New-Reloader XL 750 Package

You’ve made the decision that loading your own ammunition is right for you. You’re ready to pull the trigger, but uncertain of exactly what you need. Dillon has taken the work out of this. We have assembled a New-Reloader Package, featuring our new XL 750 reloading machine, with the most popular machine options, along with the accessories you’ll need to begin reloading immediately. This package is available in 9mm, .223/5.56mm, or BOTH.

9mm 750 Package:
XL 750 in 9mm
9mm Die Set
Bench Wrench
Small Pistol Casefeeder
XL 750/650 Strong Mount
Bullet Tray Kit
Roller Handle
9mm Case Gage
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
*The Complete Reloading Manual for the 9mm Luger*
Total: $1453.87

.223/5.56mm 750 Package:
XL 750 in .223/5.56mm
.223/5.56 Die Set
Bench Wrench
Small Rifle Casefeeder
XL 750/650 Strong Mount
Bullet Tray Kit
Roller Handle
.223/5.56 Case Gage
Dillon Case Lube
D-Terminator Digital Scale
Primer Flip Tray
4 Small Primer Pickup Tubes
Digital Calipers
*The Complete Reloading Manual for the .223 Rem.*
Total: $1488.86

Combo Package (.223 Conversion Pictured at Right) Includes the 9mm Package Above, Plus:
.223/5.56 Conversion Kit
.223/5.56 Die Set
XL 750 Quick Change
.223 Case Gage
Dillon Case Lube
Small Rifle Casefeed Plate
*The Complete Reloading Manual for the .223 Rem.*
Total w/9mm Pkg.: $1843.80

As a token of our appreciation for new reloaders who purchase one of these packages – while supplies last – we’re going to include one of these Tactical Tailor Operator Caps and our Dillon Precision morale patch. The Tactical Tailor cap is an incredible value: a high-quality product that’s made in…wait for it…the USA, by a company that prides itself on hiring veterans. The hat in the photo is MY hat, [Note: same hat, new patch.] and I’ve lost track of how many times it’s been washed – IN the washing machine! It STILL looks great! If you’re the kind of person who not only wears hats, but also WEARS THEM OUT, you’re going to love this hat.

- Targets and Target Stands: 59
- Firearms Maintenance: 64-69

Attention Dillon Customers: Because of changes to California’s Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are “known to the State of California to cause cancer, birth defects or other reproductive harm.” The new regulation states that a warning must be “provided in the catalog in a manner that clearly associates it with the item being purchased.” Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California “safe harbor” requirements.

We READ Our Mail!

From our Customer Service Department: Enclosed is my XL 650 press. It is an awesome press. However, because I am stupid, I have put a lot of aftermarket and non-factory parts on it. Hopefully, I am not the first dumb*** that thought he could make your press better reading some article on the Internet and then spending money on it. Lesson learned. Please feel free to remove, junk and replace any items that are hindering the operation of my 650 in any way. 95 percent of what I reload is .45 ACP. I promise that if you can solve my timing issues and the other stuff I have screwed up on it and get it running like the fine piece of equipment it is, you won’t see it again because the owner fouled it up. Please contact me and I will give you payment to cover whatever costs are needed for the refurb and additional parts not covered.

Jeff Dunn – Springville, UT

I just received the January Blue Press. I am always amazed at the amount of products and articles you put in the magazine. I bought my CV 500 case polisher and my RL 550B in 1993 or 4. Both work as well today as when they were new. The only problems I had were my fault, I broke a tool head pin and I lost the spent primer catcher cup. You replaced both no charge knowing it was my fault. No other company stands behind its products like you do.

Jonathan Depper – jdl30255@yahoo.com

I bought my Dillon RL 450 in 1983. Many of my friends commented on how I could have gotten a cheaper press. I already had a cheaper press and decided to go bigger and better, so the cost was not an issue; quality was, and the No B.S. Lifetime Warranty sounded very attractive to me. I have since upgraded a few times to the 450B and then to the 550B conversion. I have gotten all the bells and whistles other than the casefeeder. I love my press and Dillon service. The other day, I broke a part on the press, so I called to order a replacement part. The CSR talked with me and told me that he would ship the part to me…no charge. Imagine buying something almost 37 years ago and it still being under warranty. I am a customer for life and highly recommend Dillon to ALL my friends and have even posted the great customer service on my Facebook Timeline. Thank you for being such a great company.

INTRODUCING NEW IMR ENDURON 8133.
It's the slow-burning, copper-crushing magnum powder shooters have been waiting for. Engineered for Extreme Temperature Stability, Ideal Load Density and elevated confidence and success that comes from reloading with legendary IMR powders.
Dillon’s First DEDICATED Case-Processing Machine!

- Eccentric Roller Bearing Drive System
- Smoother Operation, Less Effort
- Higher Throughput, Lower Cost Per Case
- Heavier Frame for Greater Rigidity
- Seven Threaded Stations for More Flexibility
- Upgraded Primer Pocket Swager
- Primer Pocket Swage Available in Two Stations
- User-Replaceable Swage Rod Tip
- Reinforced Toolhead Bolt & Washer
- Improved Shellplate Indexing System
- Processing Speed up to 2000 Cases Per Hour

Designed to complement our RL 1100 and Super 1050, the CP 2000 offers higher speed, greater versatility and added case processing capability...all at a much lower cost than dedicating a RELOADING machine to prep brass!

If you’re loading mass quantities of ammo, the CP 2000 will make your task MUCH easier.

**Dillon’s** HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

**Bomber Glasses**

Bomber Glasses’ lenses and frames are made from High-Index Polycarbonate that is durable, flexible and impact resistant. All colors provide UV protection.

Christian Sailer

Doing What No One Has Done Before...
By Robin Taylor, taylorfreelance.com

Horseracing has the Triple Crown. Tennis has the Wimbledon/US Open/French Open trio. Practical shooting has a series of matches, but instead of three victories, it demands NINE. The task is so difficult, so logistically challenging, that in 30 years no one has ever done it – until now. Christian Sailer won the USPSA Open Nationals this year, then swept ALL EIGHT Open titles at the USPSA Area matches across the country. The “Big Sweep” (for lack of a better name) demands extensive travel, more than 3,000 rounds fired in competition, at regional venues across the United States – each defended by nationally ranked heroes with a home-court advantage. The last jewel in the crown is among the hardest one to get. The Area 2 “Desert Classic” at Rio Salado Sportman’s Club in Mesa, Arizona is the home club and home culture of the great Rob Leatham (and many other Grand Masters). Located in what often gets called the “Mecca of Practical Shooting,” the Area 2 happens in Dillon Precision’s backyard. We caught up with Christian during his final conquest on November 10, 2019. He was fighting off a fever, and doggedly pursuing that most-precious final jewel.

With that sort of introduction, you’d expect us to show you pictures of a hard-nosed 30-something professional athlete – someone with major industry backing. Instead, let’s look closer at this 19-year-old sophomore business student (at the University of Washington). At his age, he just isn’t “supposed” to win! Christian Sailer lives in Seattle, a block off the University of Washington campus at the Alpha Delta Phi fraternity. His folks live “across the lake” in nearby Bellevue, helping him to frequent some of the top practical shooting clubs in the Northwest. He drives home to Bellevue to practice during the week, honing his skills between classwork any way he can.

Gregarious and chatty, Christian Sailer (pronounced “SY-LER”) blends in among his fraternity brothers. His sunny expression and tousled blond hair brings to mind California surfing culture. He’s relaxed, open, but with a “switch” that he can throw, bringing out an entirely different side of himself.

Today they’re all SCSA/USPSA Grand Masters, Christian focuses on USPSA, Ethan on Steel Challenge and USPSA, and Jake on his career with the U.S. Border Patrol.

“People say I’m super focused, but I like to have fun at matches too,” says Christian. "Ask anyone that's squadded with me and they will tell you I like to keep it fun. I joke around right up until I have to perform, then pick it back up after my scores are in.”

Christian’s first national exposure came shooting with the Renton Steel Dragons, a Scholastic Action Shooting Program team located Southeast of Seattle.

“[Christian] was FOCUSED,” says coach Cel Alvarez. “He’s pretty amazing. He worked hard at what he was doing, and he just wanted to perform.”

Christian had some practical shooting background prior to joining the team thanks to the Down Zero IDPA group at West Coast Armory in Bellevue. Sailer had become somewhat used to standing out as a junior locally, but he was a big fish in a small pond. The deep competitive field within SASP would force him to strive.

“I told him (SASP) is where you’re measured as a junior. At USPSA/IDPA they have a junior award, but the sport is not really focused on juniors,” says Alvarez.

Indeed, where a USPSA Area event might draw 350 adults and a dozen juniors, the SASP nationals is the largest practical shooting event in the country – more than 1,000 entries – all of whom are juniors. For all

Additional powder measures stay on the toolhead. Never change powder measurements again!

**RL 550 Powder Measure**
P67-20782, $89.99 ea.
Magnum Rifle Powder Bar
P67-21353, $34.99 each
X-Small Powder Bar
P67-20780, $34.99 each

**DELUXE QUICK CHANGE ASSEMBLY**
With a quick change assembly and a caliber conversion kit (SOLD SEPARATELY), you can convert in less than a minute. Complete with:
- Toolhead
- Powder Measure
- Powder Die
- Toolhead Stand

Price without Dies, P67-22058, $121.99

**POWDER DIES**
Extra powder dies allow you to move your powder measure from toolhead to toolhead without changing the “belling” adjustment.

P67-20064, $14.99 each
X-Small Powder Die,
P67-21253, $22.99 each

**TOOLHEADS**
Don’t adjust dies when switching calibers. These precision tool holders hold your dies in perfect alignment, making caliber changes quick and easy.

P67-13909, $27.99 each; Three or more, $25.99 ea.

**EQUIPMENT DUST COVERS**
This packcloth nylon machine cover comes equipped with a D-ring, allowing the heavy duty zipper to be locked.

