SCAN TO SHOP

SHOOTERS WORLD PROPELLANT

Clean, Accurate & Consistent

GIVE IT A SHOT!

CLEAN SHOT Clean shot has become a favorite of competition shooters because of its consistency of ignition, efficiency , virtual lack of residue , ease of loading , low smoke and consistent velocity and accuracy. Loads almost all pistol calibers. Popular with IPSC, IDPA and Cowboy Action Shooters.

MAJOR PISTOL Major Pistol is made of a high intensity pistol propellant. The gas generation rate is appropriate for cartridges 9mm, 10mm auto, .257 SIG, .45 Colt light bullet magnum pistol loads and other high intensity pistol cartridges.

ULTIMATE PISTOL Ultimate pistol has no comparable market equivalent. It has a faster burn rate than auto pistol and slower than clean shot. Every manufactured batch is tested for superior ignition in both standard and lead free primers. Perhaps the most versatile of all propellants across the .380 auto, 9mm Luger, .40 S&W, 38 special, 38 Super and .45 Automatic Cartridges.

HEAVY PISTOL Ballistic results of this propellant show its appropriate for magnum pistol applications, 300 blackout supersonic lightweight projectiles and some other specialty ammunitions. In comparison to other magnum pistol propellants we find Heavy Pistol exceptionally clean, accurate with either cast or jacked projectiles and exhibits low muzzle flash.

AUTO PISTOL For loaders interested in attaining standard +P velocities in 9mm Luger and optimized propellant for .357 SIG, as well as correct energy levels for cycling carbines with subsonic load, this propellant is a wise choice. It will also perform well with difficult to cycle .380 Autos, .44 SPL, .45 Colt, Heavy Bullet .40 S&W and some light to moderate bullet .357 magnum loads. It can take your .45 Auto to amazing velocities.

Attention Dillon Customers: Because of changes to California's Proposition 65 that took effect on August 30, 2018, companies doing business in California are mandated to provide warnings on products that may expose Californians to any one or more of a list of approximately 900 chemicals, including Lead, which are "known to the State of California to cause cancer, birth defects or other reproductive harm." The new regulation states that a warning must be "provided in the catalog in a manner that clearly associates it with the item being purchased." Though we have no reason to believe our products could cause harm when used as intended, we now include the appropriate Proposition 65 warnings on some of our products to meet the California "safe harbor" requirements.

Dillon's Bill of Rights for Reloaders

All of Dillon Precision's customers have certain inalienable rights when they buy a reloading product:

1. Right of Quality – YOU THE CUSTOMER have the right to expect a well-designed product, manufactured with quality materials and workmanship that does what the seller claims it will do.

2. Right to Test and Send-Back – YOU THE CUSTOMER should have the right to test the product on your own reloading bench for at least 30 days, and if it does not live up to your expectations, send it back for a full refund.

3. Right of Service – YOU THE CUSTOMER have the right to free, friendly, expert service and technical advice available through a toll-free phone number. This service should include prompt replacement of broken or bad parts – free of charge.

4. Right of Warranty – YOU THE CUSTOMER have the right to a lifetime warranty on any non-commercial-grade reloading product you purchase. *Unfortunately, we can't offer this warranty on textile products and electrical or electronic components.*

5. Right to be Heard – YOU THE CUSTOMER should have the right to speak to someone of authority anytime you can't get satisfaction through normal channels. If our sales representatives aren't able to help you, our supervisors have a mandate to take customer-satisfaction issues all the way to the owner of the company if necessary.

Editor's Note: The Bill of Rights for Reloaders is Dillon Precision Products' customer-satisfaction policy. It remains very much unchanged from the day the company was founded. The disclaimer about textile products and electrical or electronic components reflects the reality of how those products are produced in today's world. Ultimately, our founder recognized that satisfied customers are our best advertising, and the only thing that differentiated his company from all the others at the time was the warranty and customer service he offered. We constantly strive to live up to his standards. Please let us know if we're not succeeding.

Rapid Trim 1500 Case Trimmer^

Dillon's RT 1500 shown installed on an XL 650.

The RT 1500 is used just like a standard size die. The big difference is that while you are pushing the case into the die to size it, an electric motor driving a carbide cutter at 4500 RPM is trimming the case to length. Chips are drawn off through a vacuum manifold that clamps to the outside of the special size/trim die. *(Vacuum cleaner and hose not included.)* The RT 1500 is equipped with a quick-disconnect power cord; and it can be used on any standard reloader, single stage or progressive.

The RT 1500 Case Trimmer **62164** is **$400.00.** (Available only in 110 volt 60 hz.) Size/trim dies are sold separately (see chart below). Replacement carbide cutting blades, **13141**, are **$24.19** each. Upper lock rings, **13559**, are **$8.79** each.

MILITARY BRASS?

Eliminate the "Grunt Work" with Dillon's Super Swage 600

20095
$125.00

Until now, reusing military brass, with its crimped primer pockets, has been a tedious task. The Dillon solution is a remarkably simple device that bolts to your bench and allows you to swage the primer pockets with speed and ease. The case is supported from the inside, so you won't be tearing the rims off the brass. A tool steel, hardened swage rod (easy to change from large to small primers) simply rolls the crimp away. No reaming is necessary. Our unique compound cam leverage system assures not only ease of operation, but perfect alignment with each and every round. Sound simple? It is and it works. What's more, it's inexpensive. The Super Swage 600 comes with large and small swage rods.

6.8 SPC Back-Up Rod	**62124**	**$26.39**

Case Preparation Equipment

Vibratory Case Cleaners Case/Media Separators

CM-2000 Case/Media Separator^	20675	$100.00
CM-500 Case/Media Separator^	21045	$70.00

CV-2001 – The Industry Standard

Dillon's CV-2001 Vibratory Case Cleaner is one of the largest in the industry. Its 12-1/2 quart bowl capacity will allow you to polish up to 1,300 .38/.357 or 550 .30-06 cases per hour. Not only is our capacity greater than most, but our motor is also larger in horsepower, internally cooled, thermally protected, and turns on precision ball bearings. This is no "hobby" machine! The bowl and base are constructed of 7/32" thick injection molded high-strength polypropylene which is impact and abrasion resistant.

Case/Media Separators

After we sold thousands of our famous first generation FL-2000 case cleaners, customers who had purchased them began asking us to address the problem of separating the cleaned and polished brass from the cleaning media. We knew from the beginning that the simplest method of separating would be a rotating squirrel cage, but we had to find a design we could manufacture economically. Our problem was that it had to be BIG – big enough to handle the entire load of the FL-2000 series case cleaners. The solution was an injection molded reversible part. Simple, and it works great. Our device is large, 10" x 14", and will hold more than 1,600 .38 Special cases. It sits on a large media collection tub that measures 18" x 22". The tub keeps the mess off the floor and bench. It's fast – so fast it will remove media from 1500 rounds of .223 brass in a matter of seconds.

Limited Work Space?

Dillon created the CV-750 heavy duty Vibratory Case Cleaner for those with limited space. This case cleaner uses the same motor as the CV-2001 and is every bit as tough – just more compact. To accompany the CV-750, the CM-500 does the same job as the larger CM-2000 Case/Media Separator; and, like the CV-750, handles just about half the capacity of the larger unit. Although scaled down in size, these two pieces of equipment are every bit as tough as their full-sized counterparts. We used the same materials in their construction and designed them to work just as hard – and do it in a more compact area!

CV-2001^, US 110v	20493	$240.00
CV-750^, US 110v	19455	185.00

Rapid Polish 290 is the first cartridge case finish designed specifically to bring a brilliant shine (20 percent brighter than tumbling media alone) and a protective coating to reloaded ammunition. Simply add several capfuls to the media in your tumbler and run. Rapid Polish 290 has a great residual value and stays in your tumbling media. You'll use less each time you clean your cases.

Rapid Polish 290 contains no ammonia, so it won't weaken brass cases!

Rapid Polish 290

8 oz. bottle.	13804	$9.99
Case (20 pc.)	20255	149.99

Dillon's **D.C.L.** non-aerosol case lube is easy to use. Simply lay your cases out, spray lightly with one or two passes and you've done it. No mess, no guesswork. Within minutes the lubricant distributes itself around the cartridge cases and you're ready to load. Try a bottle. You'll never use a grease pad again.

8 oz. bottle	13733	$15.99
Case (20 pc.)	20256	223.99

10 bottles of polish/10 of lube^		
Case (20 pc.)	21375	$186.99

Don't Forget Polishing Media!

Crushed walnut hull polishing media quickly cleans even the dirtiest of cases and is the best solution for badly tarnished, range-pick-up brass.

15-pound bag **13287** **$23.99**

Ground corn cob polishing media is the best there is for that final polish. Leaves your brass looking better than factory new!

10-pound bag **13496** **$15.99**

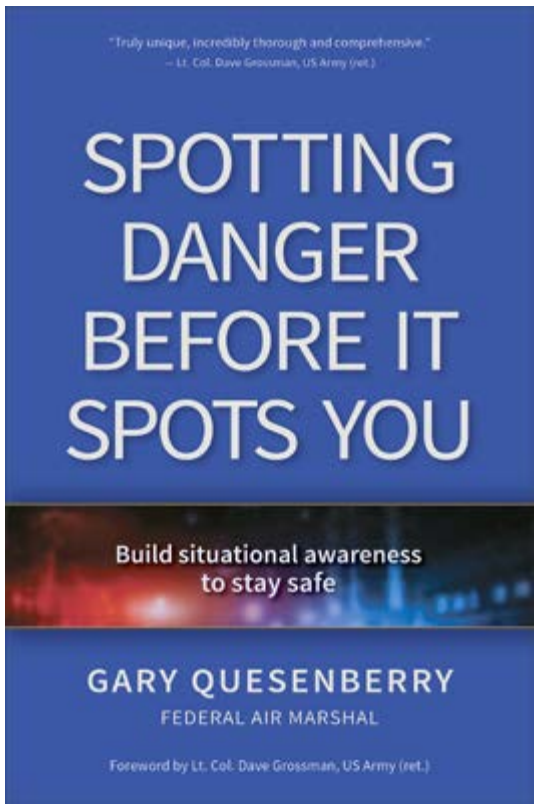
Situational Awareness: How Being Aware of Your

By Maureen P. Sangiorgio

As I stepped into the sandwich shop, I couldn't help but notice this young guy standing out front. It was around dinnertime, and this place was always busy at that time, folks picking up dinner on their way home from work. I've never seen anyone just standing around; they are always coming and going, and almost always in a hurry. It was also end of Summer, yet he had on a thick sweatshirt hoodie, and was wearing the hood up to cover his head. He also had on large, dark sunglasses, even though it was early evening.

When I came back out of the shop, I walked to my car, and noticed he was sitting in his car, not eating or drinking anything. As I pulled away, I checked my rear-view mirror, and saw he was right behind me. I was going to drive home, but thought I better not, as I didn't want him to know where I live. So I drove across town to a nearby Wal-Mart, and, thankfully, didn't see him anymore.



I found out a few days later on a neighborhood social media site that others had noticed the same guy at the shop, had a similar scary experience, and described him in exactly the same manner. Local police were notified. Turns out he was watching who used the ATM machine inside the shop, so he can follow them and rob the unsuspecting person of cash.

