scope because you're probably not going to shoot very long distance. The early ones had cheap barrels but they're plenty good for city distances."

Furr also advocates a sling on any long gun. You never know when you'll need both hands for another task.

For urban use, a folding or telescoping stock makes sense – far easier to store and conceal. (Pistol-grip shotguns is another subject.)

Scenarios

Short of that "Zombie Apocalypse," in what situations would you want a long gun in your vehicle?

Shuffle the deck and draw a card:

Civil disturbance. You're 20 to 100 miles from home when "Something Happens." It's going to take hours or maybe days to reach safety. Your "groceries gun" – a

sidearm with one or two reloads – probably won't be enough.

Natural disaster. See above, but with panic-augmenting fires, floods, earthquakes, collapsed bridges, or nuke meltdown. Visualize roving gangs setting up "toll booths" at choke points, extorting money, food, fuel, or whatever from motorists desperate to pass through.

Terrorist attack. We're in an open-ended global war that *will* last beyond the lifespan of anyone reading this article. Whether the government calls it "Terrorism" or "Workplace Violence," the result can be identical.

In any of the foregoing situations, you'll be extremely glad to have your trunk gun(s). A rifle equals range, which equals time, which equals options.

The Downside

There are practical and tactical concerns with trunk guns. First the practical:

Are you willing to leave a rifle in your vehicle full time? First consider the climate. Here in the Great Sonoran Desert, we often get daytime highs of 110 and lows of 90. What effect would higher vehicle temps have on your ammo and your rifle?

Are there frequent automobile thefts in your area? What level of risk is acceptable for your vehicle and/or its contents?

Taking your car in for a checkup or an oil change?

DON'T FORGET TO REMOVE THE GUN.

Now the tactical:

Besides your long gun, consider ear protection, shooting mat, blanket, and water for that 20- to 100-mile situation.

Trauma kits can include coagulants and high-compression bandages, sometimes spendy but invaluable when needed. Civilian rifle fights are extremely rare, but they can resemble a small-unit action more than a typical shootout. Wounds from rifle bullets typically are twice as lethal as pistol rounds, so your trauma kit might assume even greater importance than normal.

How long does it take to get a trunk gun into action? Depending on specifics, you can easily find out. At a safe facility, with a target perhaps 30 yards away (across a typical city street), while strapped into your everyday vehicle, hit the timer and retrieve your cased rifle from the passenger's compartment. Withdraw the weapon, chamber a round, and hit the target. Repeat twice for an average.

Next put the same case in your trunk. Repeat the process for an average performance. You'll probably find that the passenger compartment is about five seconds faster than the trunk.

Note: carrying a long gun in the passenger compartment can result in extremely unpleasant results from badge-heavy cops. It's happened.

Active Shooter: Trunk Gun Time?

Now then:

Let's say there's a fusilogical emergency and you have your trunk gun.

You know your rifle and you're proficient with it. A 200-yd zero means you can hold dead-on to the end of most city blocks, typically 1/8 of a mile. But it's far more likely you would shoot across a street. The average police sniper shot is about 50 yards.

Whatever your zero, know your 25-yard point of impact and practice it, because only a small piece of the perpetrator may be visible.

OK, you're confronted with an active-shooter situation. Now what?

As you run to the sound of the guns, any of several things can ensue, mostly unpleasant. Even if you don't get shot by the perpetrators:

You might get shot by a CCW holder.

You might get shot by a policeman.

You might get mobbed by a passel of unarmed citizens. All of whom assume that the guy with the rifle must be one of the offenders.

If you arrive with police already present, you have two options: (A) volunteer to help, or (B) leave.

Even with police approval, it may not carry much weight in court. Whether the offender is deceased or wounded, expect to be sued. Even cretins have relatives, and there are always ambulance chasers plus agenda-driven DAs.

A retired Oregon sheriff says, "My two cents worth, it's best to stay out of the fight. Unless the officer knows you personally, there's too much of a chance of arriving officers taking you out. I think today's cops are way too trigger happy. A sheriff is the only person with the authority to swear you in as a special deputy, and he can do that on the spot, and it should cover you. But in an active shooter scenario, time to swear you in would be limited."

A former federal agent advised: "Approaching the police during any kind of active event is really hairy. With their 'in depth' training (think NYPD), you are likely to be shot immediately – with everyone around you. The stress levels are really high, and their perception may get you killed.

"If you feel it is desirable and want to help, I suggest approach with *no* gun visible, verbally contact an officer, and ask if they would like some assistance. If no, exit the scene right away! But if yes (more likely here in the West), tell the officer what assets you have. Ask him/her to advise all that you are a civilian helping out and have them broadcast your description to all hands! Then stay close to the officer unless tactically unsound."

Your best hope is that the offenders are certified terrorists rather than garden-variety criminals. But absent an ISIS black banner accompanied by appropriate chanting, you won't know that at the fatal moment.

Sometimes the best shot is no shot. In that case, you might decide to leave your trunk gun…in the trunk.

Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon's double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

Package of 10	**21528**	**$10.00**

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Replacement M2 Sensor	**18877**	**36.99**

CED Universal Reloading Machine Light – This custom made, heavy duty, LED light, provides 3 watts of intense lighting, illuminating your entire reloading machine's shellplate. With three light intensity selection levels, and a heavy duty 9" (23cm) long adjustable rubber coated neck, the CED Universal Reloading Machine light shines precisely where you need it. Made with two heavy duty powerful magnets that strongly secure to any metal surface, this universal light is compatible with all Dillon machines (550 needs the strong mount for use).

13694 **$24.99**

CED Reloading Machine Covers – Unlike other reloading machine covers on the market today, the CED machine covers are designed to include the DAA Mr. Bullet Feeders and Autodrives in some cases. Made of a strong nylon material, they include grommets for air circulation, and an ID holder that allows you to place your load details on each machine in use. A D-ring located at the zipper closing allows the cover to be locked, keeping children from places they should not be! Offered in two size ranges, a 650/750 medium cover and the large 1050/1100 model.

650/750	**13693**	**$39.99**
1050/1100	**12888**	**39.99**

CED Solid Brass Squib Rod – The CED custom-designed Squib Rod is the ideal solution for those unexpected emergencies on the range that would otherwise ruin a perfect practice or match day!

13675 **$19.99**

*'SDB' POWDER MEASURE^* **20001 $135.00**

*SQUARE DEAL B TOOLHEAD^*

Extra toolheads keep all your adjustments the way you left them.

20113, $65.00

SQUARE DEAL B TOOLHEAD STAND

Holds your SDB toolhead, powder measure, dies and caliber conversion components (*not included*) in an orderly manner.

62225, $50.00

SQUARE DEAL B BENCH WRENCH

The Square Deal Bench Wrench has the correct sizes for Square Deal "B" die adjustments.

19970, $17.00 each

SQUARE DEAL B STRONG MOUNT & CARTRIDGE CASE BIN COMBO

Ergonomically designed to cut your workload through economy of motion! Mounts your Square Deal "B" along with a bin for your empty cartridge cases.

62395, $99.00

SDB CARTRIDGE CASE BIN & BRACKET ONLY

For those who already have a Strong Mount, the blue bin and silver bracket in the above photo are available separately (hardware not included).

11672, $42.00

*MACHINE COVER^*

This great looking nylon cover adds security to your loading bench. Your reloader will be protected against more than dust as these covers come with a D-ring that allows the heavy duty zipper to be locked.

Cover, **13795, $29.99**
Master lock, **13083, $6.99**

*MACHINE MAINTENANCE KIT^*

Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit 22211, $40.00
Maint. Kit & SDB Spare Parts Kit 97015, $65.00

*SDB SPARE PARTS KIT^*

1 SD Shellplate Bolt
1 SD Ejection Wire
4 SD Wave Bearings
1 Toolhead Friction Plate
2 Pistol Decapping Pins
1 Small Primer Seat Punch
1 SD Slide Return Spring
1 #10 Tinnerman Insert
1 Bellcrank Cube
4 Locator Pins (#1, #2, #3, #4)
1 Indexer Return Spring
1 Large Primer Seat Punch
1 Primer Seat Punch Spring
2 Pickup Tube, Small, Yellow Tips
2 Magazine Orifices, Large
2 Pickup Tube, Large, Green Tips

Properly Zeroing a Red Dot

By John Kleespies

Red dots are a popular form of optics among law enforcement and competition shooters who love the speed that they offer, especially since the floating dot – with no eye box or required distance for eye relief – allows for accurate aiming, even with a not-so-great presentation. With a dot, if you can see red-on-target, then that's all the information you need to activate the bang button.

One of the challenges to operating a red dot is zeroing them, and the difficulty increases as the size of the dot enlarges. Hunting scopes are easy to zero because they possess fine crosshairs that make it easy to match the center of the reticle to the center of the target. A dot, on the other hand, will literally cover the target area – plus potentially inches of the area around it – so that you can't see the actual bullseye for zeroing.

As they say, "You can't shoot what you can't see."

Nonetheless, I've developed an effective means of zeroing a dot, which I'd like to share with you. My system not only alleviates the "covering up issue" of a dot, but actually uses it our advantage.

First of all, the size of the dot must be determined. Reporting dot size as an "MOA" is the industry standard, and it works well for my method. For example, an 8-MOA dot will visually cover an 8-inch circle that is placed at 100 yards.

Mathematically, then, we can figure the size of a round target that the dot will cover at various yardages. The mathematical formula that I use is the decimal percentage of distance to target from 100 yards, times the dot's MOA.

For instance, if I'm zeroing my 8-MOA dot at 25

800-223-4570 • dillonprecision.com

yards, that is .25 of 100 yards. .25 times 8 MOA is 2, so an 8-MOA dot will visually cover *exactly* a 2-inch circle at 25 yards.

To zero the dot at 25 yards, then, I will create a target sheet that is covered with solid, 2-inch circles, which I set up at 25 yards from the gun. The trick, now, is to dim my red dot to the lowest setting that still allows me to see a crisp outline of the reticle's edges. By dimming the dot in this manner, it allows me to see *through* the reticle to the target circle while simultaneously aligning the *edges of the reticle* to the *edges of the target circle*.

Fire the gun, and if the dot has a good zero, the bullet will go through the center of the target circle. If not, adjust the zero of the dot in the manner that is appropriate for that particular optic. Some use knobs, some use flathead screwdrivers, and other use Allen or Torx heads. Some also have reticle locking mechanisms – if that's the case, make sure to lock the reticle in place before test firing, as the action of locking will oftentimes change the optic's zero.

One of the cool things about dots is that it's easy to see the reticle move in the field of view during the zeroing process – you can literally watch it travel across your lens as you play with the knobs. Because of this, if the gun is able to be securely planted before the first shots are made, the reticle can actually be "walked" onto the target holes, significantly increasing the speed of the procedure.

Now, simply repeat the above until the bullets pass through the *center* of the target circle.