RL 550 Cover, P67-13795, $24.99
Master lock, P67-13083, $3.99
Quick-Change Cover (for use with powder measure) P67-11143, $14.99

**1" BENCH WRENCH**
P67-10842, $9.99 each
Two or more, $8.99 ea.

**MACHINE MAINTENANCE KIT**
Everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit P67-22211, $31.99

**550 SPARE PARTS KIT**
1 Seating Punch, Small
1 #10 Tinnerman Insert
1 Primer Cup, Large
1 Primer Cup, Small
1 Bellcrank Cube
1 3/8" Index Ball
1 550 Brass Tip Set Screw
1 550 Ejector Wire
1 Cartridge Retaining Spring
1 550 Slide Return Spring
4 Locator Pins (#1, #2, #3, #4)
1 Seating Punch, Large
1 550 Index Ball Spring
2 Pickup Tube, Small, Yellow Tips
2 Magazine Orifices, Large
1 Toolhead Pin
2 Pickup Tube, Large, Green Tips
2 Magazine Orifices, Small
1 550 Primer Cup Spring
2 Retaining Clips
2 Dispensing Tip, Large
2 Dispensing Tip, Small
1 Failsafe Bushing Rev. B

P67-20048, $23.99

**UNIVERSAL MOUNTING HARDWARE KIT**
Includes: 4-Grade 5 Hex Bolts, 4-Lock Nuts, 4 Flat Washers, 4-Fender Washers, 2-Wood Screws.

P67-14355, $7.99

Our Toolholders are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

- **Strong Mount** increases your machine’s “footprint” to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

Our Bullet Tray is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal “B”, RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

- **Bullet Tray Kit**
  - P67-22214: $47.99
  - P67-22215: 47.99

The Low Powder Sensor provides an audible and visual reminder when it’s time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

- **Low Powder Sensor**
  - P67-16306: $44.99

Our Toolhead Stands for the RL 550 and XL 750/650 make it easy to tell at a glance which caliber you’re set up to load.

Our Primer Flip Tray is a heavy, high-quality tray large enough for the Federal primer package.

P67-13606, $23.99 ea.

Primer Pick-Up Tubes are used to transfer primers from flip tray to priming system. Having extras pre-loaded with primers makes it easy to load a pre-determined amount of ammo without having to stop to pick up primers.

1 Large P67-22029 $8.99

4 Large P67-20050 29.99
4 Small P67-20049 29.99

Dillon's “Belted Magnum” Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

P67-97126 $169.99

The Powdercheck System (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

P67-21044, $71.99 each
Three or more, $65.99 ea.

An Aluminum Roller Handle gives your reloader an entirely new “feel,” reduces operator fatigue, and makes primer seating easier.

P67-17950 $49.99

Dillon’s 1” Bench Wrench fits our 1” Die Lock Rings which give you more space on the toolhead.

P67-10842, $9.99 each
Two or more, $8.99 ea.

Our Machine Maintenance Kits come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

The RF 100 Automatic Primer Filler† eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run! In about two minutes the primers are inside the protective metal housing. That's about 30 rounds you can load while the RF 100 is doing your work for you! The RF 100 is available for either large or small primers, and conversion kits are available at one low price of $59.99 each.

Blue Press 17
**Case Preparation Equipment**

**CV-2001 – The Industry Standard**

Dillon’s CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no “hobby” machine! The bowl and base are constructed of 7/32” thick injection molded high-strength polypropylene which is impact and abrasion resistant.

**Case/Media Separators**

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10” x 14”, and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18” x 22”. The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

**Limited Work Space?**

Dillon’s introducing the new CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This new case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

**Rapid Polish 290**

is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run.

Rapid Polish 290 has a great residual value and stays in your tumbling media. You’ll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won’t weaken brass cases!

**Dillon’s D.C.L. non-aerosol case lube is easy to use.** Simply lay your cases out, spray lightly with one or two passes and you’ve done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you’re ready to load. Try a bottle. You’ll never use a grease pad again.

**Crushed walnut hull polishing media**

quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.

15-pound bag P67-13287 $23.99

**Ground corn cob polishing media**

is the best there is for that final polish. Leaves your brass looking better than factory new!

10-pound bag P67-13496 $15.99

**Don’t Forget Polishing Media!**

Rapid Trim 1500 Case Trimmer

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. (Vacuum cleaner and hose not included.) The RT 1500 is equipped with a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer P67-62164 is $349.99. (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, P67-13141, are $20.99 each. Upper lock rings, P67-13559, are $6.99 each.

**MILITARY BRASS?**

Eliminate the “Grunt Work” with Dillon’s Super Swage 600

Until now, reusing military brass, with its cramped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won’t be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What’s more, it’s inexpensive. The Super Swage 600 comes with large and small swage rods.

Blue Press 21
1. First gun you ever fired?
   Cheyenne: A Henry lever action .22!
   Megan: A .357 Magnum.

2. What’s your favorite gun?
   Cheyenne: I don’t have a favorite. All of my guns are my favorites!
   Megan: Benelli M2 and CZ Tactical Sport Orange.

3. Do you have any rituals before you shoot?
   Cheyenne: I don’t! Besides getting a good night’s sleep, everything else is different every time!
   Megan: I clear my head of everything else going on around me, focusing on my course/my gun/myself.

4. How many rounds a year do you shoot on average?
   Cheyenne: That’s tough. It’s hard to gauge because of all the disciplines I shoot in. I will say that I definitely don’t shoot as much as I wish I could!
   Megan: Roughly 25k.

5. Most useless thing you own?
   Cheyenne: Probably my pet Betta fish, Tay. He just makes me happy!
   Megan: First car that I got in high school which I never use.

6. What else do you do for fun?
   Cheyenne: I love cooking, and baking!
   Megan: I ride horses, dirt bike, snowboard, wakeboard, camp, really anything outdoors.

7. Favorite place on Earth?
   Cheyenne: I really love Arkansas and Alabama. And Florida! I’m not very good at picking favorites!
   Megan: Costa Rica.

8. Most annoying thing about you?
   Cheyenne: Some people say I talk too much.
   Megan: I’m a very routine person. I like to do things the same way over and over again. Consistency is what I look for in my life and I feel it’s a big reason for my success. That said, sometimes it can be annoying to be so structured. I will let loose when I’m retired, haha.

9. Craziest thing you’ve ever done?
   Cheyenne: I don’t generally go out of
my comfort zone. Most people think I am extremely boring – lol!
Megan: Moved to Australia right after graduating high school.

10. Dream job?
Cheyenne: I want to be a chief marketing officer when I grow up.
Megan: I’m living my dream job as a competitive shooter and being an instructor at Taran Tactical Innovations.

11. Who has inspired you the most?
Cheyenne: Julie Golob. She has been so kind and supportive to me, and I couldn’t have done this without her!.
Megan: My Dad, he has always had a love for firearms and got me into shooting when I was very young.

12. Who would play you in a movie?
Cheyenne: I would LOVE to be the Black Widow (Scarlett Johansson).
Megan: Margot Robbie, because I wish I looked like her and I believe she can play any type of personality on screen or Bella Thorn.

13. If you could have a conversation with anyone from the past, who would it be?
Cheyenne: Maybe one of the founding fathers. I would love to hear their personal opinions on many things!
Megan: Ron Avery, because when I first started shooting I had a private lesson with him at Tarans and at that time I was just getting started. That same week I had classes with two other instructors and I was trying to take in as much information as I could, but being so new I wasn’t able to fully wrap my head around everything he taught me. I could tell he had so much more life to live and wisdom to share.

14. Who’s in your regular crew?
Cheyenne: I don’t really have many friends, and all of the friends I have, live very far from me. I only get to see them maybe once a year. I know, depressing!
Megan: Taran Butler and Jade Struck.

15. Words to live by?
Cheyenne: Keep pushing. You can do this!
Megan: This too shall pass.
5JR-DL $75
A full-length belt slide that offers all-day comfort and superior concealment for an outside-the-pants belt holster.

5.11 Tactical®

The Double Duty TDU® belt is metal-detector friendly and offers two color options. Both the Trainer and Operator belts feature 6,000-pound-test buckles and heavy, reinforced stitching, therefore can be quickly converted into secure tie downs, secondary carry straps or emergency harnesses. All 5.11 tactical belts are made of strong nylon webbing and provide a stable support for carrying firearms and accessories. According to 5.11 Tactical, belt sizes run small, so they recommend you order one size up for the best fit.

5.11® Double Duty TDU Reversible 1.5” Belt
Waist Size 1.5” TDU® Small 28-30” Medium 32-34” Large 36-38” X-Large 40-42” 2X-Large 44-46” 3X-Large 48-50” 4X-Large 52-54”

5.11® 1.5” Trainer Belt & 1.75” Operator Belt

BLADE-TECH

The Blade-Tech Ultimate Carry Belt by Nexbelt is specifically designed for those who carry a firearm daily for personal defense. The Precisefit ratchet system allows you to quickly tighten or loosen the belt in 1/4” increments up to 6” for the perfect fit – no matter how you carry. Rest assured, this will be the most comfortable and fastest adjusting belt you will ever own. The Ultimate Carry Belt has a water-resistant backing that helps prevent moisture from penetrating the outer surface and allows for extra strength and durability. One size – adjusts to fit all.

ODIN Ready Bag

ODIN Works introduces the new ODIN Ready Bag™ (ORB) featuring multiple pockets and pouches for mags, small gear, a clip for your keys, a water bladder pouch, and soft dividers inside to take down and pack your AR-15 while keeping parts safe and separated. For those builds with longer barrels, there is an extendable pouch at the top to ensure that any rifle will fit and be carried with ease. Whether you’re going to the range, out on a hunting trip, or just hiking through the woods, packing your gear has never been easier!

- Quick-release compression straps
- Four D-ring attachment points
- Key clip
- Loop and hook fasteners
- MOLLE fasteners
- Reinforced handles
- Two water-bottle pockets
- Ambidextrous shoulder strap
- Locking buckle
- Dividing panels that separate an AR upper and lower
- Water-bladder pouch and hole for hose
- Pocket extender: Can remain in bag as a pocket or extend up through the zipper to fit longer barrels
- Available in black or coyote brown
- Dimensions: 28” x 7” x 6”

ORB Black P43-66696 $99.00
ORB Brown P43-66697 $99.00

**“Plan B” Very-Bad-Day Planner Holster**

Dillon’s “Plan B” Very-Bad-Day Planner Holster^ holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won’t draw undue attention. It looks like a typical day planner, but inside there’s a holster that’s adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

**Comtech’s STINGER**

The STINGER: Comtech’s own personal defense device. Designed to act as a “force multiplier,” it’s like having the punching power of a karate master – instantly! There’s really nothing like it for easy carry and access. It passes un-noticed by 90 percent of people who see it. Yup, just another “keychain device” to most, and yet it works so well when needed. You deserve a Stinger!