Startling Statistics

According to the FBI, there were 1.2 million violent crimes committed in the United States in 2018 (the FBI defines violent crimes as murder, rape, robbery, and aggravated assault). That boils down to about 369 violent crimes per 100,000 inhabitants. And among the various types of violent crime reported in the United States, aggravated assault (assault with a deadly weapon) is the most common. In 2018, the crime rate (the number of reported instances per 100,000 inhabitants) was 246.8 for aggravated assault.

Scared yet? No worries. There is plenty you can do to protect yourself and lower your risk of becoming a statistic. A great first step is to improve your situational awareness.

What is Situational Awareness?

According to Gary Quesenberry, author of *Spotting Danger Before It Spots You*, situational awareness is the ability to identify and process environmental cues to accurately predict the actions of others. "You can't fight what you don't see coming," explains Quesenberry, who is a retired Federal Air Marshall, and has been featured on the History Channel's "Top Shot" program. "Without situational awareness, you're always going to be reactive instead of proactive. So if something goes down in front of you that you are unaware of, your reaction times will be longer because you were not aware of your surroundings. In a violent situation, not only seconds count, but milliseconds count. So you if you want to give yourself the best opportunity to survive a violent encounter you have to have situational awareness in place first."

Action Steps

Look in the mirror. The first step is to look at yourself the way a predator will size you up. Do you have any of the traits that predators are looking for when they are trying to determine if you are a soft or a hard target? "People will be considered hard targets when they appear aware of their surroundings, carry themselves with confidence, and look like they could handle themselves in a fight," says Quesenberry. "If you're away from your house, in town running errands, always keep your head up, and look around often. Don't look down at your phone, and don't wear headphones. That's a sure way to cut yourself off from your surroundings."

Think, "What if?" Whenever you enter an area, use "what if scenarios" to rehearse your reactions to bad situations. "By imagining various scenarios as we move through our environments and visualizing the possible outcomes, we better prepare ourselves to act should the need arise," explains Quesenberry. "Remember to include solutions that address all three elements of personal safety, which are avoidance, de-escalation, and confrontation. Of those three, avoidance is the best way to stay safe 100 percent of the time."

Hatch an escape plan. It's also a good idea to take in your surroundings when inside a building just in case you need to escape quickly or use an item at hand to defend yourself. For example, make a mental note of

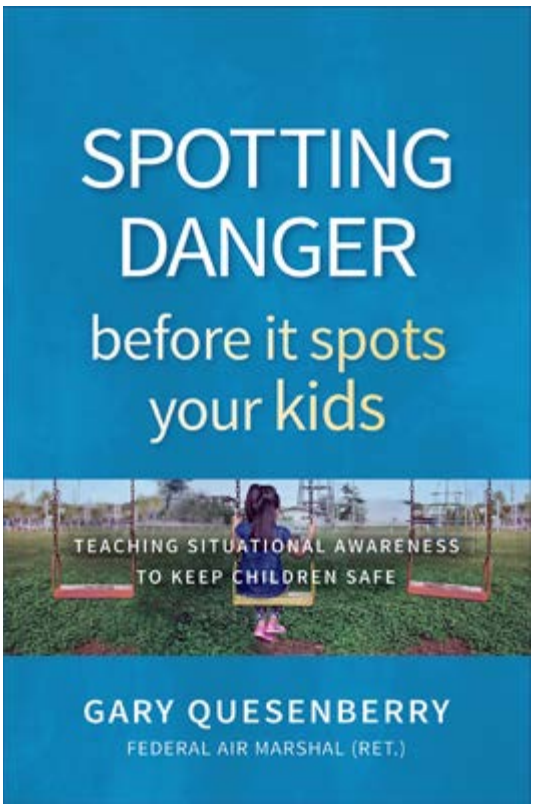
800-223-4570 • dillonprecision.com

Surroundings Just Might Save Your Life One Day

where the chairs and lamps are, so you can either use them to defend yourself, or throw one through a window for your escape.

Search for the right spot. If it's nighttime, and you have to go shopping, or out to dinner, scan the parking lot for light poles. "When you pull into a parking lot, always try to park under a light, and as close to the building as possible," advises Fred Mastison, professional firearms and combatives instructor, and president of Force Options USA. "The farther you have to walk to your car, the longer you are exposed to a criminal."

Learn to "read." According to Mastison, situational awareness is learning how to read the environment and people. "How are they carrying themselves? Are they doing something that catches your eye? Look for activity where the person is actively scanning the area and their behavior is not calm. When most people are walking from their car to the store, or when exiting a store, they are calm and relaxed. But when you see someone jittery and nervous or agitated, and their eyes are scanning around, that's a sign."



It's also a good idea to check out their hands. Are their hands in their pockets, under their shirt, or inside their coat while walking? "If so, that's a sign there's a weapon involved 99 percent of the time," warns Mastison. Also look at their clothes to see if there is a bump or bulge showing, and if they are constantly reaching at their waistline. "If so, they could be readjusting their firearm. Are they pulling their pants up time and time again? The weight of a firearm could be pulling their pants down."

Check your car. A mistake victims have made is to unlock their car from a distance with their keyless remote. "You don't want to unlock your car until you can see all the way around it," says Mastison. "Unlocking it from a distance allows somebody who's near your car to slip in without you even knowing it." Look underneath the car, and inside the car. When inside, take your rearview mirror and dip it down so you can look into the back seat. If someone is hiding there, you can see them. It's also a good idea to turn the mirror down before exiting your car, so when you return to your car, you can check the rearview mirror from the outside before getting inside.

Another tip: keep a small, extra-bright LED flashlight in your pocket or handbag so you can shine the light around, under, and inside your car before opening the door. To save time, when exiting a building, place the flashlight in your hand.

Talk to your kids. Today, if a child is being bullied at school, that follows them home because of the many hours kids spend on electronic devices. "Their tormentors can now harass and upset them electronically, making it almost impossible for them to escape," notes Gary. "It seems easy for us as adults to approach the problem from a 'just turn the phone off' perspective, but that's not as easy for someone in their teens. Aside from cyber-bullies, our children also face the threat of online predators, sexual exploitation, catfishing, and bribery, to name a few."

In Gary's second book, *Spotting Danger Before It Spots Your Kids*, he advises parents to spend time with their children teaching them about situational awareness in a fun, engaging way. "A child that's aware and engaged with what's happening around them has a much better chance of spotting a potentially dangerous situation and alerting someone to the problem," says Gary. "This helps to build their confidence and gives them a more active role in their personal safety."

Children's security comes from their ability to observe their surroundings, identify threatening situations, and communicate those threats to the adults around them. "That's their best defense against danger, and it's important that we as adults give them the tools they need to properly develop those skills," advises Gary. "We accomplish this through simple games that reinforce memory, spatial awareness, comprehension, analytical thinking, problem-solving, and decision-making. It's almost impossible to sit a 6-year-old down and talk openly about the importance of situational awareness, but through games we can give them the foundation they need to build those awareness skills as they get older."

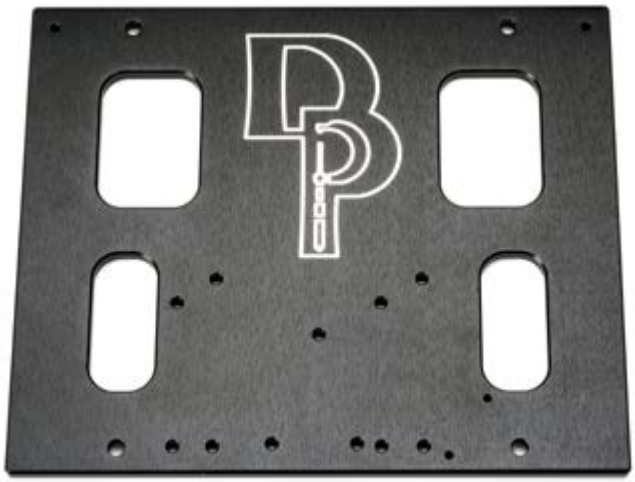
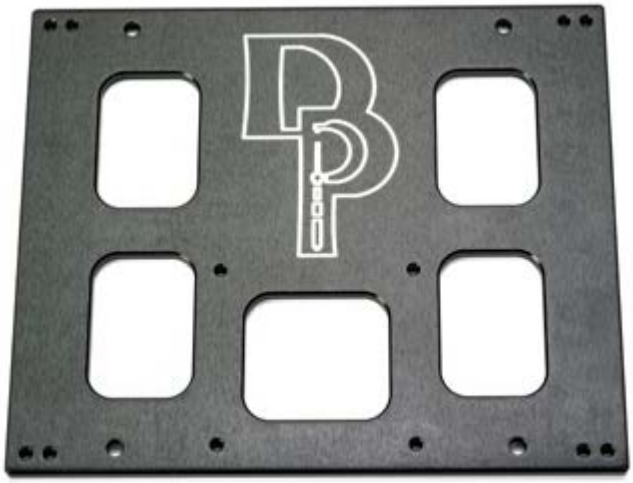
Dillon's Benchtop Mounting Plates



62005 $95.00



62006 $95.00

As seen in the Dillon videos, these plates bolt directly to your bench top, and are drilled and tapped to allow mounting your reloading machine (and loaded cartridge chute if necessary) directly to the top of the mounting plate.

One mounting plate (**Stock Number 62005**) is drilled and tapped to accept the following loaders: XL 750, XL 650, RL 550 and Square Deal "B". The other mounting plate (**Stock Number 62006**) accepts the following reloading machines: RL 1100, CP 2000, Super 1050 and RL 1050. Additionally, it accepts any Dillon reloading machine that is *mounted on the Dillon Strong Mount*, including the XL 750, XL 650, RL 550 and Square Deal "B".

The plates measure 9-3/4" x 11-3/4" x .375" thick, and plate mounting hardware is included.

"Border Shift" Ammo Bag^

Dillon's two-compartment ammo bag is constructed with a flexible inner liner that will allow the entire volume to be accessible from either zippered opening. You'll never again mix fired brass with loaded rounds!

Mr. Bulletfeeder®

by Double-Alpha

Mr. Bulletfeeder has been around for some years now, and has gained a huge following worldwide. The patented system is by far the best performing personal-use bullet feeder on the market, and has been, since its introduction in 2006. Double-Alpha Academy has teamed up with RAK Systems, the original designer and patent holder of the system, to redesign and streamline the product, making it more compact, more versatile, better looking and more affordable than ever before.

The Mr. Bulletfeeder by Double-Alpha is now a production-grade product, with Double-Alpha Academy – a world leader in practical-shooting-related product manufacturing and distribution – at the helm. The design allows the bullet collator to be mounted onto the casefeeder, eliminating any increased footprint and space use, and the new patent-pending dropper is a huge step forward in design, durability and reliability.

On the Cover

McLaren SCOTTSDALE

Gabby is this month's cover model and the other beauty on our cover is a 2021 McLaren 720S Spider in Fistral Blue (although we're calling it "Dillon Blue"). With 710 HP, this luxurious sports car goes from 0 to 62mph in just 2.9 seconds! The MSRP is $383,524 and we want to thank McLaren Scottsdale for loaning us this exotic car for our photo shoot. Their showroom is located just around the corner from Dillon Precision so make sure to give them a visit.

