(If you’d like a similar package in a different caliber, please call.)
New-Reloader XL 750 Package

You’ve made the decision that loading your own ammunition is right for you.
You’re ready to pull the trigger, but uncertain of exactly what you need.
Dillon has taken the work out of this. We have assembled a New-Reloader Package,
featuring our new XL 750 reloading machine, with the most popular machine
options, along with the accessories you’ll need to begin reloading immediately.
This package is available in 9mm, .223/5.56mm, or BOTH.

9mm 750 Package:
XL 750 in 9mm
9mm Die Set
Bench Wrench
Small Pistol Casefeeder
XL 750/650 Strong Mount
Bullet Tray Kit
Roller Handle
9mm Case Gage
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
The Complete Reloading Manual for the 9mm Luger
Total: $1453.87

.223/5.56mm 750 Package:
XL 750 in .223/5.56mm
.223/5.56 Die Set
Bench Wrench
Small Rifle Casefeeder
XL 750/650 Strong Mount
Bullet Tray Kit
Roller Handle
.223/5.56 Case Gage
Dillon Case Lube
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
The Complete Reloading Manual for the .223 Rem.
Total: $1488.86

Combo Package (.223 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:
.223/5.56 Conversion Kit
.223/5.56 Die Set
XL 750 Quick Change
.223 Case Gage
Dillon Case Lube
Small Rifle Casefeed Plate
The Complete Reloading Manual for the .223 Rem.
Total w/9mm Pkg.: $1843.80

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we’re going to include one of these Tactical Tailor Operator Caps and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that’s made in...wait for it...the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, [Note: same hat, new patch.] and I've lost track of how many times it's been washed – IN the washing machine! It STILL looks great! If you’re the kind of person who not only wears hats, but also WEARS THEM OUT, you’re going to love this hat.

WARNING: The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.
ATTENTION DILLON CUSTOMERS: Because of changes to California’s Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are “known to the State of California to cause cancer, birth defects or other reproductive harm.” The new regulation states that a warning must be “provided in the catalog in a manner that clearly associates it with the item being purchased.” Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California “safe harbor” requirements.

Twenty-plus years ago, I purchased a used Square Deal in .38 Special from a friend at the local gun club. He had purchased it from another club member. After using it for the 20-plus years and loading about 80,000 to 100,000 rounds, it finally gave out on September 27, 2019. I called Dillon and was told to ship it back for a complete rebuild. It came back to me on October 7th like brand new – press, powder measure and all. All I needed to do was bolt it on the loading bench, make a tiny adjustment and start loading. Even the charge bar was correct. The Dillon guarantee is unbelievable. No place else can you get that service at no cost, or that fast return. Especially for being owner number three. Thank you for an exceptional product and for excellent service. In this day and age, that’s hard to find.

Jim Waldram – Ironton, MO

Just wanted to say how impressed I am with your equipment, I own two SDB units, I’ve had one of those for over 25 years and never a problem. Anytime someone asks about reloading I tell them to BUY DILLON, imho it’s the best on the market, here’s to another 25 years. Thank you for a great product.

Bruce Clendenen – albino128@gmail.com

I would just like to take this opportunity to express my sincere appreciation for the outstanding service I received from one of your technical service individuals. The individual’s name was Tim Vaughn and he not only diagnosed my problem, but also immediately sent me the parts to fix the issue I was having. This combination of technical expertise and immediate follow up with the correct parts was indeed an unexpected occurrence. While my interactions with Dillon Precision have always been positive, this one was way beyond what I have experienced in the past. I would appreciate your letting him know that his service was much appreciated. I am also very happy that he did not take as long to send me the correct items as I have taken to send this thank you note.

E. von Tiesenhausen – Las Vegas

Thanks for the article you printed on the Winchester Model 67 rifle. You are the first magazine I’ve found that has information on this rifle. I have my father’s Model 67 and have looked for info on it everywhere. It still is in firing order after all these years. Not sure what year he bought it, but my brothers and sister and I all learned to shoot with it. Again, thank you for the article.

**Square Deal ‘B’ Deluxe Quick Change** (Not Pictured) Includes toolhead, powder measure and SDB Toolhead Stand.

**‘SDB’ Powder Measure**
Extra toolheads keep all your adjustments the way you left them.

**Square Deal ‘B’ Toolhead Stand**
Holds your SDB toolhead, powder measure, dies and caliber conversion components (not included) in an orderly manner.

**Square Deal ‘B’ Bench Wrench**
The Square Deal Bench Wrench has the correct sizes for Square Deal “B” die adjustments.

**Square Deal “B” Strong Mount & Cartridge Case Bin Combo**
Ergonomically designed to cut your workload through economy of motion! Mounts your Square Deal “B” along with a bin for your empty cartridge cases.

**SDB Cartridge Case Bin & Bracket Only**
For those who already have a Strong Mount, the blue bin and silver bracket in the above photo are available separately (hardware not included).

**Machine Cover**
This great looking nylon cover adds security to your loading bench. Your reloader will be protected against more than dust as these covers come with a D-ring that allows the heavy duty zipper to be locked.

**Machine Maintenance Kit**
Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

**Square Deal ‘B’ Deluxe Quick Change**
Includes toolhead, powder measure and SDB Toolhead Stand.

**SDB Spare Parts Kit**
Use to transfer primers from flip tray to priming system.

**Primer Pickup Tubes**
Used to transfer primers from flip tray to priming system.

**Primer Flip Tray**
A heavy, high-quality tray large enough for the Federal primer package.
It’s been said that the “gun of a master” is a snub-nose revolver. Until you learn to shoot one/fight with one, carrying a snubbie sounds crazy, but those little guns have a lot going for them in the right hands. Of course bigger guns are better in a gunfight for many reasons, but you’ll find plenty of the tactical instructor set carrying tiny little guns. The guns are small, yes, but they’re hardly “unarmed.”

As I’ve told students, snubbies are basically a gun and a pair of brass knuckles all rolled into one. They’re supremely nasty at roll-around-on-the-ground distances. At first blush, shooting a snubby or a subcompact seems incredibly difficult – but the more you train with one, the more accurate they become. Mechanically they’ll put the bullets where you want ‘em – you just have to have the skills to put them there.

And there’s the problem. For most of my life I’ve shot full-size guns, yet I’ve carried subcompacts. Even a Glock 19 “prints” on my skinny waist. At the same time, I’m an enthusiastic USPSA/Steel Challenge pistol competitor, where shooting a subcompact would put me at a laughable disadvantage. So why am I suddenly dragging my little guns to local shoots?

Action Shooting International (ASI) de-emphasizes the competitive part of “competitive shooting” and simplifies the rules. Doing that took the ego craziness out and let cool everyday gear in – stuff you would NEVER see at an athletic shooting event. The rules are designed to make it possible for “shorty” owners to participate and succeed. The biggest stages are only 12 shots long, so most everyone only reloads once per stage. Most every stage has a required reload, but you can reload anywhere between the first and last shot. Because of the reload, big magazines don’t give you an advantage. Ammo power doesn’t matter (shoot a .380 if you want), and the targets are close. Basically the only thing you can’t use is a frame-mounted scope and barrel-mounted compensator. Because of that, people roll out everything from Glock .45s to Browning Hi-Powers to the Ruger LCR.

Shooting ASI for fun opened a way for me to shoot my “shorty” in a way I never would have done on my own – and now I’m MUCH more proficient with it.

Short Guns Are What We Really Use

I love purpose-built match guns. They make even the humblest shooter faster and more accurate. They’re awesome on the range but make LITTLE sense in the real world. As a result there are thousands of skilled...
competitive shooters (like me) who shoot a sexy “range queen” on the weekends, but the gun they actually need, they rarely shoot!

ASI’s culture opens the door for high-volume shooters like Blue Press readers to use/train with whatever they want (including their .380 and .32 caliber carry guns). We’ve seen shooter after shooter bring out their carry guns and shoot them in a dynamic environment for the first time. They try combinations that aren’t “legal” in the eyes of other sports (using projected lasers, lightened slides, flashlights) and they learn stuff as a result.

In my case, shooting the GLOCK 26 that I carry more or less daily opened my eyes. Since choosing to shoot the 26 in ASI, I’ve learned new ways to reload, new ways to draw, and learned a lot about how quickly I can engage targets with different-size guns. I still manage to win now and then (not that anyone really cares), but I’m living proof you don’t need to run out and buy an expensive blaster to shoot ASI.

Gray Guns’ Jordan Castro ranks among the top 100 or so Steel Challenge shooters in the world. He would be bored shooting a typical ASI match with his match gun. Notice, I said “with his match gun.”

Instead, Castro brought his GLOCK 43 when he came to the range with me. The 43 is a great little gun, with the emphasis on LITTLE. Castro had shot the gun a bit at the range, intending to carry it for self-defense, but hadn’t shot it in a dynamic, move-and-shoot setting.

“Wow, that’s a lot more challenging than I thought,” said Castro after he finished his first stage. “I really have to concentrate….” Reloads were much more challenging than with his full-size SIG 320, and getting controlled accuracy at speed took effort. Suddenly, Castro was realizing all kinds of things about how to reload the 43 under stress, what his realistic range was, etc. Now, ASI’s “simple” short courses looked about right!

On the flip side, I’ve seen shooters appear at ASI events recently clothed head-to-toe in the garb and gear they use at semi-pro matches. Velcro racing belts, fancy holsters, customized jerseys with company logos, and all-steel match guns with scopes. For them ASI is “more trigger time” for their “real sport” somewhere else. They’re pretty good – and kinda missing the point.

Full disclosure, I work for ASI, so I get e-mails and phone calls about what happens at matches, and “the match gun thing” is a common thread. If someone needs a full-size gun and a scope to shoot a man-sized target at 8 yards consistently, great! Bring one! Having said that, for someone with competition-level shooting skills and good vision, shooting a scoped match gun in ASI is like driving your monster truck to work. Revving your ego in the parking lot sends a message – about yourself.

I intentionally set aside my “monster truck” 3.5” semi-auto 12-gauge when I hunt pheasants with family. My great-grandfather’s Ithaca side-by-side feels totally different than my modern shotgun, yet it has features like barrel selection and cocking indicators that my modern gun doesn’t. It’s a design from another century, hand-crafted to excel in its own way. The Ithaca’s standard 16-gauge shells reduce my maximum ranges, and with only two shots, I’m more conservative with the shots I attempt. I think and hunt differently when I hunt with the Ithaca – and that’s part of the fun.