**Key chains just got even handier with the new Kershaw PT-2 keychain tool. It offers eight handy functions in a very compact space. The PT-2 (Pry Tool-2) comes in at less than an ounce as well and offers a bottle opener and cap lifter, a pry bar, two screwdriver tips, a wire scraper, and three sizes of hex drives.**

**Overall Length 3.25”**  **Weight 0.8 oz.**

**Sizing/Depriming Die (Pistol)**

Our sizing/depriming dies feature a “floating decap assembly” with a snap spring that throws the spent primer off the pin and eliminates the primer “draw back” that often occurs when decapping military brass. The primary feature of Dillon’s size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that’s still only a part of the story.

**Bullet Seating Die (Pistol)**

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We’ve incorporated a “flip-flop” seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon’s double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

**Crimp Die (Pistol)**

We’ve made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you’ll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

**Dillon Cartridge Rifle Dies (Three-Die Sets)**

- .380 ACP P67-14401 75.99
- 9mm Parabellum P67-14406 75.99
- .40 S&W P67-14407 75.99
- .357 SIG P67-22083 156.99
- .38 Super P67-14399 75.99
- .38 Special/.357 Magnum P67-14400 75.99
- 10mm/.40 S&W P67-14398 73.99
- .41 Magnum P67-14402 75.99
- .44 Special/.44 Magnum P67-14403 75.99
- .45 ACP/.45 GAP P67-14404 75.99
- .45 Colt P67-14405 75.99

**Spare Decapping Pins**

- Package of 10 P67-21528 $7.99

**Sizing/Depriming Die (Rifle)**

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for “squeak-free,” effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

**Bullet Seating Die (Rifle)**

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

**Taper Crimp Die (Rifle)**

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today’s marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

**Dillon Rifle Dies (Three-Die Sets)**

- .223 Remington P67-10839 $83.99
- .308 Winchester P67-15574 83.99
- .30-06 Springfield P67-10840 83.99

**Dillon Cartridge Rifle Dies (Three-Die Sets)**

- .223 Remington P67-10096 $179.99
- .30-06 Springfield P67-62128 114.99
- .308 Winchester P67-62114 189.99
- .30-06 Springfield P67-62151 294.99

**Spare Decapping Pins**

- .223 Remington P67-13278 $4.99
- .30-06 Springfield P67-13278 4.99
- .30-06 Springfield P67-13069 4.99
- For Universal Decapping Die P67-15016 4.99

**Spare Dillon Die Lock Rings** (Fit all 7/8" x 14 thread dies)

- Dillon Die Lock Ring P67-14067 $1.99
- 5-Pack Die Lock Rings P67-10669 5.99

**Note:** Individual Dillon size, seat and crimp dies are available. Call or visit our website to order.
Dillon’s Range Bag is designed to hold the Border Shift Ammo Bag (sold separately below), as well as a Dillon Large Utility Box (see Page 45). The Main Compartment is 12.5” long x 7” wide x 10” high, the End Pockets are 8.5” tall x 6.5” wide x 2” deep and the Front Pocket is 9” tall x 6” wide x 2” deep.

Range Bag, Black
P67-19366 $89.99
Pistol Pouch, Black
P67-17027 10.99

**“Border Shift” Ammo Bag**

Dillon’s two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You’ll never again mix fired brass with loaded rounds!

Border Shift Ammo Bag, Black
P67-13755 $25.99
I.D. Card Holder (Inset, Left)
P67-14575 2.99

**Shooting Mat**

Dillon’s shooting mat is made of tough ballistic-weave nylon fabric, with a large skid-resistant elbow pad area. The “ground” side is moisture resistant and wipes clean easily. The padding is dense, closed-cell foam to provide both shooter comfort and a stable shooting base. The mat is equipped with a shoulder strap, a carry handle and two straps with snap-release buckles.

*Dimensions: 66” x 27.75”*

P67-18146 $69.99

**Dillon Precision Logo PVC Key Ring**

6” x 1” Dillon Logo Sticker
P67-96668 $2.50

6” x 2.5” Dillon Logo Sticker
P67-96666 4.00

By Mike Detty

Like most gun guys I was mildly aware of the SCCY pistol family. I’m ashamed to admit their low prices put me off. After all, any carry gun that retails for less than $300 has to be junk, right? There’s just no way any company can build a quality CCW gun and retail it for 3 Benjamins. After spending the last few weeks with a SCCY CPX4 I have to admit I was wrong. In spite of the economical prices, SCCY produces a fairly accurate and completely reliable self-defense gun at a price just about anyone can afford.

I probably wouldn’t have given the SCCY guns a second look except my good friend and fellow 3-gun competitor, Scott McGregor, went to work for the company. After some shameless goading I relented and McGregor sent me one of SCCY’s brand new CPX4 .380 double-action-only, semiauto pistols.

SCCY has a suggested retail of $305 but you’ll find real world pricing for much less. One important note is the gun comes with three, high quality, 10-round magazines. One of the magazines has an extended base pad so shooters can get a full grip on the gun while the other two magazines have flush fit base pads for more discreet carry.

The only real difference between the CPX3 and CPX4 is the latter possesses an ambi thumb safety located at the rear of the pistol’s frame. The front pivoting safety is pushed down to fire and up to engage the safety, which pushes the trigger bar out of engagement.

SCCY uses a Zytel polymer for the gun’s grip frame and the sub chassis is machined from aircraft-grade 7075 T6 aluminum and pinned into the polymer. All of the fire control parts are contained within the sub frame. SCCY machines the gun’s slide from 416 stainless steel. Our test sample has been blackened with a nitride process though the same gun is available with a natural stainless-steel finish.

The left side of the slide bears the legend, Roebuck
Quad Lock and it was a term I was unfamiliar with so I went to SCCY’s website (sccy.com) to learn about it. Joe Roebuck is SCCY’s founder and he originated the Quad Lock system. SCCY pistols fire from a locked breech and the barrel has a lug, which the disassembly pin goes through, to pull the rear end of the barrel down allowing the slide to cycle. When in battery, the barrel’s breech block locks solidly into the slide with an upward pressure which, correspondingly, forces the muzzle of the barrel downward in such a way that the barrel cannot be moved side to side or up and down. With four points of contact, two up front and two at the rear of the barrel, the gun returns to battery in a very consistent and precise manner.

SCCY engineers designed the gun to feed rounds from the magazine at a very shallow angle to minimize feeding problems. The barrel is machined from barstock and possesses an integral feedramp. Rifled with seven grooves and a 1:16" right hand twist, the CPX4’s barrel measures just under 3 inches. SCCY machines the slide’s ejection port large enough so loaded rounds can easily be ejected.

One of the appealing features of the CPX4 is the slide can easily be retracted to chamber a round. The pistol uses a single, flat-wire recoil spring and it is captured on a polymer recoil spring guide, which makes disassembly and assembly a snap. For folks with diminished hand strength the CPX4 is worthy of a look!

The gun also has excellent ergonomics and shoots very soft. Its backstrap is wide and this helps distribute the recoil over a wider area. While the .380 ACP is not known as a particularly brutal gun to shoot, subcompact, blowback pistols with tiny backstraps can be nasty to fire. Happily, that is not the case with the SCCY gun.

I did all of my accuracy testing at 15-yards and fired five shots to each group. The group sizes recorded in the accuracy chart reflect the best group for each ammunition. I shot all groups from a seated rest using a DOA Tactical shooting bench and rested the gun’s dust cover on a Millet BenchMaster for support. The gun has a long trigger pull and this made keeping the sights aligned until the shot broke a chore. The CPX4 uses an internal hammer and is not striker fired. My test sample required about 9 pounds of pressure to break the shot.

DoubleTap’s 80-grain Barnes TAC-XP hollowpoints produced the best 5-shot group measuring just over an inch. It also produced the most energy, generating 196-foot pounds of energy. Despite this, the load was actually pleasant to shoot and the slide velocity seemed just right. While the other loads all differed in bullet nose profiles and overall lengths, the little gun never stuttered. In fact, I’ve now fired over 250 rounds through the CPX4 and its performance remains flawless.

I set up a couple MGM BC-C Zone targets and practiced doubletaps and transitioning between targets. Though the trigger pull is extraordinarily long I found it possible to stage the hammer about 3/4 of the way when transitioning between targets and this helped considerably. Once the sights aligned, I’d add the extra pressure to break the shot. Regarding the long double-action-only trigger, it is my opinion that the longer trigger pull adds an extra degree of safety as it requires a very deliberate pull. I think most of the people who will choose the CPX4 will be new shooters and the longer pull will be prefect for their skill level. The gun’s soft recoil makes the gun extremely manageable and pleasant to shoot and that makes for a very enjoyable practice session.

My time with the SCCY CPX4 made a believer out of me. They have managed to build an accurate and reliable CCW gun, from first-rate materials, and retail the gun for just over $300! As I mentioned earlier the gun comes with three 10-round magazines and I think that’s a heck of a deal! SCCY also ships the gun with an innovative trigger lock that comes with two barrel-keys. Just as I was finishing this article, I received a press release from SCCY announcing their new CPX Red Dot series, which incorporates a Crimson Trace CTS-1500 with a 3.5 MOA red dot and back up iron sights. Believe it or not these guns run only about $45 more than their iron-sight versions. Take a minute to explore all of SCCY’s CCW options at sccy.com.

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

Dillon’s Basic Loader
$299.99
P67-15399

Dillon’s RL 550 has long worn the title of “The World’s Most Versatile Progressive Reloader,” and stripping it down to its most basic form – Dillon’s BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer’s standard 7/8” x 14 reloading dies. It’s priced comparably with other manufacturers’ turret presses; yet unlike them, it’s fully upgradeable to Dillon’s Progressive RL 550 loader! The interchangeable toolhead (Page 15) makes it quick, easy and inexpensive to change calibers. The additional toolheads are $27.99 each, or $25.99 each if you buy three or more – if you load for several rifles it’s a no-brainer! Once you get your dies adjusted, you’ll never have to re-set them. A powder measure adapter is available if you want to use a manual measure that you already own. Or, if you want to weigh every powder charge you load, it’s easy – you can use a powder trickler with the powder die/funnel assembly that comes with the BL 550.