McLaren Scottsdale, 8355 E. Raintree Drive, Suite 170 in beautiful Scottsdale, Arizona, 480-214-7260, mclarenscottsdale.com

DILLON

HP1 Electronic Hearing Protector

- Protection Rating NRR 21
- External battery compartment
- Auto shut off extends battery life
- Extra-deep, replaceable ear pads
- Separate volume controls
- TRUE stereophonic sound
- Collapsible for ease of storage
- One-year warranty on electronics

Dillon's HP1 Electronic Hearing Protector amplifies weak sounds while at the same time blocking out loud, harmful noise. During loud noises, the HP1 maintains a comfortable level of sound transmission – HP1 Hearing Protectors are designed to never completely shut off. The Dillon HP2 Folding Hearing Protector is comfortable to wear for extended periods and folds for easy storage when not in use.

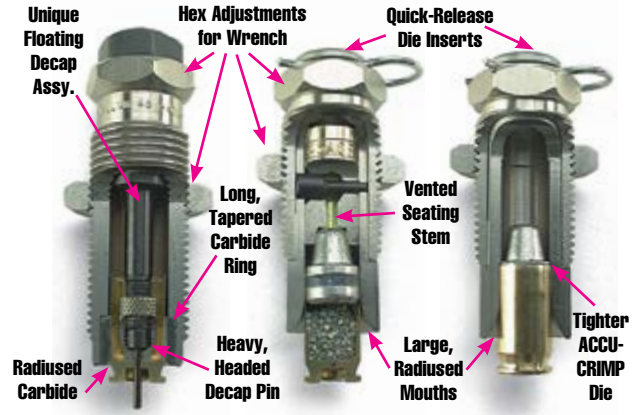
PRIMER FLIP TRAY

A heavy, high-quality tray large enough for the Federal primer package.

13606, $26.00 ea.

Dillon Die Sets



Sizing/Depriming Die (Pistol)

Our sizing/depriming dies feature a "floating decap assembly" with a snap spring that throws the spent primer off the pin and eliminates the primer "draw back" that often occurs when decapping military brass. The primary feature of Dillon's size die design is the long, tapered carbide ring with a radiused opening. That radiused opening, and its importance to progressive reloading, is one of the reasons why our seat and crimp dies are better. We found a way of manufacturing these dies that has enabled us to make the lead-in radius even bigger! The bigger radius makes progressive loading with our equipment even smoother – but that's still only a part of the story.

Bullet Seating Die (Pistol)

Our quick-disassembly seat die allows the user to disassemble and clean the seating die without losing adjustment. In this manner, bullet lube and shavings can be quickly removed from the die, thereby guaranteeing a constant seating depth. We've incorporated a "flip-flop" seating stem and a clip that enables you to remove the die insert and change the seating stem from round nose to semi-wadcutter without unscrewing a seating stem. Dillon's double-ended design makes it simple to remove a pin, reverse the seating stem, make any minor seating depth adjustments that may be necessary and go on loading in a fraction of the time.

Crimp Die (Pistol)

We've made it easy for you to remove the die insert for cleaning without having to change the critical crimp adjustment. Once your crimp die is set for the proper amount of crimp, you'll never have to change it. This is especially good news for all of you who load lead bullets! Before, you had to unscrew the die from the toolhead and disassemble the die in order to remove any bullet lube or lead residue. Then, you had to start from square one to re-adjust the crimp. Those days are over. All you have to do now is pop a clip and the die insert drops into your hand for cleaning.

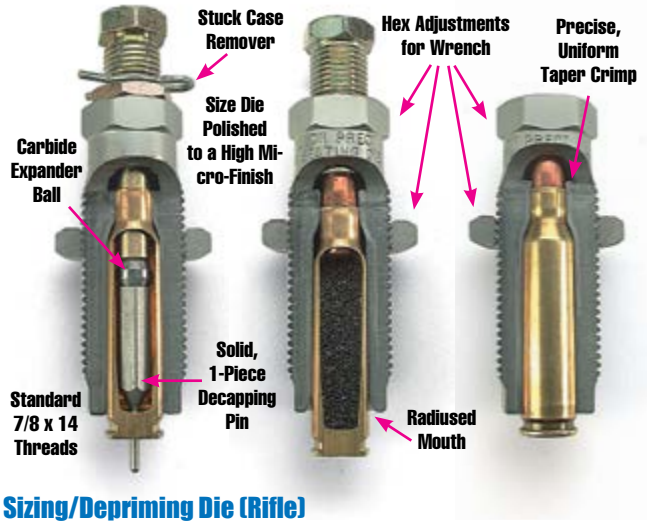
Spare Decapping Pins

Package of 10	**21528**	**$8.00**



Sizing/Depriming Die (Rifle)

The sizing/depriming die is full-length, to minimum tolerances, sizing cases down to function in semi- and full-automatic firearms. We strongly suggest that a headspace case gage be used to correctly adjust the size die.

For high volume users, such as commercial reloaders, law enforcement agencies, and high power or service rifle competitors, we also offer .223 and .308 die sets with a full-length carbide sizing die. Lubrication is still required, but the increased scratch resistance and die longevity of carbide are of great benefit to these groups of users.

The depriming assembly includes a carbide expander ball for "squeak-free," effortless neck expansion. This expander ball is located in the middle of the depriming stem to take advantage of superior initial leverage for easier extraction.

In the event of a stuck case, the design of the depriming assembly allows it to function as a stuck case remover.

Bullet Seating Die (Rifle)

Our bullet seating die is internally designed to keep the bullet straight throughout the seating process. Once properly adjusted, the only measurable runout will be that which is inherent in the bullet.

Taper Crimp Die (Rifle)

The taper crimp die is also specially configured to center both the case neck and the case body, thereby aligning the entire cartridge for a more uniform crimp. Dillon Rifle Dies are designed to meet the more rigid requirements for both accuracy and precision demanded by today's marksman.

A taper crimp die is preferred for loading ammunition intended to be used in semiautomatic firearms with detachable box magazines, and in lever-action firearms with tubular magazines.

BL 550^

Dillon's Basic Loader

$370.00

15399

Reloading Dies and Caliber Conversions sold separately

Pictured with optional accessories:

Strong Mount 22051 $85.00

Dillon's RL 550 has long worn the title of "The World's Most Versatile Progressive Reloader," and stripping it down to its most basic form – Dillon's BL (Basic Loader) 550 – adds a whole new dimension of versatility for the shooter/hunter who needs to feed several rifles. The BL 550 is essentially an RL 550 without the automatic priming and powder systems. Capable of loading over 160 calibers – just like the RL 550 – it uses any manufacturer's standard 7/8" x 14 reloading dies. It's priced comparably with other manufacturers' turret presses; yet unlike them, it's fully upgradeable to Dillon's Progressive RL 550 loader! The interchangeable toolhead (*Page 26*) makes it quick, easy and inexpensive to change calibers.

AUTO PRIME SYSTEM^	**16627**	**$115.00**

PRIMER SYSTEM EARLY WARNING^

Allows you to focus on loading instead of worrying about failing to seat a primer, and is an easy slip-on attachment to the auto prime system. **20302** **$35.00**

AUTO POWDER SYSTEM^

Accurate to within 0.1 grain, our Automatic Powder Measure is world renowned for its charge-to-charge consistency. **20251** **$125.00**

OPTIONAL MAGNUM RIFLE POWDER BAR **21353** **$45.00**

AUTO EJECT SYSTEM^

Greatly increases your ammo production capabilities and adds a Cartridge Chute/ Bracket and a Cartridge Bin to your reloader. **22120** **$41.00**

BL 550 POWDER DIE^

Extra powder dies for your BL 550 make it easier to set up additional toolheads for loading different calibers.

Powder Die:	**16629**	**$26.00**
Oversize Die:	**16626**	**28.00**
Plastic Funnel:	**16617**	**9.00**

POWDER MEASURE ADAPTER

If you load rifle cartridges with long-grain extruded powder, you can now use any manufacturer's powder measure with 7/8" x 14 threads on your RL 450, AT 500, BL 550 or RL 550. *(Requires the use of an RL 450 powder die – see below.)* **20029** **$30.00**

RL 450 Powder Die **20308** **30.00**

If You want to Become a Gunsmith You need to read this book!

LEARN HOW YOU CAN BECOME A CERTIFIED GUNSMITH!

Becoming an American Gunsmith shows you a path to follow to become a Certified Professional Gunsmith, without having to give up your lifestyle, income, leave home, or spend tens of thousands of dollars attending a campus based school.

Mr. Kelly details how mastering the Design, Function, and Repair (DF&R) training concepts revealed in this book will enable you to maintain, repair, build, and customize firearms as a Certified Gunsmith.

This information will provide you with the ability to follow your passion of working on firearms and ensure your personal freedom and financial security. Included:

- How to set up your shop
- What tools and equipment are *really* necessary
- Numerous suggestions and resources to help you establish a *successful* gunsmithing shop.

Read this book and learn how you can be a Certified Gunsmith, protecting and participating in the ongoing history of firearms in America.

New Release Sale! Reg $14.95 plus s/h

Dillon Reloading Accessories

A **Strong Mount** increases your machine's "footprint" to over 10", spreading the load over the whole bench instead of stressing the leading edge. For XL 750/650 owners with limited overhead clearance, the XL 750/650-only mount raises the machine 6" above the bench top. All mounts come with all the fasteners necessary to mount your machine and are coated with a durable black wrinkle finish.

RL 550/XL 750/650	**22051**	**$85.00**
XL 750/650-only	**22052**	**83.00**
"SDB"	**22223**	**95.00**

Our **Bullet Tray** is a simple, shallow aluminum tray designed and located for economy of motion. Our tray works on the Square Deal "B", RL 550 and XL 750/650 when equipped with the RL 550/750/650 Strong Mount, and a separate kit is available for the RL/Super 1050.

Bullet Tray Kit	**22214**	**$55.00**
1050 Tray Kit	**22215**	**55.00**

The **Low Powder Sensor** provides an audible and visual reminder when it's time to refill your powder reservoir. When the powder level drops to about 1,000 grains remaining in the reservoir, a buzzer will sound and a bright red LED will light. Designed to fit all Dillon powder measures. Made of clear polycarbonate, it simply replaces the die-cast metal lid supplied with the measure, and operates on two AAA batteries (included).

16306 **$50.00**

Our **Toolholders** are available for your reloading machine and ensure that the tools you need to service your reloader are handy and organized. No more digging around your bench trying to find the right size hex wrench!

XL 650 with Wrench Set	**11555**	**$44.00**
RL 550/XL 750 with Wrench Set	**11541**	**42.00**

"D-TERMINATOR" Electronic Scale

- 1500 grain/100 gram capacity
- Accurate to 0.1 grain/0.01 gram
- Uses four AA batteries (included)
- Comes with its own AC adapter
- 100g scale check weight included

NOTE: Dillon electronic scales are covered by a one-year warranty from date of purchase.

$149.99
10483

Dillon's "Belted Magnum" Powder System features a maximum-capacity steel powder bar that can dispense more than 100 grains of extruded IMR powder. Magnum rifle cartridges can require from 70 grains to well in excess of 100 grains for a single charge. We tested this system with various extruded rifle powders and found that powder charge variations stayed within plus-or-minus three-tenths of a grain.