In a pinch, this same "reticle atop a circle" method can be used with a square target as well, just as long as the height and width of the square match the diameter of your reticle. Once upon a time, I found myself at an Area championship and in need of a zero check. I dug a gridded paper target out of the trash and verified my zero with a handful of shots.

For those of us who are mathematically challenged, here's a chart of common dot sizes, and the diameter of the circles that they will cover at 25 yards:

1 MOA	**=**	**.25″**
2 MOA	**=**	**.5″**
2.5 MOA	**=**	**.625″**
3 MOA	**=**	**.75″**
3.25 MOA	**=**	**.8125″**
3.5 MOA	**=**	**.875″**
4 MOA	**=**	**1″**
5 MOA	**=**	**1.25″**
6 MOA	**=**	**1.5″**
6.5 MOA	**=**	**1.625″**
7 MOA	**=**	**1.75″**
8 MOA	**=**	**2″**
12 MOA	**=**	**3″**
16 MOA	**=**	**4″**

One thing about this method of zeroing is that it tells you a lot about your dot and the data that the manufacturer provides on it. If you run the test and the dots don't size up to the manufacturer's claimed MOA size, then you may need to do some experimentation to get the correct target dot size to match your actual reticle size. And, if your dot is more of a blob than a perfect circle, then this testing method will give that away, too. In fact, after zeroing a dot with this method, I find that it garners me with *a lot* of the information that I use to determine if that particular optic is going to be a keeper or not.

Red dots are amazing optics, but like any other aiming device, they are only as good as their zero. Use this method for zeroing, and you'll be on target every time!

Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL750/650 owners with limited overhead clearance, the XL750/650 Short Strong Mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL550 Strong Mount (*Pictured*)	**22051**	**$99.00**
XL750/650 Tall Strong Mount	**22050**	**99.00**
XL750/650 Short Strong Mount	**22052**	**99.00**
Square Deal "B" Strong Mount	**22223**	**110.00**

These plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine directly to the top of the mounting plate.

Stock #62005, $99.00 is for: XL750, XL650, RL550 and Square Deal "B". **Stock #62006, $99.00** is for: RL1100, CP2000, Super 1050 and RL1050 as well as *any* Dillon reloading machine that is mounted on the Dillon Strong Mount.

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our new kit for the SDB, RL550 and 750/650 can be used with or without our Strong Mount.

SDB Bullet Tray Kit	**22312**	**$74.00**
550 Bullet Tray Kit	**22311**	**74.00**
750/650 Bullet Tray Kit	**22310**	**74.00**
1100/1050 Tray Kit	**22215**	**69.00**

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

16306 **$59.00**

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL650 with Wrench Set	**11555**	**$50.00**
RL550/XL750 with Wrench Set	**11541**	**50.00**
SDB with Wrench Set	**19441**	**45.00**
Note: Super 1050 Toolholders include Wrench Set		
1050 with bracket	**62202**	**55.00**
1050 w/o bracket	**62203**	**50.00**
One-Inch Bench Wrench	**10842**	**17.00**
SDB-Only Wrench	**19970**	**17.00**

Color Coded Aluminum Toolheads for the RL550 and XL750/650 make it easy to tell at a glance which caliber you're set up to load.

Gold RL550	**62134**	**$50.00**
Blue RL550	**62132**	**50.00**
Black RL550	**62133**	**50.00**
Gold XL750/650	**62138**	**55.00**
Blue XL750/650	**62136**	**55.00**
Black XL750/650	**62137**	**55.00**

The **Square Deal "B" Toolhead Stand** holds your SDB toolhead, powder measure, dies and caliber conversion components (*not included*) in an orderly manner.

62225, $50.00

Our **Toolhead Stands** for the RL550 and XL750/650 are the ultimate in convenience for keeping your reloading bench clean and uncluttered.

22055, $35.00 each

Dillon's 1050 Toolhead Stand is now available to store caliber quick changes for the 1050.

62200, $65.00

Equipment Dust Covers are made of tough packcloth nylon and add security to your loading bench. Your reloader will be protected against more than dust as the machine covers come with a D-ring that allows the heavy duty zipper to be locked.

SDB/550 Cover	**13795**	**$29.99**
XL750/650 Cover	**10443**	**39.99**
1050 Cover	**13239**	**49.99**
Master lock	**13083**	**6.99**
Pictured: SDB/550/650/750 Quick-Change Cover (for use **with** powder measure)	**11143**	**$14.99**

Our **Primer Flip Tray** is a heavy, high-quality tray large enough for the Federal primer package.

13606, $35.00 each

Primer Pick-Up Tubes are used to transfer primers from flip tray to priming system. Having extras pre-loaded with primers makes it easy to load a pre-determined amount of ammo without having to stop to pick up primers.

1 Large	**22029**	**$12.00**
1 Small	**22028**	**12.00**
2 Small, 2 Large	**20056**	**45.00**
4 Large	**20050**	**45.00**
4 Small	**20049**	**45.00**

Dillon's "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

97126 $225.00

"D-TERMINATOR" Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.

$149.99
10483

The **Powdercheck System** (available for XL750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

21044, $99.00 each

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

17950 $65.00

Dillon's 1" Bench Wrench fits our 1" Die Lock Rings which give you more space on the toolhead.

10842, $17.00 each

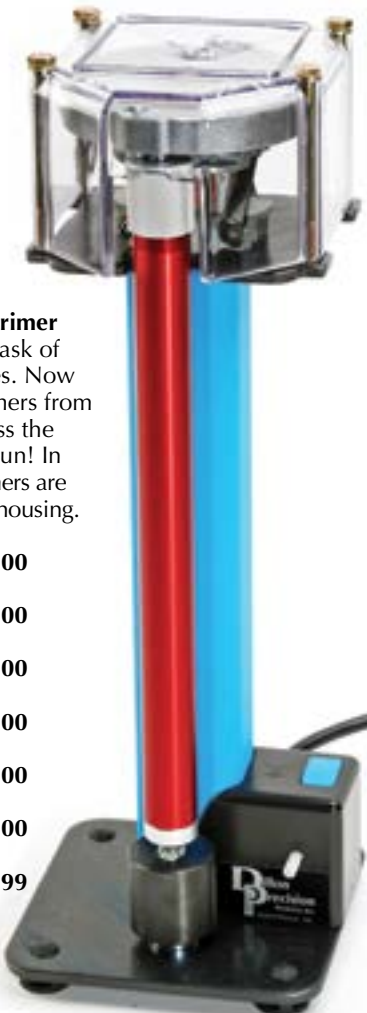

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit Only	**22211**	**$40.00**
w/SDB Spare Parts Kit	**97015**	**65.00**
w/550 Spare Parts Kit	**97016**	**65.00**
w/750 Spare Parts Kit	**97500**	**75.00**
w/1050 Spare Parts Kit	**97018**	**84.00**

RF100 Automatic Primer Filler

The **RF100 Automatic Primer Filler**^ eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run! In about two minutes the primers are inside the protective metal housing.

Large Primer Filler	**97077**	**$449.00**

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon AkroBins^

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL550/XL650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Dillon Utility Boxes^

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

WARNING: These products contain lead, which is known to cause birth defects, other reproductive harm and cancer. Handling components, ammunition, cleaning firearms or discharging firearms in poorly ventilated areas may result in lead exposure. Have adequate ventilation at all times and wash your hands thoroughly after exposure.

Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

19972 **$39.99**

AMMOBRASS, LLC Swage Setter

The AmmoBrass Swage Setter is for use with any swaging devices such as Dillon's Super Swage 600, Dillon 1050/1100 presses, and almost any other swaging device to assist you in properly setting your swage rod and swage back-up die.

Garmin
Xero C1 Pro Chronograph

The most essential data for ballistics calculations is projectile speed. A chronograph is the best tool for the job. Whether you're handloading for the range or building arrows for the hunt, the Xero C1 Pro chronograph provides the speed data you need to hone your craft.

The chronograph will reliably pick up your shots, thanks to the sensitive and accurate sensor. The device can measure projectile speeds from 100 fps to 5,000 fps for bullets, arrows, slugs, airsoft BBs, pellets, and paintballs.

Indoor and outdoor operation is simple, thanks to the backlit display and button-operated design. Keep track of your shots, measure deviation and more when paired with the ShotView app on your compatible smartphone.

Turn it on. Set it up. Point it in the direction of fire, and shoot. With battery life for up to 2,000 shots or up to six hours, there's no rush. Take your time at the range while you experiment and fine-tune your setup.

Since the unit isn't triggered by muzzle blast, it picks up shots from suppressed firearms and firearms with muzzle brakes or compensators.

Dimensions: 3.03″ x 2.38″ x 1.36″ without tripod; 5.1″ x 4.5″ x 5.5″ with tripod

Weight: 105.6 g without tripod; 161 g with tripod

BL550^

Dillon's Basic Loader

$399.00

15399

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:

Strong Mount 22051 $99.00

Dillon's RL550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL550 is essentially an RL550 without the automatic priming and powder systems.

Capable of loading over 160 calibers – just like the RL550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL550 loader! The interchangeable toolhead (*Page 13*) makes it quick, easy and inexpensive to change calibers.

AUTO PRIME SYSTEM^	**16627**	**$130.00**

PRIMER SYSTEM EARLY WARNING^

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. **20302** **$40.00**

AUTO POWDER SYSTEM^

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. **20251** **$170.00**

OPTIONAL MAGNUM RIFLE POWDER BAR **21353** **$50.00**

AUTO EJECT SYSTEM^

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. **22120** **$49.00**

BL550 POWDER DIE^

Extra powder dies for your BL550 make it easier to set up additional toolheads for loading different calibers.

Powder Die:	**16629**	**$30.00**
Oversize Die:	**16626**	**35.00**
Plastic Funnel:	**16617**	**10.00**

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL450, AT500, BL550 or RL550. *(Requires the use of an RL450 powder die – see below.)* **20029** **$35.00**

RL450 Powder Die **20308** **40.00**

Mernickle Holsters

This holster is designed for an extreme high rise carry and offers the best of both worlds. Not only does it allow you to carry a full-size automatic handgun, it's also totally concealable. The unique design has Mernickle's patented stabilizer flap that goes behind the belt. This prevents the grip of the gun from tipping away from the body while doing daily activities. The high-rise position allows you to sit in chair or vehicle without needing to take the gun out of the holster.

XHR 1911 Holster **19018** **$124.99**

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded.

4-3/4" SAA/Clones	**11560**	**$109.99**
4-5/8" Ruger Blackhawk	**15765**	**109.99**

Designed to be the ultimate in concealed carry for those not comfortable with an Outside the Waist Band (OWB) holster – the ISP offers a great carry solution! This holster gives the appearance of a front pocket wallet and breaks up the outline of your gun. The smooth Herman Oak leather inside protects the finish of the gun, but the suede outside ensures that the holster sticks in the pocket.

Sm Auto ISP	**19019**	**$39.99**
Med Auto ISP	**19020**	**39.99**
Sm Revolver ISP	**19089**	**39.99**

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy.