AUTO PRIME SYSTEM^ P67-16627 $94.99
PRIMER SYSTEM EARLY WARNING^ P67-20302 $29.99

AUTO POWDER SYSTEM^ P67-20251 $99.99

OPTIONAL MAGNUM RIFLE POWDER BAR P67-21353 $34.99

AUTO EJECT SYSTEM^ P67-22120 $35.99

BL 550 POWDER DIE^ Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.
Plastic Funnel: P67-16617 7.99

POWDER MEASURE ADAPTER
If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer’s powder measure with 7/8” x 14 threads on your RL 450, AT 500, BL 550 or RL 550. (Requires the use of an RL 450 powder die – see below.)

Blue Press 41
No, that's not a misstatement or a contradiction in terms. Semiauto revolvers are indeed a fact, and have existed since the turn of the 20th Century! In 1895, British Lieutenant Colonel George Vincent Fosbery, holder of the Victoria Cross (Britain’s highest award for valor), conceived a workable mechanism for such a handgun.

Although his initial prototype was based on the Colt Single Action Army, he decided to work with the Webley & Scott Revolver and Arms Company, Ltd. to develop it further based on the Webley & Scott top-break revolver system. The W&S revolvers provided the quick extraction and easy loading ability that Fosbery wanted.

Fosbery’s concept was, in essence, splitting a revolver into two assemblies, the upper one being able to slide back on the lower frame through recoil. In doing so, the upper action-cylinder-barrel assembly, with a pivoting lever, cocks the hammer. A stud on the lower assembly guides external zigzag grooves in the cylinder to rotate it half the distance to line up another chamber with the barrel. A spring returns the upper half to battery. In the process, the cylinder is then cammed the rest of the way to align a chamber into firing position. A short single-action pull on the trigger fires the round, and the process is repeated automatically until the gun is empty.

To eject the fired cases, pressing the lever to the left side of the hammer releases the barrel and cylinder assembly for pivoting. The barrel can then be manually hinged down smartly. The cylinder rises up around the pivot point with that motion, causing its internal ejector to be cammed out a certain distance. All the cases are ejected automatically when that is done, just as in the standard Webleys. The ejector then snaps back down into the cylinder. The chambers are all presented for reloading, and then the action is closed. To cock the hammer, it’s done manually or by pulling the entire upper assembly back and releasing it. Reloaded, the handgun can then be fired again.

Simply cocking the hammer or pulling the trigger does NOT rotate the cylinder, as in conventional revolvers. Only firing the piece or pulling the entire upper assembly back and letting it go accomplishes that. Normal make-ready procedure was to pull the upper assembly back and release it, ensuring that the gun was both cocked and the cylinder properly aligned. Standard practice when battle was imminent was to carry the gun fully cocked, with the manual safety lever on the left side of the handgun pushed upward. This cams the upper assembly a bit backwards, disconnecting the hammer from the sear and locking both the upper assembly and trigger in place. Pushing the safety down then instantly readies the gun for firing. The hammer must be fully cocked in order to engage the safety. The projecting part on the top strap is a spring-loaded stud that locks the cylinder in its proper place when the action is opened for reloading. It disengages when the barrel and cylinder assembly is returned to battery. When the action is open, the projecting part of the stud can be pressed to allow removal of the cylinder.

This new revolver was introduced at the Bisley pistol matches in July of 1900, and was subsequently offered for both military and civilian sales when full production began in 1901. Two standard calibers were offered. The most common was the .455 Webley, and the cylinders of these guns accommodated six rounds. British officers had to buy their own sidearms, and since the .455 was the required standard revolver round, it was natural enough that more of these were made. The second caliber was the .38 ACP round, then newly developed for early Colt semiautomatic pistols. With these, the cylinder would hold eight rounds, and a “full moon” clip was developed for quick reloading. The rear face of the cylinder was cut for these early clips to be utilized. It’s estimated that only about 200 .38 revolvers were ever sold. Officially, two types of .455 guns were made – initially, the 1901 model, and subsequently, the model of 1903. The .38 variation was called the model of 1902. A series of minor modifica-
The Webley-Fosbery Semiautomatic Revolver

tions resulted in six different designations, Marks I through VI. Total production of the automatic revolvers was about 4,200 (with some serial number block gaps resulting in serial numbers as high as around 4500) through the end of production in 1924. Remaining stocks were sold through the Webley catalog as late as 1939. Typical production rate had averaged out at about 10 guns per week. The more common .455 gun illustrated has the top strap marked “WEBLEY FOS-BERY” on the left. The left side of the frame is marked with the winged bullet / “W&S” trademark followed by “455 CORDITE.” All of these guns have scalloped barrels. Most have checkered hard rubber grips and a lanyard loop.

In 1902 and subsequently in 1907, the Webley-Fosbery was tested by the U.S. military. It did well in loading, accuracy and stopping power tests, but its tight tolerances and need for cleanliness and lubrication did not jibe with U.S. combat reliability needs. The pistol was also heavy – almost 2-3/4 pounds. With the 6-inch barrel, overall length was a long 11 inches. In the end, John Browning’s pistol design won out and became the famed Model 1911 .45 pistol.

Webley did offer the guns in other configurations if desired. In addition to the standard 6-inch barrel, one could buy a gun with either of the optional 4-inch or 7.5-inch barrels. Although a nickel finish could be had, apparently very few were shipped this way. Metford (polygonal) rifling and even .22 barrel inserts could be had on special order. The longest barrel was available with sights more suitable for target work. At the time, the pistol was fairly popular as a competition gun, with its easy trigger pull and no need to cock the hammer. In 1902, famed target shooter Walter Winans fired 12 shots (including a reload) into a 2-inch group at 20 yards in just 20 seconds. Rapid reloading was accomplished through the use of a Prideaux speedloader.

In war, the Webley-Fosbery was never adopted by any government officially. It did see some action in the second Boer War and World War I, where British infantry officers often carried privately purchased examples. English pilots sometimes used them in the air before machine guns were prevalent – there were no ejected shells to cause problems. They were comparatively heavy and unwieldy, factors that plagued them. They were also susceptible to jamming from dust, mud and battle debris. A stout hold was required for the action to cycle reliably. Cocking them by manually cycling the whole upper half was a bit of a pain. This gun wasn’t simple to operate, and required the owner to be fully familiar with its peculiarities. It was interesting, had some advantages, and a few serious shortcomings.

The Webley-Fosbery was somewhat notable on the silver screen, appearing in such movies as “The Maltese Falcon” (1941) and “Zardoz” (1974). Wherever shown, it was easy enough to spot with its zigzag cylinder being immediately noticeable. It had a certain exotic mystique, and although it has become quite recognizable, few have actually seen or handled one in person. It was, sadly, the answer to an unasked question. Normal semiauto pistols and normal revolvers served quite well then, and quite well now.

As far as collector value is concerned – well, if you want one, grab your checkbook and prepare to drain your IRA account. The .455 versions will probably cost you multiple thousands, and the .38 types are virtually unobtainable, worth quite a bit more when and if found. These are innovative, fascinating and collectible handguns, classic in every sense of the word – but darned expensive.
“Big Fifty”

STANDARD FEATURES:
• Made in the USA
• 4-Station Interchangeable Toolhead
• Uses Std. 1-1/2”-12 UNF Thread Dies
• Manual Shellplate indexing
• Average Loading Rate: 900 Rds./Hr.
• Loads High Volume/Match-Grade Ammo
• Milspec/Match-Grade Priming System
• Ductile Iron/Carbon Steel Construction

Dillon AkroBins

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We’ve been including these bins with our machines for years, and now we’re stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal “B” cartridge bins) are 4-3/4” long x 3-7/16” wide x 2-13/16” deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4” long x 3-7/16” wide x 2-13/16” deep.
- The 1050 bins are 10-1/4” long x 4-3/8” wide x 4-3/4” deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4” long x 6-1/2” wide x 6-3/4” deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They’re virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang ‘em, stack ‘em, rack ‘em and fill ‘em – you just can’t beat ‘em! Buy several and get your “stuff” together.

Berry’s Mfg. “20 Caliber” Ammo Can

Modeled after the military can, this tough unit is injection molded out of a tough polymer, has a gasket sealed lid, and a cam-lock latch to protect your contents. Also features a collapsible handle for easy stacking and storing.

Dimensions: 9.25” L x 3.125” BW x 3.125” TW x 2.5” H

LIFETIME WARRANTY. MADE IN THE USA

P67-12296 | $8.99
By Oleg Volk and Bill Treanor

“I also loaded my pistols with about four bullets each; and, in this posture, well provided with ammunition for a second and third charge, I prepared myself for my expedition.” – From Robinson Crusoe, by Daniel Defoe, 1719

With smoothbore flintlocks, multiple round bullets provided improved hit probability, though at the expense of penetration. Multiple projectiles in metallic cartridges have been around for a while as well, but never caught on. Handgun shotshell cartridges used for dispatching snakes and small varmints are ineffective for anything larger than a rat at a very close distance. Larger projectiles designed for military and self-defense applications have also been tried. One such project funded by the US Army was the .50 BMG SALVO “squeeze bore” round that used conical bullets stacked on top of one another like ice cream cones. A device similar to a shotgun choke was placed on the muzzle, which squeezed the bullets down to about .30 caliber and caused them to separate as they passed through. A number of commercial offerings over the years included Constitution Arm’s “Tri-Plex,” the .357 “Equalizer” made by Doubletap, Remington .357 00 buck Multi-ball and several from Lehigh Defense. With all these designs as inspiration, competitive shooter Bill Treanor and I teamed up to develop multi-projectile handloads of our own to find out if they have defensive or hunting utility.