Like shooting the GLOCK 26.

Next time you’re at an ASI event, keep an eye on those older guys shooting their carry guns. One of them might be me, or ASI co-founder Sandy Wylie (shooting his Bersa BP9CC from an ankle holster). USPSA/IDPA master Sandy COULD shoot a full-size 1911, but he’s working on his “shorty” too. For people like him and Jordan Castro – people who can really shoot – there’s more going on in ASI than meets the eye.

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

**Strong Mount** increases your machine’s “footprint” to over 10”, spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6” above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

An Aluminum Roller Handle gives your reloader an entirely new “feel,” reduces operator fatigue, and makes primer seating easier.

Dillon’s “Belted Magnum” Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

Dillon’s 1” Bench Wrench fits our 1” Die Lock Rings which give you more space on the toolhead.

Our Machine Maintenance Kits come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

**WARNING:** The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.
CV-2001 – The Industry Standard

Dillon’s CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no “hobby” machine! The bowl and base are constructed of 7/32” thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10” x 14”, and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18” x 22”. The tub keeps the mess off the floor and bench. It’s fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon’s introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

Rapid Polish 290

Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases! Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass. Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!

Don’t Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass. 15-pound bag  P66-13287  $23.95

Dillon’s D.C.L. non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you’ve done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you’re ready to load. Try a bottle. You’ll never use a grease pad again.

P66-20185  $19.99

P66-20186  $48.99
Rapid Trim 1500 Case Trimmer

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer P66-62164 is $349.99. (Available only in 110 volt 60 Hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, P66-13141, are $20.99 each. Upper lock rings, P66-13559, are $6.99 each.

1. First gun you ever fired?
   KC: The first gun I ever fired was my father’s 1911 super comp major gun. I was hooked after that.
   Max: It was a .22 rifle when I was just five years old but I don’t remember the model.

2. What’s your favorite gun?
   KC: I have two favorite guns, the new KC OZ9 and the 2011 ZevCat.
   Max: SIG 226 X5SAO.

3. Do you have any rituals before you shoot?
   KC: On match day I have to wear my lucky underwear to keep things consistent.
   Max: I always go out for Italian food before a match starts. I don’t know why, it’s just my thing, haha.

4. How many rounds a year do you shoot on average?
   KC: I shoot anywhere from 40,000 to 70,000 rounds a year depending on what matches and my instructional classes call for.

5. Most useless thing you own?
   KC: The most useless thing I own would be my basement full of free shooting gear.
   Max: Probably too many watches and sports memorabilia.

6. What else do you do for fun?
   KC: I love to workout. I go to the gym and lift weights 5-6 days a week. I really enjoy being in shape and trying to stay healthy.
   Max: Shooting has been my entire life and passion, but besides shooting, I really enjoy spending time with my family. I’m very involved in every aspect of my kids’ lives and I really enjoy coaching their school sports.

7. Favorite place on Earth?
   KC: I love the state of Georgia in the United States. Home is where the heart is.
   Max: Bahamas.

8. Most annoying thing about you?
   KC: The most annoying thing about me is that I’m a germophobe. I wash my hands constantly.
   Max: I’m a very routine person. I like to do things the same way over and over again. Consistency is what I look for in my life and I feel it’s a big reason for my success. That said, sometimes it can be annoying to be so structured. I will let loose when I’m retired, haha.

9. Craziest thing you’ve ever done?
   KC: Skydiving is probably the craziest.
**Max**: I live a pretty boring life and like I said, I have a very structured routine. Not too much craziness for a 37-year-old Dad of three.

10. **Dream job?**

**KC**: Being able to train military is basically my dream job. I love being able to give back to my country and make lifelong friends with the people who protect my freedom.

**Max**: I’m definitely living my dream. I’ve been a Pro Shooter for SIG SAUER for just over 10 years now and I was a Pro Shooter for the US Army 10 years before that. I’m very blessed to be in the industry I love for so long. I hope to be in it for another 20 years!

11. **Who has inspired you the most?**

**KC**: I would say my father has inspired me the most in my life. He was the one to teach me how to shoot and really understand the world as a whole. I never thought I would make competitive shooting my career, and if it was wasn’t for him I would not be where I am today.

**Max**: My Dad. He’s the hardest working guy I know and over the years he’s taught me so much by his actions.

12. **Who would play you in a movie?**

**KC**: Ryan Reynolds of “Deadpool,” I love to joke and shoot.

**Max**: Jason Statham. He’s usually a bad a$$ in the movies and we look alike, haha.

13. **If you could have a conversation with anyone from the past, who would it be?**

**KC**: I would have loved to speak with my Grandfather. He passed away when my dad was nine and I would have loved to meet him.

**Max**: Pat Tillman. As a US Army veteran, I respect him, who he was and what he fought for.

14. **Who’s in your regular crew?**

**KC**: Jessie Harrison, she makes life so much better. She is the best thing to have happened in my life.

**Max**: Most of the time my regular crew is my Dad, Blake Miguez, Shane Coley, Travis Tomasie, KC Eusebio and there’s a few other close friends but I keep my circle very small.

15. **Words to live by?**

**KC**: Talent is a gift, character is a choice.

**Max**: Always act as if someone is bigger, faster, better, and stronger than you. If so, you will always be humble and you will never be outworked in your profession.

5.11 Tactical

Double Duty TDU® Trainer Operator

T he Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

**Mernickle Conceal-Carry Performance Series**

This holster/mag pouch combination was designed for the Single Action Shooting Society’s “Wild Bunch” category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy. The mag pouch spaces the magazines so when you grab one mag, the second isn’t in your way; above the belt line so the belt doesn’t interfere with the draw; and at the max depth required by the sport – and no more – so you’ll get a full grip and the ability to index with your forefinger for a rapid mag well insert.

California Competition Works
Moon Clip Tools & Carriers

Universal Moonclip Tool
P66-44055 $68.00
Ruger LCR moon clips.

When you need to moon and de-moon ammo for anything from a .32 ACP through .460 S&W, rimmed or rimless cases – one tool does ‘em all. Fits in the palm of your hand and drops right into your pocket for easy field carry. Made in America with 100% American materials.

S&W Revolver .22 Speedloader

S&W Revolver Frame-mounted Firing Pin – Installation of this kit reduces the trigger pull weight by approximately 3 pounds from factory specifications.
S&W Revolver Frame-Mounted Firing Pin – The combination of the Firing Pin and the Reduced Power Firing Pin Return Spring is designed to reduce the probability of light strikes.

Apex Tactical Specialties

S&W J-Frame Duty/Carry Spring Kit – Installation of this kit reduces the trigger pull weight by approximately 3 pounds from factory specifications.
The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model.

**ODIN Ready Bag**

ODIN Works introduces the new ODIN Ready Bag® (ORB) featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease. Whether you’re going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: Can remain in bag as a pocket or extend up through the zipper to fit longer barrels
- Available in black or coyote brown
- Dimensions: 28” x 7” x 6”

**Pachmayr Pac-Mag Gun Concealment Magnet**

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!
**Dillon’s “Plan B” Very-Bad-Day Planner Holster**

A handy holsters is one that holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

“Plan B” Holster

- **GLOCK 19**: P66-66682 $44.95
- **GLOCK 43, 43X**: P66-66683 44.95
- **GLOCK 48**: P66-66684 44.95

- **S&W M&P Shield**: P66-66686 44.95
- **Shield .380 EZ**: P66-66687 44.95

**Comtech’s STINGER**

The STINGER: Comtech’s own personal defense device. Designed to act as a “force multiplier,” it’s like having the punching power of a karate master – instantly! There’s really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another “keychain device” to most, and yet it works so well when needed. You deserve a Stinger!

- **PT-2 Keychain Tool**: P66-19495 $9.99

**Eclipse Lunar Dump Tray**

The Eclipse Lunar Dump Tray is the best place to empty your pockets at the end of the day, ensuring that you’ll find everything you need for the next one!

- **P66-66695**: $34.95

**Eclipse Apollo 12 Wallet**

Hang on to your cash and your cards with this pocket safe! This Kydex wallet holds up to 12 cards. Forget wearing that bulky, uncomfortable wallet and carry a wallet that matches your style.

- **Black**: P66-66694 $15.00
- **Brown**: P66-66693 15.00

**Dillon Precision Morale Patch**

- **P66-13762**: $4.95

**Tactical Tailor Operator Cap**

Made in the USA (Tacoma, Washington) by a company that prides itself on hiring veterans.

- **P66-00025**: $22.50

**“Plan B” Very-Bad-Day Planner Holster**

- **P66-10252**: $29.99

**Eclipse Holsters**

Handmade holsters manufactured in Williamsburg, Virginia.

By Duane Thomas  
Photography by Belle McCormack & Duane Thomas

The 2019 Washington State IDPA Championship was one of the single hardest matches I have ever shot, from a standpoint of the skill level required to do it well. Marty Hayes, Match Director and headman at the Firearms Academy of Seattle, where the state match was held for the second year in a row, commented, “A championship should be hard. That’s how you separate the good shooters from the ones who are just lucky.”

A good example of that would be the mover stage. As those of you who’ve read my articles over the years know, FAS has a laterally moving target system that comprises one of the stages on the school’s Handgun Master Test. On the HMT, the drill is you begin facing the target, a concealment garment is not required, the target carrier starts out behind a barrel, when it appears its exposure time is three seconds before it disappears behind another barrel, there’s only one target, there’s one pass left-to-right, another right-to-left, you have to draw and fire three shots per pass, freestyle, six shots total, all shots must be in the target’s highest scoring area to pass.

That is not how it was at the state match. Instead:

1. You drew from concealment. This was, after all, an IDPA match.
2. You began facing away from the target, with your master hand on the toggle control that started the target carrier moving.
3. Distance between targets was longer, five yards; exposure time was also longer, five seconds.
4. There were three passes, one left-to-right, one right-to-left, another left-to-right.
5. There were two targets, requiring two shots apiece per pass. No make-up shots allowed.
6. And, here’s the biggie, for rep #1 you had to turn, draw, and engage the targets with two shots apiece on two targets, freestyle. For rep #2 it was turn, draw, two shots apiece on two targets, master hand only. For rep #3 it was turn, draw, transfer gun to support hand, two shots apiece on two targets, support hand only. No one on my squad was doing this very well, frankly. I have never seen so many good shooters in one place getting their asses absolutely kicked by a stage.