97126 $195.00

The **Powdercheck System** (available for XL 750/650 and Super 1050 reloading machines) sounds an alarm if the powder charge in a round is out of limits either high or low.

21044, $90.00 each

An **Aluminum Roller Handle** gives your reloader an entirely new "feel," reduces operator fatigue, and makes primer seating easier.

17950 $60.00

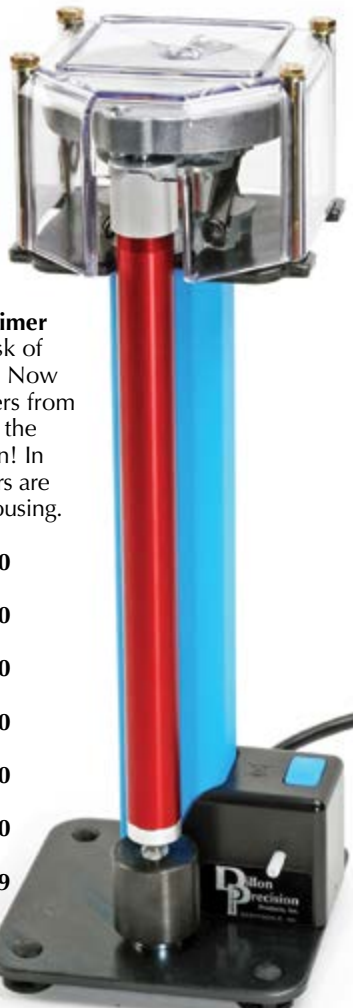
Dillon's 1" Bench Wrench fits our 1" Die Lock Rings which give you more space on the toolhead.

10842, $15.00 each

Our **Machine Maintenance Kits** come with everything you need to keep your Dillon loader cleaned and lubricated up to factory specifications. Available alone or in combination with a spare parts kit for your machine.

Maintenance Kit Only	**22211**	**$35.00**
w/SDB Spare Parts Kit	**97015**	**52.00**
w/550 Spare Parts Kit	**97016**	**50.00**
w/750 Spare Parts Kit	**97500**	**67.00**
w/1050 Spare Parts Kit	**97018**	**70.00**

RF 100 Automatic Primer Filler



The **RF 100 Automatic Primer Filler**^ eliminates the task of filling primer pick up tubes. Now you simply pour your primers from their box into the top, press the blue button and watch it run! In about two minutes the primers are inside the protective metal housing.

Large Primer Filler	**97077**	**$425.00**

Lyman Neck Expander Die

Improves accuracy of cast and jacketed bullet reloads. Extends case life. A "Must-Have" die for the cast bullet or flat-base bullet user. The first step expands the inside of the case neck to just under bullet diameter for precise case neck tension in the finished reload. The second step expands the case mouth to bullet diameter or slightly over. This allows the jacketed or cast bullet to be started perfectly centered in the case mouth and properly aligned with the axis of the case neck. By adjusting the plug slightly deeper, the second step also provides a slight flaring of the case mouth for reloaders using cast bullets.

Dillon AkroBins^

AkroBins are ideal for reloaders who load several calibers, bullet weights, bullet shapes, etc. We've been including these bins with our machines for years, and now we're stocking them in quantity for our customers.

- The small bins (the ones we use as Square Deal "B" cartridge bins) are 4-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The RL 550/XL 650/750 cartridge bins are 6-3/4" long x 3-7/16" wide x 2-13/16" deep.
- The 1050 bins are 10-1/4" long x 4-3/8" wide x 4-3/4" deep.
- The double-extra-large bins we use on our SL 900 measure 13-3/4" long x 6-1/2" wide x 6-3/4" deep (all inside dimensions).

AkroBins are made of heavy-duty polypropylene with permanent, molded-in color (ours are blue). They're virtually unbreakable; unaffected by weak acids and alkalis, and are also water, rust and corrosion proof. Hang 'em, stack 'em, rack 'em and fill 'em – you just can't beat 'em! Buy several and get your "stuff" together.

Description	Stock #	Each	6 ea.	12 ea.
"Square Deal" Bin	13756	$2.99	$15.30	$24.84

Dillon Utility Boxes^

Dillon's Utility boxes are ideal for all those accessories that don't quite fit into the compartments of your shooting bag. The large box measures 13-1/2" x 5-3/4" x 2-1/4" and the small box measures 4-5/8" x 6-3/8" x 1-5/8". Use them for cleaning gear, extra magazines, repair parts, first aid supplies, reloading accessories and tools – the list is endless.

Have adequate ventilation at all times and wash your hands thoroughly after exposure.

Shellsorter

The **SHELLSORTER** is a simple product designed to reduce the time you spend sorting brass, allowing you to enjoy more time reloading and shooting. The **SHELLSORTER** is comprised of three pans designed to sort several common calibers. The fastest way to sort is to stack all three of the pans together on a common five-gallon bucket, yellow pan on top and black on the bottom; in that way, with a few shakes all your brass is sorted by caliber at the same time. The **SHELLSORTER** is made of ABS, a strong plastic that will give a lifetime of service.

19972 **$39.99**

AMMOBRASS, LLC Swage Setter

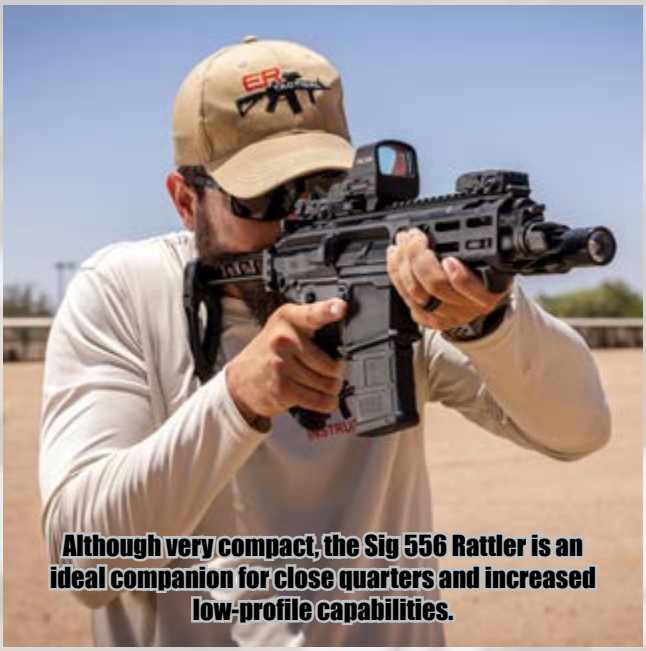
Why Pistols SUCK

By Rob Orgel

If we're to believe American cinema, a pistol is all you need to win your gunfight. I mean, the good guy has a pistol, and all the bad guys have machine guns. The good guy STILL wins every time. Yeah, right.

So, reality check. Let's understand our capabilities. Under duress, how's your ability to draw a pistol from a holster and accurately engage a potentially moving/aggressive target? Your ability to place a round on the target to successfully stop the threat can be difficult… to say the least. "Success" means more than just placing a round where it needs to be, because placing a round doesn't necessarily mean the assailant is going to fold up and quit.



Although very compact, the Sig 556 Rattler is an ideal companion for close quarters and increased low-profile capabilities.

Put this in perspective: Let's look at the capabilities of the weapons (carbine versus pistol) themselves in terms of terminal ballistics, accuracy and effective distance.

• **Terminal Ballistics** – When a pistol round impacts meat, it's – at best – traveling around 1300 to 1600 feet per second. On the other hand, a 5.56 carbine round is traveling 2700 to 3200 feet per second.

To use an automotive analogy that's all too common these days, someone is texting and driving through a parking lot at 15-25 mph and comes to an immediate halt against a barrier or light pole. The driver will probably incur some neck injuries but will in all likelihood walk away from the accident.

If the same driver were to text and drive down the freeway at 75 mph and crash, there's a strong likelihood the driver would die in said vehicle. (Moral? Don't text and drive.)

Given the handicap of limited velocity, how do pistols fill the gap? Using science and technology – hollow point and other defensive ammo – ammunition companies have worked hard to increase the effectiveness of the pistol.

Back to the parking lot – rather than running down someone at 15 mph with a stock vehicle, you could attach medieval swords to the front of the car in order to increase its "effectiveness" at parking-lot speeds. But, by comparison to freeway speeds, it doesn't matter if someone is hit with a semi-truck or a motorcycle – sheer speed will do the job. So,

ROB'S ON POINT

The author chooses to carry a far more capable weapon in a low-profile backpack.

The discomfort of deploying your pistol at distance and under duress, illustrated in this photograph.

regardless of the application of science and technology to pistol ammunition, it's still not as effective as rifle-velocity ammunition.

• **Accuracy** – Obviously your ability to hit the intended target in a life-threatening situation isn't the same as on a static range, but for the moment let's pretend it is. If you're required to hit a 10-inch target with your pistol, at what distance would you need what amount of time as compared to your rifle? It's likely that you can clear ten times the distance in one-half the time with a rifle.

Now, let's apply that to a shooting situation. If you and your buddy place a steel target downrange and say, "Three…two…one…GO!" whoever hits the target first is likely to be the survivor of that shooting. If one of you is shooting a rifle versus a pistol, who's likely to win nine (or 10) times out of 10?

Regardless of who wins timewise, there are still terminal ballistics to consider. By comparison, pistol gunshot wounds are considerably LESS deadly than rifle gunshot wounds (GSW). In talking with medical professionals, it's not uncommon to hear of someone walking into an emergency room with a pistol GSW and walking out of the hospital two days later. In short, rifles are MUCH more successful at stopping a threat.

Rifles are also easier to shoot accurately. Having multiple points of contact – buttstock, cheek weld, pistol grip, handguard – makes you more one with your weapon, creating greater accuracy potential even in a life-threatening engagement. Due to gross muscle skills being used under duress, the rifle is a more natural system with which to engage a threat. For example, run a mile, and at the end, with your heart racing, is it easier to throw a baseball or sign your name? In a gunfight, you're off balance most of the time, so the rifle gives you an immediate advantage.

• **Effective Distance** – As another example, let's take a world champion pistol competitor versus an intermediate recreational rifle shooter. Now, place a target at 250 yards. I'm not saying the pistol shooter can't hit it – but add stress and time and the rifle shooter WILL beat the pistol shooter. Then – once again – apply terminal ballistics.

Since few of us are world champion pistol competitors, consider the amount of time and practice it takes to get really good with a pistol. One might compare it to learning to spin a basketball on your fingertip. It takes a lot of time and practice to master and can slip away rapidly if we don't constantly practice. Few adults and fewer children display the level of dexterity required.

On the other hand, one might compare learning to shoot a rifle to riding a bicycle. Once we have the skill, we tend to retain the skill. That pretty well explains what makes the difference between pistol and carbine shooting. So, why don't we choose to "ride the bicycle," then?

"My pistol is for me to use fighting my way to my carbine!"

Compared to a rifle, the pistol is impotent. It's equivalent to a race between a car and a bicycle. It boils down to the capabilities of the vehicles in the

800-223-4570 • dillonprecision.com

With a little training, rapid deployments can still be fluid with the highly capable 5.56mm NATO round.

Keep in mind, when it's in your vehicle or your home, your rifle doesn't have to be compact.

race. Even a highly skilled Olympic cyclist is set for failure racing a car. So, why a pistol, then? Simply because you can conceal it with ease and carry it all day without discomfort. So, where is YOUR rifle? Personally, I carry a carbine locked in my TruckVault® (truckvault.com).