“Long ago, I remember reading an article in one of my dad’s shooting magazines,” said Bill, “It was probably in the 1980s just as my interest in firearms and reloading was starting to blossom as a young adult. The writer had the cylinder chambers of his .357 revolver reamed to fit the dimensions of the relatively new (at the time) .357 Maximum cartridge. His load consisted of four small wadcutter bullets over an unknown powder charge. (Due to length constrictions, only wadcutter bullets seated flush would fit in the revolver.) He called his creation the “.357 Quadrimaximum.” I thought it was a clever idea, but didn’t think much more about it because I lacked the funds and expertise to experiment with reloading at that time in my life. Fast forward 30 years and now I’ve accumulated enough of both to give it a try.”

Before modifying a firearm, he took a simpler approach at first. The first attempt with multiple projectiles used blue Speer shot capsules and three #1 buckshot pellets in the .38 Special cartridge. This load may have been offered commercially at one time, but he couldn’t remember the manufacturer. The #1 buck fits snugly in the capsule for the combined weight of the capsule and buckshot around 140 grains. The firearm used for this and all subsequent testing was a Smith & Wesson Model 586 revolver with a 4” barrel. Selecting the appropriate powder charge of Alliant Bullseye powder, Bill assembled a handful of these cartridges but was quite skeptical about getting a useful pattern due to the buckshot’s smaller diameter in relation to the bore. He assumed that they would disperse wildly upon leaving the barrel, but they patterned tightly at 15 yards with a dispersion of a little less than 2.8 inches. The blue capsule acted as a tight wad to keep the buckshot in the center of the bore. The muzzle velocity with this load was around 965 fps.
The downside with the #1 buckshot load is that the limited terminal performance. In bare Clear Ballistics (clearballistics.com) gel at 3 feet, the pellets penetrated 12, 15 and 17 inches respectively, creating narrow wound tracks. The velocity of spherical 40-grain projectiles would decline quickly with distance. Increasing the powder load deformed the pellets more on firing, increasing the spread considerably.

For the next load, Bill used commercially available 75-grain wadcutters and stacked two of them in a .357 case. Due to the reduced case volume caused by the two wadcutter bullets, he charged the cases with Hodgdon HS-7, one of the densest powders he had on hand. In the loading process, he ran into lead shaving during seating of the top bullet because the bottom bullet seated flush with the case mouth, and there was no room in the case to help guide the top one as it was pushed down into the case. He solved the problem by modifying the plug in the seating die to allow him to seat the bottom bullet below the edge of the case mouth. This double-bullet load produced acceptable results with a 3.1" dispersion at 15 yards and a muzzle velocity of 1140 fps. Bare gel penetration of 20 inches was plenty, bordering on excessive for defensive use. For testing, we backed off the velocity down to 900 fps, getting slightly less recoil despite the 225-grain combined bullet weight. Gel penetration was even greater than with the two-bullet load, 24-25 inches. At this reduced velocity, the wadcutter bullets didn’t deform and so retained more energy for deeper wound tracks. Great for outdoor use, it’s the best overall load for my taste.

Using more than three of these 75-grain wadcutter bullets would have been impossible because of the decreased case capacity. One way to increase the number of bullets further was to find a lighter wadcutter design. No lighter wadcutter bullets were commercially available, so Bill cast his own. Most molds for .38/.357 produced projectiles over 70 grains, but one mold manufacturer offered to eliminate one of the beveled ends of the bullet to lighten it. The resulting shorter bullet was only 63 grains. This small decrease in length proved to be just the ticket for fitting four of them in the .357 Maximum case to reproduce the “.357 Quadrimaximum” that he had read about so many years before.
Tests of the Quadrimaximum proved to be somewhat disappointing, though. The highest muzzle velocity with HS-7 powder without excessive pressure was just over 800 fps, and the muzzle flip was pronounced. The four-bullet load performed similarly to the two- and three-bullet loads, with an average dispersion of 3.9” at 15 yards. However, we were beginning to see a distinctive trade-off between the number of bullets in the case and their relative effectiveness as self-defense projectiles. Up close, penetration was 18” to 21”, but velocity dropped off quicker with the lighter wadcutters. This load would work best for home defense.

All of these cartridges had one practical disadvantage: they had to be aligned perfectly for loading into chambers. To facilitate easier loading, Bill used a commercially available 93-grain round nose lead bullet up front, followed by the same 63-grain cast wadcutters. Although designed for the .380, this round nose bullet is available in 0.359” diameter, ideal for the revolver. The added length of the round nose bullet forced the return to the standard .357 Magnum brass to keep overall length in check. With HS-7, muzzle velocity of 920 fps and an average spread of about 4.1” were obtained, with the round nose projectile hitting somewhat apart from the two wadcutters. The heavier bullet penetrated 27”, the lighter wadcutters 24”. This load was Bill’s favorite, being easy to chamber and compatible with standard .357 Magnum cylinders. This kind of ammunition can be used in lever-action rifles as well.

Out of curiosity, we also ran the round nose load through a Marlin lever-action carbine. From the 16” barrel, the round had a very minimal report and 1120 fps velocity, a decent 200 fps gain over the handgun. The same spread obtained with the revolver at 15 yards was shown at 25 with the rifle. By 50 yards, only two of three bullets would consistently hit steel silhouettes. Fired from a Ruger LCR with sub-2” barrel, the 2-bullet load developed an even 1000 fps with moderate recoil, while the round nose cartridge dropped to 813 fps, kicking noticeably despite a 100 fps drop from the 4-inch S&W 586.
From left: A four-cavity 63-grain wadcutter mold, three rounds of triple-projectile .357 Maximum loads at 5 yards on a steel target and three rounds of quadruple-projectile .357 Maximum loads at 5 yards on a steel target.

Compared to single-projectile .357 Magnum ammunition, multi-bullet projectiles show reduced barrier penetration. They are all subsonic, with much smaller flash and milder report. Overall amount of crushed tissue is greater than with a single expanding hollow point, primarily because little of kinetic energy is converted into lead deformation. With center mass aim, all these loads reliably stay within a silhouette at 25 yards, and within the A zone at 15 yards.

On a rapidly moving Texas Star with 8-inch plates, hit probability increased considerably. Unlike 00 buck pellets fired from .45 Colt/.410 revolvers, wadcutters do not deform against each other on firing and so produce much tighter patterns and more consistent penetration. Multi-bullet loads are not recommended against thick-skinned dangerous game or for ranges exceeding 25 yards, but perform very well at typical self-defense distances against humanoid foes.
Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system. Available in black or coyote brown.

- .30 Caliber Neck, Long

**Dillon’s 1” Bench Wrench**

**Lyman Neck Expander Die**

Improve accuracy of cast and jacketed bullet reloads. Extends case life. A “Must-Have” die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

HYSKORE Six Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The rack will hold six pistols with either single-stack or double-stack magazines, and can be disassembled and reconfigured to hold guns with wider or narrower grips. The modular feature of the rack also means that two or more racks can be connected together and reconfigured not only to give each gun its own “special home,” but also to take maximum advantage of all available space in your safe or vault. This is easy to do using 3/16” threaded rod, washers, and hex nuts available from any home-improvement store. The rack measures 11-1/4” wide x 7-1/2” deep x 6” high.

P43-10208 $19.99

Sack-Ups
Protective Gun Sacks

Protect your valuables against rust and corrosion. When the moisture control crystals turn pink, recharge unit by placing it in the oven. Unlimited recharges ensure a lifetime of use.

P67-66701 $19.99

Absorb humidity and prevent rust or mildew in gun safes or other enclosed areas. Moisture-control crystals change color when unit needs recharging. Recharge by plugging into 110V electrical outlet.

P67-66702 $19.99

SnapSafe Modular Vaults

The SnapSafe® Modular Vaults LOCKBOX is a pry-resistant 16 gauge steel container that provides secure storage for handguns and other valuables. Meets TSA airline firearm guidelines.

*These ETS magazines fit the H&K MP5, MP5K, HK94, SP89 and the SP5K. They work with the ETS C.A.M. Rifle Magazine Loader. They’re extremely reliable feeding – even with hollow points. They’re far lighter than steel magazines, fits standard MP5 mag pouches and couplers. Both 30- and 40-round capacity available. Compatible with all MP5-style 9mm firearms such as: Zenith, MKE, Omega, POF, HK Contract MP5 9mm Variants, MP5 style SW5, BWS, CA94, D54, V94, clones or other custom builds.*

The HMB Bolt

Young Manufacturing is the licensed manufacturer of the HMB bolt. The HMB Bolt by HM Defense eliminates the pass-through cam-pin hole and replaces it with a cam-pin socket and radiused cam-pin design. The new patented design eliminates the natural weak point of Mil-Spec bolts by significantly increasing the amount of metal (and strength) at the cam-pin location. The result: NO MORE BROKEN BOLTS! The HMB Bolt also reduces contact between cam pin and firing pin, enabling smoother operation of the firing pin, bolt lugs and aft gas rings. The new cam-pin socket also retains lubrication for extended operations. Comes with a phosphate cam pin.

HMB Bolt

P67-66680 $99.99

Jerry Miculek AR-15 Compensator

Jerry Miculek’s three-chamber AR-15 Compensator fits threaded-barrel rifles and may be “clocked” for left- or right-handed shooters. Used by many top 3-gun competitors.

P67-11328 $49.99

Badger Ordnance Tac Latch

The Badger Ordnance Tac Latch makes it much easier for you to operate the latch on your AR-15/AR-10 charging handle. It works especially well for “flat-top” rifles equipped with low-mounted optics.

P67-10379 $19.99

Young Manufacturing’s Upper Receiver Vise holds any AR15 upper receiver regardless of the manufacturer. Since it supports the receiver from the inside, the outside dimensions are of no concern. Made from aircraft-grade 6061 T6 aluminum and anodized to MIL-A-8625 Type 3 Class 2.

YM Upper Receiver Vise

P67-66679 $34.99

Specialized Dynamics Emergency AR(epair) Kit

The Specialized Dynamics AR-15 Emergency Repair Kit includes: three gas rings, extractor spring, firing pin retaining pin, buffer retaining pin/spring, hammer/trigger pin, take down detent and spring.

Blue Press 61
Enter: The Challenger

Introducing the all-new, striker-fired pistol from SCCY. A light-weight trigger pull, polymer frame and a 10+1 magazine capacity make the SCCY DVG-1 engineered for everyday. Whether you’re practicing on the range or training for self-defense, the DVG-1 is built for those who aim for their personal best and dare to be bold.