1911 Holster	**19947**	**$175.99**
Drop-Leg 1911 Holster	**11991**	**189.95**
Mag Pouch	**19946**	**49.99**

BURSTFIRE

2-in-1 Brass Case Annealing Machine and Case Prep Center

Introducing an industry first: the original Burstfire 2-in-1 Brass Case Annealing Machine and Case Prep Center! Now you can improve and Automate the process of brass-case annealing and increase the speed and accuracy of case prepping for reloading!

GEN 2 Brass Case Annealer features:

- Red Anodized Aluminum Wheels (Standard, Magnum, and Bottom Rotation Wheel)
- Tool-less Adjustment 360 Swivel Torch Holder. The only tool-less torch holder design on the market! Now standard on all Gen 2 units
- Sleek, glossy glass digital display for speed Controller.
- Improved/Updated speed control to a sleek and silky smooth turn knob design. Provides both speed, and simplified speed change operation.
- Updated chute design. Improved feeding when processing large batches/full chute.
- No complicated set up required! Simply attach the torch to the torch holder, and ready to go in 15 seconds! No messing around with finicky set ups like other units out there.
- Powered by six independently driven high torque motors. Unlike all other annealers, it has no plastic parts, and is not gear driven. Each motor is rated for 30k+ hours. No single point of failure!
- Precision Laser cut steel panels with a beautiful, durable, wear- and scratch-resistant finish.
- Brass case capacity is approximately 200-300 cases (dependent on caliber).
- Mechanically operated case release/drop, eliminating the need to adjust/tune it based on case size.
- Aluminum Standard wheels will accommodate cases from .300 BLK, 6BR, .223, and up to .30-06.
- Aluminum Magnum wheels will accommodate cases up to .338 Lapua or similar cases.
- Short case feed ramp – for annealing short cases such as 6BR/.300 BLK/pistol cases – included.

No complicated assembly, finicky set up/adjustments needed out of box! Open the box, attach the torch to the ring, and you're ready to go!

Case Prep Center

The Case Prep Center is powered by four independently operated high torque motorized heads on the top. It will accept any industry standard 8/32 thread attachments for deburring, chamfering, primer pocket reaming, pocket uniforming, flash hole uniforming, etc. Case Prep Center Attachments are sold separately, if you do not have them already.

One of four motors operates at reduced speed, to allow for precision work normally done by hand.

The Case Prep center can be operated upright, or laid down on the steel handle, to maximize comfort, based on your personal preference.

The On/Off switch is independent from Case Annealer.

Features a steel handle for easy carrying.

THE BLUE BULLETS

The folks at **The Blue Bullets** make cost-effective bullets for anyone who wants to reload and enjoy the Shooting Sports. Their bullets are specially designed for competitive shooters who need an accurate bullet with no barrel leading, no smoke, and at a price comparable to a non-coated lead bullet. Their coating is a proprietary polymer based liquid coating that they mix in house (not a powder coating). The bullets are sized after the coating has cured to ensure a consistent and round bullet.

KNS Precision AK Thread Adapter

This adapts your metric 7.62x39 AK barrel to the standard 7.62 thread pitch for muzzle devices and suppressors.The latest version of the AK thread adapter has been designed to index on the muzzle of the barrel, rather than the rear sight base. This is to ensure best possible angular alignment of the muzzle device. It's important to clean any buildup on the muzzle before installing thread adapter to ensure that clean, surface-to-surface contact is made between the adapter and muzzle. Thread Adapter OD 5/8" x 24 ID M14x1.0 LH. Tools Required – 17mm wrench. Finish – Black Nitride. ***NOTE: Includes adapter only – rifle and muzzle device NOT included.***

30349 $40.00

KNS Precision AK Sight Pack

Front Sight Assortment includes six CNC Machined steel sights precision shaped for hunting, target, and match shooting. Ball and standard post sizes: .034, .052 and .072. **Does not work with Krinkov Front Sight Blocks.**

30348 $40.00

7.62x39 10-Round Stripper Clips

NC STAR Stripper Clips hold 10 rounds of 7.62x39mm ammunition and are compatible with SKS rifles and various brands of quick magazine loaders for AK-47 magazines. Feature all steel construction and come 20 to a package.

HIPERFIRE® High Performance AR Triggers

Competition HIPERTOUCH®
- Designed for the Ultimate In AR Performance
- HIPERFIRE®'s Most Popular Trigger
- Virtually No Take-Up/Pre-Travel,
- Very Smooth
- Cam-Over Toggle Engine™
- Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™
- Straight Trigger Bow
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment

Reflex HIPERTOUCH®
- Everyman's AR Trigger
- Virtually No Take-Up/Pre-Travel, Very Smooth
- Similar to the Competition except with Curved Trigger Bow
- As Run by Keanu Reeves in John Wick 2
- Cam-Over Toggle Engine™ Very Hard Hitting Hammer Soft-Start Lock-Up™ for Pre-Ignition Stability
- You-Adjust Pull Weights of 2-1/2 and 3-1/2 lbs.
- Radical Sear Mechanics™ Semi-Auto Single-Stage
- Curved Trigger with a Backbone™
- Crisp, Clean, Trigger Break

HIPERFIRE® PDI™
- Power Drop-In Trigger
- 2-lb. Pull
- MIL-Grade Hammer Strike, No LPS, Ever
- H&M BLACKNITRIDE+™ Finish
- Exceptionally Smooth Feel
- Enhanced Corrosion Protection
- Polished Look
- PCC Blowback Tough
- Hammer Collision Bumper
- Disconnector Crash Protection
- Disconnector Spring Crush Protection
- Curved Trigger Bow with a Backbone™
- HIPERSHOE® Finger Pad Revolution™
- Changes the Trigger Lever Length for Fine Weight Adjustment
- Changes the Trigger Lever Length to Further Adjust Pre-Travel
- Position Your Finger in the Same Place Every Time

HIPERFIRE® X2S™ MOD-2
- Two-stage AR trigger
- Minimal, user adjustable, 2 – 3-pound first stage
- Minimal second stage wall with a 1-1/2-pound weight
- Total 3-1/2 – 4-1/2-pound pull with green or red springs respectively
- Distinct wall between first and second stages allows for effective "prepping" of the trigger for added control
- Clean, effortless break
- Weightless, imperceptible overtravel
- Cam-Over Toggle Engine allows for lighter pull weights without losing hammer strike energy
- Soft Start Lock-Up aids in eliminating rifle "flinch" after the break for more accurate shots at distance

Competition Hipertouch AR10/15	**40287**	**$250.00**

MAGPUL PMAG Drums

MAGPUL's PMAG drum magazines are durable, lightweight, highly reliable and made in the USA. The unique drum configuration keeps the height of the magazine manageable and allows for prone firing and easier storage. Features an easy-to-use loading lever, paint pen dot matrix for easy marking, and a rear window for instant capacity indication.

Regarding GLOCK pistol version: It is recommended that you install a new OEM magazine release on Gen 1-3 GLOCK handguns to support the extra weight of the magazine. Gen 4 GLOCK handguns will require an aftermarket metal magazine release. Installation of a new recoil spring assembly to ensure reliable feeding is strongly recommended. Individual variations between firearms may result in an extra power recoil spring being required. Use of the D-50 GL9 in pistol caliber carbines (PCC) is not recommended, because the increased length of the feed tower will be partially unsupported in most pistol caliber magazine wells. This unsupported condition may cause premature wear on the feed tower magazine catch, and (in firearms which deviate from factory magazine well specifications) may result in improper round presentation and failures to feed.

PMAG D-50 GL9-PCC (Glock mags)	**21849**	**$124.95**
PMAG D-50 GL9-Glock	**21848**	**124.95**
PMAG D-50 EV9 (CZ Scorpion)	**21847**	**124.95**

FIX IT STICKS

All-in-One Torque Driver Kit

Featuring the Fix It Sticks All-in-One Torque Driver. Tighten down your scope rings, mounts, actions screws, etc. while in the field, at the range, or at home.

Kit includes: All-in-One Torque Driver (15 - 65 inch lbs); T-Way T-Handle Wrench; 15 different bits: T10, T15, T20, T25, [hex 3/32, 5/64, 1/8, 5/32, 3/16, 2.5mm, 3mm, 4mm, 5mm], P1, slotted #5; 1/2" Socket and 1/4" bit adapter set; and Zippered case with Molded Holder.

29835 $112.00

Replaceable Edition Shooting/Hunting Kit

This kit offers unmatched portability, functionality and versatility. Two Fix It Sticks (which combine to form a T-Handle) and 16 bits are held in a molded bracket for portability/storage. Extra room on each end can hold two additional bits. Includes two sticks, bracket, and 16 different bits: 2.5mm Hex, 3mm Hex, 4mm Hex, 5mm Hex, T-10, T-15, T-20, T-25, T-30, 1/8" Hex, 5/64" Hex, 3/32" Hex, 5/32" Hex, 3/16" Hex, Slotted #5, and Phillips #1.

29843 $40.00

Mini All-in-One Torque Driver

Tighten scope rings, red dot sights, mounting plates, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 6 - 25 inch-lbs).

29837 $55.00

All-in-One Torque Driver

Tighten scope rings, mounts, action screws, etc. Just turn the drive handle until the hash mark lines up with the torque value you need (from 15 - 65 inch-lbs).

29836 $60.00

Scope Bubble Level Set

Level your optics with machined aluminum levels, featuring precise UK-sourced bubble vials. Kit includes: Magnetic level, NATO/Pic rail level/anti-cant device, and Protective foam carrier with pouch.

29839 $50.00

Scope Jack

A new way to level your optic, the Scope Jack works with any 1/4 inch driver to quickly and easily level your scope to your NATO/Pic rail. Just mount the Scope Jack to the rail under your scope and turn the drive handle until the lifting arm engages with the flat section under your turrets. Once the scope is level, maintain pressure while tightening your ring screws to keep optic level throughout the process.

29838 $44.00

Bolt Carrier Group Scraper

Custom bit that is designed to clean carbon off the various surfaces of the Bolt Carrier Group. Works with any standard magnetic 1/4" driver. Black Isonite finish for increased corrosion resistance and strength.

AR-15 (Top) 29840 $10.00
AR-10 29841 $10.00

Glock Tool Kit

Glock tool kit including two custom bits designed to aid in the assembly and disassembly of Glock Handguns / Front Sights. Includes: *Glock Front Sight Tool*, a 3/16" Hex Thin Wall Nut Driver – Integrated magnet holds the screw securely in place. Machined from Solid Steel Bar Stock. Works with any standard 1/4" bit driver. *3/32" Metal Pin Punch* – Punch is sized to ensure easy removal of all Glock pins by hand. Machined from Solid Steel Bar Stock.

29842 $16.00

Remington Bolt Opener

Access your Remington 700 firing pin quickly and easily in the field with our compact custom bit. Levers the firing pin head with a "bottle opener" action. Molded synthetic polymer bushing protects bolt plug from damage.