Okay, it’s my turn. I step up on line, face uprange, put my right hand on the toggle switch, hit it, turn, draw, here comes the target. I have all the time in the world to draw, fire four shots, two per target, freestyle. Before it disappears, I know I’ve gotten four down-zeroes. Second rep, hit the toggle, turn, draw, four down-zeroes master hand only.

At this point, I’m feeling like pretty hot stuff. I’ve done a fair amount of practice support hand only, I know I can do that, too. However, a stage like this is very unforgiving, it will highlight any weakness in your shooting; the vast majority of my support-hand-only shooting has started with the gun already in my hand at Low Ready, I haven’t put in very much time at all practicing the draw and transfer. But who cares, I know I can do it. Confidence is half the battle.

I hit the toggle, turn, draw, the transfer actually goes smoothly...but the gun indexes high on the first target. Rather than rush the shot – which in retrospect, is probably what I should have done – I haul the gun down, fire two down-zeroes on the first target, and transition to the second target. By this time the target carrier is almost to the second barrel, I fire two hopers...and wind up with one down-three, one total miss. That’s eight points down, right there. So apparently, that’s where my ratio of “good to lucky” ran out.

Another challenging stage was a near-to-far standards exercise, two shots per target, seven targets total, 14 shots, no make-ups allowed, the first target was at five yards, the remaining targets evenly spaced til the final target was at 40 yards. FUN. This stage really separated those people with solid trigger control from those without. I would like to report I did absolutely awesomely on this stage. That would not be true. But it did highlight something else on which I need to work.
Another stage began with the shooter kneeling, support hand handcuffed to a closed briefcase, at the buzzer you had to draw a loaded gun from the briefcase and engage three close-range targets. Like everyone else on my squad, I elected to draw and shoot master hand only while kneeling. Actually did that one pretty darn well.

The major match sponsor was Walther. Thus the stage that began with the shooter seated at a card table, and one of Walther’s new Q5 Match Steel Frame autos as a “pick-up gun.” After you hit a Pepper Popper, you had to deal with two swingers, coming in from opposite directions at the same time, from the first position, while seated. Kewuhl!

This was the first match at which I’ve ever shot a “wet stage,” i.e. the stage description read, “You are surprised while doing dishes...” and you started the stage with your hands submerged in a tub of water simulating a sink. At some matches, they’ll actually put dish washing liquid in the water. Not crazy about that idea, it can be a safety issue since that makes your hands really slippery. They didn’t do that here, it was just water. Also at some matches, they supply a towel as a prop during wet stages. No towel here, since experience has shown the SOs proofing this stage that, if there’s a towel available, some people will actually take the time to dry off their hands before they draw the gun and shoot the stage, so they won’t get their gun wet. I kid you not.

I found shooting with wet hands, something we very rarely if ever practice, was no big deal. Once I drew the gun, I didn’t even notice my hands were wet. The only way I could even tell it had happened, there was some water on my Glock grip at Unload and Show Clear. Big whoop.

At the chrono stage, I discovered the answer to one of the questions of the ages: What power factor does Sellier & Bellot 115-grain hardball post out of a 4-1/2" barreled Glock 17? Answer: 132. (125 passes the chrono.) With the kind permission and aid of Steve Rankin, chrono stage SO, after the match I also discovered the answer to yet another of the questions of the ages: What power factor does Sellier & Bellot 115-grain hardball post out of a 4" barreled Wilson EDC X9? Answer: 131.

Finally, it was time for the awards, and the random raffle prize table. It is just a constant in my life, I am always one of the last people to have my name called. If there are more people than prizes, my name is not called all. This match proved no exception. I did envy the guy who glommed onto the Square Deal “B” supplied to the prize table by Dillon Precision. I would have grabbed it, myself, had the opportunity arisen. Obviously, I need a third Square Deal. Right?

As I said to start the article, this was one of the most technically difficult matches I’ve ever shot. It was also one of the most fun. I almost can’t wait for next year so we can do this again!

Duane’s website is self-defense-handguns.com.

---

"A CHAMPIONSHIP SHOULD BE HARD. THAT’S HOW YOU SEPARATE THE GOOD SHOOTERS FROM THE ONES WHO ARE JUST LUCKY."

-- MARTY HAYES
Dillon Die Sets

Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

**Bullet Seating Die (Pistol)**

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

**Crimp Die (Pistol)**

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Dillon Cartridge Pistol Dies (Three-Die Sets)

- .380 ACP P66-14401 75.99
- 9mm Parabellum P66-14406 75.99
- 9x25 Dillon P66-14601 156.99

- 10mm/.40 S&W P66-14398 75.99
- .41 Magnum P66-14402 75.99
- .44 Special/.44 Magnum P66-14403 75.99
- .45 ACP/.45 GAP P66-14404 75.99
- .45 Colt P66-14405 75.99
- **Spare Decapping Pins** Package of 10 P66-21528 $7.99

Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

**Bullet Seating Die (Rifle)**

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

**Taper Crimp Die (Rifle)**

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

Dillon Rifle Dies (Three-Die Sets)

- .223 Remington P66-10839 $83.99
- .308 Winchester P66-15574 83.99
- .30-06 Springfield P66-10840 83.99

Dillon Carbide Rifle Dies (Three-Die Sets)

- .223 Remington P66-10096 $179.99

By Oleg Volk

Long pistol barrels were popular before enclosing slides even appeared around 1900. Borchardt 1893 model sported a 7.7” barrel, “broomhandle” 1896 Mauser started out with 5.5”. Both were .30 caliber designs and the barrel length was necessary to obtain sufficient muzzle velocity and the sight radius to utilize the resulting flat trajectory. The first pistol to use an actual slide, Browning FN1900, had a 4” barrel that has become the standard for personal and police carry guns ever since. Browning 1903 and 1911 models, both with 5” barrels, set the standard for army sidearms in countries where officers were actually expected to use them as more than badges of rank. Subsequent Army sidearms got fractionally shorter: M9 barrel is 4.9” long, M17 barrel is 4.7” long. With 4” GLOCK and its imitators and competitors being the police standard, medium-frame pistols with barrels 5” and longer have come to be considered “longslide,” and large frame pistols with barrels 6” or longer. The first factory longslide was AMT Hardballer, produced from 1980 in .45 ACP and later .400 Corbon calibers. Since then, most large companies have introduced longslide handguns, usually with hunting or competition in mind.

The velocity advantage of the extra inch of barrel varies from negligible to about 100 fps. It is usually more pronounced in higher-pressure chamberings with lightweight bullets, the opposite of what’s employed for hunting at distance. The sight-radius advantage is likewise fractional, though every inch counts for older eyes starting to lose close focusing ability. Muzzle blast and flash are also reduced, though not decisively. Overall slide mass in longslides is either increased, lessening muzzle flip, or kept the same through skeletonizing of the side, permitting standard-weight recoil springs. The main disadvantage is the slightly longer time required to clear the holster mouth. The sight-radius advantage has recently been reduced by the popularity of optics. Despite this mixed bag of features, longslide autoloaders are now offered by over 20 gun makers. What makes the concept so persistent?

Despite the Jeff Cooper quip that “a pistol is what you use to fight your way to the rifle you should have never laid down,” that isn’t a practical approach for most people outside of war zones. Carrying long guns is illegal in many places, and both socially and physically awkward elsewhere. The handgun becomes the sole readily available weapon, even though the foes may come prepared with shotguns or rifles. In that

800-223-4570 • 480-948-8009 • bluepress.com
case, every little bit of accuracy, muzzle energy and shooting comfort helps, all at the slight cost of a couple of ounces of weight and an inch of length. Some longslide pistols have barrels even longer than the slide, threaded for flash hiders or compensators. The same reasoning applies to the choice of cartridge for the defensive guns: some maximize capacity (9mm Luger), others muzzle energy (10mm Auto), a few frontal area and bullet weight (.50 GI, .50 AE). Larger, heavier slabside sidearms make even magnum cartridge recoil and flip manageable. I have used only some of the currently available models, and found most of them to be exceptional performers.

Guncrafter Industries (guncrafterindustries.com) Model 4 in .50 GI is a massive slabside with a full 6” barrel. Firing a thick but fairly low-pressure cartridge, Model 4 is an expensive custom-made-to-order weapon optimized for self defense against thin-skinned hominids. Bullet options range from high-velocity 185-grain copper HP to subsonic 300-grain ball, all match-accurate. Overlapping bullet holes in targets at 12 yards is too easy, and the weapon stays on target well for fast follow-up shots. At $5,000+ for the gun and $2-3 per cartridge, it’s a deluxe package that’s all functionality and smiting power. The 1200-fps 185-grain expanding bullets start out 1/2” in diameter and expand to over 3/4” with plenty of penetration. Despite the heroic dimensions, the pistol is only a couple of ounces heavier than M1911. In deference to budgetary considerations, it is also available with a “subcaliber” .45 ACP slide for cheaper practice.

Nighthawk Custom’s Heinie Long Slide 6” (nighthawkcustom.com) is a more conventional-look-
Berry’s Mfg. Bullet Puller

# Lyman Products

**Lyman’s Precision Funnel Set** is the ideal system for the serious reloader. The Precision Funnel Set is made to be completely static free, with a body of die-cast aluminum and precision-turned aluminum inserts. This is no “one size fits all” funnel; the Precision Funnel Set uses precision-machined, caliber-specific inserts to properly fit the case neck. The inserts can be quickly and easily installed by simply pushing them into place and then pulling them out when changing calibers. The Precision Funnel Set also comes with a padded storage case that neatly stores extra inserts when not in use. The set includes inserts for .22, .243/6mm, .25/6.5mm, .270/7mm, .30 and .338 caliber rifle cartridges.