Learn more at scdy.com/DVG
On the Cover

This month’s cover model is competitive shooter Chrysti Ane, shown above with Megan Sweasey (who’s also in this month’s Get 2 Know feature on Pages 22 & 23) an instructor at Taran Tactical Innovations. To see more photos of Chrysti Ane, Megan and other Blue Press cover models, follow us on Instagram @bluepress.
**Smart Mats™** are cleaning mats on steroids. The no-slip backed padded mat features an oil-resistant surface. It allows you to properly clean your gun without ruining the kitchen table and is large enough to handle field-stripped guns. The ingenious magnetic parts tray ensures your pins, screws and springs are never lost again. This is real world gun cleaning taken to the next level.

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

Swab-its
A Swab for Every Job!

No stuf, there I was...in my office, cleaning my revolver when the boss walks in with that “whiskey-tango-foxtrot” look on his face. “Hi,” I said (thinking fast), “I’m trying out these Bore-tips before I write the Blue Press copy for them. They work GREAT!” The Bore-tips Swabs REALLY DO work. What you can’t see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reusable.

The HYSKORE Degrezeer consists of a 12" x 6" x 4-1/2" polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. Small parts and even complete trigger groups and bolt assemblies can be placed in the basket and the well filled with solvent to cover the parts and left to soak for extended periods. Then the basket can be withdrawn, draining all the parts. The set includes a cover with an integral holder for the brush. This means the solvent that has been contaminated by the cleaning process can be left in the well of the Degrezeer (rather than returned to the bottle) with the cover in place so that it’s ready to be used for the next cleaning event. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.
P67-10209 $15.99

Slip 2000 Products

725 Gun Cleaner Degreaser should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! NOTE: To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture or dirt. NoTE: Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.

16 Oz. P67-19237 $21.99

Slide 2000 Extreme Weapons Lubricant (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. P67-11644 $18.99

Brian Enos’ Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60º+). Lite is a thinner viscosity for lower temperatures (F30º+).

Slide-Glide Lite P67-15572 7.99

Bri son Microon UltraBlue protects, penetrates and lubricates all surfaces. UltraBlue is in use by the US Army Marksmanship Training Unit, the US Army Pistol and Rifle Teams and the US Marine Corps Pistol and Rifle Teams.

P67-75125 $9.99

**Lyman X-Block Gunsmith Bench Block**

Having the right tool for the job makes any gunsmithing project so much easier! Without the right tool, you may damage fine finishes or break parts. The Lyman X-Block is the right tool for anyone driving pins out of firearms. It has all the features to get the job done smoothly and professionally. The X-Block has both a “V” slot and a rounded slot running across the face of the block to support a variety of barrels and slides. The block is made of a tough, non-marring polymer, and edged with a softer non-slip outer overmold. The block has multiple holes to take on most any project, as well as a molded-in magnet on the back side of the block to catch pins and other small parts as they drop out. Its large 5” diameter provides a stable base with plenty of support.

**Lyman X-Block**

$15.99

There is something about a lever-action rifle or carbine that stirs some people. It might be the connection to the Old West, Western movies and television shows or the fact that they are just plain fun to shoot. Because of all these characteristics, many people are more comfortable with lever-action guns than they are with modern semiautomatic rifles or carbines. And this applies to people who like guns and people who don’t.

But many people don’t realize how versatile the lever gun really is. It can be used for hunting, recreational shooting or self defense. The last feature has been recognized for 100 years or more by people who actually used these guns for self defense, but in the modern era of semiautomatic guns, many people overlook it.

Lever guns have a long history of being used by law enforcement and non-sworn citizens to protect life. Additionally, they can be used for hunting just about anything on the planet if the right cartridge is used. Big Horn Armory (bighornarmory.com) makes the Model 89 which is chambered in .500 Smith & Wesson Magnum and has killed every large animal on the planet with the possible exception of a whale. Other manufacturers chamber the lever gun in .22 Long Rifle which can be used for small game and varmints.

Loading – especially with a side gate – is fast and easy, and follow-up shots can be delivered rapidly. The gun is quick to the shoulder and an almost instantaneous sight picture can be obtained with a little practice. But the lever gun can be made even better for all applications with a few simple modern improvements. And a gunsmith’s service is not always needed.
When people envision a lever gun, they usually think of the traditional buckhorn sights consisting of a bead or blade front sight and an open rear sight. But consistently placing the front sight vertically in the buckhorn rear sight can be difficult. Often there is no distinct reference point to always get a proper and repeatable sight picture. Improving the sights is pretty simple though.

One of the biggest improvements that can be made to a lever gun is to replace the open rear sight with an aperture or peep sight. There is something about the human eye that tends to naturally place the front sight in the center of the aperture. Some apertures are small and some are large, and the smaller the aperture, generally the more precise the sight picture which is better for a small target or when a very precise shot is needed. On the other hand, a large aperture, sometimes called a ghost ring, allows the sight picture to be acquired faster, which is important when there is little time to make the shot. Although a large aperture or ghost-ring rear sight is generally not as precise as a small aperture, precision shots can still be made with practice and time.

Either a bead or blade front sight can be used with an aperture, so depending on your preference the front sight may not even have to be changed. Either way, and with a ghost ring or with a small aperture, the shooter’s focus should be on the front sight. The target and rear sight can be allowed to blur, and in fact, with a ghost ring, the rear sight may be almost unnoticeable. That’s why it is called a ghost ring.

Skinner Sights (skinnersights.com) makes a variety of quality front and rear sights for lever guns, and offers rear apertures of different sizes. Some are even threaded for quick installation and removal so that a different size hole can be used depending on the shooter’s situation.

Another sight option is a scope or modern red-dot sight – for those who are not offended by a modern addition to a classic design. Some lever guns are drilled and tapped to accept scope rings or bases, while others are not. Those that are not can often be drilled and tapped to accept a scope or red dot mount by a good gunsmith. However, a side-ejecting lever gun instead of a top-ejecting one should be used so that ejected brass is tossed clear of the receiver. A top-ejecting gun can throw brass into the bottom of the scope or base causing a malfunction.

A scope is an excellent choice for longer distances or for more-precise shooting. And with practice, using a scope can be lightning fast. Speed is easier to develop though with a red-dot sight, which can still be very accurate depending on the range, size of the target and dot. A trick for longer shots or smaller targets is to sight the gun so that the top edge of the dot is used for the point of aim. Fast shots on close targets, which do not require as much precision can still be made by just placing the dot on the target.

Both Skinner Sights and XS Sight Systems (xssights.com) make excellent rails and mounting options for scopes or red dot sights. At Gunsite (gunsite.com) I used an XS Sights Lever Rail along with a SIG Romeo 4T red dot sight on a Marlin 1894. The combination allowed for fast shooting and follow up shots and was precise enough to make longer shots within reasonable ranges for a pistol-caliber carbine.

When mounting a scope or red dot, the line of sight through the optic will probably be higher above the bore line than it is with iron sights. This may require a cheek pad to raise the shooter’s eye a bit, but they are easy to install and many come with loops to hold extra ammunition which can be handy to top off the magazine or keep the gun running when the magazine is empty.

Whether for hunting, having fun at the range or for self defense, the old lever gun is a design that is still very useful today.

the glory associated with the Steel Challenge World Championship, it’s half the size of the juniors-only SASP Nationals. As you might expect, if you can win there, and you can win anywhere.

Christian took the challenge to heart, and saw his intensity reflected in his varsity teammates.

“It was so cool when our team was really into it,” says Christian. “Alex, Conner, Bradley, and myself.”

That team won two national titles together, and briefly held the SASP all-ages speed record in Rimfire Pistol. Dan Paczosa was their main shooting coach, but Christian credits Alvarez for running the organization.

“Cel is the guy that really got the program together.”

Alvarez remembers Christian’s game-day intensity. “He was friendly, but when it came to match time you couldn’t mess around with him. Not like what typical teenagers would do. If he wasn’t shooting, he was standing behind the shooter picking up on the SO’s timing, doing everything he could to get an edge.”

Alvarez marveled at how Christian focused not just on shooting, but on the culture of shooting. “He was the only kid that asked me for references. (To become an SASP All-Scholastic athlete.) He was always looking for where he could be involved and learn.”

Now he’s back at West Coast Amory, training with an informal team of adults who rent out a bay to run drills and train together weekly, preparing for the next big event.

**What Makes Christian Unique?**

Where other people say Christian’s intense focus is his ace-in-the-hole, Christian says otherwise.

“Last year I really looked into what it takes to make it a good shot... That’s the number one thing in shooting – fundamentals. You can move fast, but you HAVE to have mastery of the fundamentals. Then you figure out how to apply those fundamentals at a high rate of speed.”

When we talked, Christian pointed to the details within this, how each aspect of the fundamentals can morph, depending on what you’re trying to accomplish.

“For example, the SASP stage ‘In and Out’ has two front plates where you can just slap the trigger and they’ll be there – but you’d be a lot better off if you prepped the trigger for the (more distant) back plates. Each shot requires a different level of focus and trigger pull.

“My biggest discovery last year was how to properly manipulate the trigger. Different trigger pulls and techniques are needed depending on the distance and size of the target. I did that by practicing a lot, and by doing drills that push speed but require a high level of accuracy.”

Today, Christian is cashing in on the benefits of his hard work. He says it’s not so much the intensity that’s winning matches for him – it’s that reservoir of skill.

“If you look at my scores, it’s the accuracy that sets me apart... I never try to win the match on one stage, but rather stay consistent and maintain a balance of good accuracy and speed without letting the wheels fall off.”

**“Confidence Through Preparation.”**

As any coach will tell you, the mental game plays a major role in top-tier sports. Christian has been working on that, and thanks to his practice group, he’s VERY prepared technically.

“I looked back at my matches from last year and remembered everything that scared me. Then I went out and practiced everything that scared me... I roll into these matches now knowing that I’ve shot a swinger that’s 15X harder than that, and I’ve shot small partial targets farther than anything at the match.
“That practice element is really important. Now instead of being scared and careful, I capitalize on the most-difficult stages. It’s confidence through preparation.”