29844 $20.00

Master Sight Pusher™

The Real Avid Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Master Sight Pusher **16496 $149.99**

FIX IT STICKS

2" Bit Sets

Expand the bit selection of your **Fix It Sticks Kit**. Bits are all 2" in length. Bits come in molded polymer bit holder that links with other bit holders.

2" Bit Pack, Torx Bits includes:
T10, T15, T20, T25, T27, T30
29847 $20.00

2" Bit Pack, Metric Hex Bits includes:
Hex 2mm, 2.5mm, 3mm, 4mm, 5mm, 6mm
29845 $20.00

2" Bit Pack, SAE Hex Bits includes:
Hex 5/64, 3/32, 7/64, 1/8, 5/32, 3/16
29846 $20.00

Repeating the Feat: The Zurich Drill

By George Hupp

In Repeating the Feat*, we replicate shooting problems faced by legendary gunners. Through such experiences we learn tactical lessons, cultivate our skills, and gain hands-on understanding of our heritage as armed citizens.*

We don't judge. There was probably a little good and a little bad, for example, in each participant near Tombstone's OK Corral. Our focus, instead, will be on the challenges faced by those "in the arena."

On February 18, 1969, armed only with a .22LR Model 71 Beretta, Israeli Sky Marshal Mordechai Rahamim took on four PFLP guerillas armed with AKs, explosives, and incendiary grenades.

The subject of our initial reenactment was Sky Marshal Mordechai "Mordoch" Rahamim.

THE AMBUSH

In the 1960s and '70s, there was a rash of skyjackings worldwide. Some countries began placing armed guards on commercial airline flights.

On 18 Feb 1969, a fire team of four PFLP (Popular Front for the Liberation of Palestine) guerrillas waited by a taxiway at Zurich Airport. They ambushed El Al flight 432 with at least two Kalashnikovs, explosives, and incendiary grenades.

There were 28 souls aboard, including Sky Marshal Rahamim. When 7.62mm rounds started ripping through the cabin, he ran to the flight deck. Copilot Yoram Peres was fatally wounded.

Rahamim shot back at the guerrillas through an open cockpit window. Then he egressed the aircraft and ran in a wide circle to draw fire away from the plane and its passengers. The ambushers were hiding behind a snowbank. Rahamim closed with them and put three bullets into one wielding an AK. Investigation later determined Rahamim shot the leader of the fire team.

Swiss *Polizei* broke up the fight. They arrested Rahamim and the three living guerrillas. Six travelers had been wounded. The PFLP fighters were convicted. Rahamim was tried and exonerated.

SETTING UP THE DRILL

El Al 432 was a Boeing 720, a shorter variant of Boeing's 707. To recreate Rahamim's shooting problem, we needed to get the approximate dimensions of the flight deck and, specifically, the window he shot through.

I live in Tucson, Arizona, so that was easy. Tucson's Pima Air Museum happens to have a walk-in Boeing 720 cockpit on display. The former flight simulator was the set of flight deck scenes in the classic comedy "Airplane!"

I had to resist the urge to say "Roger, Roger. What's our vector, Victor?" as I took my notes.

One window on each side of the 720 cockpit could be opened by pulling it in, then sliding it aft down angled rails (one under the sill, and another running diagonally across the window behind). The openings were emergency exits, large enough to crawl through.

The opened window was an irregular diamond shape

800-223-4570 • dillonprecision.com

Boeing 720 cockpit on display at Pima Air Museum. Inset: Boeing 720 copilot's window.

with rounded corners, roughly 16″ wide on top and 19.5″ on the bottom. The front edge was just under 17″ tall. The back edge was 21 inches.

The top edge of the window was only 50.5″ off the deck. Mordoch had to crouch, probably with one foot between Yoram's legs and a shin on Yoram's lap, to shoot through the open window. I doubt Rahamim took the time to drag the wounded copilot out of the right seat before returning fire.

Measurements I took of the rounded, cone-shaped cabin didn't transfer precisely to the flat 4'x8' sheet of plywood we used for the side of the flight deck, but the windows we cut out were roughly the same size and shape. The white-painted portions represented the windscreen and overhead windows that, owing to their angle in front or above, couldn't be used to see people on the ground beside the plane.

Centerline to wingtip of the Boeing 720 was 22 yards. Assuming the guerrillas were some distance past the wing, we posted our fire team targets at about 35 yards. Steel silhouettes would work better for this drill, but we used four cardboard IDPAs.

A dining room chair was our copilot's seat (don't tell my wife). A martial arts dummy represented the head and torso of First Officer Yoram Peres. Two rolled-up, duct-taped Army sleeping mats substituted for his legs.

RAHAMIM'S PISTOL

Israeli sky marshals carried Beretta Model 71s. Read Ken Hackathorn's excellent Combat Classic evaluation of the Model 71 in the January 2025 *eBlue Press* to learn more. For this drill, any smaller pistol with iron sights will do.

ZURICH DRILL PART 1

The first part of our exercise was not timed, mainly for safety, since it involved some clambering with gun in hand; also, because the targets were somewhat distant for a pocket pistol. One cannot miss fast enough to win a gun battle at any range, but one can hit faster up close than farther away.

The shooter replicating Rahamim's deeds began seated in "first class," about 15 feet behind the flight deck. The pistol should start holstered under concealment in what Cooper called "Condition 3" (the US Army calls that "Amber"): eight rounds in the magazine but nothing in the chamber. That's how the Israelis carried.

On the start command, the shooter stood, faced downrange (as if peering out passenger windows), drew, and chambered the top round. The Israelis racked the slide as part of their drawstroke.

We required the shooter to point the pistol up while moving "in the aircraft," for two reasons:

1. Centerline fuel tanks, hydraulic lines, and wiring of passenger jets are almost always below the deck. Even nearly horizontal NDs angled only slightly downward could go into critical systems in wings or engines.

2. Sul or pointing downrange would muzzle the copilot while the shooter got into position by the window.

^ **WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to **www.P65Warnings.ca.gov**.

Above: "Kneeling on Yoram" in order to shoot out of the copilot's window. Right: The "Zurich Drill" setup.

I don't know how Israeli Sky Marshals carried their pistols outside the holster in 1969. Many US police were still using upward pointing readies. The *StressFire* system of the 1980s had a two handed, bent elbow, upward pointing carry Mas Ayoob called High Ready (we called it "Sabrina," after Kate Jackson's character in *Charlie's Angels*). The US Army adopted *StressFire* as their handgun doctrine, calling their one handed High Ready "Pistol-Ready" in FM 23-35. These days we have High Port, which is similar to Pistol-Ready, and Temple Indexed (TI).

TI is safe but would be problematic in a Boeing 720. Retention (a weakness of TI) was not an issue in Zurich – the attackers were outside – but Rahamim was over 6 feet tall. A pistol in TI might drag along switches and instruments in the low ceiling of the flight deck. I'm 5'4" and I could barely stand up behind the pilots' seats.

I was not a full-time FAM, but when I flew from 1996 – 2017, I was armed. If I had to close with hijackers inside a cabin, as Rahamim did three years later, on 08 May 1972 (Sabena Airlines flight 571 in Tel Aviv), I might move in High Port when not aimed-in.

If I didn't know where the hijackers or bombs were, I would clear rows of seats using a compressed, downward-angled Center Axis Relock Combat High hold. That would regrettably point the muzzle at passengers too. Terrorists with guns and bombs inside an airliner pose a greater threat to the passengers than the potential for a negligent downward discharge by trained rescuers observing Rule 3 (finger along the frame).

The Zurich Drill start postion, seated in "First Class."

But in Zurich, the only gun inside the aircraft was Rahamim's. The safety of the passengers was paramount, so we pointed our guns up while executing this drill.

Moving to the plywood flight deck, the shooter stepped into position with his or her left leg in front of the seat, right leg kneeling on the rolled up sleeping mat legs of our dummy copilot. The real Rahamim had to climb over a control panel with throttle levers between the pilots' seats. We omitted that trapezoidal box in the interests of safety.

800-223-4570 • dillonprecision.com

The person shooting the drill fired one shot at each fire team target, plus a fifth round at their target of choice. Then they pointed the pistol up again and directed a spectator to render aid to Peres.

THE MED COMPONENT

Most shooting drills end when the shot timer picks up the last shot. My limited experience has been that there is a very messy period of cleaning up after a gun battle. Any time you trade bullets with someone, expect to render first aid, to yourself or others, when the smoke clears. Rahamim may or may not have delegated medical tasks, but our shooters did. It's a good habit.

"Driver's only job is to drive," applies whether you're ambushed in a car or a jet. The captain and the flight engineer might have had their hands full shutting down engines or closing fuel valves, depending on aircraft damage. But other aircrew or passengers could be recruited to stanch the bleeding.

The rolled-up camping mats we used to simulate Yoram's legs had holes cut in them for practicing wound packing. They could also be tourniqueted. Tourniquets were not as popular in the 1960s as they are now, but they have been emergency medical tools since the 1600s, and probably before. The Zurich Drill is run one shooter at a time, so getting quality reps of essential medical skills gave the other shooters something beneficial to do while waiting for their own trigger time.

ZURICH DRILL PART 2

We timed the second part of the drill, to give the shooters incentive to run fast.

The Boeing 720 had four doors equipped with slides. Rahamim used one of the rear slides to get to the tarmac. I have trained in mothballed aircraft, but we didn't have one on the range to work with. We didn't shoot from a raised platform or try to simulate egress.

When the shot timer started, our sky marshal understudy ran to the right side of the range, about the 33-yard length of the 720 passenger cabin. Then the shooter turned left (downrange) and ran till they flanked the target array. The targets were angled about 40 degrees so they could be hit from uprange and also from the right. Our range had a circular berm. As with many action shooting bays, we had the luxury of left and right traverse, so long as we did not break the 180-degree plane.

The targets were numbered 1 – 4. When the shooter reached the second firing point (we marked ours with a traffic cone), the RO running the shot timer called out a number, designating the "leader." The shooter put three rounds into that target, ending the timed portion of the drill.

After stopping the clock, you could use a bullhorn siren or simply yell "*Polizei!*" as a signal that your shooter should set their gun down and step away with their hands up, fingers splayed – a survival response every concealed carrier should practice. Lay down a door mat or piece of cardboard to set the gun on.

SCORING

Eight hits were possible. Because of the distance, and the crouching on one foot, we decided to score holes anywhere on the target as hits. With such forgiving scoring, and only three closer shots against the clock, we elected a hefty penalty of 20 seconds per miss. You could choose to add 10 seconds (or whatever) per miss instead.

THREE SIDES TO EVERY STORY

I worked much of my adult life in counter-terrorism security. I don't condone the murder of civilians by anybody. While I can't abide the PFLP's methods, I must admit that those four Palestinians, one female, were committed to their beliefs. And whatever your stand on the Holy Land, you must admit that what Mordechai Rahamim did that winter day in Zurich was extraordinary.