40029 $12.99

"Plan B"
Very-Bad-Day Planner Holster

Dillon's **"Plan B" Very-Bad-Day Planner Holster**^ holds a handgun and a spare magazine or pepper spray, yet it fits in with business clothing and won't draw undue attention. It looks like a typical day planner, but inside there's a holster that's adaptable for either right- or left-hand draw. It fits most .380, 9mm, .40 and .45 caliber autos, including: Beretta, Colt, GLOCK, HK, Kahr, Kel-Tec, Ruger, Taurus, SIG, and Smith & Wesson. Will also hold small-frame revolvers with two- to four-inch barrels.

"Plan B" Holster **10252** **$29.99**

Mernickle

$79.99

Conceal-Carry Performance Series

Conceal-Carry Performance Series revolver holsters can be worn strong side, appendix carry or cross draw and are fully molded. Auto holsters are strong-side only.

4-3/4" SA Colts/clones	**11560**
4-5/8" Ruger Blackhawk	**15765**
GLOCK 17/22	**62277**
GLOCK 19/23	**62278**

This holster/mag pouch combination was designed for the Single Action Shooting Society's "Wild Bunch" category, incorporating a holster and mag pouch that look like they were made at the turn of the century, yet feature state-of-the-art speed and accuracy.

1911 Holster	**19947**	**$139.99**
Mag Pouch	**19946**	**44.99**

Pachmayr Pac-Mag
Gun Concealment Magnet

The Pachmayr Pac-Mag™ Holds up to 30 pounds and the three-magnet design gives the Pac-Mag more strength than any other gun magnet on the market. Secure almost any gun – pistol, rifle or shotgun – practically anywhere!

10098 $19.99

Real Avid Master Sight Pusher™

The Master Sight Pusher is a professional-grade tool that makes quick work of changing pistol sights while protecting both gun slides and the sights themselves. Heavy-duty, built to last and smartly designed to work on most any modern pistol sights. The oversized, ergonomic Easy Torque™ Handle partners with extra-fine drive threads to provide maximum torque with minimal effort when removing or installing sights. The Universal Press Block features multiple contact surfaces for almost any size and style of press-fit dovetail slots and sight profiles. Adjustable non-marring contact surfaces securely hold both 1911 and flat-bottom pistol slide styles.

Master Sight Pusher **16496** **$149.99**

Sack-Ups
Protective Gun Sacks

Sack-Ups Protective Gun Sacks protect your firearms from the dings and scratches that tend to happen when you're rifling through your gun safe looking for…well…your rifle. They don't take up as much room as a gun case, but provide just enough padding to keep your guns safe…in your safe.

HYSCORE
Six-Gun Modular Pistol Rack

The HYSKORE Six Gun Modular Pistol Rack is constructed from closed-cell, non-reactive foam that will not absorb moisture or react with lubricants or solvents. It has a soft, suede-like finish, but is rigid enough to offer firm support. The modular feature of the rack also means that two or more racks can be connected together and reconfigured to take maximum advantage of all available space in your safe or vault. The rack measures 11-1/4″ wide x 7-1/2″ deep x 6″ high.

Nighthawk Custom
Drop-In 1911 Trigger System

When looking to upgrade the performance of a 1911 pistol, a common improvement sought by shooters is a high-quality trigger job, with a crisp, clean break. Until now, a high-quality trigger job has never been in the realm of a "drop-in" upgrade. Nighthawk Custom has changed that with the introduction of its Drop-In Trigger System (DTS) for 1911 pistols.

An all-in-one unit, the DTS replaces your existing hammer, hammer strut, sear, disconnector, and sear spring. Your existing sear pin and hammer pin will be retained for use with the DTS, but no other parts are necessary for installation. With a steel housing securing the unit, the DTS features all Fully Machined™, stainless steel internal components. The traditional three-pronged sear spring is no longer necessary as the springs for the disconnector and sear are built into the unit. A single-leg grip safety spring is included with the DTS to replace the existing sear spring.

The DTS is designed for use in most 1911 models, and installation is simple enough that minimal gunsmithing skills are necessary.

Stainless Drop-In Trigger System	**18930**	**$299.99**

Zastava ZPAPM70 (top) and Galil ACE. Both are chambered in 7.62x39mm.

A Tale of Two AKs – Classic or Modern?

By Mick Bjelopavlic

The Phoenix, Arizona area is home to multiple shooting ranges and has an exceptionally strong competitive-shooting base. It's possible to shoot a match literally every day of the week! One such range which is no doubt familiar to readers of ***The Blue Press***, is the Rio Salado Sportsman's Club located in Mesa. Rio Salado is home to a couple of long running major matches, the Area 2 Desert Classic and the Superstition Mountain mystery 3 Gun (SMM3G), which just completed its 25th Anniversary match in March.

With the explosive rise in popularity of the pistol caliber carbine (PCC), in 2017 I was among the team that devised the Arizona State PCC Championship (AZ PCC), which will be in its fifth year this coming September and has become regarded as one of the most challenging PCC matches in the country.

With all of these matches, there was still something missing. Pistol competition was covered with all of the USPSA matches, multigun (both 3 gun and 2 gun variants) was covered with SMM3G and PCC had the AZ PCC Championship. When it came to action rifle events, most if not all competitors were using the ubiquitous AR platform and it was not hard to see why. The AR pattern rifle has low recoil, exceptional ergonomics, can be made sub-MOA accurate and has a literal plethora of aftermarket support to enable it to be fully customized to the end user. There is no question that the AR15 is a true classic.

However, what about all of the other classic rifles that people enjoy shooting, such as the AK, FAL, M14/M1A, G3/HK91? With the demise of the old Soldier of Fortune matches of the 1980s and 1990s, these rifles needed a home in which they could compete. From that concept was born the first Red Oktober: Cold War (ROCW) rifle match which was held as a 2-day event in October 2020 with over 120 competitors. Such was the overwhelmingly favorable response to this first match, that for 2021, ROCW has been expanded to a 3-day event with 260 competitors and sold out in one week (Even in the midst of the current ammunition crisis!).

For ROCW 2020, I dragged out a Valmet M-76F chambered in 5.56mm. The only problem was that these rifles are no longer made even in their home country of Finland and have not been imported into the US since the 1989 import ban [*Gee thanks, George H.W. Bush. – Editor*]. Aside from lack of spare parts, magazines for the 5.56 Valmets are fetching upwards of $350 (don't even ask about .308 Valmet mags!), not the kind of thing you'd want to be routinely dropping onto the hard ground in Arizona during a match. So, what to do?

800-223-4570 • dillonprecision.com

I wanted to stay with the AK platform for ROCW. Switching to the 7.62x39 caliber made a lot of sense from the magazine and ammunition perspective, not to mention spare parts. I could search for another Valmet M-76 or older M-62 chambered in 7.62x39 and use common AK mags, but prices on those particular rifles is in the stratosphere ($6-10,000!). Since the Valmet rifles were derived from the classic Soviet AK-47, that lead me to two choices – revert to a classic AK-pattern rifle or go with a current production modernized version similar to the Valmet I was familiar with.

For the classic AK rifle, I chose the Zastava ZPAP M-70. Located in Serbia, Zastava has been making arms since 1853, and in 1959 began working on its first AK-pattern rifle, the M64 with milled receiver, before changing over to the stamped receiver M-70 in 1970. Whereas the typical stamped receiver AK (or more correctly, AKM) is made from 1mm thick steel, the Zastava M-70 uses 1.5mm steel for the receiver along with a reinforced (bulged) front barrel trunnion found on the RPK light machine gun. These changes made the M-70 much more robust than the typical AKM and was due to widespread use of rifle grenades by the then Yugoslav military (Trivia: Yugoslav pattern rifles use the NATO standard 22mm rifle grenade. Yugoslavia was neither part of NATO or the Warsaw Pact.) The M-70 also has a locking mechanism on the back of the receiver to retain the dust cover during grenade launching. Unlike Warsaw Pact AK rifles, the M-70 barrel was not chrome lined.

Above: Galil ACE polymer lower half and factory forend removed. Below: Zastava M70 receiver, left side. Note bulged RPK trunnion at front and dust cover lock at rear of receiver. The side optic rail is not compatible with other ComBloc mounts. The 306M and 307M mounts from RS Regulate will fit and Zastava USA recently began making its own side mount.

Some M-70 rifles were imported by Mitchell Arms prior to the 1989 import ban. In the 2000s, Century Arms began selling M-70 based rifles made from demilled parts kits and US receivers before importing the N-PAP (with 1mm receiver) and O-PAP (with 1.5mm receiver) series (PAP stands for Pola Automatska Puška or semiautomatic rifle).

In 2019, Zastava USA came into being and took control of importing rifles and pistols from the parent company in Serbia. It began with the PAPM70 rifles with 1mm receiver. In 2020, after listening to the many requests from its' US customers, Zastava USA introduced a new ZPAPM70 rifle with 1.5mm receiver, bulged trunnion and chrome-lined barrel with choice of classic walnut or polymer furniture. I ordered the classic walnut rifle from Brownell's and had it shipped to Accuracy Speaks, which is located at Rio Salado.

After receiving a call that my ZPAPM70 had arrived, I went by to pick it up. When I walked through the door, the shipping box was on the front counter when I heard, "Where did you get this AK from?"

Fearing there was an issue, I replied "Brownell's. Is there something wrong with it?" (Brownell's has one of the best warranty policies, like Dillon Precision.)

"No, this is the best built and tightest fitting AK rifle I have ever seen!" came the reply.

From the back, Derrick Martin exclaimed, "That wood is way too nice!"

I spoke with Ranko Ristic, President of Zastava USA (and who also sponsored Red Oktober: Cold War)

WARNING: The products offered for sale in this catalog can expose you to chemicals, including Lead, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to **www.P65Warnings.ca.gov**.

about the walnut furniture and he laughed, saying "We put high-grade hunting rifle furniture on our rifles." There is a tiger-stripe maple furniture option now available (zastavaarmsusa.com).

The ZPAPM70 is an all steel and wood rifle with a traditional deep blued finish. I changed the walnut grip for a polymer M70 military grip for better traction in the Arizona heat. The trigger pull is smooth and in typical AK fashion, has no wall before the hammer drops, measuring a surprising 4 pounds. On the range, the ZPAPM70 showed a distinct preference for Golden Tiger 124-grain FMJ, with groups of 2-3 MOA (best group was 1.8 MOA). Moving to Wolf 124-grain FMJ Military Classic and Wolf 123-grain FMJ Polyformance, group sizes opened up to 4-6 MOA, which is normal for me with iron-sighted AKs. There were no malfunctions of any kind.