Looking Ahead:

Christian’s recent win at the USPSA Nationals clinched his spot on the USPSA “Gold Team” for the World Shoot in Thailand (the largest practical shoot in the world). With that comes enough financial support to get Sailer to Thailand and back. However, international competition is a bit different than U.S.-centric competition, so he has plans to hit an overseas event or two to prepare. The Extreme Euro Open is on the short list, along with a hoped-for trip to the French IPSC Nationals – home of multi-year World Champion Eric Grauffiel.

The run-up to Worlds will also include the US IPSC Nationals, USPSA Nationals, Area 1, Area 6, and the Florida Open – putting a huge drain on Christian’s available study time.

“I leave for Thailand in November 2020,” says Sailer. “I’m going to take very few classes that quarter, so I am thinking of ways to offset that academically with summer and on-line classes,” he says.

Already Christian has achieved something that no one else in the sport ever has – launching him into the same rare air as great names like Max Michel, Jr., Rob Leatham, Jerry Miculek, and the late Michael Voigt. Dillon Precision decided to sponsor Sailer earlier this year – adding his name to a short list of standout athletes that tracks back to the earliest days of USPSA/IPSC competition.

Christian’s Winning Load:

- .38 Super Comp cartridge cases
- VihtaVuori 3N38 powder
- 1.235” OAL
- 124 grain JHP (Everglades Ammunition) projectiles
- Winchester Small Pistol primers

Christian’s Current Handgun:

- Infinity IMM Open – “Warlordz 1” and “Closer 1”
- Infinity 38 Super Comp Hybrid Barrel
- Leupold DeltaPoint Pro optic
- Infinity Signature Grip with 172 SkaterTerrain Grip Surface
- 150 Degree Xcelerators with Mobius/X Slide Serrations
- Infinity Tall Boy Slide Racker
- Bianchi 172 Mount
- CRN + TIN PVD Coating with Royal Purple anodizing
- Custom Hand Laid Blast Pattern on Slide, Frame and Comp
Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

Bushnell's Trophy TRS-25 Ultra Compact Red Dot Sight is designed for use on shotguns, handguns and rifles. It is constructed and assembled by highly skilled craftsmen to Bushnell's high quality standards. The precision and craftsmanship with which this scope was built ensures its performance under demanding conditions. This scope will provide the shooting accuracy and repeatability which have made Bushnell legendary. Features unlimited eye relief and a three-minute-of-angle dot.

TRS-25 (Includes riser, not pictured.) P67-31318 $119.99

Scout Scope Mounts
Scout Scope Mount for AK Rifle P67-25374 $79.99
Scout Scope Mount for SKS Rifle P67-25373 $78.99

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle P67-25374 $79.99
Scout Scope Mount for SKS Rifle P67-25373 $78.99

By Alan Korwin

The Basics:

Sometimes considered “the other gun lobby” Gun Owners of America had humble beginnings in 1975, starting in California when H.L. “Bill” Richardson created Gun Owners of California, then brought on Larry Pratt, for a presence in the nation’s capital, creating Gun Owners of America. Today it stands with more than two million members and activists, based in Springfield, Virginia. It is justifiably proud of its “no-compromise” label, bestowed by Congressman Ron Paul, for things like the F-minus rating it gave the late Senator John McCain, who called GOA “abysmal, wretched, and pathetic.” At the time, mindless accolade was being heaped on McCain by mass media (McCain had proposed shuttering gun shows, q.v., gunlaws.com/Gun-Shows/index.htm).

The group has raised tens of millions of dollars to lobby and sue Congress and states over blatant infringement of Second Amendment rights. GOA's main focus is legislative, spotting and stopping the bad and promoting the good. It is generally against laws that require locking up firearms, for example, a one-size-fits-all approach, since owners must be able to keep arms ready for use, at their discretion, and it battles similar familiar tyrannies. In 2018, founder Larry Pratt handed the reins to his son Erich, who now carries the torch with a leadership team. Their latest effort involves SASOs, Second Amendment Sanctuary Ordinances, now in 230 jurisdictions in 19 states and growing.

SASOs tell officials that, even if they enact anti-gun-rights legislation, they will not be enforced. The focus now, aside from spreading SASOs, involves implementing fines and prison time for infringers. Join GOA for only $20 at gunowners.org.

A certain natural tension exists between the leading gun-rights-advocacy groups. Though they share similar goals and are driven by related principles, they compete for members, funding, influence and prominence on the national stage. Some degree of pride enters into it. The leaders know each other, of course; their paths cross at the big conferences and they read each other’s work. Staff tracks each other’s progress and they borrow ideas from one another usually for the good of the whole. They see each other on TV screens and in the halls of power. But their strategies and rulebooks differ, sometimes markedly.

All are guided by certain underlying concepts, the primary one being the Second Amendment, that staunch bedrock of American freedom that no other nation on Earth enjoys as ours does. It sets up the framework upon which each one of you reading this counts your other freedoms, religious or secular, high and mighty or low and routine. And in that arena, defense of your way of life rests. One group stands out in counting its Christian faith among its guiding lights. That one is GOA, Gun Owners of America, and its founders H.L. Richardson and Larry Pratt.

These deeply religious men felt the threat of atheist, communist and anti-American enemies of our state,
and a carefully planned assault on our precious God-given right to defend ourselves and what is ours. While the right to arms is a political one, and has been since people formed themselves into tribes for mutual benefit, it is also a religious and spiritual one, because the right to life is one of the highest holy values. Those who would rip it from us stand against everything that is holy. Communism loudly professes hostility to religion, and to succeed must disarm the populations it rules.

Removing God from the classroom, the public square and your lifestyle is part and parcel with the attacks on the Second Amendment. Leaders of Gun Owners of America recognize this element of the threat to a degree perhaps greater than other civil and human rights groups. It is not an overt or operant part of GOA's campaign or activity, no, but it undergirds their understanding of the problem we face, because their leaders understand the situation. Democrats in particular, taken as a group, seek to deny the influence of God, and certainly His presence in public life, and with it the right to arms.

In the Beginning

GOA got its start when a brash but effective young legislator in California cut his teeth in the most anti-gun state in the union, facing an overwhelmingly democrat house and senate, whose anti-gun credentials were solid. He developed methods; born in the crucible of dirty leftist politics that would prove so effective it became a model attracting hundreds of thousands to his side. One of them, his soon-to-be protégé, was a young Larry Pratt:

AK – Larry, please think back to when you and Bill got GOA started. What was that like, why did you do it? How did Richardson’s approach to lobbying influence you?

LP – He wrote Confrontational Politics, a very practical, influential book, based on experience, highly recommended. It captures why Republicans struggle so, and how politics really works. Richardson and I thought on the same lines, that’s why I got hired. The new field of direct-mail marketing was starting up, it was a new toy, the political right had discovered it, with all the [mailing] lists and the power that represented. He wanted someone based in D.C. I lived in Virginia – because he was in California, where he had served in the state Senate and headed up the America Conservative Union, among others. He found out politics works – but not like you think it does. It’s in his book.

AK – What was your relationship with him like?

LP – Bill was one of my mentors. Because we thought the same way I began dabbling in local politics. In Oct ’76, I ran for Virginia’s state legislature, unsuccessfully, and in ’79 got elected to the House of Delegates, for one term, in a liberal county. What a great practical education that was.

“If we are serious about protecting our freedoms we had better be serious about getting the anti-freedom crowd out of office. One of the best ways to sort the good guys from the bad guys is the gun issue. If they are not for you having a gun, they are not for you at all.” – Larry Pratt
I learned about being confrontational, but not obnoxious, which is counterproductive, to intransigent politicians. Pretending to be one thing but not, especially to RINOs (Republicans In Name Only), gets them upset, they’ll even starting cursing, hurling expletives, and you’re only damaged if you respond in kind. When they behave poorly you’ve won. We’ve grown since the early days, with state and local directors at the office. We share responsibilities now that Larry has retired, with Tim Macy the Board Chair, I’m the Senior VP, and John Vallecio is EVP, Finances. Mike Hammond is our main legislative brain, and we have lawyers and no-compromise chapters in key states, which is constantly growing.”

Erich Pratt was at GOA on and off since he was a teenager, and in his mid 20s, after grad school, with a degree in public policy and his Master’s thesis on the Second Amendment, he was passionate and excited to go into the family business full time. “I loved working with Dad when he was Executive Director. He was a fantastic boss, best boss I ever worked for, kind and easy going. Everyone thought so, except when he debated liberals. He got Piers Morgan to come unglued live on air, while he remained calm. We’ve grown since the early days, with state and local directors at the office. We share responsibilities now that Larry has retired, with Tim Macy the Board Chair, I’m the Senior VP, and John Vallecio is EVP, Finances. Mike Hammond is our main legislative brain, and we have lawyers and no-compromise chapters in key states, which is constantly growing.”

AK – To what extent did your strong religious faith play a role in your work? It was fundamental in the nation’s Colonial days.

LP – It’s important to me to make sure what I’m doing squares with my religious beliefs. The Bible is clear, using violence is legitimate in self defense, it’s written across scripture. Ask for peace. Direct action is OK. The story of Lot’s kidnapping by Canaanites, (what today we call Arabs), illustrates. Abraham went and got Lot, and eliminated many. That sets parameters. GOA has a fact sheet posted about such things, gunowners.org/fs9902.

AK – In the early years, what were the challenges in launching GOA?

LP – We had the advantage of coming on the scene at the inception of direct-mail marketing. GOA started using a service early – northern Virginia is the epicenter for DM due to its proximity to the nation’s capital. Everyone was discovering and using it. We had to obtain lists – we were not that other group everyone knows. We asked people to support us on specific legislative threats. Our strategy was, “Here’s a postcard, send it, we’ll get your legislators’ attention, change their attitude,” and it worked. They got flooded, and told us, “Your direct mail is loud!” and it informed Congress what was going on. Otherwise they were clueless. It was an easy method of being a citizen
large responses. Things got more sophisticated, we could segment lists by zip codes, then we could target governors, senators, even single Congress members. In the old days it was tape, far more crude. Everett Dirkson once asked me, “Why are you doing it?” and I told him, “Because it bothers them.” That’s confrontational. I liked the result; we got them to stop doing bad things, which was easier than to get them to do good things. It’s an open secret: It’s easier to be against than for.

AK – Why have so many politicians abandoned The American Way?