As with airliners, when people shoot up your school or your shopping mall, their motivations will be irrelevant. Reporters and pundits will dwell on "why" *ad nauseam* later, but when it's happening, your only concern will be that the killers are stopped. Barricading your door may save you, but not your neighbors. A bullet in the killer's head will stop the killing.

Mordechai Rahamim counterattacked a heavily armed fire team. By himself. With a .22. He showed us what one dedicated protector can accomplish against serious odds, with only a handgun, training, and raw, unadulterated courage.

5.11 Tactical®

Double Duty TDU® **Trainer** **Operator**

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. *According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.*

zeta6™ J-CLIP™ Speedloader

J-CLIP™ Speed Loader for 5-Shot J-Frame Size Revolvers, sold in a package of two.

15091 $11.95

zeta6™ K-CLIP™ Speed Loader for 6-Shot K-Frame Size Revolvers, sold in a package of two. **15094 $13.95**

zeta6™ J-PAK™ Speedloader

J-PAK™ Speed Loader for 5-Shot J-Frame Size Revolvers, sold in a package of two.

15092 $13.95

zeta6™ SafeSnap™

SafeSnap™ Training Disc for 5-Shot J-frame Size Revolvers, sold in a package of two. SafeSnap mitigates long term damage to your revolver by absorbing much of this energy in two ways: The center plastic plug absorbs some of the energy and individual diaphragm springs absorb even more.

15093 $8.95

Ed Brown 1911 Mags

Having spent over 50 years building custom 1911s, Ed Brown has tested just about everything possible when it comes to magazine design and performance. The tube is constructed from 0.025" thick, certified 410 stainless, which is heat-treated to 35 Rc for exceptional strength and corrosion resistance. For maximum strength, longevity and durability, the tubes and fixed base are TIG welded with the latest technology for maximum strength, longevity, and durability. The completed tubes are then highly polished inside-and-out to provide the smoothest possible operation. The patented follower design is made from heat-treated steel (not cheap plastic), with an extended front skirt, and an anti-friction finish. This ensures proper feeding and full engagement of the slide stop on the last round. The maximum tensile strength heavy duty spring provides a longer lasting spring life, with the proper up-force to ensure reliable feeding and slide stop operation.

RELOADER DOT COM

Nighthawk Custom
Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

DAA PRIMAFILL GEN-2

The Double-Alpha PRIMAFILL GEN-2 is a semi-automatic primer-tube filling solution, able to quickly and easily fill both Small and Large primer tubes. It allows you to switch between Small and Large primers instantly, without tools or assembly.

NEW!

The PRIMAFILL can be used with any primer tubes which have an 8mm outer diameter. It does not require a custom adapter piece fitted to the tube, as other competing products require. So using the PRIMAFILL, you will be able to fill all your primer tubes!

The Extra-Large flip-tray area is convenient when emptying large primer boxes, such as Federal and others. The tray is large enough for the entire box to fit over.

In the GEN-2 upgrade, DAA retooled the exit holes to incorporate machined aluminum plugs. This allows the exit holes to be manufactured with tighter tolerances and reamed to ensure a smooth surface finish. The exit hole is the most critical area for smooth function and primer flow. Upgrading to machined and reamed aluminum holes, rather than the previous injection-molded plastic ones, is a significant improvement in performance and reliability.

The PRIMAFILL GEN-2 is powered by a regular 9-volt battery (not included). A momentary ON switch falls naturally under your index finger as you hold the device for right-hand use, with your thumb centered on top of the lid. Hold the button down as you feed the primers into the tube, and release as soon as the last primer vanishes down the exit hole. Since this action should take 20 seconds or less, one battery charge will last for many thousands of primers.

The spring-loaded orange latches incorporated into the output posts enable you to snap a tube into place, or remove it, instantly without any twists or turns. The latch falls naturally under your thumb: you press down on it as you insert the tube up, and you press up on the latch as you extract the tube downwards. An easy and natural opposing-thumb action.

10060 $86.95

Mr. Bulletfeeder®

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

JP Rifles Adjustable Gas System

These ultra-minimized designs will fit under most any hand guard on the market while adding negligible weight to the barrel. The D2 Series features a redesigned forward-facing adjustment that avoids any access interference with hand guards. This new adjustment design is also excellent and shedding dirt and fouling while doubling the adjustment clicks per rotation to provide extremely fine gas control. The two-piece design allows for easier installations even on barrels with pin-and-weld muzzle treatments.

Swab-its

No s#!+, there I was…in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the ***Blue Press*** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reuseable.

High Speed Gear Sniper Sack

Designed in collaboration with USMC sniper instructors, this versatile shooting-support bag allows marksmen to stabilize a rifle in a variety of positions. The eccentric shape of the bag allows it to fit any number of odd shooting positions. Heavy-duty materials and reinforced stitching allow this bag to handle the abuse of both combat environments and fast-paced competitive events. A large, integrated fill port makes filling or adjusting the fill level easy, and a webbing handle makes carrying or attaching the bag to gear fast and simple.

- Ships unfilled – add sand or lightweight fill
- Large opening allows easy filling
- Hook & loop roll-up fill port
- Bound edges and double stitching
- Ambidextrous carry handles
- Made in USA

Small Sniper Sack	**19962**	**$71.00**
Large Sniper Sack	**19963**	**$79.00**

CED PCC Rifle Sleeve

The CED PCC Rifle Sleeve is the ideal companion for competition stage use. It's a lightweight, water-resistant neoprene zippered sleeve that folds up easily to fit into a range bag or backpack. Perfect for covering and protecting your PCC rifle when carried in a trolley or wagon at the range. Weighs only 8 ounces and measures 33" inside.

Real Avid VIZ-MAX™ Bore Sighter

THE FAST, EASY WAY TO ACCURATELY BORE SIGHT YOUR RIFLE.

Viz-Max™ is a revolutionary, yet uncomplicated, next generation instrument. No more fumbling with extra pieces and underpowered lasers to find your mark. Housed in the rugged and protective exoskeleton is a precision machined, factory calibrated laser. The laser projects a powerful green dot providing maximum visibility and quick acquisition. The bore attachment is fast and easy with the hold-fast neodymium magnet.

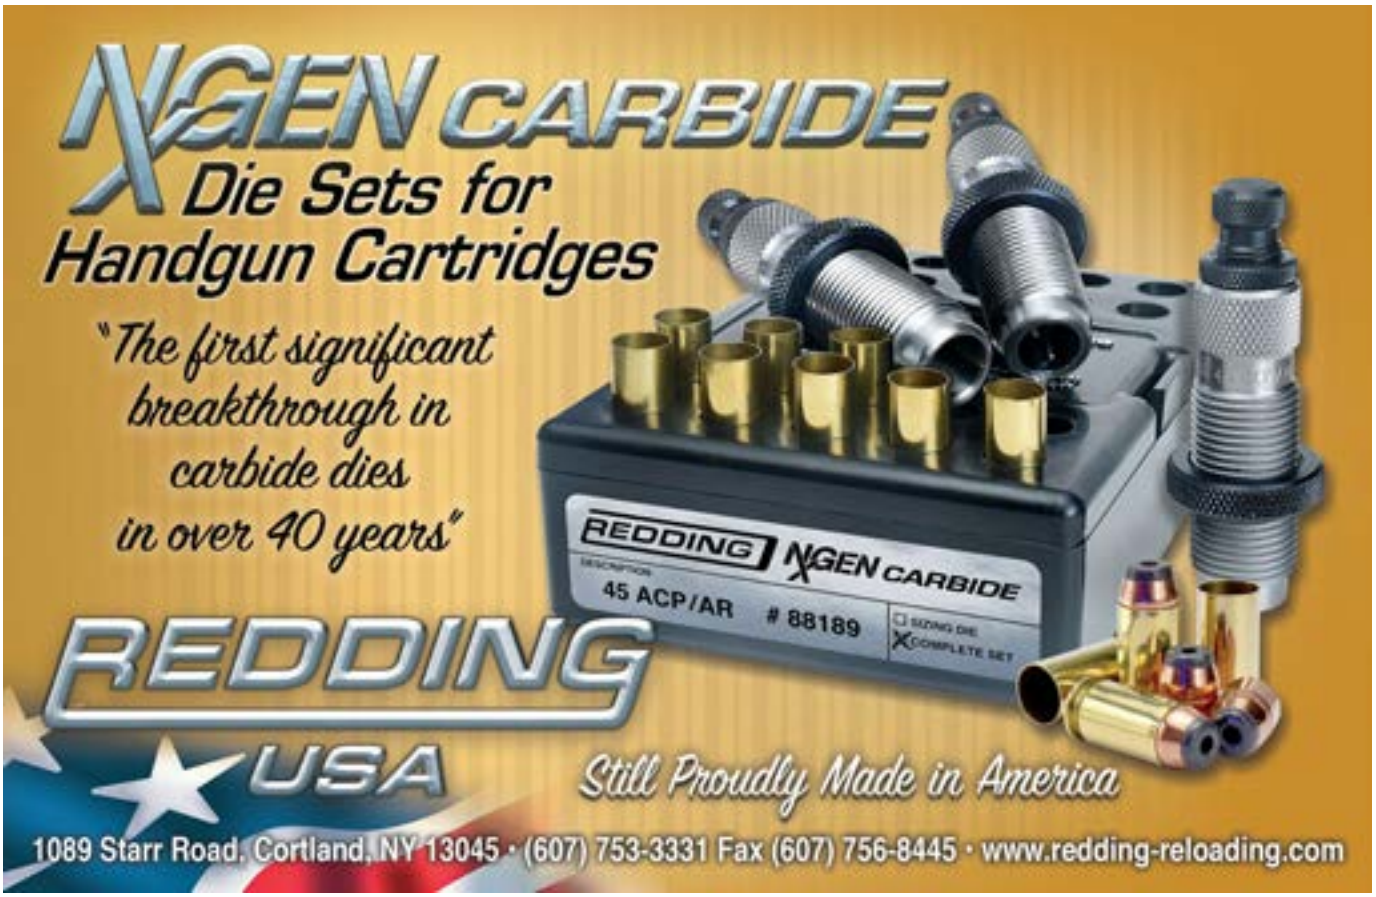

10134 **$129.99**

Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

21776 **$79.99**

Real Avid Gun-Cleaning Chemicals

TRI-MAX™ CLP

Real Avid Tri-Max CLP® is an all-in-one gun cleaning and maintenance solution that allows you to clean, lubricate and protect against rust in one step. Tri-Max CLP® saves you time and ensures effective gun maintenance that is the preferred solution used by today's military.

12oz. can Tri-Max	**19391**	**$14.99**
4oz. Tube Tri-Max	**19392**	**8.99**

FOUL-OUT™ GUNK BLASTER

Foul-Out Gunk Blaster blows away grease and grime fast. This powerful gun- metal grade solvent quickly strips gun actions of burnt powder, oil and grease, eliminating malfunctions of moving parts due to fouling and build up. Quickly cleans chambers, actions, trigger groups, bolt groups, slides, choke tube threading, semi-auto gas ports, extractors, ejectors and other hard to reach areas.