**Lyman Scale Weight Check Set** enables you to check/calibrate your scale using known weights.

**Weight Set .5 - 210.5 Gr.**

Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

It was lauded at Smith & Wesson as the greatest single-shot .22 target pistol they had ever produced, of which there were four. It replaced the third model “Perfected” single shot, which (with its predecessors) used a top-break revolver frame. This gun was developed in response to the wishes of the bullseye target community, with all the features they wanted. It was as precision-machined as any firearm S&W ever produced, and locked up as solid as a bank vault door. It was called the “Straight Line” model, because the striker and trigger moved in straight lines, rather than in arcs, as employed in previous target pistols. The gun had the look and feel of a semiautomatic pistol, a departure from the past. It was easy to open for loading and unloading. It had a long 10” solid-ribbed side-swing barrel, and an even longer sight radius. The sights were superb, with a Patridge upright front and a fully adjustable rear. In fact, S&W had listened carefully to target shooters, and spared no expense in giving them all the features that they desired. This masterpiece gun weighed almost a pound more and had a noticeably heftier and more solid feel than the “Perfected” single-shot. It was provided with a green-felt-lined blued metal case that kept the gun and its accessories handy and well displayed. Announced in 1923 and produced beginning in 1925, it was intended to be everything a target shooter could hope for.

All the same, it proved to be a stunning flop, with disappointing sales through 1936. As a very rare pistol from the past, not many folks today have even heard about it. Its story (and the mystery of its demise) is worth telling.

The gun was first conceived as an apparent challenge to the Colt Camp Perry Model single-shot, which was based on the Colt Officer’s Model .38 revolver frame. These guns were dominating the .22 target matches in 1921 and 1922. The new Straight Line model had the same weight (34 ounces) as the Colt gun. The S&W catalog had these things to say about their new contender: “…we determined to design an arm which would be easier for the average man to shoot well, and at the same time make several desirable improvements in the action. To this end we adapted the type of handle typical of the Auto Pistol, as when shot with the arm extended this shape makes the pistol point naturally without any bending of the wrist. Those who have learned to do deliberate shooting with a revolver or with our old model pistol will find this auto-shaped grip a very different proposition – but after a little practice, scores will begin to improve and shooting will be much easier, and require much less holding for each shot. For years expert pistol marksmen have criticized the swinging hammer and trigger on the ground that they tended to disturb the aim. To overcome this we have used a straight pull trigger and a hammer that moves in a straight line parallel to the bore.”

With the Straight Line, instead of a swinging hammer as found on revolvers, an in-line hand-cocked striker is used. Two round and checkered gripping surfaces are provided on the striker in order to easily pull it back. When the striker is pulled back to half-cock position, the grip is held with the right hand and the barrel by the left. The left hand pushes the button on the left side back with the thumb to unlock it, and the barrel is twisted counter-clockwise to open the action. The spent case (or unfired cartridge) will be partially extracted to where it can be gripped and removed from the chamber. A new round can be chambered, and the barrel can be pivoted back into alignment with the frame where it will lock into place. The striker can then be pulled back to full cock preparatory to firing. The “straight line” idea was to avoid any downward push on the gun (however slight) that could result from a pivoting hammer. The same strategy was employed on the trigger, which had to be pulled straight to the rear to fire the piece.

Sales of the new gun were brisk at first, but winning over shooters who had long been accustomed to revolver shooting (and single shots based on revolvers)
proved to be problematic. The “straight line” advantage over the older guns was in actuality quite minimal, perhaps of use only to incredibly accomplished shooters for whom every small edge was important. In fairness, a good number of high scores were achieved by some top-notch competitors using the pistol. Unfortunately, another problem began to develop. Because of the purposely very tight tolerances of the action, when the working parts were lubricated with oils then in use, some gumming up inevitably took place.

I remember as a boy that the popular classic 3-in-1 oil that was widely available during WWII had a reputation for gumming. In recent years I took my grandfather’s S&W revolver (which dated to 1903) apart for cleaning, and it was really gunked inside from those earlier lubricants. Such gum-ups too often resulted in light primer strikes and misfires with the Straight Line. “Alibis” such as these were certainly unwanted and very annoying. Numbers of competitive shooters subsequently returned to the old revolver-based guns as being way good enough. And then the Great Depression fell on the country in 1929. The Straight line was a premium gun, somewhat expensive, and sales of it plunged. In the end, at the close of production in 1936, only 1,870 Straight Lines were ever manufactured. A few continued to be available from some large wholesalers for a while after elimination from the S&W catalog.

The Straight Line was, nonetheless, an incredible precision instrument. Fit and finish were superb, arguably never quite equaled. The care lavished on these pistols is immediately noticed when they are examined. The fitted metal case was also unusually nice, embossed with the S&W logo on the hinged top cover. The Straight Line was the first production handgun that used chambers recessed for the cartridge rims, providing some insurance against rim blowouts. Early pistols were equipped with “Olympic” chambers. These had shortened throats, which necessitated more forceful insertion of the cartridge, as the bullet actually engaged the beginning of the rifling. Some users found this type of chambering frustrating, and the chamber was subsequently lengthened to allow easier loading by order of a factory directive dated January 15, 1926. Some production changes were made in 1928, consisting of heat treating of the frame, a rebounding striker, a non-adjustable trigger, and a different sear and sear lever arrangement that gave a shorter, crisper trigger pull. The rebounding strikers were added to pistols then in stock, and serial numbers as low as 170 have been found with this feature. At S&W, as many collectors know, guns are seldom shipped in actual serial number progression. Serial-numbered frames may languish in bins for some time before final assembly and shipping. The serial number is found on the butt of each pistol. Although several styles of wooden stocks have been observed, most are made of smooth Circassian walnut. Some are found with indented upper portions such as on the pistol illustrated, some are non-indented, and some feature checkering. The top of the barrel is marked “Smith & Wesson Springfield Mass. U.S.A. PAT'D DEC. 4, 1923.” “Smith & Wesson” is stamped on the barrel’s left side, “Made in U.S.A” is stamped on the frame’s right side, and the S&W logo is on the left side. S&W logo medallions are inserted into the upper portion of each side’s stock. Each metal case is equipped with a sight adjustment screwdriver and a two-piece cleaning rod in addition to the gun itself. Approximately the first 30 cases used elastic straps rather than metal clips to hold these accessories, and are more greatly valued by collectors. The condition of the case, if available, is important in figuring value. As is normal, the green felt lining can deteriorate over time. Rumor has it that some nickel-plated cases (rather than blued) exist, but if so, examples are practically non-existent. I’ve yet to see an example or a picture.

The Straight Line is a hot collector’s item today, and an “as new-in-box” example can command several thousands of dollars on the market. As always, condition of the gun itself is important, and an intact original case with accessories can add a substantial amount to value. These guns are very interesting artifacts from a time when hand-fitted manufacturing excellence was prevalent at Smith & Wesson, and certainly deserve to be called classics!
**“Big Fifty”**

**STANDARD FEATURES:**
- Made in the USA
- 4-Station Interchangeable Toolhead
- Uses Std. 1-1/2"-12 UNF Thread Dies
- Manual Shellplate indexing
- Average Loading Rate: 300 Rds./HR.
- Loads High Volume/Match-Grade Ammo
- Milspec/Match-Grade Priming System
- Ductile Iron/Carbon Steel Construction

All for ONLY...

$1499.99

P66-50000

Now Available! .408 CheyTac Conversion P66-50204 $189.99 (Dies NOT included)

Total price as pictured here with optional accessories: $2945.96
- .50 BMG Carbide Size Die P66-50075 $984.99
- .50 BMG Case Trimmer P66-50030 $449.99
- BFR Mounting Hardware Kit P66-50140 $10.99

**50 BMG CASE TRIMMER ASSEMBLY**
Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die. P66-50050 $449.99

**50 BMG CARBIDE SIZE DIE**
The only .50 BMG size die in the industry that’s a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications. P66-50075 $984.99

**50 BMG POWDER MEASURE ADAPTER**
For use with the RCBS .50 BMG powder measure. P66-50125 $109.99

**50 BMG PRIMER SEATING DIE**
One of these is included with Dillon’s Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, Mil-Spec primer punch. P66-50200 $189.99

**50 BMG PRIMER POCKET SWAGER**
Makes it easy to remove the military crimp. P66-50001 $379.99

**PRIMING CONVERSION**
Converts Swager to Priming System. P66-50003 $99.99

**50 BMG PRIMING SYSTEM**
Allows off-the-machine primer seating. P66-50002 $354.95

**1 (SWAGER CONVERSION**
Converts Priming System to Swager. P66-50004 $99.99

**RCBS .50 BMG LOADING ACCESSORIES**
- .50 BMG Powder Measure P66-21896 $114.95

**SL 900 CONVERSIONS**
- 12 Gauge Conversion P66-97037 $299.99
- 20/28 Gauge Casefeeder P66-97036 299.99
- Low Powder Sensor P66-16306 44.99

Total price as pictured here with optional accessories: $1714.97
- 12 Gauge Conversion (pictured) P66-97037 $299.99
- 20/28 Gauge Casefeeder P66-97036 299.99
- Low Powder Sensor P66-16306 44.99

**SL 900 MACHINE COVER**
This heavy-duty nylon cover comes equipped with a D-ring, allowing the zipper to be locked. Includes: Lyman Reloading Handbook, Clear Safety Glasses, Dial Caliper, Eliminator Scale, Machine Cover, and Low Powder Sensor. P66-22290 $223.99

**Spare Parts Kit**
- 1 Pawl Spring $39.99
- 1 Ejector Wire $39.99
- 1 Swing Arm Torsion Spring $39.99
- 1 Primer Transfer Arm $39.99
- 1 12 Gauge Locater Pin $39.99
- 1 Gum Rubber Insert Revision B $39.99
- 1 Shot Fitting E-Clip $39.99
- 1 Failsafe Bushing Revision B $39.99

**Total price as pictured here with optional accessories: $1669.98 with Casefeeder**
- 12 Gauge P66-97110 $449.99
- 20 Gauge P66-97123 $449.99
- 28 Gauge P66-97124 $449.99
- Comes with factory adjusted dies

Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We’ve been including these bins with our machines for years, and now we’re stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal “B” cartridge bins) are 4-3/4” long x 3-7/16” wide x 2-13/16” deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4” long x 3-7/16” wide x 2-13/16” deep.
- The 1050 bins are 10-1/4” long x 4-3/8” wide x 4-3/4” deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4” long x 6-1/2” wide x 6-3/4” deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They’re virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang ‘em, stack ‘em, rack ‘em and fill ‘em – you just can’t beat ‘em! Buy several and get your “stuff” together.