As the Finnish Valmet was derived from the AK, the Israeli Galil was derived from the Valmet (legend has it that the first Galils were built on Valmet M62 receivers). Just like the first Zastava rifles, Galils were imported into the US by IMI (Israel Military Industries) in 5.56mm and .308 prior to 1989. After a hiatus of over 20 years, the now Israel Weapon Industries, IWI-US subsidiary began operations in 2013 (iwi.us). By this time, the original Galil had been updated to become the Galil ACE. The updates reflected changes in military operating conditions with the advent of body armor and optics. Updates included: right side folding stock adjustable for length, left side charging handle (similar to the AK "lightning bolt" modification) with reciprocating FNC-style side cover to keep out dirt, picatinny railed gas tube and dust cover for optics mounting, shortened right side safety (gone is the classic AK safety lever), new forend with covered picatinny rails and polymer lower half incorporating pistol grip and magazine well. Available calibers included the previous 5.56mm and .308, but with the polymer lower half allowing use of STANAG pattern M16 and 308 P-Mags, respectively. New calibers included ComBloc 7.62x39 and more recently, 5.45x39.

Galil ACE left side view. Note charging handle, FNC style side dust cover mechanism, original grip and thumb safety. Magazine is an X-Tech.

For ROCW, I chose the 7.62x39 Galil ACE, with the following modifications. The polymer lower precluded the use of mags such as the X-Tech and Bulgarian Circle 10 waffle pattern as well as drums. Removing the pistol grip screw and one just forward of the magwell detached the polymer lower, enabling use of all magazine types. The KNS Precision Plastic Delete Kit adds a trigger guard and uses an AR-pattern grip, but I chose different path since who wants an AR grip on an AK? I sourced an original 1980s Galil pistol grip which fit perfectly re-using the grip screw. All that was left was to add a trigger guard. That's where the crew at Lee Armory (leearmory.com), Title Sponsor for ROCW, came in. Located in Phoenix, Arizona, Lee Armory builds custom AKs and works on ComBloc rifles of all flavors, including exotics such as the Dragunov SVD. The AK maestro known as Mario fitted a virgin AK trigger guard and incorporated the original Galil ACE magazine release to complete the factory look. I elected to keep the adjustable stock – to go further retro, an original Galil skeleton stock will fit with no modifications. However, the length of pull of Israeli stocks will be too short for some (a South African R4 stock has a longer length, if you can find one).

Other changes were an RS Regulate (rsregulate.com) 10 inch M-LOK handguard along with a KNS Precision (knsprecisioninc.com) adjustable gas piston. The RS Regulate rail is much slimmer and longer than the factory handguard, allowing for the support hand to be further out to help drive the muzzle from target to target. Speaking of the muzzle, standard .30 caliber 5/8x24" thread pattern is used, allowing use of a wide range of devices such as the attached SilencerCo ASR brake. In combination with the adjustable gas piston, the over-gassed AK rifle can be tuned to allow use of suppressors.

On the range, the Galil ACE was less picky about which ammunition it liked. The best group was achieved with Wolf 124-grain FMJ Military Classic turning in just under 2.5 MOA with iron sights, while Golden Tiger 124-grain FMJ and Wolf 123-grain FMJ Polyformance turned in 3 MOA and 3.5 MOA groups, respectively. This performance was helped by the aperture style rear sight and the two-stage trigger, with a 4-pound first stage which hit a solid wall, after which the hammer was released with a clean break when applying an extra 2 pounds of pressure. Reliability was 100 percent.

The final dilemma is which rifle to use for ROCW 2021? The classic Zastava ZPAPM70 or the modern classic IWI Galil ACE? Ask me on Oktober 1.

Real Avid Level-Right™ PRO

A level reticle is critical to long-range accuracy. For longer shots a canted reticle will pull or push a bullet's trajectory off of vertical center. It gets worse the more the distance increases. A level scope means that the reticle will be perfectly aligned with the rifle bore. Balancing small levels on a scope turret and gun receivers has been a commonly accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right PRO simplifies scope alignment in four easy steps. Accurate and intuitive, this instrument quickly aligns the actual scope reticle to the horizontal gun plane, which is key to the long-range accuracy of your rifle. Level-Right PRO helps you quickly and confidently mount a scope for maximum accuracy.

Apex Tactical Specialties

Action Enhancement Trigger for Springfield Armory Hellcat

The Action Enhancement Trigger for the Hellcat pistols is the easiest, quickest upgrade you can do to the trigger system that significantly improves the feel of the trigger pull, without reducing factory safety values. When properly installed, this drop-in trigger will:

- Reduce trigger pull weight to 5.0 to 5.5 lbs after break-in
- Smooth uptake and reset
- Reduce trigger overall travel and reset distance
- Deliver a crisp trigger break
- Directly replaces factory components without additional fitting
- Maintains factory safety values

TUFF Products

3 Gun Ammo Bags

TUFF Products 3 Gun Ammo Bags (Set of 3) are made of 1000 Denier Cordura® and equipped with dual 550 cord cinch strings for secure closure. The Red/Blue bags hold up to 200 loose pistol/rifle rounds and Black bag holds up to 200 loose shotgun rounds.

15773 **$19.99**

Taylor Freelance Magazine Extensions

AR-15/Tavor 9mm SMG +10 (*Pictured*) **12377** **$39.99**
This extension adds a full 10 rounds to your 32-round Colt SMG-type magazine. Works with many "stock" mag springs. *NOTE: Colt SMG mags come from many different manufacturers. Colt offered at least two major types – one where the floorplate slides on from the front, and the other which slides on from the rear. TF extensions are built to work with BOTH the front-mount and rear-mount styles.*

CZ Skorpion +10 **12378** **$49.99**
- Extra length/strength spring included
- Thumbscrew-and-gasket retention system allows for quick, easy disassembly.

SIG MPX +10 **12376** **$29.99**
- Works with stock mag spring.
- Angled floor stands the magazine straight up on a table for easier loading.

High Speed Gear®

Polymer TACO® Mag Pouches

The bodies and brackets of High Speed Gear® Polymer TACO® magazine pouches are made with HSG's durable and flexible proprietary polymer and are laced together with bungee cord for the same versatility customers have come to expect from the TACO® brand. The rifle pouches grip and retain a wide variety of magazine styles and calibers. The pistol pouches also grip and retain a wide variety of pistol magazine styles and calibers, as well as small tools like pocket knives, multitools and small flashlights.

Polymer Double Decker TACO	**44058**	**$46.99**
Polymer Rifle TACO	**44056**	**32.99**
Polymer Pistol TACO	**44057**	**25.99**

Tuff Products Mag Pouches

Tuff Products Magazine Pouches are the most versatile we've ever seen. They can be worn on a belt or attached to anything that has a MOLLE fastener system. Available in black or coyote brown.

Real Avid Gun Tools & Cleaning Gear

Smart Mats™ are cleaning mats on steroids. The no-slip backed padded mat features an oil-resistant surface. It allows you to properly clean your gun without ruining the kitchen table and is large enough to handle field-stripped guns. The ingenious magnetic parts tray ensures your pins, screws and springs are never lost again. This is real world gun cleaning taken to the next level.

AR-15 Smart Mat	**29041**	**$24.99**
1911 Smart Mat	**29040**	**19.99**
Handgun Smart Mat	**29042**	**19.99**

The Master Bench Block™ is the most comprehensive AR15 bench block ever! It allows you to tap 13 critical pins from 5 different components. The block is wrapped in an over-molding that grips to your bench to prevent slippage.

29033 **$34.99**

This advanced kit includes every standard and roll pin punch needed to build or work on an AR15.

29032 **$39.99**

The Chamber Boss –AR15™ All-In-One AR15 Chamber Cleaning Kit. Every tool you need to easily eliminate baked-on carbon from the AR15 chamber.

21778 **$29.99**

Installing a pivot pin is a small step that can quickly become a giant pain in the neck. Meet the AR15 Pivot Pin Tool – the one tool guaranteed to take the nail biting, pin-launching task of installing a pivot pin and turn it into something you might actually look forward to. Align the guide, insert the spring and detent pin, slide the pivot pin into place. Click. Snap. Done.

29034 **$9.99**

Carbon Boss™ – AR15. This is the most comprehensive carbon removal multi-tool ever built. Extremely versatile, it has 12 precision surfaces to clean the most critical parts of your bolt, bolt carrier, cam pin, and firing pin. It's the enemy of your AR15's worst enemy.

29039 **$29.99**

The unique Accu-Grip™ Picks and Brushes get the job done, feel good in your hand, and won't scratch your firearm.

Eight profiles dig gunk out of the places that even the sun don't shine. They're tough on the crud but tender on the metal. A better designed, better built detailing kit that just might make your dentist jealous.

29036 **$9.99**

The AR15 Brush Combo™ contains the critical components you need to keep your AR15 chamber and bore carbon free. It contains a star chamber brush and star chamber mop for cleaning inside the hard to reach star chamber. Star chamber pads help collect left-over carbon while applying the perfect amount of oil or solvent. The .223/5.56mm bore brush scrubs baked on carbon from lands and grooves.

29037 **$9.99**

There's no easy way to scrape carbon out of the star chamber of an AR15 unless you're a surgeon. That's why you use a star chamber brush to loosen the carbon then remove it with these star chamber cleaning pads. Done deal. Now get back to shooting. 20 wool chamber pads per package.

29038 **$12.99**

Real Avid Smart TORQ™

The most precise and technically advanced torque driver for guns. Specifically developed for optics mounting and gun builds. Discrete inch-pound-increment settings provide spot-on torque adjustments. Comfortable ergonomic grip with Force Assist makes tool manipulation a breeze. The functionally intuitive torque setting with visual, tactile and audible feedback provides confident assurance. To get you started, Smart Torq comes with 12 of the most commonly used gun bits. Never over-torque a scope ring again!

21776 $79.99

For more than 100 years, consumers have trusted Ballistol to lubricate, penetrate, clean, protect, and preserve their firearms, leather gear, wood, metal surfaces, and more. With an astonishingly wide range of applications, this environmentally friendly multi-purpose oil has become an essential tool for shooters, hunters, fishermen, and handymen all over the world.

1.5 oz. Aerosol Can	**30147**	**$4.99**
6 oz. Aerosol Can (pictured)	**30145**	**9.99**

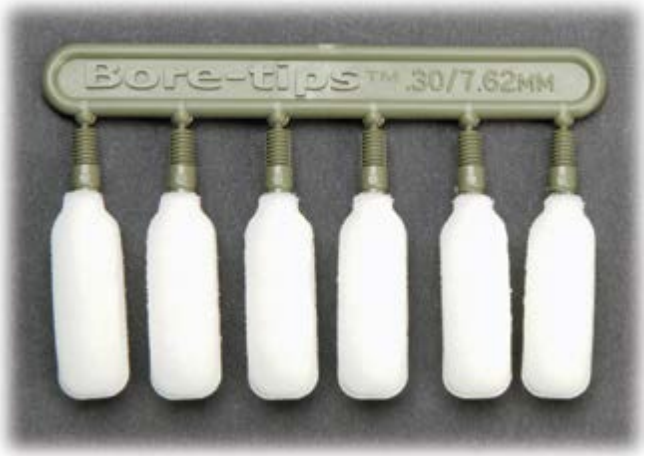
Swab-its



No s#!+, there I was…in my office, cleaning my revolver when the boss walks in with that "whiskey-tango-foxtrot" look on his face. "Hi," I said (*thinking fast*), "I'm trying out these Bore-tips before I write the ***Blue Press*** copy for them. They work GREAT!" The **Bore-tips Swabs** REALLY DO work. What you can't see under the foam is a plastic jag sized for a tight bore fit which provides for the uniform application of solvents and oils. They work with all standard 8-32 thread cleaning rods, and are tough and reuseable.