12oz. can Foul-Out	**40216**	**$13.99**

GUN-MAX™ GUN OIL

Gun-Max's advanced gun-metal grade formula sets a new standard for protecting, lubricating and cleaning modern guns. Powerful inhibitors displace moisture delivering extended corrosion protection. Advanced anti-friction additives bond to metal surfaces for longer lasting lubrication of moving metal parts. Maximizes performance of semi-auto guns with high cycle rates. Formulated to excel in sub-zero temperatures and harsh operating conditions.

12oz can Gun-Max	**40214**	**$13.99**

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

29033 **$39.99**

The 1911 Smart Wrench's ergonomic design fits comfortably in your hand while you remove the barrel bushing, and the strategically placed cavity catches the spring. Removes the barrel bushing from the Officer's and Government model 1911s.

11656 **$12.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

29034 **$11.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

29039 **$34.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm. Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

29036 **$11.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

29037 **$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

29038 **$12.99**

Real Avid MASTER GUN WORKSTATION®

The Master Gun Workstation is a groundbreaking and versatile Workstation designed to revolutionize firearm maintenance, repair, customization and optics mounting. With its adjustable and modular design, it provides a secure and efficient way to clean, repair, customize and mount optics on long guns. The Quick-Adjust Shuttle allows for precise positioning, while the Gun Gripper™ technology ensures a tight grip on gun barrels and stocks. Featuring built-in storage and Smart-Assist™ Accessory compatibility, this Workstation is perfect for cleaning and maintaining all long guns. Elevate your gun maintenance with the Master Gun Workstation and experience a new level of convenience and precision.

11230 $199.99

Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

66053 $14.99

Real Avid LUG-LOK® Upper Vise Block

Real Avid designed an upper block that leverages the strongest part of the gun – the barrel lugs inside the star chamber. The Lug-Lok is precision machined and precisely fits into all Mil-Spec uppers. It mates perfectly with the barrel lugs, while allowing you to rotate the upper to be able to work on different sides. The Lug-Lok is the safest, easiest and smartest way to lock down an AR15 or AR10 upper into a bench vise.

AR-15 (*pictured above*)	**29035**	**$79.99**
AR-10	**10137**	**119.99**

Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Level-Right PRO **21777 $69.99**

Real Avid ARMORER'S MASTER KIT™

This kit of Master Grade Tools and how-to information equips you to confidently tackle everything from building your own gun from the ground up to customizing or modifying an existing gun. With better tolerances, materials and expanded capability, every tool is carefully designed to make each job as simple and easy to execute as possible. Housed in a professional tool case and equipped with step-by-step instructions, you will be able to work smarter and create better guns regardless of your experience level.

31401 $279.99

ARMORER'S MASTER WRENCH™

The Real Avid Armorer's Master Wrench features best-in-class strength, precision fitment and ergonomic intelligence. Wrenches seat squarely for a no-slip fit on stubborn barrel nuts, castle nuts, muzzle brakes, or fixed stock receiver extensions. Industry first torque wrench attachment location is optimally positioned to provide consistent torque for all nuts. As a bonus, interchangeable hammer heads make the Armorer's Master Wrench a "Master" hammer as well! This is the right tool for the job… and for you.

31402 $79.99

BORE BOSS®

The single piece Dual Action Cable with integrated phosphor bronze brush and braided mop wraps around the unique Flex-Case Handle to keep the system stowed and organized. To use, simply flip, feed, clip and pull. Throw it in your pack, or put it in your pocket. It's the next best thing to a self-cleaning gun.

AR15 FRONT SIGHT ADJUSTER TOOL

This smartly designed tool makes front sight adjustments quick and easy. The stainless steel shaft is knurled to create no-slip leverage when turning tight posts. It works on both A1 & A2 front sights and the compact design won't clutter up your bag.

31403 $9.99

THE AR15 SCRAPER™

PRECISION, MULTI-FUNCTION CLEANING TOOL FOR AR15 BOLT CARRIER GROUPS

A dirty bolt carrier group (BCG) is the number one cause of AR15 malfunctions. Carbon is the enemy and it quickly builds up in hard-to-clean areas. This precision-made tool gives you the power to easily demolish carbon from 12 surfaces on the bolt carrier, bolt, bolt cam pin and firing pin. Clean it fast, clean it right.

31404 $19.99

Slip 2000 Products

725 Gun Cleaner Degreaser should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! ***NOTE:*** *To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.*

16 Oz. 19237 $24.00

Slip 2000 **Carbon Killer** provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. ***NOTE:*** *Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.*

15 Oz. 19234 $24.00

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 $28.00

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 $22.00

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 $21.00

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 $24.00

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! ***NOTE:*** *It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.*

4 Oz. 11646 $14.00

Each Slip 2000 **Gun Wipe** packet contains one 5" x 8" wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 $17.00

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

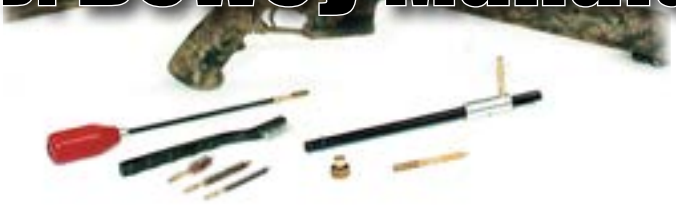

0.5 Oz. Syringe	**15732**	**$14.99**
1.5 Ounces	**15731**	**18.99**

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Sack-Ups
Protective Gun Sacks

Sack-Ups Protective Gun Sacks protect your firearms from the dings and scratches that tend to happen when you're rifling through your gun safe looking for…well… your rifle. They don't take up as much room as a gun case, but provide just enough padding to keep your guns safe…in your gun safe.

KA-BAR Backpack Kaster

The **KA-BAR® Backpack Kaster**, an American-made, lightweight fishing system designed to tag along on all your outdoor adventures is made from Ultramid® and weighs 0.25 lb. It is comprised of three main components. The handle is inspired by the iconic KA-BAR USMC Fighting/ Utility Knife and has a hollow storage compartment for extra line and lures. The head of the Kaster is where your fishing line attaches, and a plastic clamp-like device is included to secure your line in place when not in use. To learn how to load and cast the KA-BAR® Backpack Kaster and pick up tips on tying a highly effective slip knot, be sure to visit KA-BAR on Vimeo. https://vimeo.com/268652885 https://vimeo.com/268657182 Made in the USA. Fishing line and lure not included. The KA-BAR® Backpack Kaster holds the following fishing line: 8lbs = 100 yds @.011″ dia. 10lbs = 90 yds @.012″ dia.

10059 **$19.99**

Comtech STINGER

THE STINGER: Comtech's own personal defense device. Designed to act as a "force multiplier," it's like having the punching power of a karate master – instantly! There's really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another "keychain device" to most, and yet it works so well when needed. You deserve a Stinger!

19495 **$9.99**

Evolution Gun Works
USPSA Mag Gauge

EGW is the official manufacturer of the USPSA magazine length gauge to be used at all major matches and tournaments.

CNC machined out of 6061 aircraft grade aluminum, the gauge is then anodized black. It measures both 140mm (141.25mm) and 170mm (171.25mm) length magazines.

11657 **$35.00**

Arredondo Multi-Function Squib Rod

This is a MUST-HAVE range-bag accessory. It's a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

Turning SIG's "American" P210 Into a Carry Gun

By Duane Thomas

The SIG P210-A Standard Model is a service-sized, all-steel, 5" barreled, single-action autopistol built around a singlestack magazine holding eight rounds of 9mm. The "A" in the name stands for "American" since this was SIG's Americanized P210, and "Standard Model" differentiates the fixed-sight version from the adjustable-sighted Target Model.

In this article we'll discuss the virtues and vices of the SIG P210-A Standard Model, and what I've done to mine to improve it for my use as a carry gun. Also, we'll compare it a bit to its primary competitor in the full-sized, singlestack, all-steel, 9mm autopistol game: the 9mm 1911.

SIG has produced two versions of their full-sized, all-steel, P210-A: the adjustable-sighted Target Model (right) and the fixed-sight Standard Model.

SIZE

The SIG P210-A Standard Model is 8.4" long and 5.3" tall. Whipping out the dial caliper discloses the slide is .895" wide, the frame is .988" wide. In other words, the frame is considerably wider than the slide. Like the CZ-75 (which the basic P210 design predated by decades), on the P210-A Standard Model the slide encloses the frame.

Classic barrel length for a pre-A-model SIG P210 was 4.7". The P210-A is advertised as having a 5" barrel. According to my dial caliper, the barrel measures 4.825" from the muzzle to the back of the barrel hood.

WEIGHT

My postal scale pegs the SIG P210-A Standard Model, unloaded with the stock magazine with polymer floorplate in place, as weighing 38.4 ounces. Fully loaded with nine rounds of Winchester 127-gr. JHP +P+ it goes 42.6 ounces. In other words, a SIG P210-A fully loaded weighs about what a 9mm 1911 does unloaded.

TRIGGER PULLS

Out-of-the-box trigger pulls for the P210-A Standard Model go 4-1/4 pounds. Re the trigger stroke, there's fairly long takeup before hitting the wall, and the wall is fairly subtle. Once we hit the wall, the actual break is a rolling, pull-through experience. Very little in the way of overtravel, on par with a 1911. Reset is longish compared to a 1911, and the reset point is a bit past the wall, there's a slight amount of reuptake travel required to hit the wall again. Not a lot, not bad, but it's there.

Bottom line, this gun has great trigger pulls, that are probably best left to experienced shooters, and way too light and short for most people.

SAFETY LEVER

The gun features a frame-mounted safety lever that falls naturally under the shooter's master hand thumb (assuming your master hand is your right hand). The only option is a single-side thumb safety. If you happen to be left-handed, this fact will take the SIG P210-A Standard Model out of consideration right there.

GRIP SAFETY (OR LACK THEREOF)

It's not at all uncommon for 1911 shooters to fail to depress the grip safety far enough to allow the gun to fire. This is largely dependent on the size and shape of the shooter's hands, and how they grip the gun. The solution is to "sensitize" the grip safety to the point that,

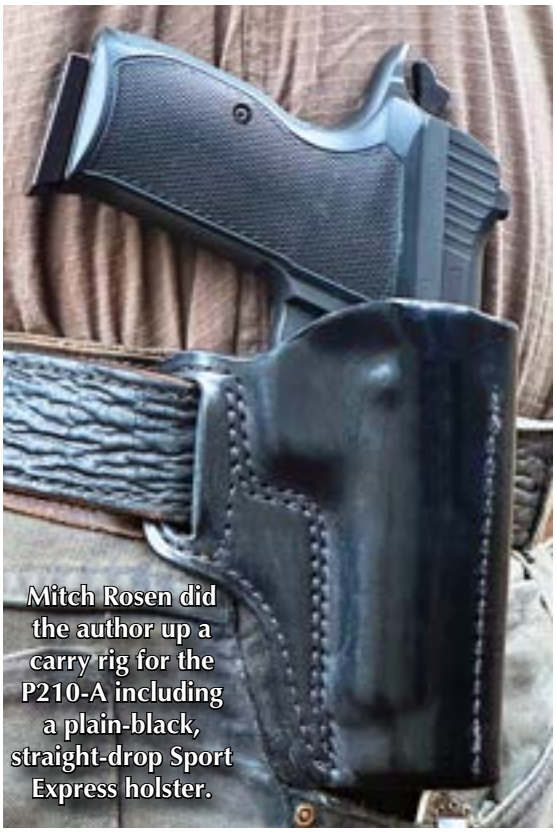

800-223-4570 • dillonprecision.com

while it's still fully functional and will pass an armorer's check with flying colors, it requires comparatively little movement, and pressure, to disengage. I learned how to sensitize a 1911 grip safety decades ago, so for me this is a non-issue. I will be the first to admit, however, for many people it is an issue.