By Peter Caroline

The distance from my home in southern Arizona to Gunsite is 257 miles. Somewhere in the middle of that drive is Phoenix, which is enough to ruin anyone’s day. I was on my way to a three-day writers’ event, wherein we of the firearms press are encouraged to demonstrate our skills, or lack thereof, in using the sponsors’ products. This event would be a little different. In the events I attended in years past, the emphasis was on semiautomatic pistols, usually of the 1911 persuasion, the favorite of Gunsite’s founder, Lt. Col. Jeff Cooper. This year, we were encouraged to bring our own favorite revolvers, both single and double action, and lever-action carbines.

I had started out at 9:30 a.m. to avoid the heavy traffic (as if). By about noon, I had made it without incident through most of the Phoenix mess, and was about 20 miles north of the city when I saw an area of nearly total blackness some distance ahead. When I reached that area, the black turned to white. It was not
fog, but a downpour, the likes of which I had never seen before. It was like being stuck in The Carwash From Hell for 20 minutes. The traffic had slowed to a crawl, and I could barely see the taillights of the car in front of me. Many cars had pulled off to the side of the road; I decided to press on regardless, and the torrent eventually devolved into a drizzle.

I arrived at the Chino Valley Days Inn at 2:30 p.m. Once in my room, I examined my guns to make sure that no rain had seeped into my car’s trunk. All, thank God, were perfectly dry. I had brought four revolvers: a Lipsey’s .44 Special Ruger GP100, a Smith & Wesson Model 24 .44 Special, a S&W Model 10 .38 Special snubby and a 1968 Colt Detective Special, which was on my belt. My only long gun was the Skinner Model 1892 .44 takedown carbine that I’d used on my pig hunt several months earlier.

At 5:30 p.m., I attended a get-together at Rob Leahy’s Simply Rugged leathercrafting shop. There were lots of good folk from the gun world, excellent...
food and drink, and the incomparable aroma of tanned leather permeating the premises.

Tuesday morning, after a light complimentary breakfast of an omelet, yogurt and coffee at the Days Inn, I drove the 10 miles to Gunsite. We filled out releases and chose our lunches for the three-day course. Revolvers were the order of the day. I had planned to shoot one of the .44s. I tried on both of them. Accompanied by a heavyweight belt, holster and bag holding a dozen speedloaders, both were just too much baggage for all-day comfort. So, I switched to the Detective Special in a homemade Yaqui slide, with a half dozen Bianchi Speed Strips stuffed in my pocket. As they say in Sonora, “Why shlep?”

We started out on the Hanneken Range, where we were briefed on the most effective shooting stance and the proper sequence of the draw. Most of us had been through this before, but repeated familiarization never hurts. Then we spent some time shooting close up at Gunsite’s bewildering camo humanoid targets. These were set to rotate 90° to face us for 3 seconds, and then flip back. In those 3 seconds, we were supposed to draw, aim and, ideally, hit a golf ball-sized imaginary circle in the center of a small square area representing the head. Being old, slow and astigmatic, I was not optimistic about my performance. The Detective Special, however, has a surprisingly square and visible front sight and a very decent double-action trigger. I actually did manage to hit the kill zone more often than not.

At noon, we drove back to the administrative area and collected our catered lunches. I had a generously stacked roast beef sandwich with provolone, onions, tomato, lettuce, etc., plus cole slaw and a cookie.

In the afternoon, we had some classroom time to get together with our sponsors...Simply Rugged Holsters, Tyler Gun Works, Doubletap Ammo and Skinner Sights. Doc Barranti was displaying some impressive leather creations, plus a fashionable lightweight canvas vest, weighted at the bottom to aid in quick draw. Fermin Garza, the wizard of aftermarket iron sights, showed off his improved version of the legendary mirror-illuminated King Sight. Although Bobby Tyler could not make it to this event, he had a fellow Shootist deliver my “reborn” 1920s Smith and Wesson .32 Regulation Police. I had bought this revolver several years ago for 80 bucks as a wallhanger. It was pitted, and choked with internal gunk. I had cleaned it up, and found it to be a surprisingly good shooter. Bobby had restored it to better than new condition, with a spectacular color casehardened finish, and retimed and tuned it.

Wednesday was lever-action carbine day...and we had carbines ranging from .25-35 Winchester to .444 Marlin. I noticed that most were accessorized with slings. My Skinner Bush Pilot Model 92 .44 takedown carbine did not have a sling. I’d previously hunted pigs with it in heavy brush, and a sling is not an asset in that environment. Anyway, we got a very thorough indoctrination on the proper manual of arms, with and without sling, and cautionary advice on muzzle discipline. We then proceeded to the 3-yard firing line to practice headshots and upper chest shots. This was followed by similar exercises at increasing ranges up to 50 yards, with varying degrees of success. At the end of this range session, a number of our group went off to enjoy house-clearing exercises. I’ll have my turn tomorrow, I’m told.

I was supposed to join a group for dinner this evening at a restaurant called El Charro Norte. My ancient GPS didn’t recognize the address, but the nice folks at the Days Inn supplied me with a printed map and directions. I headed north on Route 89, but...
encountered an apparently horrendous accident about eight cars ahead of me, with seemingly every emergency vehicle in Yavapai County on site or just arriving. After I had waited for about 20 minutes, the police came and turned every northbound vehicle, me included, in a southbound direction. I ended up at the Bonn-Fire Restaurant, where I enjoyed a Jack on the rocks, followed by a nice rare ribeye and a salad.

Thursday morning was off-and-on rain, so we enjoyed some more classroom time with Ed Head as our instructor. He took us through the Combat Triad – Gun Handling, Marksmanship and Mindset; the Color Code – White = unaware; Yellow = relaxed awareness; Orange = specific alert noted; Red = mental trigger, fight or flight. We also reviewed seven principles of self defense: 1. Alertness, 2. Decisiveness, 3. Aggression, 4. Speed, 5. Coolness, 6. Ruthlessness, and 7. Surprise.

Skinner Sights’ Andy and Sheila Larsson demonstrated an ingenious firearms storage system disguised as a garment bag, a very nice option if you don’t happen to have a safe handy. They also gave us a first peek at a neat little 1-6x24 scope with a 30mm tube and a 1 m.o.a. lit dot. Doc Barranti showed off several new compact holsters, and Fermin Garza emphasized the importance of having sights tailored to our own visual and shooting style requirements.

The rain appeared to have quit, so those of us who had missed yesterday’s house-clearing exercise headed off to the Fun House. Contrary to popular TV portrayals, this was not a mass invasion, complete with armed storm troopers, flashbangs and much screaming and violence; it was an individual entry, with all moves carefully executed, and appropriate reaction to any potential targets. Unlike my previous pistol experience in this venue, the lever-action carbine was the tool of choice. I was instructed to load eight rounds, and my instructor followed me through the exercise. I managed to score seven well-centered headshots and one “headache” shot through the ear. I’ll have to work on that.

We finished the day with a competition that involved shooting our revolvers at a line-up of gong targets. Lots of fun (I like noisy targets). Afterwards, I stopped by the Pro Shop to pick up a few more “must-haves” and settle my account.

This was my fifth trip to Gunsite in as many years. It is an experience like no other...challenging, rewarding, sometimes frustrating but ultimately enriching in terms of skill, knowledge and camaraderie.

The Speed Beez Lever Loader gives you the mechanical advantage you’re looking for! Works with double-stack GLOCK 9mm mags with or without magazine extensions. A must have for Pistol Caliber Carbines using GLOCK mags.

P66-12337  $24.95

Tuff Products Magazine Pouches are the most versatile we’ve ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system. Available in black or coyote brown.

P66-15773  $19.95

California Competition Works Six-Magazine Pouch for PCC Magazines

AR-15/Tavor 9mm SMG +10  P66-12377  $39.95
This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many “stock” mag springs. NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.

TF/Wolff Spring for above  P66-12213  $10.00
Some Colt/Tavor/UZI magazines ship with strong springs capable of powering +10 extensions. Others don’t. This spring eliminates the problem.

CZ Skorpion +10  P66-12378  $49.95
• Extra length/strength spring included
• Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

GLOCK +20 Pictured  P66-12148  $69.99
Transforms Glock 31-round magazines into 51+1 round mags.

Legal for PCC competition!
• Extra length/strength spring included.

SIG MPX +10  P66-12376  $29.95
• Works with stock mag spring.
• Angled floor stands the magazine straight up on a table for easier loading.

SIG P320 +5  P66-12375  $39.95
• Extra length/strength spring included.

P66-39921  $29.95

California Competition Works’ magazine storage pouch® for PCC magazines is the easy way to protect, store, organize and transport your PCC magazines. Easily holds six 30-round factory or aftermarket pistol-caliber carbine magazines.

800-223-4570 • 480-948-8009 • bluepress.com
California Competition Works’ Tactical Strippers are available in four- or six-shell versions that allow quick access to your shotgun reloads. Engineered to carry up to 3” magnum shells as well as the longer European shotshells. All CCW Tactical Strippers are equipped with a belt clip that will accommodate up to a 2-1/4” duty belt.

The opposite end of our 1" wrench is a 7/16" box-end for more room to re-adjust dies after they're already mounted. This combination gives much addressed this in two ways. We offer 1" die lock rings and a "naked" machine, there's plenty of room, but if you have a are set rather close together. When you're setting up a are centered in the case mouth and properly aligned with the jacketed or cast bullet to be started perfectly finished reload. The second step expands the case bullet diameter for precise case neck tension in the expands the inside of the case neck to just under cast bullet or flat-base bullet user. The first step reloads. Extends case life. A "Must-Have" die for the regardless of brand, is that the dies improve accuracy of cast and jacketed bullet on reloading machines, regardless of brand, is that the dies are set rather close together. When you're setting up a "naked" machine, there's plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring or a crowded toolhead. We've addressed this in two ways. We offer 1" die lock rings and a 1" Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they're already mounted. The opposite end of our 1" wrench is a 7/16" box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8" x 14 dies.

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

L. E. Wilson Case Gages, Deburring Tool

Dillon’s 1” Bench Wrench

A characteristic of virtually all progressive reloading machines, regardless of brand, is that the dies are set rather close together. When you’re setting up a “naked” machine, there’s plenty of room, but if you have a need to adjust a die afterward, it often requires a delicate touch to maneuver a lock ring or a crowded toolhead. We’ve addressed this in two ways. We offer 1” die lock rings and a 1” Bench Wrench to fit them. This combination gives much more room to re-adjust dies after they’re already mounted. The opposite end of our 1” wrench is a 7/16” box-end for adjusting the Powder Bar of any Dillon Powder Measure. All our lock rings fit any standard 7/8” x 14 dies.