.22/5.56mm (6 ea.)	**15310**	**$4.98**
.243/6mm (6 ea.)	**15311**	**4.98**
.30/7.62mm (6 ea.)	**15312**	**4.98**
.357/9mm (6 ea.)	**15313**	**4.98**
.40/10mm (5 ea.)	**15314**	**4.98**
.45 Caliber (5 ea.)	**15315**	**4.98**

Gun-tips® Extended Reach Firearm Cleaning Swabs by Swab-its® revolutionize the way you clean your gun. The foam tips are lint free, reusable and ideal for cleaning trigger assemblies, slide rails, springs, extractors and anywhere else space is tight. 24 per package.

12583 $9.99

HYSCORE Degreezer

The **HYSKORE Degreezer** consists of a 12″ x 6″ x 4-1/2″ polypropylene tray with an angled drainage surface and a well with a perforated basket for holding and draining small parts. The set also includes a standard double-end nylon gun-cleaning brush. The set includes a cover with an integral holder for the brush. The tray, cover, and basket are made from polypropylene plastic. This has been proven to be impervious to all popular commercial cleaning solutions. It will also resist kerosene, acetone, and gasoline.

Slip 2000 Products

725 Gun Cleaner Degreaser should truly be called Super Degreaser. This water-based cleaner will cut through the toughest cosmoline, carbon, grease and grime! Its super strength allows it to degum and degunk the dirtiest of gun parts when sprayed on or used in parts washers or solvent tanks! ***NOTE:*** *To help prevent rusting, users must apply a gun lubricant immediately after cleaning to disperse any moisture in parts.*

16 Oz. 19237 $21.99

Slip 2000 **Carbon Killer** provides you with a safe, effective way to clean carbon, lead and plastic wad fouling. Unlike other gun cleaners, this product is non-flammable, non-hazardous and biodegradable. Designed for soaking metal parts with baked on carbon, Carbon Killer dissolves carbon and lead on contact. ***NOTE:*** *Carbon Killer is for cleaning internal metal gun parts with baked on carbon by soaking them. It is an aggressive cleaner and should not be used to clean the outside of your gun. It can damage and even remove some finishes.*

16 Oz. 19234 $21.99

Slip 2000's **Extreme Cleaning System** contains 2 Oz. bottles of: Carbon Killer Bore Cleaner, 725 Gun Cleaner Degreaser, and EWL Extreme Weapons Lubricant.

11652 $25.99

Slip 2000's **AR Cleaning System** contains a 7 Oz. bottle of Carbon Killer Bore Cleaner, a 15cc syringe of Extreme Weapons Grease, and a 1 Oz. bottle of EWL Extreme Weapons Lubricant.

11676 $19.99

Slip 2000 **Extreme Weapons Lubricant** (EWL) was designed for use on chain guns and machine guns like the MP5 and the 249SAW. It contains a proprietary Anti-wear agent that reduces friction and wear by 90-95 percent. It is an excellent CLP and is able to clean, lubricate and protect.

4 Oz. 11644 $18.99

Slip 2000 **EWL30** has the same properties as EWL, except it is a lot thicker. It contains a proprietary thickening agent that makes this lubricant consistency like a 30-weight motor oil. It was designed for those who want or need a lubricant that will not migrate at all and don't want to use a thick grease.

4 Oz. 11645 $18.99

Slip 2000 **Copper Cutter** is specially formulated to remove copper, lead, powder residue and plastic wad fouling from bore surfaces with little scrubbing! ***NOTE:*** *It is a water based, ammonia enhanced product and will remove all lubrication or oil protection, so always re-lube all parts cleaned.*

4 Oz. 11646 $11.99

Each Slip 2000 **Gun Wipe** packet contains one 5″ x 8″ wipe treated with Slip 2000 Synthetic Gun Lube. Perfect for wiping your guns down after a day on the range or while out on a hunt. Apply to all metal surfaces. Great for light carbon cleaning. Safe for all firearm stocks and grips.

20 Pack 11674 $14.99

TW25B is the choice of leading firearms manufacturers, armorers, pro shooters and gun enthusiasts, and is recognized as the world's best all-purpose weapons lubricant/protectant. It is now widely specified by the U.S. military for their most critical performance weapons systems. Environmentally safe, non-carcinogenic, non-ozone-depleting.

0.5 Oz. Syringe	**15732**	**$14.99**
1.5 Ounces	**15731**	**18.99**

Brian Enos' Far Superior Slide-Glide is a dual grease blend, with proprietary extreme pressure compounds, which boost the ability of the oils in the grease to withstand extreme pressures. It gives the grease a very stringy, tenacious character that makes it stay where you put it. Slide-Glide Standard is for use in warm weather (F60°+), Lite is a thinner viscosity for lower temperatures (F30°+).

Slide-Glide Standard	**15571**	**$7.99**
Slide-Glide Lite	**15572**	**7.99**

Sweet's 7.62

Sweet's Australian 7.62 Solvent easily removes powder residue and stubborn copper fouling. It's harmless to steel, a non-acid formula with five percent ammonia. If you shoot a rifle, you ought to try cleaning it with Sweet's. **13128 $12.99**

Now Available!

.408 CheyTac Conversion 50204 $210.00
(Dies NOT Included)

Total price as pictured here with optional accessories: **$3565.96**

.50 BMG Carbide Size Die	*50075*	*$1150.00*
.50 BMG Case Trimmer	*50050*	*$550.00*
BFR Mounting Hardware Kit	*50140*	*$15.00*

50 BMG CASE TRIMMER ASSEMBLY^
Features an industry standard 1-1/2"-12 UNF threaded body, a 1/4 HP motor, replaceable carbide cutter, quick-disconnect cord and includes the .50 BMG trim die. **50050** **$550.00**

50 BMG CARBIDE SIZE DIE^
The only .50 BMG size die in the industry that's a full-length solid carbide size die, for increased die life and scratch resistance. It also has a solid carbide expander ball, placed in the middle of the power stroke for easier operation. The die body is standard 1-1/2"-12 UNF thread, and is manufactured to low chamber tolerance specifications. **50075** **$1150.00**

50 BMG POWDER MEASURE ADAPTER^
For use with the RCBS .50 BMG powder measure. **50125** **$125.00**

50 BMG PRIMER SEATING DIE^
One of these is included with Dillon's Big Fifty Reloader, but may be used as an accessory on a separate toolhead. The primer seating die is adjustable for enhanced control of primer seating. Includes two primer punches: one flat, match-style primer punch and one cupped, MIL-SPEC primer punch. **50200** **$230.00**

50 BMG PRIMER POCKET SWAGER^
Makes it easy to remove the military crimp. **50001** **$450.00**

PRIMING CONVERSION^
Converts Swager to Priming System. **50003** **$115.00**

50 BMG PRIMING SYSTEM^
Allows off-the-machine primer seating. **50002** **$450.00**

(1) SWAGER CONVERSION^
Converts Priming System to Swager. **50004** **$125.00**

RCBS .50 BMG LOADING ACCESSORIES^
.50 BMG Powder Measure **21896** **$129.99**

SL 900^

STANDARD FEATURES:

- Made in the USA
- Automatic Indexing
- Auto Powder/Priming Systems
- Adjustable Case-Activated Shot System
- Factory Adjusted to Load AA Hulls
- Factory Adjusted Loading Dies
- The Original Tilt-Out Wad Guide
- Lifetime "No-B.S." Warranty
- RISK FREE 30-Day Trial Period!

Hartman Manufacturing's Target Stand Adapters make it easy to use scrap 2″x4″ lumber as long-range target stands. Simply attach the adapters to form two bases as shown, then clamp to uprights and a crosspiece to form a stable target stand.

33366 $64.99

Justified Defensive Concepts, LLC Multi-Use Training Target

Shooters who compete in several disciplines can now use one target to practice USPSA, IDPA and ICORE or train with various dot-torture and bullseye arrays. The National Target Company, Inc. is offering the Justified Defensive Concepts, LLC Multi-Use Training Target. Sized 22.5″ x 35″ on lightweight paper, this target's versatility is almost unparalleled for handgun, pistol-caliber carbine and rifle training or practice. It comes in a package of 50 targets and just might be the ONLY target you'll need for your shooting session.

11713 $19.99

Shoot Out Targets

The **Alpha Target** is **Shoot Out Targets'** Patent Pending instant-reaction target system that can be reused again and again to improve your marksmanship. All Shoot Out Targets are made of durable cardboard that has been tested to withstand 1000-plus shots. Unlike clay pigeons that can only be used once, the **Foam Medallions** are durable and able to self heal for longer-lasting use, allowing for up to 40-plus shots per medallion. Each foam medallion is 3″ in diameter and 1/2″ thick. With the easy-to-see foam medallions you will get an instant kinetic reaction with every hit. Shoot Out Targets are proudly made in the USA, reusable for hours of fun and can be used with all-caliber firearms and airguns. The target stands 43″ tall and 22″ wide when assembled.

This Ernest Landgon-customized Beretta 92FS previously belonged to famous firearms instructor Ken Hackathorn. Though its overall lines were changed a bit to make it look more like a generic "gun" instead of recognizably a Beretta 92, the gun on the original IDPA logo (opposite page) was based on Ken's custom Beretta 92FS.

THE IDPA BERETTA 92

By Duane Thomas

A question among IDPA shooters over the decades has been, "What is the gun on the original IDPA logo?" Recently I discovered the definitive answer: it's a Beretta 92. More specifically, it's Ken Hackathorn's Ernest Langdon-customized Beretta Model 92FS.

According to Ken, "One day the IDPA founders were sitting around, trying to figure out what should be the gun on the IDPA logo. The original thought was that it should be a 1911, since that really is the gun the entire sport of combat pistol match shooting was built on. I said to Bill Wilson, 'If you put a 1911 on the IDPA logo, people are going to say that IDPA is just a way to sell more of your custom 1911s.' Bill said, "Well, what do you think it should be?' I said, 'I think it should be a Beretta 92.'"

"At the time, that was the military service pistol. And it was a gun all the IDPA founders liked; we all had a high regard for the Beretta 92; we all owned them; we could all shoot the Beretta 92 really well. So that's the gun the IDPA founders all shot, when the sport was just starting out, because we wanted to make the point, you don't need a multi-thousand dollar, custom 1911 to shoot IDPA. I happened to have my Ernest Langdon custom Beretta 92FS with me, so I went over to my shooting bag, whipped it out, we took a photo of it, and that became the basis for the gun on the IDPA logo. Now, they did change the shape of the gun a bit, to make it more a generic 'gun' instead of identifiably a Beretta 92."

By serial number, this gun was built in 1994, Ken bought it in early 1995, and it was customized by Ernest Langdon shortly thereafter. At the time, Ernest was still working for Beretta. I talked to Ernest, he actually remembers this gun. He said, "This was a VERY early custom gun of mine. I didn't do that many guns back then." Ken said, "Ernest used to just sit there for hours, with stones and files and Dremel tools, and work over every part until it was absolutely perfect. He wasn't doing this as a job back then; it was a labor of love." If this is not the first custom Beretta 92 Ernest Langdon ever turned out, it's certainly close to the first.

Let's take a look at **THE** IDPA Beretta 92 and its features.