The classic military P210 was famous for hammer bite. The P210-A Standard Model has an upswept beavertail treatment to its grip tang to guide the shooter's hand into place on the draw and protect it from hammer bite. However, though it kinda-sorta looks like a beavertail grip safety, it actually isn't, it's a solid part of the frame. The fact the SIG P210-A is "a 1911 without a grip safety" is a huge selling point for some people.

GRIPS

The stock wooden grips on the P210-A Standard Model are somewhat bulbous and checkered (shallowly) only on the sides, the backstrap is left smooth. When firing the gun with those grips, it twists in my hands under recoil, which severely, negatively impacts accuracy at speed. Hogue (**hogueinc.com**) – which also makes the factory stock wooden grips, by the way – sells two different sets of G10 grips for the P210-A, one checkered, one in what's called the Piranha pattern. Of the two I prefer the checkered version, and that's what I have on my P210-A Standard Model. Though I do have a set of Piranha grips on my adjustable sighted P210-A Target Model.

Mitch Rosen did the author up a carry rig for the P210-A including a plain-black, straight-drop Sport Express holster.

MAG WELL

The SIG P210-A mag well looks squared-off. "Let's turn back the hands of time!" It's actually beveled but it's so subtle we have to look hard to notice it. I took both my P210-A Standard and Target Models to my friend, gunsmith Ron Soderquist, to have their mag wells beveled. Unlike the 1911 where, in the overall scheme of things, there's not much metal to the sides, and the front, and the rear (without cutting into the mainspring housing) of the mag well, all of which severely limits just how much of a bevel can be applied to its opening, on the P210-A there's much more material in all those areas. Ron seriously opened-up my P210-A's mag wells. These guns just got a LOT easier to speedload.

ACCURACY

The SIG P210 in general has always been famous for its accuracy. I have shot multiple 5-shot groups, at 50 feet from the bench (the maximum distance possible on the range where I do my accuracy testing), with different ammo types, of 1" with my P210-A Standard Model. While, for the purposes of self-defense, we really don't need that level of accuracy, it's certainly nice to have.

MAGAZINES

My favorite magazine setup for the SIG P210-A is the factory 8-rounder. These magazines are stainless steel, brightly polished, finished with black Nitron, and say on the tube "Made In Italy." Well, we all know what that means. Can you spell M-E-C-G-A-R, children? I knew you could! Mec-Gar OEMs top-quality magazines for a variety of companies including SIG.

There are a few companies out there producing extra-capacity floorplates for P210-A magazines, however in my experience they suffer from either making the magazine feed-unreliable, or they're extremely difficult to get off the magazine so it would be hard to disassemble for cleaning. The stock 8-round magazine, by contrast, is superbly reliable and easily user-serviceable.

However, this magazine does have its quirks. When firing the gun, the top cartridge in the magazine will drift forward. Punch the mag button before the magazine's fully empty, as when doing a speedload, the magazine will stick in the gun and refuse to fall free. When you then yank the mag free, usually the top cartridge will come loose and follow the mag out of the gun.

If you're out at a firearms training class, typically the instructor will say to the class, "I'd suggest dropping a box of loose cartridges down inside one of your front pants pockets, so you can be reloading mags in-between drills, while you're gathered around and I'm telling you what's going to be the next drill. I don't have a problem with you loading the gun in the holster, by popping out the mag in the gun and replacing it with a full mag; just don't draw the gun while you're facing me or any of your classmates."

The way we do that is to reach down to the holstered gun and depress the mag button, at which point the magazine pops out slightly; we withdraw the partially empty magazine, store it on our body somewhere, then insert a fresh mag, push until it clicks. We have just reloaded our gun without ever drawing it from the holster.

^ **WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to **www.P65Warnings.ca.gov**.

We can't do that with a SIG P210-A because, when we withdraw the partially empty mag, the top round is going to pop out of the magazine. We can't then seat a new mag because there's a loose round rattling around inside the mag well blocking the magazine from full insertion. It could be debated how important this all is, but it's definitely irritating.

BASEPLATE

Armory Craft (**armorycraft.com)** sells a low-profile aluminum baseplate that's slightly less bulky than the stock polymer baseplate. It looks good and is what I have on the magazine in the gun when I carry my SIG P210-A Standard Model.

TAP-RACK-BANG

As previously mentioned, on a SIG P210-A the frame encloses the slide. This means there's far less of the slide exposed, to allow fast slide manipulation, as when cycling it during a tap-rack-bang drill, than on many more-conventional autopistols. Whether this is really an issue for you will depend largely (pun intended) on the size of your hands. I don't have huge hands, but I don't have little girly hands either, and my fingers are fairly narrow. It's possible for me to grip and rip a P210-A slide pretty darn well. On the other hand (again pun intended), if you've got big ol' ham hocks hanging off your arms, you're probably going to find the P210-A slide considerably less amenable to fast manipulation than many other autopistols'.

Author Thomas' friend, gunsmith Ron Soderquist, beveled both P210-As' mag wells. Note how much material it was possible to remove from the sides, front and rear of the mag well opening.

CARRY GEAR

SIG P210-A holsters and mag pouches do not exactly litter the streets. I know, I was shocked too. I called up Mitch Rosen (**mitchrosen.com)** and had him do me up one of his Sport Express holsters and a couple of his Ace single-mag pouches, all in plain black. What makes this stuff part of Mitch's "Express" line is (1) the holster is simply press-fit around the gun rather than finely boned, (2) it's made only to fit one belt width, 1-1/2", and (3) it costs less than his boned rigs. Some holstermakers might freak if you asked for gear for such an unusual handgun as the SIG P210-A. For Mitch it was just another day at the office.

PRICE

SIG P210s in general are famous for the smoothness of their slide stroke, their slick and light trigger pulls, and the overall quality of the workmanship that went into them. In order to get a 1911 that's equivalent in all those areas, you really do need a top-end custom gun. Pricing top-tier 9mm 1911s, we find prices start in the mid-$3,000 range, and head for the stratosphere from there.

The SIG P210-A Standard Model was recently discontinued from production, however a quick perusal of GunBroker disclosed two different listings, both examples in "Like New" condition, for $1,100 apiece. For the quality of the gun you're getting, that's a steal, and WAY more affordable than the equivalent 1911.

OUT-OF-THE-BOX RELIABILITY

The 9mm 1911 is a famously finicky gun/cartridge combination to make work well. Even a good 9mm 1911 may well require a bit of fine-tuning before it begins chugging happily away. Even at that, you'll need to watch the ogive of the bullets you load into it (1911s in general do not like bullets with straight-sided, jacketed truncated cone ogives). For the SIG P210-A, take the gun out of the box, lube it up, stuff ammo in the gun, start pulling the trigger, in overwhelming probability it will be out-of-the-box feed reliable, and with a surprising variety of different bullet types.

SUMMARY

It might be argued that, in a world where there exist so many other smaller, lighter, higher-capacity autopistols, the SIG P210-A makes a senseless carry gun. My attitude is, I carried and concealed an all-steel, full-sized, 9-shot, 1911 .45 every day for years. If I accept that 9mm Parabellum works just as well as .45 ACP – and I do – bottom line, if I can carry and conceal a 9-shot 1911 .45, I can carry and conceal a 9-shot SIG P210-A.

If you're in the market for a big, beautiful, accurate, all-steel, easy-to-shoot, single-action, singlestack 9mm auto, I would suggest the SIG P210-A Standard Model as a superior choice to a 9mm 1911, for two primary reasons: price and out-of-the-box reliability. For all practical purposes, the SIG P210-A Standard Model is a really nice 9mm 1911 that costs less than a third of what you'd pay for an equivalent-quality actual-1911 and works out-of-the-box. That it has no grip safety and weighs about a third of a pound less is just icing on the cake.

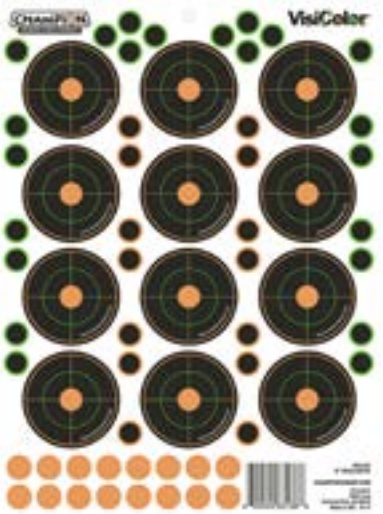

Justified Defensive Concepts, LLC

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5" x 35" on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 $19.99

2" Peel-and-Stick Champion VisiColor Adhesive Targets

Peel-and-Stick Champion VisiColor Adhesive Targets create an instant shooting range. Multi-color impact halos help shooters track specific shot placement. Plus, you can get more time out of your target with the included Pasters that lead to hours of shooting. Simply place one of the adhesive Visicolor Pasters over a shot hole to shoot at the target again!

John Marshall on Classic Firearms: The Benelli M1014 Shotgun

"The M1014 Joint Service Shotgun has now been in service with the U.S. military for 25 years and has earned a solid reputation for both reliability and effectiveness. In the global war on terror, it has been employed by us in numerous locales…."

It's not unusual for shotguns to be a standard part of U.S. combat equipage – their use dates back to the Spanish-American War, with 12-gauge pump-action Winchester model 1897 shotguns. These were subsequently modified to "trench gun" configuration for use in War I. With a shorter barrel, a ventilated metal barrel heat shield and a bayonet lug designed to accommodate the widely available model 1917 bayonets, it was a fearsome weapon indeed. In fact, our soldiers and Marines could depress the trigger and hold it down while pumping the gun rapidly to unleash a firestorm of lethal lead pellets into the trenches.

In those years our German enemies thought our manually-operated shotguns were such terribly fearful weapons that the German high command threatened to summarily execute any of our people who were found carrying them on the spot! Well, we quickly quashed the idea of such behavior, as our opponents were then prone to using poison gas – not exactly a very humane method of killing on the battlefields. We kept employing shotguns and still do.