Jerry Miculek
AR-15 Compensator

Jerry Miculek’s three-chamber AR-15 Compensator fits threaded-barrel rifles and may be “clocked” for left- or right-handed shooters. Used by many top 3-gun competitors.

JP Enterprises
Tactical Performance Gear

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: NO MORE BROKEN BOLTS! The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

Specialized Dynamics
Emergency AR(epair) Kit

The Specialized Dynamics AR-15 Emergency Repair Kit includes:

- three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring.

Badger Ordnance Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for “flat-top” rifles equipped with low-mounted optics.
**Sig Sauer**

**MSR Collapsible Stock Assembly**

Includes stock, buffer tube, buffer, spring, castle nut and endplate.

**AR-15 Parts**

**High Quality Mil-Spec Parts Made in the USA**

shipped with a 5” barrel, but a compensated variant exists. Without extending the barrel or the sight radius, it tames the muzzle flip. The recoil is already tamed with the autoloading process, so it is possible to concentrate on marksmanship more than on the stinging in the palm from the abrupt kick of full spec .357 Magnum discharge. Like the original Desert Eagle, which was a relatively lightweight .357 Magnum pistol, Coonan makes the formidable ballistics useful in practice. Laser-accurate, it makes shooting 158-grain 1500 fps JHPs a pleasure rather than a pain in the hand. With good leather, like Sideguard IWB, even this 50-oz pistol can be carried concealed with comfort.

Smith & Wesson gives shooters “belt and suspenders” with the M&P9 Pro Series C.O.R.E. (smith-wesson.com) model: in addition to the long sight radius to go with the 5” barrel, it supports a slide-mounted red dot. The pistol thus configured handles extremely well, and crisp trigger plus optics add up to considerable practical long-distance accuracy. With hands braced on a fence, I can ring an 8” gong every time at 50 yards, and better than half the time at 100. The gun was designed mainly for competition use, and as such provides maximum control without snag-prone skeletonizing. We have empirical evidence that small 9-year-old girls like Alexis Welch can run it competently.

GLOCK (us.glock.com) makes several longslide entries: 6” in 9mm and 10mm, 5.3” in 9mm, .40 S&W and .45 ACP. The 9mm models have a very characteristic radiused cutaway in the top of the slide, 10mm and .45 ACP models produce enough recoil energy to keep solid slides. Thanks to 3.5-lb triggers usual for these pistols, they shoot accurately and kick less than the standard 4” service models. I wondered by the large 10mm model kicked more than some of its competition, discovered that despite appearances, G40 weighs only 28 oz, making it a very attractive backpacking option for bear country. Like the S&W, GLOCK makes most of its longslides available with slide-mounted red dot sights.

Springfield Armory’s 5.25” XDM (springfield-armory.com) follows the same pattern, marrying a light, crisp trigger with fiber optic sights and a red dot option. So long as barrels are available, most of the major manufacturers are starting to offer longslide variants of their standard handguns. The mechanical differences aren’t significant, only in the angle to which tilting barrel unlock. Desert Eagle is one of the new fixed-barrel longslides, offering .50 AE, .44 Magnum and .357 Magnum options with 6” barrel and rifle-like gas autoloading (magnumresearch.com). Although recoil is manageable, especially in the .44 Magnum version, the pistol favors large hands due to the front to back dimensions of the grip. Integral Picatinny rail on top of the barrel allows mounting substantial non-reciprocating optics for making the most of the potent ballistics, making this 70-oz beast a plausible rifle substitute for short-range hunting. The original design by Bernie White was slimform hunting .357 Magnum, with just enough substance to tame the recoil. IMI redesign gave it the iconic triangular front and enough mass to make high-volume rather than only occasional shooting possible.

Like swords compared to daggers, longslide pistols have style. To handloaders, the longer barrels also provide more options for optimizing custom cartridges to the task. For people whose eyesight doesn’t work well with red dot sights, the increased alignment precision helps put mass on target. Even the distant space-faring future, at least according to L. Neil Smith’s and David Weber’s science fiction, will have 10mm longslides in it. If you haven’t tried one yet, see what you’ve been missing.
This month’s cover model is Peyton, photographed in the Titanium Membership Lounge at the Scottsdale Gun Club (scottsdalegunclub.com). Our thanks to everyone at the Scottsdale Gun Club for the location and firearms. To see more photos of Peyton and other Blue Press cover models, follow us on Instagram@bluepress.

Swab-its
A Swab for Every Job!

No shit, there I was…in my office, cleaning my revolver when the boss walked in with that “whisky-tango-foxtrot” look on his face. “Hi,” I said (thinking fast), “I’m trying out these Bore-tips before I write the Blue Press copy for them. They work GREAT!” The Bore-tips Swabs REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

The HYSKORE Degreezier consists of a 12” x 6” x 4-1/2” polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degreezier (rather than returned to the bottle) with the cover in place so that it’s ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

Slip 2000 Products

725 Gun Cleaner Degreaser should truly be called Super Degreaser. This water-based cleaner will cut through the toughest grease, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! NOTE: To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.

16 Oz. P66-19237 $21.99

Note 2000’s Extreme Cleaning System contains 2 Oz. bottles of: Carbon Killer Bore Cleaner. 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

P66-11652 $25.99

Brian Enos’ Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a verystringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60º+), Lite is a thinner viscosity for lower temperatures (F30º+).

Slide-Glide Standard P66-15571 $7.99
Slide-Glide Lite P66-15572 7.99

Sweet’s Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It’s harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet’s.

P66-13128 $12.99

Micron UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

M-14 Bolt Roller Greaser

So THAT’s how you grease that little S.O.B. (Slick-Operating Bolt, that is.)

M-14/M1A Bolt Roller Greaser  P66-18531  $9.99

Dillon Bushing Wrench

The Dillon Bushing Wrench is a MUST-HAVE range-bag accessory. It’s a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

Dillon Bushing Wrench  P66-11049  $2.50

STUL GLOCK Slide Removal Tool

Engages the slide lock and provides a mechanical advantage making slide removal easier and faster. For those with large fingers, small fingers, tired fingers, anyone looking for a way to simplify the removal of your GLOCK® slide.

STUL GLOCK Slide Removal Tool  P66-19527  $11.99

Lyman X-Block Gunsmith Bench Block

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a “V” slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5” diameter provides a stable base with plenty of support.

Lyman X-Block Gunsmith Bench Block  P66-11390  $15.99

STUL Magazine Base Pad Tool/Scope Battery Cap Remover

Scope Windage Adjustment Tool

This is a MUST-HAVE range-bag accessory. It’s a squib rod (for removing stuck bullets), magazine base removal tool, and scope windage adjustment and battery cap removal tool.

Arredondo Multi-Function Squib Rod  P66-15250  $12.99

D•WIPE Towels were specially designed for immediate clean up of most contaminants without water. The soft 5.5”x 8” towels are saturated with a unique cleansing formula and aloe vera, and will remove heavy metals from skin and other surfaces.

D•WIPE Towels  P66-19916  $4.99

Original D•LEAD Hand Soap quickly cleans heavy metals as well as paint dust and firing range residue from the skin and fingernails. Removes lead, nickel, cadmium, arsenic, mercury, silver, zinc and most other heavy metals.

Original D•LEAD Hand Soap  P66-19915  $2.99
By Barrett Tillman

Two nights before a defensive pistol class I dined with my attorney friend, shooting partner and sometime financial advisor. (Cue Warren Zevon: “Lawyers, Guns and Money.”) He asked, “Why do we hold the gun way out at the end of our arm?”

I replied, “Because Jeff Cooper taught us that way 41 years ago.”

If that was a snarky reply, it was accurate. When you consider the evolution of the handgun, the technique evolved from a one-handed dueling stance of the 18th century, arm raised from the side to present a narrow target to the aggrieved party, or manfully showing a full front with the gun hand above the feet.

Centuries passed before a two-handed “combat stance” emerged, still with variations on full front or inclined (bladed) torso.

Which brings us to the present.

Jeff Johnsgaard is a globe-trotting firearms and tactics instructor who founded Natural Tactical Systems. A former British soldier and current Canadian police instructor, he keeps extremely busy with classes around the world. This year alone he’s been to Australia and Brazil, with multiple classes in the U.S.

Johnsgaard’s path to Natural Tactical was evolutionary. Paul Castle, a UK firearms trainer, developed the “Center Axis Relock” technique in the 1990s and died in 2011. Johnsgaard was introduced to the concept in 2004 and added to the curriculum over the next several years. Now it’s more accurately termed the 360 Close Quarter Defense (CQD), an all-aspect approach.

The basis of Close Quarter Defense arises from threat proximity. Studies from 1994 to 2016 noted that nearly half of police killed with firearms were shot at five feet or less. Two-thirds fell within 10 feet and over 80 percent within 20 feet. Therefore, Johnsgaard believes that a critical gap exists in police training for deadly close-quarter encounters.

CQD integrates the Weaver and isosceles techniques, allowing students to adapt their current preference. In CQD, when standing the body is bladed toward the threat, regardless of whether shooting with the dominant or support hand. (The opposite foot is forward either way.) Unlike conventional techniques where the hands meet during the draw above belt level, with CQD the grip is obtained around shoulder height. The support arm is held upright, fingers extended vertically, and the gun hand, palm down, is driven into the support hand below the fingers, close to the face.

Contrary to conventional techniques, with CQD the gun is held close to the body, either at chest or eye level, canted toward the support side. The support hand wraps around the back of the dominant hand, partly cradling the bottom of the shooting hand. Thus, CQD can blend sighted and unsighted aiming.

Unlike the push-pull isometric of Weaver, and many isosceles variations, the CQD support hand exerts little pressure. In fact, the supporting grip is more toward the bottom of the gun hand, but allows the dominant hand’s small finger to flex. As Johnsgaard explains, “Many shooters don’t realize that the pinky can exert enough pressure to send your rounds down and away – low and left for right handers. If you learn to grip the gun with the thumb and three fingers, you can avoid that problem. Happy days!”