SIGHTS

Ken said, "I was out with Wayne Novak one day, he said, 'You should come with me back to my shop, I've got something to show you, it's really cool.' I said, 'Okay.' We went to his shop, he showed me this replacement rear sight he'd just developed for the Beretta

800-223-4570 • dillonprecision.com

92. This might have been a prototype, it was so new. I said, 'Wow, that really is cool.' So he put one on my gun. Remember, Beretta 92 rear sights at the time had a really shallow notch, about half what it is today. There was a time the Novak rear sight, with a notch about twice as deep, was a huge product improvement."

HAMMER

Ernest fitted Ken's gun with the spurless hammer off a Beretta 92D, Beretta's double-action-only Beretta 92. A lot of people seem to think Beretta DAOs are DAO because the D-hammer lacks a single action notch. Untrue. The D-hammer does have a single action notch; the D-models just leave out the internal sear and spring that, in DA/SA Beretta 92s, cause the hammer to stay to the rear after the gun is fired. Fit a D-hammer to a gun that has the normal parts, you wind up with a spurless hammer that stays to the rear for single action shooting after the first shot.

SAFETY SYSTEM

THE IDPA Beretta 92 retains the stock safety system, where pushing the lever down simultaneously decocks the gun and disconnects the trigger. In 1995 the G-lever that springloads the safety lever, turning it into a simple decocker, did not exist. Ken makes no bones about the fact that, had it existed, he would have had one pistolsmithed into the gun.

TRIGGER ACTION

In 1995, Ernest Langdon didn't have the array of aftermarket Beretta 92 parts we now enjoy. Because he's designed many if not most of them in the interim. Back then, he had to customize factory parts. In order to get rid of overtravel in the Beretta 92 trigger action, and also shorten reset distance, the rear of the trigger was welded-up and reshaped to create what Ernest called the Speed Bump Trigger. Trigger pulls in both double and single action are notably smooth; the tendency of the stock Beretta 92 DA trigger to stack, i.e. get heavier toward the end of its stroke, has been totally erased. Overtravel is almost nonexistent. The distance the trigger must return forward before it resets, and reuptake travel before we hit "the wall" are both there, but much less than on a stock gun. According to my NRA weight set, trigger pulls go 9-1/2 pounds DA, five pounds SA. Both DA and SA are so smooth they feel lighter than their actual poundage.

GRIPS

The grips on the gun came from former Green Beret, Super Dave Harrington. Ken said, "I saw a set of those grips on one of Super Dave's Berettas, I said, 'Wow, those are really cool.' So he gave me a pair."

Dave is one of my Facebook Friends, I asked him, "Did you do those grips yourself, or did you have someone do them for you?" He replied that a friend of his was doing these grips, Dave saw them and really liked them, so he commissioned the guy to make some for him, too.

I have no idea who this person was, but he did a great job on these grips. They're heavily stippled, but the stippling has been nicely sanded-down. Grippability is greatly enhanced, but the texture is not hard on the shooter's hands at all. You could put a thousand rounds a day through this gun at a training class without a single problem.

MAG WELL

The Beretta 92FS has a really squared-off mag well. Ernest Langdon went in and opened up the mag well to ease insertion of a fresh magazine during a speedload.

TIER ONE TRAINING

This is the gun that Ken carried and used during, as he puts it, "the NDA years" when he was training "government employees." Translation: He was training Tier One units.

SUMMARY

Ken said to me, "Lately I've been getting phone calls from people saying, 'Ken, I hear you're selling a lot of guns. Are you ill? Are you dying?' Because that's the only reason they can think of that I'd be selling a lot of my guns. I've responded, 'No, I'm not dying. It's just that I'm getting to a certain age; my wife is not into guns; I don't want her to have to deal with all this once I'm gone. Also, this allows me to be selective about who the guns are sold to. I can make sure they go to good homes, to people who can really appreciate them. I'm getting a lot of calls from people saying, 'You know, Ken, I'd really like to have a gun that belonged to you!'"

Our conversation continued on, eventually we started discussing the question, "What was the gun on the original IDPA logo?" and Ken told me the story I recounted earlier in this article. I asked Ken, "Do you still have that gun?" He said, "Yes, I do." At which point I said, "You know, Ken, I'd really like to have a gun that belonged to you!" Ken laughed and said, "Well, I think we can make that happen."

For a certain sort of person – like, for instance, me – this gun is an important historical artifact. It served as the basis for the gun on the original IDPA logo. It is linked to men like Ken Hackathorn, Ernest Langdon, Wayne Novak, and Super Dave Harrington. And now what I call **THE** IDPA Beretta 92 belongs to me. I'm very happy about that.

If you would like to watch an in-depth video review of this gun, go into YouTube and type "THE IDPA Beretta 92 Duane Thomas" into the Search box.

Lyman Mechanical Trigger Pull Gauge

Lyman's mechanical trigger pull gauge is a simple, accurate and cost-effective way to measure the weight of your firearm's trigger pull. Made of tough machined aluminum and steel components, the gauge will stand up to years of use. The gauge features a rolling trigger shoe, "T" handle, a sliding indicator that holds your highest weight and a zero-adjustment wheel.

- Reads from 0 to 12 pounds
- 2-ounce increments
- Highest weight indicator
- Aluminum and steel construction
- "T" handle and hanging loop for storage

27111 $22.99

MagPul AK MagLink

The AK MagLink is a coupler for PMAG AK magazines designed for Kalashnikov pattern rifles in 7.62x39mm. It allows the user to attach two magazines together for more efficient speed reloads and to keep additional ammunition accessible on the weapon at all times.

The AK MagLink features a two-piece bolt-on design and durable, lightweight reinforced polymer construction, which resists operational abuse. Wide-set design resists flexing and integral grooves interface with PMAG ribbing to eliminate slippage during transport or use. The MagLink fits 7.62x39 PMAG 30-round AK/AKM MOE® and GEN M3™ magazines. *Made in the USA.*

00008 $17.95

UpLULA

Universal Pistol Mag Loader

The UpLULA® loader is a military-grade, pocket-size, universal pistol magazine loader and unloader designed to load and unload virtually all* 9mm Luger up to .45 ACP single and double stack magazines of all manufacturers. It also loads most .380 ACP single and double-stack mags, and 1911 mags. The UpLULA® loader self-adjusts to the magazine and loads it easily, painlessly, and reliably!

Loads the following mags: Astra, Auto Ordnance, Barak, Beretta, Browning, Bul, Colt, CZ, EAA, FN, Glock, HK, Hi-Point, High Standard, Jericho, Kahr, Kel-Tec, Kimber, Les Baer, Llama, Luger, Magnum Research, Para Ordnance, Phoenix Arms, Ruger, Sigma, Sig/Sauer, S&W, Springfield Armory, Star, Steyr, Taurus, Vector, Walther, and more.

19239 $34.99

Real Avid AR15 Bolt Catch Pin Starter & Pin Punch Set

Two punches, one simple solution to the difficult-to-access bolt catch retaining pin. The orientation of the pin, close proximity to the lower receiver, distance required to safely punch a pin, and the difficulty in getting the pin started makes it a real pain with standard punches. Our simple solution is specially designed to fit flush against the receiver without damaging it, and is long enough to reach the pin. It features a roll pin punch for removing pins and a magnetized roll pin starter punch that eliminates the need for a third hand. Smart, simple, frustration free.

66053 $14.99

C-More Systems

RTS2R

Railway

Built for speed, these High Performance red dot sights will take your shooting ability to the next level. By using a single red dot as an aiming point, target acquisition is as simple as point and shoot. The unique Heads-Up-Display (HUD) design provides an unlimited field of view, while eliminating obstruction and tunnel vision common to tube-style scopes.

Scout Scope Mounts

Sorry, the optic pictured here is NOT included with the Scout Scope Mount.

Scout Scope Mounts provide an extremely stable optics base for your AK, Saiga or SKS rifle and will not shift, vibrate loose or change point of impact as the rifle heats up. Rock solid and easy to install, the two-piece design enables the removal and replacement of your optics without losing zero.

Scout Scope Mounts easily allow for complete DISASSEMBLY of your rifle for cleaning and maintenance while retaining zero. These rifles are designed so that carbon build-up can easily be cleaned from the gas tube and piston. This is routine maintenance, necessary in order to maintain a properly functioning rifle. Other mounts for AK-and SKS-style rifles make this difficult, time consuming and then require that optics be re-zeroed.

Scout Scope Mount for AK Rifle	**25374**	**$79.99**
Scout Scope Mount for SKS Rifle	**25373**	**78.99**

ERGO Grip

The ERGO Grip Delta Grip™ is the first truly ergonomic grip for J Frame revolvers. Designed for the most important part of the gun, the shooter, the Delta Grip was engineered to fit the natural point of aim and mechanics of the human hand, wrist and arm. Fits round butt J-Frames. Will not fit on Smith and Wesson Bodyguard 38 Model.

19684 $25.99

BERRY'S

Like pretty much everything from Berry's Manufacturing, this 9" x 12" x 10" deep stackable utility box is made in America and covered by a lifetime warranty. The box is designed to stack and is great for storing bulky items. If your gun room/garage looks anything like ours, these will help you get organized. So, whether you're looking to store shooting accessories, ammo components, or car parts (we have more than our share of all of the above) these boxes are ideal. The best part is that they're transparent, so when you fill them, you don't have to open the WHOLE stack to find what you're looking for.

Stackable Utility Box 40194 $20.99

Berry's Pistol Cases are as tough as they look. Available in a desert tan color, they're injection molded out of high-impact polypropylene and contain high-density crate foam to provide a soft, protected bed for your firearm investment. They're TSA approved when appropriate locks are added. Available as a single-pistol or double-pistol case, they carry a lifetime warranty and are made in the USA.

Single-Pistol Case	**40192**	**$12.99**
Double-Pistol Case	**40193**	**19.99**

SAFARILAND®

ENHANCED LIBERATOR HP 2.0

Next Generation Multi-Mode Hearing Protection!
The Liberator® HP headset is the next generation in electronic hearing protection, offering crisp, clear audio in a durable, scratch-resistant, slim earcup.

Individual First Aid Kits From The Tactical Medic

Nobody likes to think about it, but should a serious hunting/shooting accident occur, chances are the drugstore "first aid kit" you have stashed under the seat of your truck won't do much good. That's why we're offering individual first aid kits from The Tactical Medic. The Econo-IFAK contains a 4" Emergency Bandage, a TK-4 Combat Tourniquet, 1 Package of Rolled Gauze, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves. The Micro Kit #2 contains a 4" Pressure Bandage, 1 Package of Quick Clot Gauze, a TK-4 Combat Tourniquet, 1 Roll of Medic's Tape and 1 Pair of Nitrile Gloves.

Econo-IFAK (at right in photo)	**43379**	**$19.99**
Micro Kit #2 (at left in photo)	**43378**	**39.99**

D•WIPE Towels were specially designed for immediate clean up of most contaminants without water. The soft 5.5"x 8" towels are saturated with a unique cleansing formula and aloe vera, and will remove heavy metals from skin and other surfaces.

40 Soft Towels **19916** **$5.99**

Original **D•LEAD Hand Soap** quickly cleans heavy metals as well as paint dust and firing range residue from the skin and fingernails. Removes lead, nickel, cadmium, arsenic, mercury, silver, zinc and most other heavy metals.