Over the years since the "Great War," trench shotguns of several models and makers were available to our armed forces and used as effective ordnance. They all had one defining characteristic – they were manually pump-activated. The reason for this was reliability. While semiautomatic and automatic rifles and pistols had become standard, no one had come up with a combat shotgun that could use self-loading methods of operation. There were just too many variations of shotgun ammunition for an existing automatic mechanism to handle all the differences without malfunctioning.

A provably reliable semiauto shotgun would enable quick repeat shots and multiple targets way better than any manually-operated system. And so the word went out. On May 4, 1998 the United States Army Armament Research, Development and Engineering Center (ARDEC) at Picatinny Arsenal, New Jersey, put out a solicitation request for a 12-gauge semiautomatic combat shotgun to equip the U.S. armed forces. The die was cast.

Responding to the request, Benelli Armi SpA in Urbino, Italy conceived and fabricated the Benelli M4 Super 90 Combat Shotgun. On August 4, 1998, Benelli sent five prototypes of the M4 to Aberdeen Proving Ground in Maryland for testing. To make a long story short, the M4 won the competition, meeting all the requirements specified by ARDEC. It was then officially designated as the XM1014.

The contract for the importation of the shotguns was awarded to the U.S. subsidiary of Heckler & Koch, and the first 20,000 of them were delivered to the U.S. Marine Corps in 1999. After adoption, the "X" in the designation of the gun was erased, and the official name for it became the M1014.

The M4 predecessor to the M1014 was actually the first gas-operated shotgun put on the market by Benelli. They started from scratch to develop an action that would work reliably with the many varieties of 12-gauge ammunition that were available and not require manual adjustment of the shotgun mechanism to do so. What they came up with was a brand-new design they called the "auto-regulating gas-operated" (ARGO) system. It uses two self-cleaning stainless steel gas pistons positioned ahead of the chamber to impact directly back against a rotating bolt. A more powerful round will of course apply

800-223-4570 • dillonprecision.com

more gas pressure than one of lesser power, resulting in no need for manual adjustment of the gas system. It was simple yet ingenious.

The mechanism will accommodate the use of shotshells of varying lengths and power. It can use shell lengths of 2.75 inches and 3 inches with different power levels interchangeably and in any order. Very low-power less-lethal rounds must be cycled manually.

The sights are typical ghost-ring devices and can be easily adjusted for windage and elevation using the rim of a shell. The MIL-STD-1913 Picatinny rail on the receiver permits the use of optical sights, lights, lasers, and night-vision devices.

The overall modular design of the gun allows for quick exchange of components such as buttstocks, barrels and forend to be switched out for special purpose applications. The standard buttstock is adjustable for length of pull up to eight inches.

Extensive testing of the gun before its release has verified its reliability. It can operate for at least 25,000 rounds before requiring the replacement of any major parts. The steel parts in the gun have been given a matte black corrosion-resistant phosphate finish, and the aluminum components are matte black hard-anodized. These touches make the weapon more durable and less visible when used during night operations. The M1014 doesn't need much maintenance and is capable of functioning in almost all climates and weather conditions.

The most-often selected buttstock on this weapon is collapsible and is capable of quickly shortening the gun by almost 8 inches. This feature helps in maneuvering in close quarters and allowing for more compact storage. It also makes it more adaptable when fitting the gun properly to different individuals. The M1014 can also be alternately equipped with a pistol grip or a fixed stock if required.

The M1014 Joint Service Shotgun has now been in service with the U.S. military for 25 years and has earned a solid reputation for both reliability and effectiveness. In the global war on terror, it has been employed by us in numerous locales, including Fallujah in Iraq and many more locations in Afghanistan. It's been included as standard equipment with not only the U.S. Marine Corps, but most of our other military services here. It's a "must have" item for our special forces as well. At last count, this special shotgun is in the inventories of at least 14 other nations and is now used by many U.S. police departments as well.

The suggested retail price of the civilian version of this gun is in the $2,000 range. The standard magazine capacity is 5+1, although 6+1 and two shot extension tubes are sold by Benelli as well as by other companies. If you want one of these gems, you can get one, but it most assuredly won't be cheap.

It is usually my practice to spotlight older firearms, but "classic" does not necessarily mean "old." This shotgun has broken many rules, but the rule that says a gun must be antiquated to be a classic is officially broken now!

A Facelift for Your Dillon!

Does your loader look a little grungy? Is the handle stiff to cycle? Would it benefit from a thorough cleaning and lubrication service? Would you like it to perform and look like new? Dillon Precision offers a clean and lube service for all of our reloading equipment. You ship it to us (we have a prepaid return shipping label, box and packing foam available as an option); we inventory what you sent; we tear it apart and give everything a scrubdown in our solvent tank. Once clean, we inspect and measure parts, replacing anything worn out or damaged (parts extra on the 1050, 1100 and 2000 machines); we relube everything, reassemble it then make sure all systems are tuned and properly functioning. Service fees start at $100, which includes shipping your like-new loader back to you (in the lower 48 States).

DILLON RIFLE COMPANY

The OPAR Operator Trigger is a complete-assembly pre-stage drop-in trigger purpose built to provide improved trigger pull weight, reset, clean feel, precision, and safety for day-to-day users, military and law-enforcement members and agencies. The trigger's form enhances precision capabilities through its Area-of-Engagement design. This is accomplished by helping shooters build muscle memory for their trigger-finger placement in a simple and natural way.

It has a clean 5.0 to 5.5-pound trigger pull weight with a short trigger reset. The OPAR Operator's patent pending pre-stage trigger mechanism design has an inset secondary trigger providing an additional safety mechanism to reduce the chances of an accidental discharge. The OPAR Operator is compatible with AR-15 and HK416 rifles using the Mil-Spec 0.154-inch pins.

Dillon Rifle Company AR-15 OPAR Operator Trigger, Curved

The Jalapeño

You shoot a lot and your gun gets hot. Then, without thinking about it, you put your rifle into its case or someplace else equally tender. I have mauled several rifle cases, burned a car seat, and have at least one scar from doing exactly this. This is why we created The Jalapeño. Actually, we made the original The Jalapeño for the Minigun. With it, we could dump 3000 rounds in a minute or so, slip The Jalapeño over the barrel group, pull the gun off the mount and stow it right away. 23.5 in. (l) x 8 in. (w), Made in the U.S.A.

The Bucket

This range gear was originally designed for use in live-fire exercises from helicopters. It's since been adapted for use in various range environments. It's the range bag that can do it all, collect brass, hold your mags empty or full, store tools and carry tactical gear that you need for the range. It features a high quality waterproof, laminated cotton exterior with a large side pocket to hold your eye and ear pro. The elastic outer band holds five 30-round AR mags and three pistol mags. It's made with a soft (4-stretch nylon) top for easy access to drop empty mags inside and at the same time prevent it from spilling out. Also features coated webbing daisy chain around the base for multiple lashing points to secure your DRC Range Bucket anywhere. Topped off with a padded static line rope handle, you really can't go wrong with this quality crafted product. 11 in. (diameter) x 8 in. (high), Made in the U.S.A.

Mini Bucket

If you like our Range Bucket, you might just need a mini version of it. The Range Bucket Mini is a good fit for use at indoor ranges. A range bag that can do it all, collect brass, hold your mags empty or full, store tools and carry tactical gear. The Range Bucket Mini includes all the same great features as the Range Bucket, just smaller. It's the range bag that can do it all, collect brass, hold your mags empty or full, store tools and carry tactical gear that you need for the range. It features a high quality waterproof, laminated cotton exterior. The elastic outer band holds four 30-round AR mags and six pistol mags. It's made with a soft (4-stretch nylon) top for easy access to drop empty mags inside and at the same time prevent it from spilling out. Also features coated webbing daisy chain around the base for multiple lashing points to secure your DRC Mini Bucket anywhere. Topped off with a static line rope handle, you really can't go wrong with this quality crafted product. 8.5 in. (diameter) x 9.5 in. (high), Made in the U.S.A.

Traveler's Guide

…to the Firearm Laws of the Fifty States – The myriad of firearm laws facing the gun owner of the early 21st Century can be intimidating when traveling.

30201 $15.99

Gun-Guides Personal Firearms Log Book

The Gun-Guides® Personal Firearms Log Book makes it easy to record and organize vital information for all your firearms in one book. Includes 30 forms – one form per page. Forms contail fields to identify and describe each firearm by manufacturer, serial number, model, action, finish, barrel length, repairs/modifications, accessories, optics and other unique characteristics found only on your firearms.

Personal Firearms Log Book **11658** **$7.99**

BERRY'S

Like pretty much everything from Berry's Manufacturing, this 9″ x 12″ x 10″ deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

Stackable Utility Box 40194 $20.99

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

Single-Pistol Case	**40192**	**$14.99**
Double-Pistol Case	**40193**	**19.99**

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

Dillon Headstamped 9mm Brass

We tried to get them to produce it in Dillon Blue, but this was the best we could do! The first 9mm brass to ever wear the "DILLON" headstamp was made by a major US manufacturer of cartridge cases and is now available in your favorite pistol (and PCC/submachinegun) caliber.

Pkg. of 1000 **21850** **$135.00**

SIERRA 9mm .355 125 Gr. JHP

The exterior of JHP bullets is completely covered by jacket, including the nose radius, for total reliability. Sierra's Power Jacket with skives enhances expansion in varmints at handgun velocities. Pure lead is used for the core to give good penetration with excellent expansion.

Pkg. of 100 **10087** **$21.99**

The Berger Reloading Manual features data for over 60 different cartridges, but they also went the extra mile and added several sections of information that they believe shooters like you would find useful. Berger's manual includes a biography of the founder, Walt Berger, a series of technical articles written by experts in the industry, and reloading tips and tricks that can help beginners and experts alike. The manual features guest authors like John Barsness, Nancy Tompkins, John Burns, and other such experts, who share their experiences and knowledge about their respective fields of reloading, firearms, competitive shooting, and hunting.

Pictured here are the original 1928 Navy Overstamp Thompson submachine gun Mike inherited from a friend who died in a tragic plane crash and a Star Machine Works reloader with Mike's "Super Star Conversion." These two items inspired Mike Dillon to found his own reloading equipment company. Read the book for details about how it happened.

DILLON: A MEMOIR

Read the story of Mike Dillon's journey from washing aircraft for a crop-dusting company, to airline pilot, to creator of The World's Finest Loading Equipment, and ultimately, to the man who revolutionized the M134 Mini-Gun!

Along the way his adventures included restoring a P40 Warhawk, fighting wildfires in WWII-era bombers converted to drop fire retardant and writing articles about flying warbirds for *Air Progress* magazine.

Not content to rest upon his laurels for creating the World's Finest Loading Equipment, Mike finished out his career by re-engineering the M134 Mini-Gun, helping to arm the US and its allies to fight the War on Terror across the globe.

Mike's memoir is a compelling read: The story of a man who believed he could do anything he set his mind to, and actually did it!

Part #88887 $35.00