Johnsgaard does not suggest replacing Weaver or isosceles with CQD. Rather, he states that either remains applicable at suitable distances, but it makes sense to focus more attention on the deadly area where most combats occur. He summarizes, “I always talk about the
360 Close Quarter Defense Training

A variation on CQD lowers the gun to a high chest level with the same grip, minus the cant, with the pistol’s slide almost touching the shirt. For a right hander presenting his left side to the threat, extremely fast responses and accuracy are possible. Johnsgaard starts students at five feet, urging them to fire two to four-round “bursts” to center of mass, then raising the aim point to eye level. The results were astonishing: many of us shot multi-round, one-hole groups almost at will simply by looking at the desired impact point.

Both variations lend themselves to switching hands, and Johnsgaard allowed time to experiment with that option. I noted that in most cases the results were similar to dominant-hand results with little correction.

Vehicle Defense

With 38,000 to 49,000 carjackings reported annually, CQD is optimum for vehicle defense. The FBI Uniform Crime Report does not distinguish carjacking from theft or robbery but other sources, including insurance claims, offer some perspective.

A weapon was reported in three-quarters of the incidents, though “only” 45 percent are firearms. About 11 percent involve knives, undoubtedly wielded as the victim approaches the vehicle. Brandishing a blade to a driver behind the wheel would seem non career enhancing.

Available reports are not specific enough to conclude how many carjackings involve forcing a driver out of the vehicle. Certainly many of the crimes occur outside the car, often because the owner is distracted with a key ring, purse, or package.

Approximately two-thirds of carjackings occur at night, with nearly half of those being “successful.” So reduced-light environments call for greater vigilance.

The mortality of carjacking is miniscule: about 15 per year. But if you’re one of those, the ratio jumps to 100 percent.

It’s difficult to impossible to find a range that permits shooting from a parked car in nearly 360 degrees, but CQD proves itself in dry runs.

Sitting behind the wheel in your vehicle, WITH A NONFIRING TRAINING GUN, try bringing your sights to bear with a left-handed, extended arm technique. Immediately you find that unless the driver’s window is down, your muzzle goes “CLUNK” against the glass. You can get one-handed extension across the passenger seat, but if there’s a rear-hemisphere threat you’re blocked by the passenger headrest, and the coverage to your own six o’clock is approximately zero.

Switch to CQD. Your driver-side window is available with the high-chest hold, and most of the interior becomes available with the close-in eye-level grip, either left or right handed.

Other vehicle advantages to CQD are obvious: immediate accessibility to a sidearm and ability to cover nearly 360 degrees from almost any seat inside. Long guns are fine if you can poke them out a window, but a “War Wagon” scenario is as rare as political honesty. That’s why 360 CQD is so promising.
By J.B. Wood

I’m convinced that the design team at Taurus never sleeps. In recent years, they have given us the weirdly ergonomic Curve, and the elegant little Spectrum. And now, the TX22. The display ads for it suggest that it would be equally at home for plinking or serious target work. Well, this is not just ad exaggeration.

It’s a full-sized pistol in .22 Long Rifle chambering, striker-fired, with a single-action trigger. So you’ll have an idea of its handling and carrying qualities, let’s do the numbers: Overall length is 7.06”, and height is 5.44”. Width is 1.25”, and barrel length 4.1”. Weight, empty is 17.3 oz.

The magazine capacity is 16 rounds, and you get two of them. If you live in a state with a repressive regime, 10-round mags are available. The magazines have good pull-down buttons on both sides for loading. Also included in the kit is a little push-down loader, in case some users might have difficulty with the last few rounds.

Construction materials are polymer for the grip-frame, high-grade aluminum for the slide, and steel for all the rest. As an example of the last mention, the breechblock and its components are a separate Insert in the slide. The grip has “furry” panels all the way round, and the shape is perfect, regardless of hand size.

The controls are also excellent. The bilateral safety levers go up for safe, down to fire. If the striker is cocked, the slide can be cycled with the safety in on-safe position, a good feature. The slide locks open after the last shot. The slide latch is small, but operates easily. For loading the chamber, though, you should pull the slide slightly rearward and let it go.

The magazine release, in the usual location, has minimal protrusion, and on both sides there is a guardrail below it. You’re not going to lose it from body or holster depression. For left-handers, it’s reversible. When the button is pressed, the magazine freely drops out. If, perish the thought, you’ve let it get grungy, there’s a grasping recess at the bottom of the grip.

In the firing system, there’s a “trigger-safety,” but you won’t notice it, because there’s no silly “flipper” in the wide and smooth trigger. Instead, as you put a finger on it, the entire trigger pivots very slightly, a tip movement of about 1/16”. After that, on my Lyman electronic scale, the pull averaged 4.5 lbs., with practically no overtravel.

The trigger action of the TX22 deserves further com-
ment. Usually, in striker-fired single-action pistols, the sear will either pivot or retreat vertically to disengage from the striker. Not this time. The arrangement is what I would call a “prop-type” sear, similar to the ones used in .22 target rifles. Thus, a crisp, clean release.

Also an advantage at the range were the excellent sights. Three white dots, square-picture, with a nice wide rear notch. And, the rear sight is fully adjustable by two screws on the right side. The TX22 ate both high velocity and target loads with no problems. At 15 yards from a casual rest one perfectly centered group was just under 2”.

Up at the front of the grip frame there’s a standard rail, in case you want to hang a light or a laser. There are good slide-retraction grooves at both the front and rear. For those who still use an outdated version of a two-hand hold (and pull all their groups off to the left), the front of the trigger guard is squared.

At the lower rear of the trigger guard, an upward recess lets the hand get a little closer to the bore axis. At the upper rear of the grip-frame, a generous in-curve sets the whole thing firmly in the hand. In the area of handling qualities, the TX22 is absolutely superb.

Takedown for cleaning is simple, so I’ll refer you to the good owner’s manual for that. One really nice thing is that the recoil spring and guide are a captive unit. I do have one minor complaint – the ends of the take-down latch are very small. I made a little non-marring tool from a plastic bottle-cap, and operated it easily.

To find something to criticize, I had to really reach. The Taurus TX22 is a marvelous piece of work, and you will be surprised at the suggested-retail price: $349.

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

**Bushnell TRS-25 Ultra Compact Red Dot Sight**
Bushnell’s Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell’s high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot.

**Scout Scope Mounts**
Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle: P66-25374, $79.99
Scout Scope Mount for SKS Rifle: P66-25373, $78.99

By Alan Korwin

What makes people pursue the American dream and go into business for themselves? Too often, they know not what they do. Nationally syndicated radio talk-show host Tom Gresham, speaking at the 2019 Gun Rights Policy Conference, revealed truths too often obscured with ego and a gloss of self-serving sanitized story telling.

For him, and probably many others who could not be as truthful in relaying their tales publicly, a combination of “arrogance, ignorance, naiveté and willingness” played a role, he says. “I didn’t know what I was getting myself into,” he admitted.

Driven by ambition and a desire to do what he knew was right, he pushed ahead against a tide of people who simply lacked the vision burning within him. He literally invented the field of gun-talk radio, with his now nationally syndicated show, “Gun Talk.” Speaking for myself, when I started Bloomfield Press, like Tom, I had no idea my first skinny book and early insecure steps would lead to the biggest gun-law publishing company in the country, which probably means in the world.

Like Tom’s experience, people constantly said, “You can’t do that, don’t do that, you’ll get in trouble, are you crazy?” People told him, “You’re going to go on radio and talk about guns? How can you talk about guns for an entire hour?” He’s now on 266 stations with a three-hour show and growing.

So how does a new family man, with a newborn, decide to go into the concealed-carry training business? And not just another trainer with a shingle looking for clients—a man with a mission. Tim Schmidt turned out to be that man, with a vision. His epiphany came with the birth of his first child. “Where was my family’s safety going to come from?” he wondered.

The state wouldn’t and couldn’t provide it, he realized, not some local constabulary, nor some bill or law book in some distant building. If his family was to remain guarded and secure, he was going to have to make sure this was the case. “From day one, I was like, hey, it’s on me. I’m responsible.” Whatever it would take, he would have to provide it. The turning point was when he and his wife realized they were not alone in this quest.

A proverb notes, “You teach best what you most need to know.” The truth in that has been proven through the test of time. Like so many successful entrepreneurial startups, Concealed Carry Magazine, one of the linchpins of the nascent organization, was created on Tim’s kitchen table with his own two hands. Tim wrote all the articles, produced the entire thing and figured out how to put it on press (no small feat, I can assure you).

He was the one-man show the same as so many other startup businesses. It was that singular focus and dedicated energy producing those initial editions that led inevitably to the preeminent magazine of its kind. For the longest while, it was the only magazine of its kind. Like Gresham’s experience—“You’re going to publish a magazine solely about concealed carry? What could you possibly say?” Right—they can’t fit everything there is to say in each edition.

His audience devours every word, from top writers in the field. In the interests of full disclosure, for many years I wrote one of their columns, “After The Shot,” loosely based on my book After You Shoot: Your gun’s hot. The perp’s not. Now what?, and still contribute features periodically.

Together with co-founder Tonnie Schmidt, USCCA has become a three-point standard for people taking personal responsibility seriously for their own safety. The combination of training, education and legal protection make up the cornerstones of preparedness and self-defense awareness as practiced by USCCA.

Time was when an organization like this one could not exist. The right to keep and bear arms was as much theoretical as practical, with more laws banning, regu-
lating and restricting the right of decent, law-abiding citizens from “living the armed lifestyle,” a phrase USCCA uses often. Now, with all 50 states standing behind at least some form of perfectly legal discreet carry, it’s hard to imagine life in America without an organization like this one.

For all the active gun-rights groups out there, this is one entirely dedicated to the art and science of legally staying armed, and discreetly going about your business on a routine basis. What the mass media and uninformed masses see as a simple and distasteful subject is actually a robust and complex one, with elements of fashion and wardrobe, lifestyles and family culture, legal and social rules and boundaries, rapidly changing technologies, with evolving political and societal norms. Changing patterns of criminality and international terrorism add to this mix to make it a subject worthy of a lifetime of study.

Self-Defense Legal Protection

Up-front access to criminal-defense attorneys when you need them most is the membership benefit most people think of when describing why they join USCCA. In any self-defense incident, gun-related or not, no matter how innocent you may feel you are, authorities are going to descend on you like angry bees, putting your life and liberty on the line. It is the worst time to go shopping for legal support. It is surely better to be tried by twelve than carried by six, but a six-shooter pretty much guarantees appearance of the twelve – the jury. The USCCA card in your pocket means you have ready and able professionals to back you up, help you face or avoid that jury, and with the mind-bending expenses covered up to the terms of your contract.