LP – My two years in state legislature was enormous-ly instructive here. As strong as my beliefs were, they were illegitimate and naïve. Virginia was a happy view, a conservative state, but three weeks in I started to feel like it was fascism – they’re using public power for private benefit. Not exclusively, but that was dominant for many legislators.

I recall remonstrating with a senior legislator against a tax increase. The governor himself had argued against it, but this man said, “Look,” with an eye roll, “That was campaigning, now we’re governing!” I came to realize too many politicians are this way. Even if they start with good intentions, it’s the swamp, a room filling with gas, you’re being had. The devil smiles, says he wants to help, but it’s the devil. God is sovereign, he’s in control, there are no surprises for Him at the end of the day. I learned.

AK – Has foreign and toxic political influence played a significant role?

LP – I didn’t see much – anyone with a checkbook can play. Foreign powers just hire American firms, to do what they want to achieve. This was a bigger problem. Plus, the liberal psyche doesn’t want people to be and think independently, they want groupthink.

AK: What about the new liberal red-flag mentality – people snitching on each other to confiscate guns out of blind fear?

LP – Like in New York and Massachusetts? Politicians are OK with no door knocks, but cops themselves are telling them, “We aren’t doing this! It’s a bad plan.” Cops are not for it. That’s the best firewall we’ve had. People have gone goofy about that in my own Virginia. If they try to get some sort of massive collection going, cops are going to say, “I don’t think that’s a good idea, I don’t think the guys are going to go for this,” and it won’t happen. If a guy gets sideways with his wife, cops might act judiciously, but a uniform sweep, I don’t see it.

AK – Which are the worst laws enacted at the federal level, what do you think needs to be done?

LP – Complete repeals. (He sounded serious; I nearly choked on my coffee.) Other than all of them? The worst was 1968 GCA (Gun Control Act), which set up a record of our purchases (it created the much-reviled 4473 form). The first federal gun law on the books might be worse, because once they saw they could violate the Second Amendment, it opened the slippery slope. Once you give them an inch you’ve lost the battle. Not right away, but you’ve given them the key to the armory.

(Larry cited the 1934 prohibition-era statute that regulated machine guns and “NFA” weapons like short rifles, which many people erroneously think was the first federal gun law. It was actually the May 7, 1894 Yellowstone Park hunting ban and gun-seizure statute, 16 USC §26, which we discussed at some length. The feds could have outlawed hunting, without demanding gun forfeiture. Larry pointed out that was like outlawing men’s reproductive organs so they couldn’t attempt rape.)

AK – What does the left miss, and what do we miss, that would help improve things?

LP – The importance of first principles. Anti-gunners keep getting us to chase our tails. Articulate what our first principles are. Why do you want to carry a gun? If government gets out of line, balance of power. The left assumes whatever they order cops and military to do is going to get carried out. If they pass a law for gross confiscation, they don’t count on time to ruminate. Getting Americans to shoot other Americans, that’s a difficult measure to sell. Getting the National Guard to act like that, soldiers don’t think the way these bureaucrats think. You’ll have untold cases of the Blue Flu (officers calling in sick, staging walkouts). Massachusetts and New York are already seeing massive non-compliance. Many officers don’t live in Boston or New York City, and in smaller cities and towns it’s a different story. Politicians will see just how far they can push without push back.

AK – Switching to a personal level Larry, what do you like?

LP – The See Food diet, but I eat carefully. At 77 I’m a stranger to hospitals and pharmaceuticals. I’m blessed with good genes. I avoid sugar, eat fish, chicken, limited red meat, but love good roast beef once in a while, and hot sauce! I was treated once to a trip to the Chilean Embassy, First Class on Chilean airlines, and the steward prepared bacon and eggs, we forget what that was like. I read blogs and have a stack of books but never enough time. I’ve never liked e-books; I prefer a book on paper. I enjoy the beach with family, but I’m not much into vacations for the money or the time.

Award-winning author Alan Korwin has written 14 books, 10 of them on gun law, and has advocated for gun rights for nearly three decades. See his work or reach him at GunLaws.com.
**101 Classic Firearms**

John Marshall’s book *101 Classic Firearms: A Chronological Foray into the Golden Years of Firearms Development*, is a compilation of the author’s popular articles appearing in *The Blue Press* since 2007. *101 Classic Firearms* is sure to be a prized addition to the library of any serious firearms enthusiast. Published by Dillon Precision, and printed and bound in the USA, *101 Classic Firearms* is a high-quality full color 11.5” x 9” hardcover with 224 pages packed full of insights and history on some of the world’s most important firearms. 

**About the Author:** John Marshall is an accomplished photographer and freelance writer whose articles have appeared in *The Blue Press*, *Gun Digest*, *Guns & Ammo’s Handguns*, and *American Gunsmith*. An expert on firearms, he is also a member of the Remington Society of America, the Smith & Wesson Collectors Association, the Smith & Wesson Historical Foundation and the American Gunsmithing Association. John is also an endowment member of the National Rifle Association.

Wise Company’s “Grab & Go” Emergency Food Kits

**Wise Company’s 18 Wise Favorites 72-Hour Kit** includes six entrées and three breakfast meals, each individually packaged for a total of 18 servings (2 servings per pouch). Entrées include meat. Packages included have a shelf life of 7 years compared to those in our buckets with a shelf life of 25 years. Great for hunting, camping and hiking! Simple to prepare, just add boiling water directly into pouch.

**Wise Company’s 60 Serving Gourmet Freeze Dried Meat “Grab & Go” Food Kit** includes 60 servings of assorted gourmet-seasoned freeze dried meat and a 20-serving bonus of long-term emergency rice, for a total of 80 servings. **Product within this Bucket is:** Roasted Chicken (12 servings), Teriyaki Style Chicken (8 servings), Cheesy Beef (8 servings), Southwest Style Chicken (12 servings), Savory Roasted Ground Beef (12 servings), Stroganoff Style Beef (8 servings), and Long-Term Instant Rice (20 servings).

**Wise Company’s 120 Serving Freeze Dried Vegetable and Sauce “Grab & Go” Food Kit** includes 120 servings of vegetable and sauce assortment. **Product within this Bucket is:**

- Corn (24 servings), Peas (16 servings), Broccoli (24 servings), Green Beans (24 servings), Butter Sauce (8 servings), Cream Sauce (8 servings), Cheese Sauce (8 servings), and Mushroom Sauce (8 Servings).

**Wise Company’s 60 Serving Gourmet Entrée Only “Grab and Go” Food Kit** includes two servings per day (entrées only) for one adult for one month or four adults for one week. **Product within this Bucket is:**

- Savory Stroganoff (8 servings), Creamy Pasta and Vegetable Rotini (8 servings), Creamy Alfredo (8 servings), Creamy Pasta and Vegetables (8 servings), and Cheese Sauce (8 servings).

**Wise Company’s 120 Serving Breakfast Only “Grab & Go” Food Kit** includes 120 servings of breakfast assortment (no entrées). **Product within this Bucket is:**

- Apple Cinnamon Cereal (40 Servings), Crunchy Granola (40 Servings), and Brown Sugar and Maple Multi-Grain (40 Servings).

**Wise Company’s 120 Serving Freeze Dried Fruit and Snack “Grab & Go” Food Kit** includes 120 servings of fruit and snack assortment. **Product within this Bucket is:**

- Bananas (16 servings), Strawberries (16 servings), Peaches (16 servings), Apples (16 servings), Caramel Sauce (16 servings), Yogurt (16 servings), and Pudding (16 Servings).
TRUST YOURSELF. TRUST YOUR TOOLS. BE READY FOR EVERYTHING.

From clearing brush to making kindling, the Camp 10 is the ideal outdoor and survival tool. Cut, slash, hack, split, scrape—just about any task you ask of it, the Camp 10 can handle. The full-tang Camp 10 is made of carbon tool steel for toughness and wear resistance. A basic black powdercoat protects the steel and makes maintenance easier. You’ll like the secure, contoured grip of the Camp 10, too. The handle has a built-in hand guard and is drilled in both front and rear so you can attach a lanyard either place—or both—for carrying versatility.

Blade length: 10” Overall Length 16” Weight, with Sheath 1 lb. 8 oz.
P67-55012 $80.99

Military knives have a lot of history and a lot of fans. Yet they tend to be bulky for everyday carrying and use. Kershaw and custom knifemaker Les George offer a solution by taking inspiration from a U.S. World War II knife design and turning it into the XCOM folder.

Blade length: 3.6” Closed: 4.4” Open: 8”
P67-55009 $49.99

Designed by Dmitry Sinkevich, the Atmos features Sinkevich’s characteristic clean and practical design—but enhanced with extra detailing. In addition to the chamfered carbon-fiber, it also has a custom oversized pivot, a backspacer with wide lanyard attachment, and a reversible, deep-carry pocketclip.

Blade length: 3” Closed: 4” Open: 6.9”
P67-55010 $57.99

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25” Closed: 3.9” Open: 7.1”
P67-66699 $49.99

Designed by RJ Martin, the Volt II has the same versatile blade and handle style as the original Volt, but with a hardworking 8Cr13MoV stainless steel blade and textured, black glass-filled nylon scales.

Blade length: 3.25” Closed: 3.9” Open: 7.1”
P67-66698 $55.99

The Kershaw Faultline is the one you add to your truck box, toss in your go-bag, or slip into the pocket of your tactical pants. Everything about it says, “practical, reliable, and sturdy.” Made of quality 8Cr13MoV stainless steel.

Blade length: 3” Closed: 4” Open: 7”
P67-55011 $46.99

The Kershaw Method opens quickly, easily, and manually with Kershaw’s KVT ball-bearing system and a built-in flipper. The handle is black—of course. The G10 handle features an unusual machined pattern reminiscent of an architectural truss.

Blade length: 3” Closed: 4.25” Open: 7.25”
P67-66700 $39.99

Kershaw Volt II opens one-handed and with an authoritative “twack” thanks to Kershaw’s SpeedSafe® assisted opening system. A simple pull back on the flipper and the Volt II opens smoothly and easily.

Blade length: 3.25” Closed: 3.9” Open: 7.1”
P67-66698 $55.99

The Original GLOCK Field Knife

Field Knife, Glock, with scabbard, 1 ea.
P67-15483 $35.99