The educational and training resources are extremely beefy at every level of membership, too numerous to detail here, just check them out online if you’re interested. If you study them thoroughly you will reduce the chances of ever needing legal aid. Remember this: “It is always better to avoid a gunfight than to win one.” And of course, it is always better to win than lose one, which USCCA’s training tools will help you do.

Once you join, and even without joining, USCCA is a warehouse of top-flight information on self defense, tactics, gear, crime avoidance, and the leading thinking on going armed in modern society. Just a subscription to their dedicated Concealed Carry Magazine is an eye opener. They encourage phone calls with questions whether you’re a member or not. That’s how Tim rolls.

The most popular Platinum-tier legal protection coverage, the middle level, provides $1,000,000 protection for civil defense and damages, $150,000 for criminal defense, bail-bond funding & attorney retainer, 24/7/365 critical response team and either your choice of attorney or access to USCCA’s attorney network. The entry level Gold plan provides $500,000/$100,000 civil/criminal coverage with similar legal defense team privileges. The top-tier Elite plan ups the protection to $2,000,000/$250,000 and the defense team elements. Everyone can avail themselves of the educational resources. The monthly plan

USCCA hires many military veterans to help staff the firm. Here they pose together for a group photo in front of the company headquarters in West Bend, Wisconsin, in 2019.
fees are $22, $30 and $47, or save by joining annually at $247, $347 or $497.

Many of the informational resources that could cost a small fortune to obtain are available at no extra cost once you join. Where is your carry permit valid? USCCA provides a constantly updated map, an attorney locator app and permit notifications for when you cross state lines. Valid and prohibited places are tracked for you by the association so you don’t have to be a research facility; you have one at your beck and call. Weekly updates on gun news and gun laws are provided by president and founder Tim Schmidt to members. If you carry a firearm on a regular basis, the question isn’t why would you join USCCA, it’s why wouldn’t you?

**United States Concealed Carry Association**

**Founder and CEO Tim Schmidt**

**AK** – Tell us about your call center, what you’ve called the “beating heart” of the USCCA.

**TS** – We strive to be there to answer members of our community wherever they want to speak with us. You could be looking at nearly 20,000 phone calls, 10,000 social chats, and another 20,000 emails in any given month. Now, that’s not even including all the comments and discussions we have in our USCCA community forums and on social media. Our contact center is just constantly alive with some really amazing people who genuinely care. Even in some of the worst blizzards we’ve had up here in Wisconsin, they always find a way to be here and helping anyone who needs us.

**AK** – How many people work in your call center?

**TS** – Our contact center is really the beating heart of the USCCA, with none of it outsourced, it’s all here in the USA. Right now, we’re at over 110 employees whose sole focus is being there to take any phone call, email, chat and our online social-media community, interacting directly with our members. You can call us 24/7 for any reason. Honestly, any reason! You don’t even need to be a member with us. We’re just here to help.

We’ve helped people plan their family trips to make sure they were following local laws. We’ve helped them talk about what firearm they were thinking about buying. You name it. We just don’t, and won’t, measure our success by how many calls our employees can take or how fast they can take them. It’s about the quality of the conversations we can have with our community, that’s what counts.

Of course, we’re also here for any member when they need help after a self-defense incident. That’s what we do, what we’re known for. It’s all about serving our community. We really think about it as a family.
AK – You have attorneys nationwide. How did you assemble qualified attorneys in all 50 states? 

TS – This has been a huge mission for our Critical Response Team. They’ve spent years finding individual attorneys with proven track records who we can trust to really stand up for our members when they need it. Not just anyone can join our USCCA Attorney Network, so it’s not easy. There’s a rigorous vetting process because they play a critical role in serving and protecting our members. It’s been a monumental task, but right now we have more than 1,000 attorneys in our USCCA Attorney Network, and I believe we’re at just over 880 Critical Response Attorneys. They have agreed to answer a call 24/7/365 days a year. All USCCA members can access the network as part of their membership.

AK – How about some juicy examples of a case or three.

TS – You know, in a lot of ways, I really wish we could share more about the USCCA members we’ve helped, and there have been quite a few. When you get behind the scenes and see what can really happen after a self-defense incident, well, it’s pretty eye opening. The stories make it real, but they are also very personal. That’s why we decided right from the start that we must fiercely protect our members in every way we can. That extends to their privacy, and understandably many simply do not want their stories shared.

They’ve just gone through one of the most traumatic situations they will ever face. I’m proud that we’ve created something here that was ready to help them when they needed it, and I truly do understand and respect their wishes in that regard. Concealed Carry Magazine runs published stories of self-defense incidents, and our columns cover the subject in many ways, why not subscribe if you’re interested?

There are a few rare exceptions where we’ve shared some member stories, but that’s only after we’ve worked closely with the member to ensure they are comfortable and ready to share what happened. In the end, the decision to share it was made based on how it could help other people.

AK – How has your training program developed?

TS – We’ve achieved huge growth with the USCCA’s Training Program over the last few years. This has been a huge initiative of mine from the beginning. In fact, finding quality training I could count on was one of my first struggles after my own self-defense awakening years ago. That’s really how the USCCA Certified Instructor program got started. I went looking for training to help me grow as a protector for my family, and that’s when I met one of my closest friends and the man who got the entire program started, Steve Fischer.

Steve became my martial-arts instructor, and he literally changed my life. I’ll be honest; I had no idea what I was getting myself into when I started. But he just inspired me to stick with it. After years training with him, I earned my black belt. It was an amazing and inspiring experience. I came to understand he was the right man to build a world-class training program for the USCCA. And that is exactly what he did.

We’ve built our own firearms training programs that now reach approximately 100,000 students a year with thousands of USCCA Certified Instructors across the country. We’ve even launched a brand-new USCCA Training Platform that allows students from anywhere to connect with instructors wherever they live. There is just so much more we want to do with that program, and it just keeps growing. I honestly believe it’s one of the most important things we’ve accomplished on our mission to save lives.

AK – Tim, did you ever imagine USCCA would grow to the size and prominence it has achieved?

TS – When I see what the USCCA has become, both to our members and to our community as a whole, I have trouble even imagining how we did it. It’s been a journey; I can’t wait to see where it goes.

AK – If USCCA could become anything what would you want it to be?

TS – Our current goal is to educate and train 10,000,000 responsibly armed Americans, protect 1,000,000 USCCA members, stop 20,000 crimes and save 1,000 lives by 2022.
John Marshall's book *101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development*, is a compilation of the author's popular articles appearing in *The Blue Press* since 2007. *101 Classic Firearms* is sure to be a prized addition to the library of any serious firearms enthusiast. Published by Dillon Precision, and printed and bound in the USA, *101 Classic Firearms* is a high-quality full color 11.5" x 9" hardcover with 224 pages packed full of insights and history on some of the world's most important firearms. About the Author: John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, Gun Digest, Guns & Ammo's Handguns, and American Gunsmith. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endowment member of the National Rifle Association.

80 Blue Press
Wise Company’s “Grab & Go” Emergency Food Kits

Wise Company’s 18 Wise Favorites 72-Hour Kit includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

Wise Company’s 60 Serving Gourmet Freeze Dried Meat “Grab & Go” Food Kit includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. *Product within this Bucket is: Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

Wise Company’s 120 Serving Freeze Dried Vegetable and Sauce “Grab & Go” Food Kit includes 120 servings of vegetable and sauce assortment. *Product within this Bucket is: Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

Wise Company’s 60 Serving Gourmet Entrée Only “Grab & Go” Food Kit includes two servings per day (entrées only) for one adult for one month or four adults for one week. *Product within this Bucket is: Savory Stroganoff (8 servings), Chilli Macaroni (8 servings), Pasta Alfredo (8 servings), Creamy Pasta and Vegetables Rotini (8 servings), Cheesy Lasagna (4 servings), Teriyaki and Rice (8 servings), Creamy Ala King and Rice (8 servings), and Creamy Tomato Basil Soup (8 servings).

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore “first aid kit” you have stashed under the seat of your truck won’t do much good. That’s why we’re offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4” Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic’s Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4” Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic’s Tape and 1 Pair of Nitrile Gloves.

Econo-IFAK (at right in photo) $19.99
Micro Kit #2 (at left in photo) $39.99

From clearing brush to making kindling, the Camp 10 is the ideal outdoor and survival tool. Cut, slash, hack, split, scrape – just about any task you ask of it, the Camp 10 can handle. The full-tang Camp 10 is made of carbon tool steel for toughness and wear resistance. A basic black powdercoat protects the steel and makes maintenance easier. You’ll like the secure, contoured grip of the Camp 10, too. The handle has a built-in hand guard and is drilled in both front and rear so you can attach a lanyard either place – or both – for carrying versatility.

Blade length: 10”   Overall Length: 16”   Weight, with Sheath 1 lb. 8 oz.
P66-55012 $80.99

Military knives have a lot of history and a lot of fans. Yet they tend to be bulky for everyday carrying and use. Kershaw and custom knifemaker Les George offer a solution by taking inspiration from a U.S. World War II knife design and turning it into the XCOM folder.

Blade length: 3.6”   Closed: 4.4”   Open: 8”
P66-55009 $49.99

Designed by Dmitry Sinkevich, the Atmos features Sinkevich’s characteristic clean and practical design – but enhanced with extra detailing. In addition to the chamfered carbon-fiber, it also has a custom oversized pivot, a backspacer with wide lanyard attachment, and a reversible, deep-carry pocketclip.

Blade length: 3”   Closed: 4”   Open: 6.9”
P66-55010 $57.99

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25”   Closed: 3.9”   Open: 7.1”
P66-66699 $49.95

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, “practical, reliable, and sturdy.” Made of quality 8Cr13MoV stainless steel.

Blade length: 3”   Closed: 4”   Open: 7”
P66-55011 $46.99

The Kershaw Method opens quickly, easily, and manually with Kershaw’s KVT ball-bearing system and a built-in flipper. The handle is black – of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3”   Closed: 4.25”   Open: 7.25”
P66-66700 $39.99

Kershaw Volt II opens one-handed and with an authoritative “twack” thanks to Kershaw’s SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25”   Closed: 3.9”   Open: 7.1”
P66-66698 $55.95

The Original GLOCK® Field Knife

Field Knife, GLOCK, with scabbard, 1 ea.
P66-15483 $35.99
